Characterisation means sampling and testing that must be conducted on the recovered glass sand for the range of chemicals and other attributes listed in Column 1 of Table 2.

Composite sample means a sample that combines 5 discrete sub-samples into a single sample for the purpose of analysis.

Consumer means a person who applies, causes, or permits the application to land of recovered glass sand within the definitions of “application to land” in accordance with the Act. The consumer may be the landholder responsible for the land to which recovered glass sand is applied. Where a person responsible for transporting the recovered glass sand to the land application site is also the party applying the recovered glass sand, this person must also meet the responsibilities of the consumer.

- mixed commercial and industrial waste, or
- construction and demolition waste, or
- Cathode Ray Tubes or other glass recovered from electrical equipment, or fluorescent or incandescent lights.

Recovered glass sand means recovered glass that has been processed to produce a ‘sand-like’ glass material with a particle size diameter generally less than 5 mm, and that contains at least 98% recovered glass.

Relevant waste means recovered glass sand that meets the requirements of Section 7.

Routine sampling means sampling and testing that must be conducted on the recovered glass sand on an ongoing and regular basis.

General conditions

7. This Notice of Exemption is subject to the following conditions:
 - 7.1. The chemical concentration or other attribute of the recovered glass sand listed in Column 1 of Table 2 must not exceed any of the following:
 - 7.1.1. the absolute maximum concentration or other value listed in Column 4 of Table 2,

 - 8.1. Sampling must be undertaken in accordance with Australian Standard 1141 Methods for sampling and testing aggregates (or equivalent). Sampling and information on sample storage and preparation must be detailed in a written sampling plan.
 - 8.2. Where the recovered glass sand is generated as part of a continuous process, the processor must undertake characterisation and routine sampling according to the requirements listed in Column 1 and Column 2 of Table 3.
 - 8.3. Where the recovered glass sand is not generated as part of a continuous process, the processor may undertake once-off sampling of a batch, truckload or stockpile of recovered glass sand according to the requirements listed in Column 3 of Table 3, for the range of chemicals and other attributes listed in Column 1 of Table 2.
 - 8.4. Where there is a change in inputs that is likely to affect the properties of the recovered glass sand, characterisation must be repeated. Characterisation samples can be used for routine testing and subsequent calculations.
 - 8.5. Processors must keep a written record of all characterisation, routine and/or once-off test results for a period of three years.
 - 8.6. Records of the quantity of recovered glass sand supplied to the consumer and the consumer's name and address must be kept for a period of three years.
 - 8.7. The processor of recovered glass sand must provide a written statement of compliance to the consumer with each transaction, certifying that the recovered glass sand complies with the relevant conditions of this exemption.
 - 8.8. The processor of recovered glass sand must make information on the latest characterisation and routine test results available to the consumer.

Consumer responsibilities

9. The following conditions must be met by the consumer for this exemption to apply:
 - 9.1. Records of the quantity of the recovered glass sand received by the consumer and the suppliers' name and address must be kept for a period of three years.
 - 9.2. The consumer must land apply the relevant waste within a reasonable period of time.

Chemical and other material property requirements

10. This Notice of Exemption only applies to recovered glass sand where the chemical and other attributes listed in Column 1 of Table 2 comply with the chemical concentrations and other values listed in Column 2, Column 3 and Column 4 of Table 2, when analysed according to test methods specified in Column 5 of Table 2.

Exemption Granted

**Mark Gorta
Manager, Waste Management Section
Environment Protection Authority
by delegation**

Notes

The EPA may amend or revoke this exemption at any time. It is the responsibility of the generator, processor and consumer to ensure that they comply with all relevant requirements of the most current exemption. The current version of an exemption will be available on the EPA website: www.environment.nsw.gov.au

In gazetting this general exemption, the EPA is exempting the relevant waste from the specific requirements of the Act and Regulations as stated in this exemption. The EPA is not in any way endorsing the use of this substance or guaranteeing that the substance will confer benefit.

The use of exempted material remains subject to other relevant environmental regulations within the Act and Regulations. For example, a person who pollutes land (s142A) or water (s120), or does not meet the special requirements for asbestos waste (clause 42), regardless of having an exemption, is guilty of an offence and subject to prosecution.

For the purposes of arrangements between a generator, a processor and a consumer, a 'transaction' is taken to mean the contractual agreement between the two parties which specifies the exchange of waste material from one party to another. A 'statement of compliance' must be in writing and be provided with each transaction.

The conditions set out in this exemption are designed to minimise the risk of potential harm to the environment, human health or agriculture, however, neither this exemption nor these conditions guarantee that the environment, human health or agriculture will not be harmed.

The consumer should assess whether or not the exempted material is fit for the purpose the material is proposed to be used and whether this use will cause harm. The consumer may need to seek expert engineering or technical advice.

This exemption does not apply to any material received at a premises that is required to be licensed for waste disposal (application to land) activities under the provisions of the Act. This exemption does not remove the need for a site at which processing occurs to be licensed, if required under Schedule 1 of the Act.

This exemption does not alter the requirements of any other relevant legislation that must be met in utilising this material, including for example, the need to prepare a Material Safety Data Sheet (MSDS).

Regardless of any exemption provided by the EPA, the person who causes or permits the application of the substance to land must ensure that the action is lawful and consistent with the development consent requirements of the land.

All records required to be kept under this exemption must be made available to authorised officers of the EPA upon request.

Failure to comply with the conditions of this Notice of Exemption may constitute an offence under clause 51 of the Regulation and the responsible person will be required to comply with the normal regulatory provisions.
