CONTAMINATED LAND MANAGEMENT ACT 1997

Environment Protection Authority

Declaration of remediation site

(Section 21 of the Contaminated Land Management Act 1997)

Declaration Number 21095; Area Number 3224

THE Environment Protection Authority (EPA) declares the following land to be a remediation site under the Contaminated Land Management Act 1997 ("the Act"):

1. Land to which this declaration applies ("the site")

The site comprises 117-153 Rookwood Road, Yagoona NSW 2199 (Lot 100 DP878185 and Lot 401 DP752036) in the local government area of Bankstown City Council.

2. Nature of contamination affecting the site:

The EPA has found that the:

- groundwater beneath the site is contaminated with high concentrations of metals (including zinc, lead, cadmium, copper, nickel and arsenic) and ammonia and is acidic; and
- some areas of soil on the site are contaminated by petroleum hydrocarbons and asbestos.

3. Nature of harm that the contaminants have caused:

The EPA has considered the matters in s.9 of the Act and for the following reasons has determined that the site is contaminated in such a way as to present a significant risk of harm to human health and the environment:

- Groundwater in the eastern part of the site is contaminated with high concentrations of metals (including zinc, lead, cadmium, copper, nickel and arsenic) and ammonia. In addition, the low pH of the groundwater is likely to further mobilise some metal contaminants and may influence the toxicity of ammonia.
- There is a risk that contaminated groundwater has migrated offsite and reached a tributary of the Cooks River.
- Some of the contaminants found in high concentrations in groundwater, such as zinc and lead, are bioaccumulative, persistent and can be toxic in the environment.
- Asbestos, a human carcinogen, has been found in the unsealed area at the south of the site.

4. Further action under the Act

The making of this declaration does not prevent the carrying out of a voluntary remediation of the site and any person may submit a voluntary remediation proposal for the site to the EPA. If the proposal satisfies the requirements of s.26 of the Act, the EPA may agree not to issue a remediation order to the person or persons bringing the proposal.

5. Submissions invited

The public may make written submissions to the EPA on:

- Whether the EPA should issue a remediation order in relation to the site; or
- Any other matter concerning the site.

Submissions should be made in writing to:

Director Contaminated Sites
Department of Environment and Conservation
PO Box A290
Sydney South NSW 1232

or faxed to (02) 9995 5930

by not later than Friday 24 March 2006.

NIALL JONHSTON,

A/Director Contaminated Sites

Department of Environment and Conservation

Date: 20 February 2006.

NOTE:**Remediation order may follow**

If remediation of the site or part of the site is required, the EPA may issue a remediation order under s.23 of the Act.

Variation/Revocation

This declaration may be varied by subsequent declarations. It remains in force until it is otherwise revoked. A declaration may only be revoked when the EPA does not have reasonable grounds to believe that land is contaminated in such a way as to present a significant risk of harm (s.44 of the Act).

Information recorded by the EPA

Section 58 of the Contaminated Land Management Act 1997 requires the EPA to maintain a public record. A copy of this remediation declaration will be included in the public record.

Information recorded by councils

Section 59 of the Act requires the EPA to give a copy of this declaration to the relevant local council. The council is then required to note on its planning certificate issued pursuant to s.149 (2) of the Environmental Planning and Assessment Act that the land is currently within a remediation site. The EPA is required to notify council as soon as practicable when the declaration is no longer in force and the notation on the s.149 (2) certificate is no longer required.

Relationship to other regulatory instrument

This declaration does not affect the provisions of any relevant environmental planning instruments which apply to the land or provisions of any other environmental protection legislation administered by the EPA.
