- 
- (d) new streets must be constructed in the general location as shown in the Adopted Master Plan and must meet the objectives, general specifications, controls and public domain strategy as indicated in Part 5 (Public domain) of the Adopted Master Plan,
  - (e) buildings must be constructed in the general locations as shown in the Adopted Master Plan and must, to the satisfaction of the Council, meet the objectives, general specifications, controls and private domain strategy as indicated in Part 6 (Private domain) of the Adopted Master Plan,
  - (f) the design of buildings, including their vehicular access, must have regard to, and generally conform to, the design principles indicated in Part 7 (Illustrative housing types) of the Adopted Master Plan,
  - (g) development for the purpose of co-ordinated housing may be carried out on the site instead of development in stages involving a subdivision creating separate lots and the subsequent erection of a dwelling on each of those lots, but only if the co-ordinated housing is consistent with the urban design principles contained in the Adopted Master Plan and, in particular, with the objectives and controls specified in Part 6 (Private domain) and Part 7 (Illustrative housing types) of the Adopted Master Plan, including the subdivision plan indicated in figure 6.2 (i).

In carrying out co-ordinated housing instead of such development in stages, there must be variation in the design of dwellings on each lot to prevent an homogenous style of housing and to provide (to the satisfaction of the Council) architectural interest, variety and an individuality in housing design and appearance as viewed from the public domain.

Co-ordinated housing in accordance with the requirements in this paragraph may be implemented over the whole or part of the site.

For the purposes of this paragraph, *co-ordinated housing* means development carried out as a combined subdivision and housing package,
