### CONTAMINATED LAND MANAGEMENT ACT 1997

Environment Protection Authority

Declaration of Remediation Site

Section 21 of the Contaminated Land Management Act  
1997

Declaration Number 21076, Area No. 3208

THE Environment Protection Authority (“the EPA”) declares the following land to be a remediation site under the Contaminated Land Management Act 1997 (“the Act”):

#### 1. Land to which this declaration applies (“the site”)

The premises that are located at 34 Brougham Street, Cowra NSW, comprising part Lot 3 and Lot 5, section 5 within DP 758300. The site is currently used as a fuel depot.

#### 2. Nature of the substances causing the contamination

Contaminants in groundwater at the site and contaminants which have moved from the site include phase separated fuel product. The chemical components of the fuel product include benzene, toluene, ethylbenzene and xylenes (“BTEX”) and total petroleum hydrocarbons (“TPHs”).

#### 3. Nature of harm that the substance may cause:

The EPA has considered the matters in s.9 of the Act and found that:

- Groundwater monitoring results strongly indicate that separated phase fuel product is moving off-site via groundwater flow.
- The groundwater contamination contains high levels of benzene, toluene, ethylbenzene, xylene (BTEX) and total petroleum hydrocarbons (TPHs). The International Agency for Research on Cancer (IARC) classifies benzene as a known human carcinogen.
- The BTEX and TPHs contamination has the potential to severely degrade the quality of the groundwater down-gradient to the site. The groundwater in the region is currently used for stock, domestic, irrigation, municipal and recreation purposes.
- The contaminated groundwater has the potential to impact on Waugoola Creek.

#### 4. Further action under the Act

The making of this declaration does not prevent the carrying out of a voluntary remediation of the site and any person may submit a voluntary remediation proposal for the site to the EPA. If the proposal satisfies the requirements of s.26 of the Act, the EPA may agree not to issue a remediation order to the person or persons bringing the proposal.

#### 5. Submissions invited

The EPA advises that the public may make written submissions to the EPA on:

- Whether the EPA should issue a remediation order in relation to the site; or
- Any other matter concerning the site.

Submissions should be made in writing to:

Director Contaminated Sites,  
Department of Environment and Conservation,  
PO Box A290,  
Sydney South NSW 1232,

or faxed to: (02) 9995 5930,  
by not later than 10 June 2005.

CAROLYN STRANGE,  
Director,  
Contaminated Sites,  
Department of Environment and Conservation  
(by delegation)

Dated: 16 May 2005.

#### NOTE:

#### Remediation order may follow

If remediation of the site or part of the site is required, the EPA may issue a remediation order under s.23 of the Act.

#### Variation/Revocation

This declaration may be varied by a subsequent declaration. It remains in force until it is otherwise varied or revoked. A declaration may only be revoked when the EPA does not have reasonable grounds to believe that land is contaminated in such a way as to present a significant risk of harm (s.44 of the Act).

#### Information recorded by the EPA

Section 58 of the Contaminated Land Management Act 1997 requires the EPA to maintain a public record. A copy of this remediation declaration will be included in the public record.

#### Information recorded by councils

Section 59 of the Act requires the EPA to inform the relevant local council that this declaration has been made, as soon as practicable. The council is then required to note on its planning certificate issued pursuant to s.149 (2) of the Environmental Planning and Assessment Act that the land is currently within a remediation area. The EPA is required to notify council as soon as practicable when the declaration is no longer in force and the notation on the s.149 (2) certificate can be removed.
