# OFFICIAL NOTICES

## Appointments

### EDUCATION ACT 1990

Notification of an Appointment to the Board of Studies

I, VERITY FIRTH, Minister for Education and Training, in pursuance of Schedule 1, Clause 8 of the Education Act 1990, appoint Mr Philip COOKE as a member of the Board of Studies, being a nominee provided under section 100 (3) (h), for a term commencing on and from 1 February 2011 until 31 January 2014.

VERITY FIRTH, M.P.,  
Minister for Education and Training

### INDEPENDENT PRICING AND REGULATORY TRIBUNAL ACT 1992

Appointment under Section 6

PURSUANT to the provisions of the Independent Pricing and Regulatory Tribunal Act 1992, I have appointed the officer listed below to the position as specified:

Independent Pricing and Regulatory Tribunal

Mr Jim COX, Full Time Member and Chief Executive Officer [22 February 2011 to 21 February 2014].

The Hon. K. K. KENEALLY, M.P.,  
Premier  
and Minister for Redfern Waterloo

### NATURAL RESOURCES COMMISSION ACT 2003

Appointment under Section 7

HER Excellency the Governor, with the advice of the Executive Council, pursuant to the provisions of the Natural Resources Commission Act 2003, has appointed the officer listed below to the position as specified:

Natural Resources Commission

Mr John WILLIAMS, Commissioner [11 May 2011 to 10 August 2011].

The Hon. K. K. KENEALLY, M.P.,  
Premier  
and Minister for Redfern Waterloo

### NSW POLICE FORCE

Notice of appointment of Registered Law Enforcement Officer pursuant to section 207B of the Police Act 1990 (NSW)

I ANDREW PHILLIP SCIPIONE, Commissioner of Police for the State of New South Wales, and pursuant to section 207B of the Police Act 1990 (NSW) hereby appoint each of the officers in the attached schedule/s as a Recognised Law Enforcement Officer.

The appointment takes effect on the date on which this notice of appointment is published in the NSW Government Gazette.

Dated 15 November 2010.

A. SCIPIONE,  
Commissioner of Police

## Department of Industry and Investment

### POULTRY MEAT INDUSTRY ACT 1986

#### Nomination of Grower Members

Three (3) Grower Members are Required to be Appointed to the Poultry Meat Industry Advisory Group.

NOMINATIONS are now called for under the Poultry Meat Industry Act 1986 and the Poultry Meat Industry Regulation (2008) for candidates for appointment as a grower member to the Poultry Meat Industry Advisory Group.

**ELIGIBILITY FOR NOMINATION:** Any person is eligible for nomination as a candidate for appointment as a grower member.

**QUALIFICATION FOR NOMINATING A CANDIDATE:** A person is qualified to nominate a candidate for appointment as a grower member if the person is a grower who has grown designated poultry under an agreement with a processor during the 2010 or 2011 calendar year.

**NOMINATION FORMS:** Nomination forms may be obtained from and lodged with:

Joanna Blunden,  
Secretary, Poultry Meat Industry Committee (PMIC),  
C/ Tocal Agricultural Centre,  
Paterson NSW 2421  
Phone: (02) 4939 8946  
Fax: (02) 4939 8950.

**CLOSE OF NOMINATIONS:** 4.30pm, Monday, 28 February 2011. Completed nomination forms must be lodged with the secretary before the close of nominations.

### STOCK DISEASES ACT 1923

#### Appointment of Inspector

Notification No: 528

I, ANDREW COLIN SANGER, Director, Agricultural Compliance of the Department of Industry and Investment, pursuant to section 6 (1) of the Stock Diseases Act 1923 ("the Act") and with the delegated authority of the Director-General of the Department of Industry and Investment pursuant to section 22C of the Act hereby appoint Christopher HYDE as an inspector for the purposes of the Act.

Dated this 27th day of January 2011.

A. C. SANGER,  
Director, Agricultural Compliance,  
Department of Industry and Investment

### MINERAL RESOURCES

NOTICE is given that the following applications have been received:

#### EXPLORATION LICENCE APPLICATION

(T11-0041)

No. 4162, SUMMIT EQUITIES LIMITED (ACN 112 479 553), area of 104 units, for Group 1, dated 28 January 2011. (Orange Mining Division).

### MINING LEASE APPLICATIONS

(06-4103)

No. 371, Anthony Claude BERGER, area of about 2 hectares, to mine for gold, lead, silver and zinc, dated 15 November 2010. (Inverell Mining Division).

(10-8983)

No. 396, WHITE MINING (NSW) PTY LIMITED (ACN 089 414 595), AUSTRAL-ASIA COAL HOLDINGS PTY LTD (ACN 113 038 663) and ICRA ASHTON PTY LTD (ACN 097 499 780), area of about 56.59 hectares, for the purpose of any building or mining plant, any road, railway, tramway, bridge or jetty, any reservoir, dam, drain or water race, any cable, conveyor, pipeline, telephone line or signal, any bin, magazine or fuel chute, stockpiling or depositing of overburden, ore or tailings and storage of fuel, machinery, timber or equipment, dated 17 January 2011. (Singleton Mining Division).

STEVE WHAN, M.P.,  
Minister for Primary Industries

NOTICE is given that the following applications have been granted:

#### EXPLORATION LICENCE APPLICATIONS

(T09-0296)

No. 3890, now Exploration Licence No. 7688, ANCIENT RIVER DIAMONDS PTY LTD (ACN 126 290 168), Counties of Arrawatta, Gough, Hardinge and Murchison, Map Sheet (9038, 9138), area of 128 units, for Group 6, dated 20 January 2011, for a term until 20 January 2013.

(T10-0158)

No. 4028, now Exploration Licence No. 7684, WEST CAPE RESOURCES PTY LTD (ACN 134 113 170), County of Farnell, Map Sheet (7135), area of 100 units, for Group 1, dated 19 January 2011, for a term until 19 January 2013.

(T10-0163)

No. 4033, now Exploration Licence No. 7685, WEST CAPE RESOURCES PTY LTD (ACN 134 113 170), County of Yancowinna, Map Sheet (7133), area of 43 units, for Group 1, dated 19 January 2011, for a term until 19 January 2013.

(T10-0164)

No. 4034, now Exploration Licence No. 7686, WEST CAPE RESOURCES PTY LTD (ACN 134 113 170), Map Sheet (7135), area of 92 units, for Group 1, dated 19 January 2011, for a term until 19 January 2013.

(T10-0173)

No. 4042, now Exploration Licence No. 7687, WEST CAPE RESOURCES PTY LTD (ACN 134 113 170), County of Farnell, Map Sheet (7136), area of 98 units, for Group 1, dated 19 January 2011, for a term until 19 January 2013.

(T10-0196)

No. 4064, now Exploration Licence No. 7683, EPIC MINING PTY LTD (ACN 144 713 931), County of Cumberland, Map Sheet (9030), area of 9 units, for Group 5, dated 7 January 2011, for a term until 7 January 2013.

(T10-0204)

No. 4071, now Exploration Licence No. 7689, ELEPHANT MINES PTY LIMITED (ACN 097 799 025), County of Beresford, Map Sheet (8725), area of 5 units, for Group 1, dated 19 January 2011, for a term until 19 January 2013.

(T10-0208)

No. 4074, now Exploration Licence No. 7690, TECK AUSTRALIA PTY LTD (ACN 091 271 911), County of Farnell, Map Sheet (7134, 7135), area of 43 units, for Group 1, dated 19 January 2011, for a term until 19 January 2013.

(T10-0229)

No. 4092, now Exploration Licence No. 7691, AUSMON RESOURCES LTD (ACN 134 358 964), Counties of Young and Yungnulgra, Map Sheet (7435), area of 9 units, for Group 1, dated 20 January 2011, for a term until 20 January 2013.

**MINING LEASE APPLICATIONS**

(09-3984)

Orange No. 338, now Mining Lease No. 1647 (Act 1992), CHARBON COAL PTY LIMITED (ACN 064 237 118) and SK ENERGY AUSTRALIA PTY LTD (ACN 003 964 225), Parish of Clandulla, County of Roxburgh, Map Sheet (8832-2-S), area of 570.9 hectares, to mine for coal, dated 17 December 2010, for a term until 17 December 2031. As a result of the grant of this title, Consolidated Coal Lease No. 732 (Act 1973), Mining Purposes Lease No. 270 (Act 1973) and Exploration Licence No. 7123 have partly ceased to have effect.

(T10-0013)

Singleton No. 354, now Mining Lease No. 1653 (Act 1992), DONALDSON COAL PTY LTD (ACN 073 088 945), Parish of Stockrington, County of Northumberland, Map Sheet (), area of 2500 square metres, for the purpose of any building or mining plant, any reservoir, dam, drain or water race, any cable, conveyor, pipeline, telephone line or signal, any drillhole or shaft for ventilation, drainage, access, conveyance of electricity and communications, dated 21 January 2011, for a term until 21 January 2032. As a result of the grant of this title, Exploration Licence No. 5497 has partly ceased to have effect.

(T10-0014)

Singleton No. 359, now Mining Lease No. 1646 (Act 1992), CIM DURALIE PTY LTD (ACN 008 703 311) and CIM SERVICES PTY LTD (ACN 070 387 978), Parish of Monkerai, County of Gloucester, Map Sheet (9233-2-N), area of 180.3 hectares, to mine for coal, dated 4 January 2011, for a term until 4 January 2032. As a result of the grant of this title, Authorisation No. 315 has partly ceased to have effect.

STEVE WHAN, M.P.,  
Minister for Primary Industries

NOTICE is given that the following application has been refused:

**EXPLORATION LICENCE APPLICATION**

(T10-0074)

No. 3943, COBAR OPERATIONS PTY LTD (ACN 103 555 853), County of Robinson and County of Yanda, Map Sheet (8035, 8036). Refusal took effect on 27 January 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

NOTICE is given that the following applications for renewal have been received:

(09-8453)

Authorisation No. 346, ASTON COAL 2 PTY LTD (ACN 139 472 567), area of 1662 hectares. Application for renewal received 1 February 2011.

(T04-0059)

Exploration Licence No. 6376, FORGE RESOURCES LTD (ACN 139 886 187), area of 24 units. Application for renewal received 1 February 2011.

(06-4156)

Exploration Licence No. 6715, RAPTOR MINERALS LIMITED (ACN 101 168 343), area of 50 units. Application for renewal received 27 January 2011.

(05-0249)

Exploration Licence No. 6726, ARK MINES LIMITED (ACN 123 668 717), area of 50 units. Application for renewal received 1 February 2011.

(T08-0105)

Exploration Licence No. 7274, VOLCAN ALUMINA CORPORATION PTY LTD (ACN 130 185 885), area of 246 units. Application for renewal received 28 January 2011.

(09-0822)

Exploration Licence No. 7275, VOLCAN ALUMINA CORPORATION PTY LTD (ACN 130 185 885), area of 227 units. Application for renewal received 28 January 2011.

(09-0823)

Exploration Licence No. 7276, VOLCAN ALUMINA CORPORATION PTY LTD (ACN 130 185 885), area of 154 units. Application for renewal received 28 January 2011.

(09-0824)

Exploration Licence No. 7277, VOLCAN ALUMINA CORPORATION PTY LTD (ACN 130 185 885), area of 137 units. Application for renewal received 28 January 2011.

(09-0825)

Exploration Licence No. 7278, VOLCAN ALUMINA CORPORATION PTY LTD (ACN 130 185 885), area of 115 units. Application for renewal received 28 January 2011.

(T08-0207)

Exploration Licence No. 7279, ABX2 PTY LTD (ACN 139 791 478), area of 7 units. Application for renewal received 28 January 2011.

(T08-0245)

Exploration Licence No. 7280, STANNUM PTY LTD (ACN 121 771 695), area of 14 units. Application for renewal received 25 January 2011.

(T08-0204)

Exploration Licence No. 7281, JERVOIS MINING LIMITED (ACN 007 626 575), area of 20 units. Application for renewal received 27 January 2011.

(T08-0123)

Exploration Licence No. 7305, STANDARD IRON PTY LTD (ACN 131 971 438), area of 83 units. Application for renewal received 27 January 2011.

(T08-0124)

Exploration Licence No. 7306, STANDARD IRON PTY LTD (ACN 131 971 438), area of 45 units. Application for renewal received 27 January 2011.

(T08-0125)

Exploration Licence No. 7307, STANDARD IRON PTY LTD (ACN 131 971 438), area of 98 units. Application for renewal received 27 January 2011.

(T08-0126)

Exploration Licence No. 7308, STANDARD IRON PTY LTD (ACN 131 971 438), area of 49 units. Application for renewal received 27 January 2011.

(T08-0127)

Exploration Licence No. 7309, STANDARD IRON PTY LTD (ACN 131 971 438), area of 30 units. Application for renewal received 27 January 2011.

(T08-0129)

Exploration Licence No. 7310, STANDARD IRON PTY LTD (ACN 131 971 438), area of 51 units. Application for renewal received 27 January 2011.

(T08-0130)

Exploration Licence No. 7311, STANDARD IRON PTY LTD (ACN 131 971 438), area of 57 units. Application for renewal received 27 January 2011.

(T08-0131)

Exploration Licence No. 7312, STANDARD IRON PTY LTD (ACN 131 971 438), area of 100 units. Application for renewal received 27 January 2011.

(T08-0132)

Exploration Licence No. 7313, STANDARD IRON PTY LTD (ACN 131 971 438), area of 100 units. Application for renewal received 27 January 2011.

(T08-0133)

Exploration Licence No. 7314, STANDARD IRON PTY LTD (ACN 131 971 438), area of 100 units. Application for renewal received 27 January 2011.

(T08-0134)

Exploration Licence No. 7315, STANDARD IRON PTY LTD (ACN 131 971 438), area of 46 units. Application for renewal received 27 January 2011.

(T08-0135)

Exploration Licence No. 7316, STANDARD IRON PTY LTD (ACN 131 971 438), area of 100 units. Application for renewal received 27 January 2011.

(T08-0136)

Exploration Licence No. 7317, STANDARD IRON PTY LTD (ACN 131 971 438), area of 102 units. Application for renewal received 27 January 2011.

(T08-0137)

Exploration Licence No. 7318, STANDARD IRON PTY LTD (ACN 131 971 438), area of 69 units. Application for renewal received 27 January 2011.

(10-5918)

Exploration Licence No. 7321, STRAITS GOLD PTY LIMITED (ACN 072 498 081), area of 8 units. Application for renewal received 1 February 2011.

(T02-0005)

Mining Claim Converted To Lease No. 311 (Act 1992), Geoffrey Neville CHECKETTS, area of 1.86 hectares. Application for renewal received 28 January 2011.

(T02-0006)

Mining Claim Converted To Lease No. 312 (Act 1992), Geoffrey Neville CHECKETTS, area of 1.83 hectares. Application for renewal received 28 January 2011.

(T02-0004)

Mining Claim Converted To Lease No. 313 (Act 1992), Anthony Hedley GATES, area of 1.98 hectares. Application for renewal received 28 January 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

### RENEWAL OF CERTAIN AUTHORITIES

NOTICE is given that the following authorities have been renewed:

(T03-0969)

Exploration Licence No. 6281, MINERALS AUSTRALIA PTY LTD and JACARANDA MINERALS LTD, County of Hume, Map Sheet (8226), area of 16 units, for a further term until 10 August 2012. Renewal effective on and from 28 January 2011.

(06-0070)

Exploration Licence No. 6591, CAPITAL MINING LIMITED (ACN 104 551 171), County of Gipps, Map Sheet (8430), area of 23 units, for a further term until 28 June 2012. Renewal effective on and from 31 January 2011.

(06-7060)

Exploration Licence No. 6969, RAPTOR MINERALS LIMITED (ACN 101 168 343), County of Killara, Map Sheet (7736), area of 8 units, for a further term until 11 December 2011. Renewal effective on and from 25 January 2011.

(07-0378)

Exploration Licence No. 6996, HILL END GOLD LIMITED (ACN 072 692 365), County of Wellington, Map Sheet (8732, 8832), area of 150 units, for a further term until 21 December 2011. Renewal effective on and from 27 January 2011.

(T07-0466)

Exploration Licence No. 7034, GREYSTOKE MINES PTY LTD (ACN 125 517 259), County of Mootwingee, Map Sheet (7337), area of 16 units, for a further term until 22 January 2012. Renewal effective on and from 20 January 2011.

(07-0367)

Exploration Licence No. 7061, NEWMONT EXPLORATION PTY LTD (ACN 006 306 690), Counties of Gordon and Wellington, Map Sheet (8632), area of 5 units, for a further term until 4 February 2012. Renewal effective on and from 27 September 2010.

(07-0424)

Exploration Licence No. 7115, Peter John FORNER and Kenneth Gray GORDON, County of Lincoln, Map Sheet (8633), area of 500 hectares, for a further term until 26 March 2012. Renewal effective on and from 3 December 2010.

(T08-0060)

Exploration Licence No. 7177, MALACHITE RESOURCES LIMITED (ACN 075 613 268), Counties of Gough and Hardinge, Map Sheet (9138), area of 50 units, for a further term until 15 July 2012. Renewal effective on and from 25 January 2011.

(05-5706)

Petroleum Exploration Licence No. 454, APEX ENERGY NL (ACN 097 997 914) and SYDNEY BASIN CBM PTY LTD (ACN 105 706 894), Counties of Camden, Cook and Westmoreland, Map Sheet (8929, 8930), area of 4 blocks, for a further term until 27 March 2013. Renewal effective on and from 23 November 2010.

STEVE WHAN, M.P.,  
Minister for Primary Industries

---

#### REFUSAL OF APPLICATIONS FOR RENEWAL

NOTICE is given that the applications for renewal in respect of the following authorities have been refused:

(05-0269)

Exploration Licence No. 6512, SILVER MINES LIMITED (ACN 107 452 942), County of Clive, Map Sheet (9239, 9240), area of 100 units. The authority ceased to have effect on 24 December 2010.

(T08-0022)

Exploration Licence No. 7148, IRONBARK ZINC LIMITED (ACN 118 751 027), County of Darling, Map Sheet (9036, 9037), area of 61 units. The authority ceased to have effect on 20 January 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

---

#### CANCELLATION OF AUTHORITY AT REQUEST OF HOLDER

NOTICE is given that the following authority has been cancelled:

(T08-0224)

Exploration Licence No. 7284, NEWMONT EXPLORATION PTY LTD (ACN 006 306 690), County of Gordon and County of Wellington, Map Sheet (8632, 8732), area of 50 units. Cancellation took effect on 25 January 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

#### TRANSFERS

(T08-0102)

Exploration Licence No. 7287, formerly held by ORESUM LIMITED (ACN 129 712 465) has been transferred to GLOBAL NICKEL INVESTMENTS LIMITED (ACN 124 140 889) and ORESUM LIMITED (ACN 129 712 465). The transfer was registered on 23 December 2010.

(T08-0102)

Exploration Licence No. 7288, formerly held by ORESUM LIMITED (ACN 129 712 465) has been transferred to GLOBAL NICKEL INVESTMENTS LIMITED (ACN 124 140 889) and ORESUM LIMITED (ACN 129 712 465). The transfer was registered on 23 December 2010.

STEVE WHAN, M.P.,  
Minister for Primary Industries

---

#### EXPIRY

Mining Claim Converted To Lease No. 181 (Act 1992), Rodney George RILEY and Mervyn Robert RILEY, Parish of Delingera, County of Murchison. This title expired on 30 January 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

---

#### AMENDMENT OF CERTAIN AUTHORITIES

NOTICE is given that the following authorities have been amended whereby the due expiry dates of the authorities have been changed from 28 February 2011 to 22 February 2011:

Authorisation 216, DIRECTOR GENERAL NSW DEPT OF INDUSTRY AND INVESTMENT ON BEHALF OF THE CROWN, Counties of Buckland, Nandewar, Pottinger and White. Map Sheets (8836, 8837, 8935, 8936, 8937, 9035), area of 2479 square kilometres.

Exploration Licence 6505, COAL MINES AUSTRALIA PTY LTD, Counties of Buckland and Pottinger. Map Sheet (8935, 9035), area of 344 square kilometres.

Exploration Licence 7223, SHENHUA WATERMARK COAL PTY LTD, Counties of Buckland and Pottinger. Map Sheet (8935), area of 195 square kilometres.

STEVE WHAN, M.P.,  
Minister for Primary Industries

**PLANT DISEASES (FRUIT FLY OUTBREAK, GRIFFITH NTN 2017) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1. Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Griffith NTN 2017) Order 2011.

**2. Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3. Definitions**

In this Order:

**approved treatment** means the treatment or schedule of treatments or manner of harvest specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales as described in Schedule 2.

**Outer Area** means the portions of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435 excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4. Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area;

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-221.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.274836 South and 146.070094 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.274836 South and 146.070094 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of Griffith NTN 2017 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, BEELBANGERA NTN 2091) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Beelbangera NTN 2091) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-225.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.221067 South and 146.112667 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.221067 South and 146.112667 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Beelbangera NTN 2091 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

## PLANT DISEASES (FRUIT FLY OUTBREAK, HAY NTN 4917) ORDER 2011

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

### 1 Name of Order

This Order is the Plant Diseases (Fruit Fly Outbreak, Hay NTN 4917) Order 2011.

### 2 Commencement

This Order commences on the date it is published in the *NSW Government Gazette*.

### 3 Definitions

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person..

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

### 4 Regulation of the movement of host fruit

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-233.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

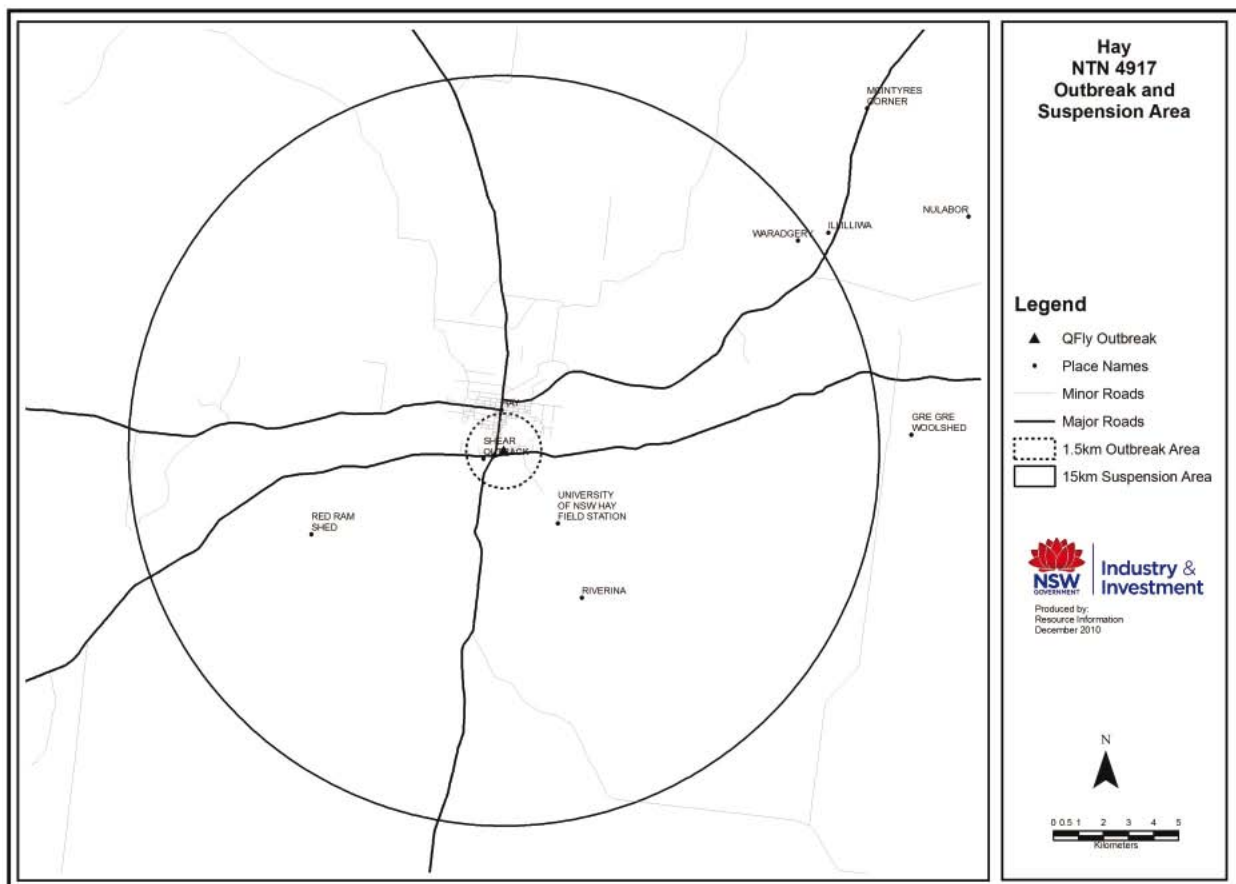

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.518968 South and 144.845323 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.518968 South and 144.845323 East, (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hay NTN 4917 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, GRONN ROAD, HANWOOD) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Gronn Road, Hanwood) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

- (a) Host fruit that originates from or has moved through:
  - (i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;
  - (ii) the Suspension Area must not be moved into the Outer Area, except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and
- (b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:
  - (i) specifying the origin of the host fruit; and
  - (ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and
  - (iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-224.

**SCHEDULE 1 – Host fruit**

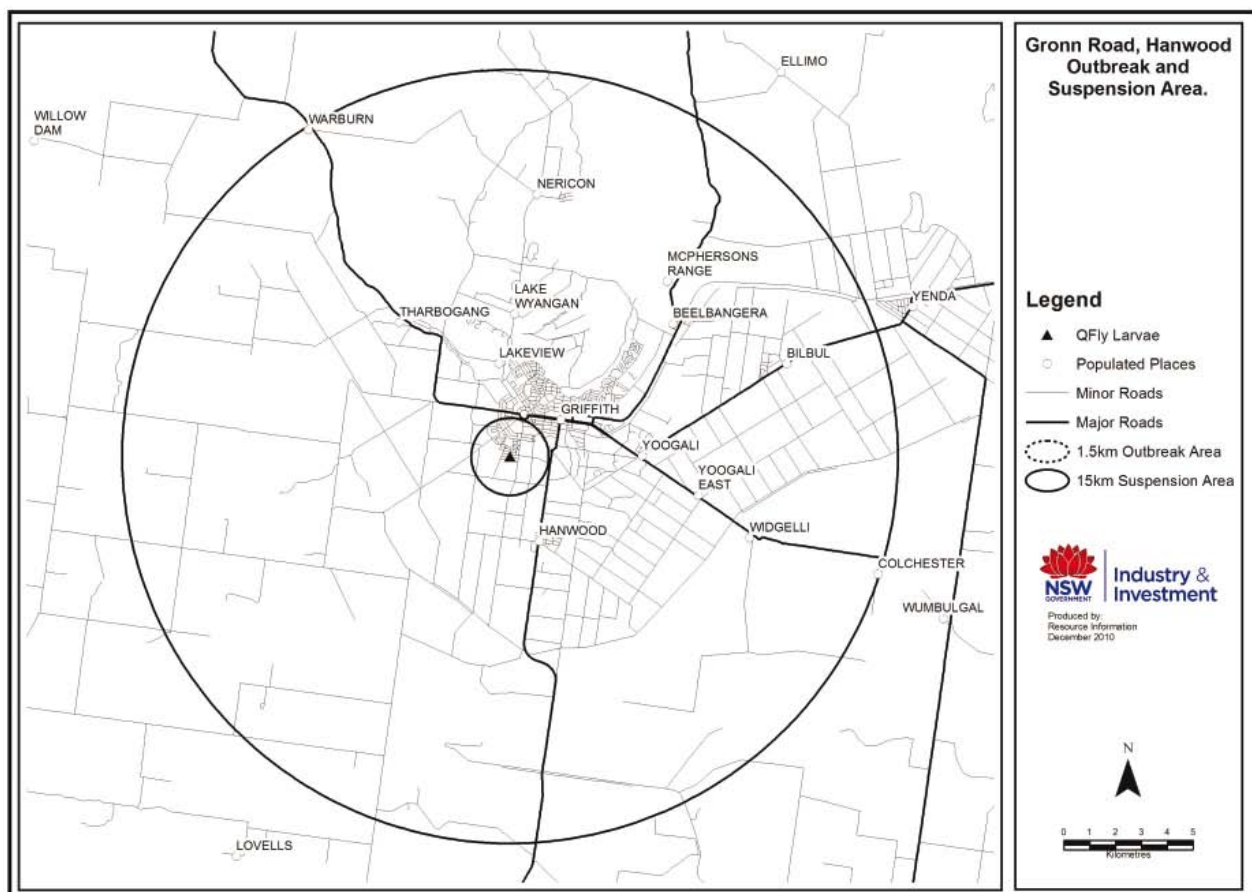

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.301251 South and 146.029297 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.301251 South and 146.029297 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Gronn Road, Hanwood Outbreak Area and Suspension AREA**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, LEETON NTN 2400) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Leeton NTN 2400) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-232.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

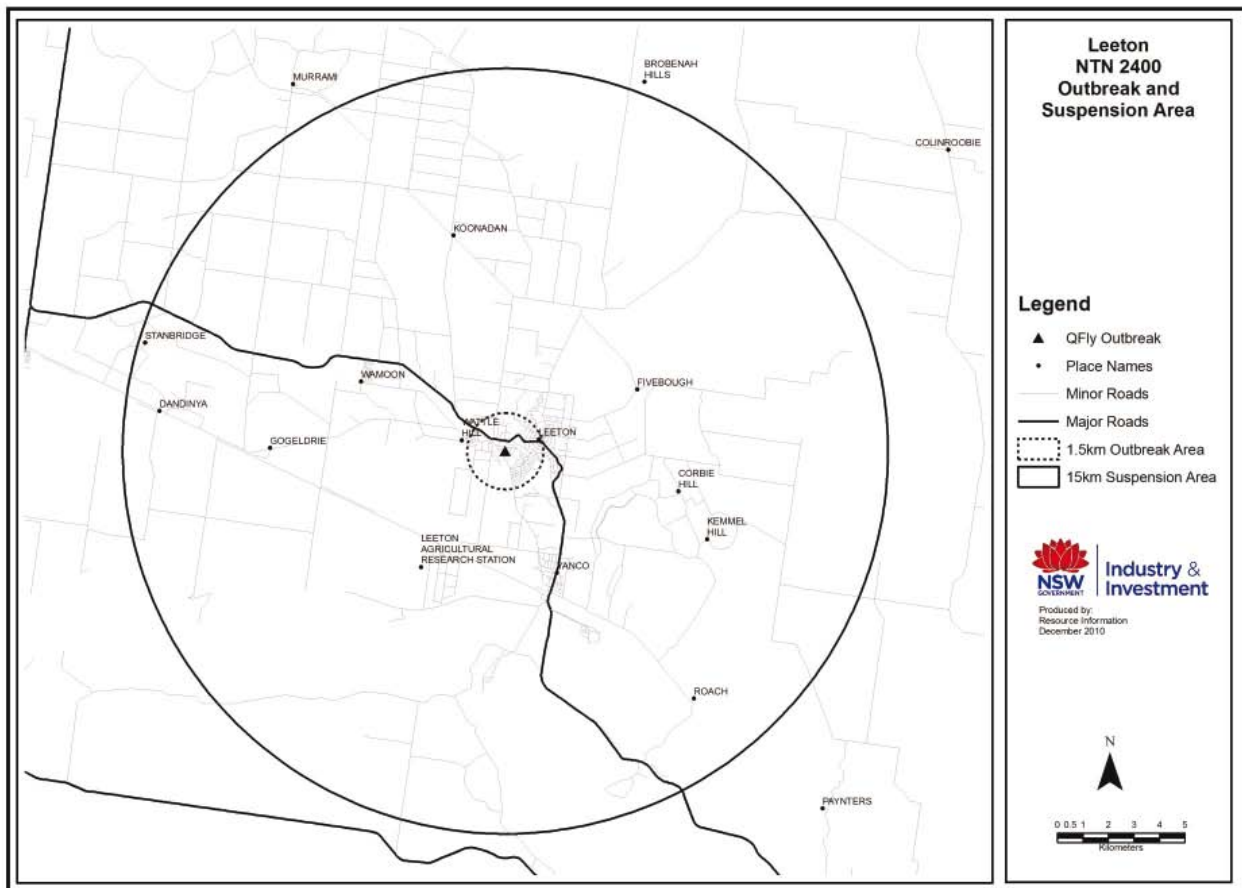

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.555052 South and 146.390549 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.555052 South and 146.390549 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Leeton NTN 2400 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, HILLSTON NTN 2320) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Hillston NTN 2320) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-223.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -33.358284 South and 145.683155 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -33.358284 South and 145.683155 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hillston NTN 2320 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

## PLANT DISEASES (FRUIT FLY OUTBREAK, MAHONGA STREET, JERILDERIE) ORDER 2011

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

### 1 Name of Order

This Order is the Plant Diseases (Fruit Fly Outbreak, Mahonga Street, Jerilderie) Order 2011.

### 2 Commencement

This Order commences on the date it is published in the *NSW Government Gazette*.

### 3 Definitions

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

### 4 Regulation of the movement of host fruit

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-234.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -35.358124 South and 145.732777 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -35.358124 South and 145.732777 East, (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Mahonga Street, Jerilderie Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, MACARTHUR STREET, GRIFFITH) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1. Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Macarthur Street, Griffith) Order 2011.

**2. Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3. Definitions**

In this Order:

**approved treatment** means the treatment or schedule of treatments relevant to the type of host fruit or manner of harvest specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portions of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435 excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4. Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area and the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-220.

**SCHEDULE 1 – Host fruit**

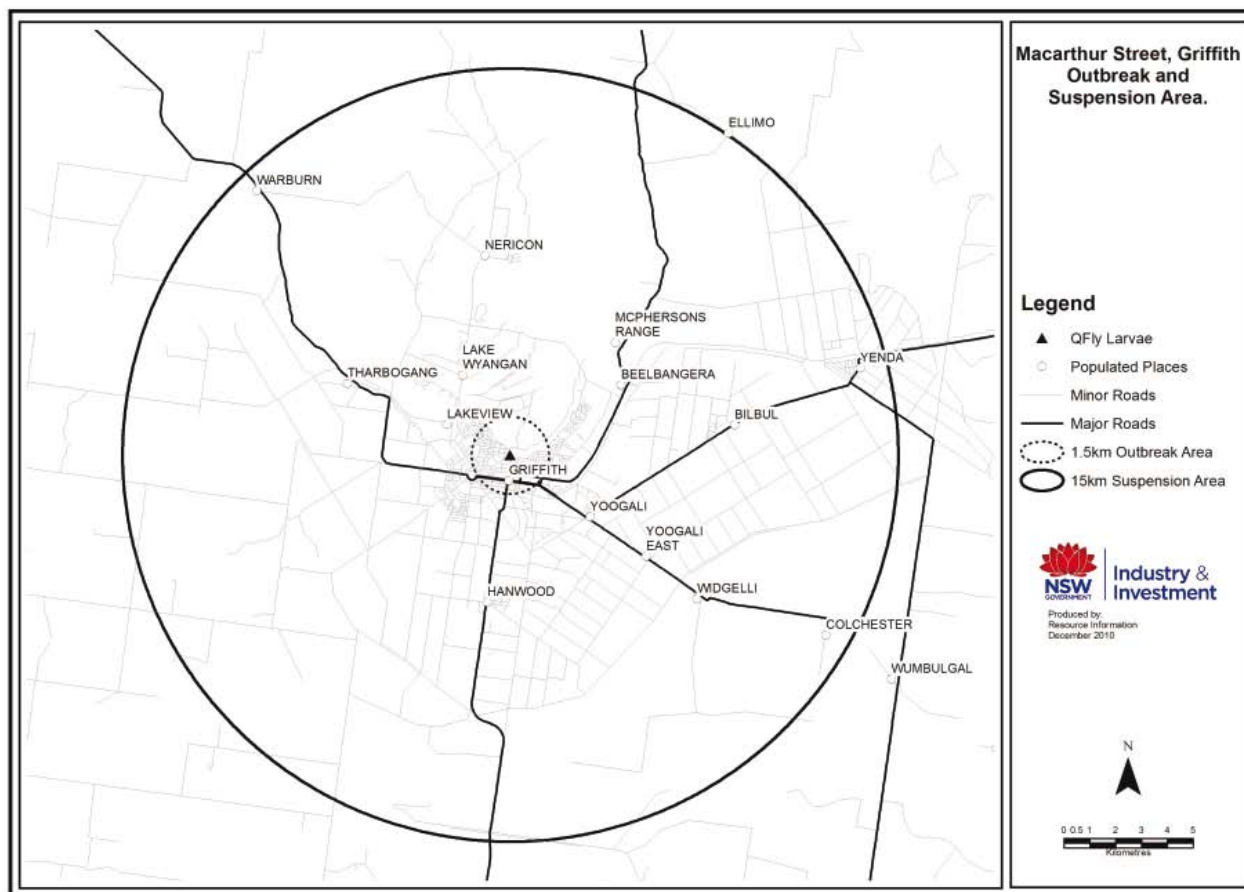

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.279600 South and 146.051633 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.279600 South and 146.051633 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of Macarthur Street, Griffith Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, NERICON NTN 2255) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Nericon NTN 2255) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-241.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.148967 South and 146.038617, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.148967 South and 146.038617 (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Nericon NTN 2255 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, NERICON NTN 2249) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Nericon NTN 2249) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-230.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Fejoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

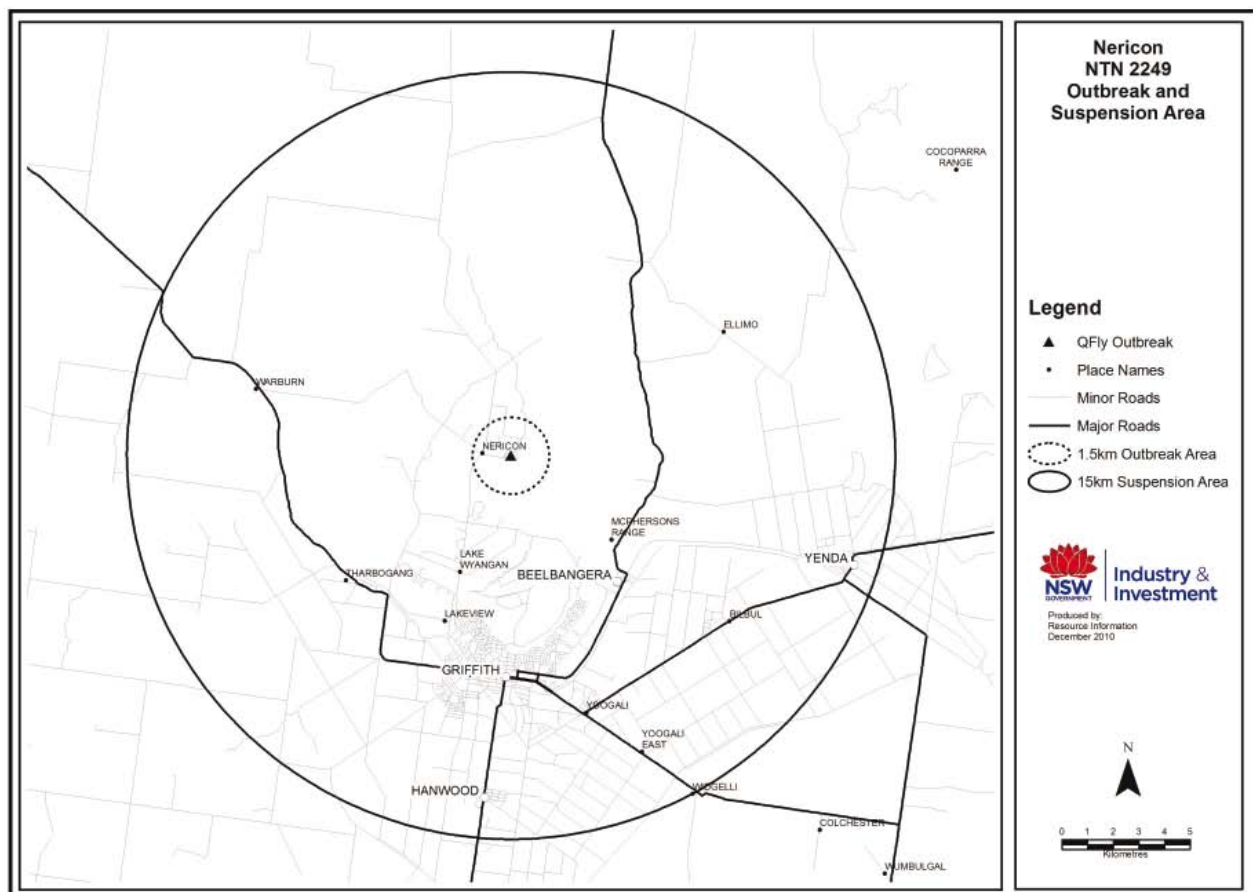

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.210550 South and 146.053917 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.210550 South and 146.053917 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Nericon NTN 2249 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, WARATAH STREET, LEETON) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Waratah Street, Leeton) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

- (a) Host fruit that originates from or has moved through:
  - (i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;
  - (ii) the Suspension Area must not be moved into the Outer Area, except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and
- (b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:
  - (i) specifying the origin of the host fruit; and
  - (ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and
  - (iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-228.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates -degrees -34.547673 South and 146.409555 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees – 34.547673 South and 146.409555 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Waratah Street, Leeton Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, NERICON NTN 2780) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Nericon NTN 2780) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-242.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

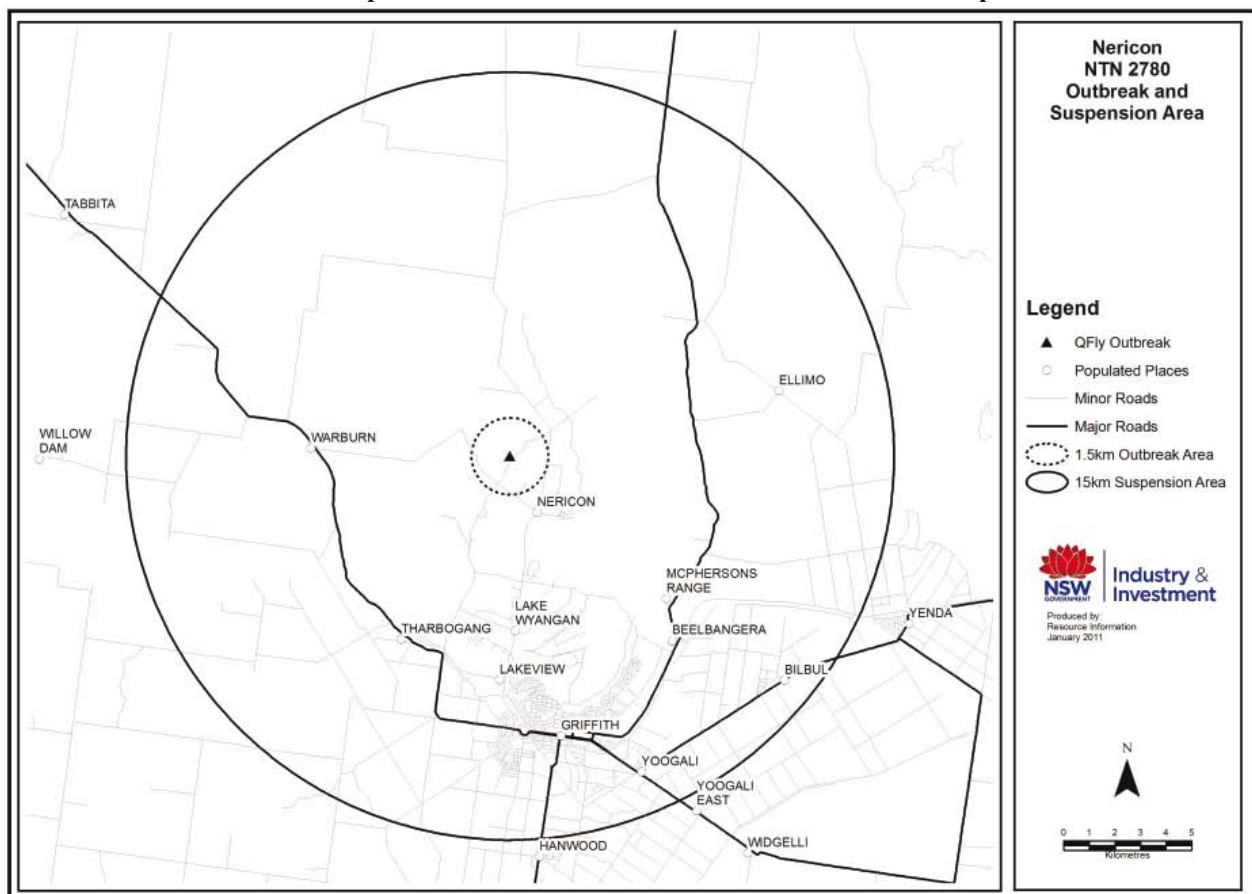

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.189833 South and 146.030367 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.189833 South and 146.030367 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Nericon NTN 2780 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, YENDA NTN 2139) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Yenda NTN 2139) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-240.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.246017 South and 146.2181 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.246017 South and 146.2181 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Yenda NTN 2139 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, YENDA NTN 2123) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Yenda NTN 2123) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-235.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

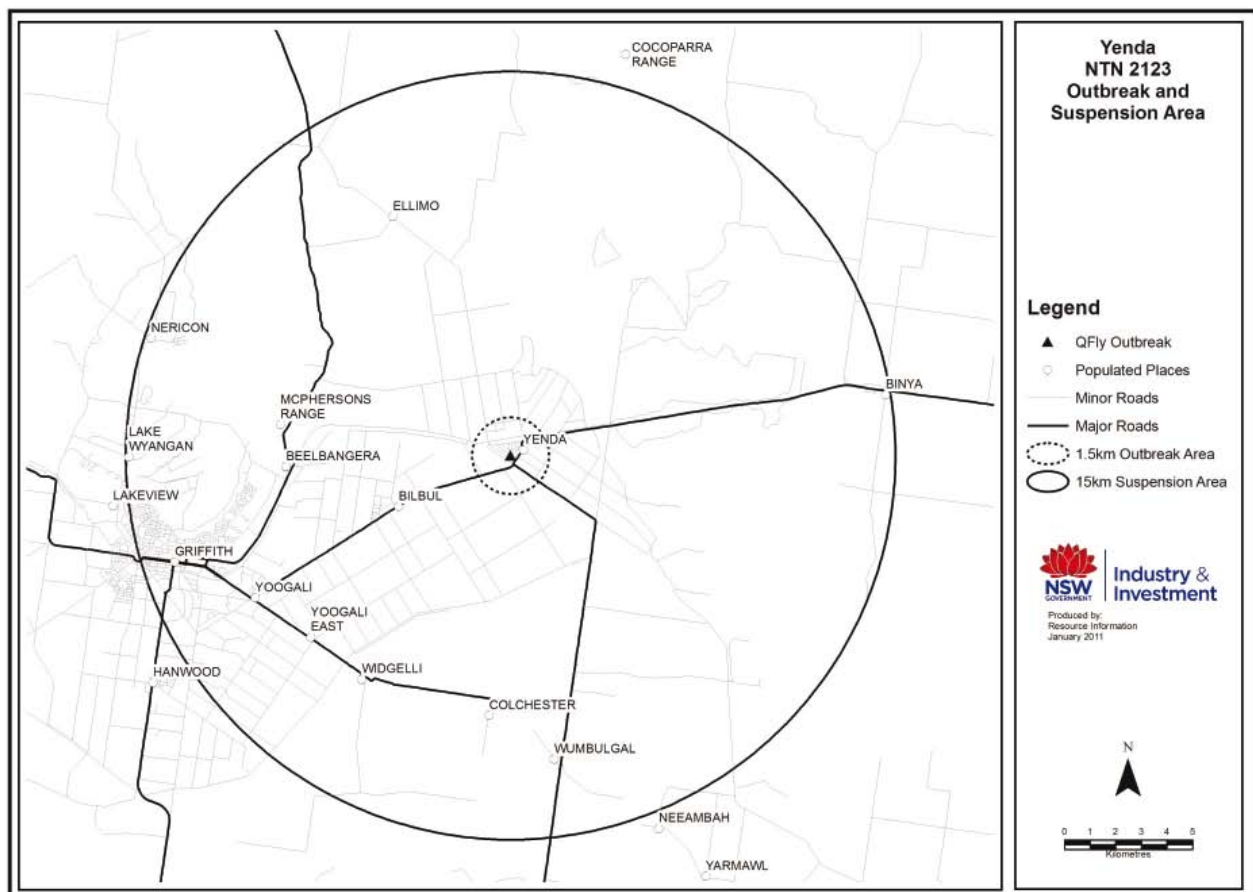

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.252118 South and 146.193466 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.252118 South and 146.193466 East, (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Yenda NTN 2123 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

## PLANT DISEASES (FRUIT FLY OUTBREAK, YOOGALI NTN 2195) ORDER 2011

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

### 1 Name of Order

This Order is the Plant Diseases (Fruit Fly Outbreak, Yoogali NTN 2195) Order 2011.

### 2 Commencement

This Order commences on the date it is published in the *NSW Government Gazette*.

### 3 Definitions

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

### 4 Regulation of the movement of host fruit

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-222.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

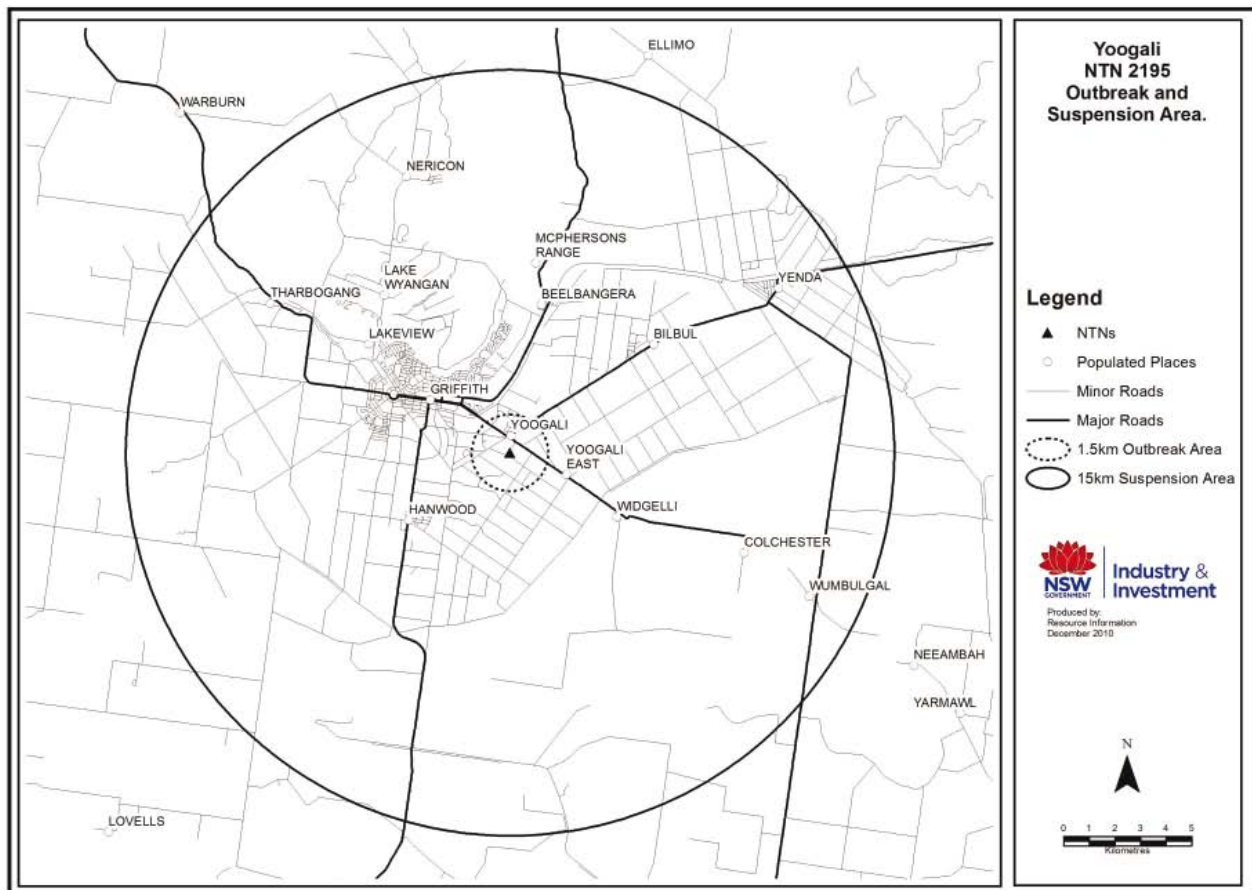

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.307517 South and 146.08448 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.307517 South and 146.08448 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Yoogali NTN 2195 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, HILLSTON NTN 2322) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Hillston NTN 2322) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

approved treatment means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

APVMA means the Australian Pesticides and Veterinary Medicines Authority.

authorised person means an inspector or a person authorised pursuant to section 11 (3) of the Act.

certificate means a Plant Health Certificate or a Plant Health Assurance Certificate.

Certification Assurance Arrangement means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

Department means Industry and Investment, NSW – Primary Industries.

free of broken skin means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

host fruit means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

lot means a discrete quantity of fruit received from one grower at one time.

NTN means national trap number.

Outbreak Area means the portion of New South Wales described in Schedule 2.

Outer Area means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

Plant Health Assurance Certificate means a certificate issued by a business accredited under a Certification Assurance Arrangement.

Plant Health Certificate means a certificate issued by an authorised person.

Queensland fruit fly means the pest *Bactrocera tryoni* (Froggatt).

Suspension Area means the portion of New South Wales described in Schedule 3.

the Act means the Plant Diseases Act 1924.

Note: *covering* or *package*, *inspector*, *occupier* and *owner* all have the same meaning as in the Act.

**4 Revocation of Order O-218**

Pursuant to sections 3 (2) and 4 of the Act the Order titled Plant Diseases (Hillston Orchard Fruit Fly Outbreak) Order 2010 with Departmental reference O-218 signed by the Minister and dated 18 January 2010 is revoked (as is any Order revived as a result of this revocation).

**5 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-256.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -33.291091 South and 145.549399 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -33.291091 South and 145.549399 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hillston NTN 2322 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

## PLANT DISEASES (FRUIT FLY OUTBREAK, BRINGAN STREET, GRIFFITH) ORDER 2011

Under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

### 1. Name of Order

This Order is the Plant Diseases (Fruit Fly Outbreak, Bringan Street, Griffith) Order 2011.

### 2. Commencement

This Order commences on the date it is published in the *NSW Government Gazette*.

### 3. Definitions

In this Order:

**approved treatment** means the treatment or schedule of treatments relevant to the type of host fruit or manner of harvest specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435 excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

### 4. Regulation of the movement of host fruit

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-219.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.287032 South and 146.027183 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.287032 South and 146.027183 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of Griffith (Bringan Street) Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, CORBIE HILL NTN 2485) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Corbie Hill NTN 2485) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-254.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.57695 South and 146.48285 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.57695 South and 146.48285 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Corbie Hill NTN 2485 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm, so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, HANWOOD NTN 2089) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Hanwood NTN 2089) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-255.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.30613 South and 146.052598 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.30613 South and 146.052598 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hanwood NTN 2089 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm, so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, HANWOOD NTN 2161) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Hanwood NTN 2161) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-252.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

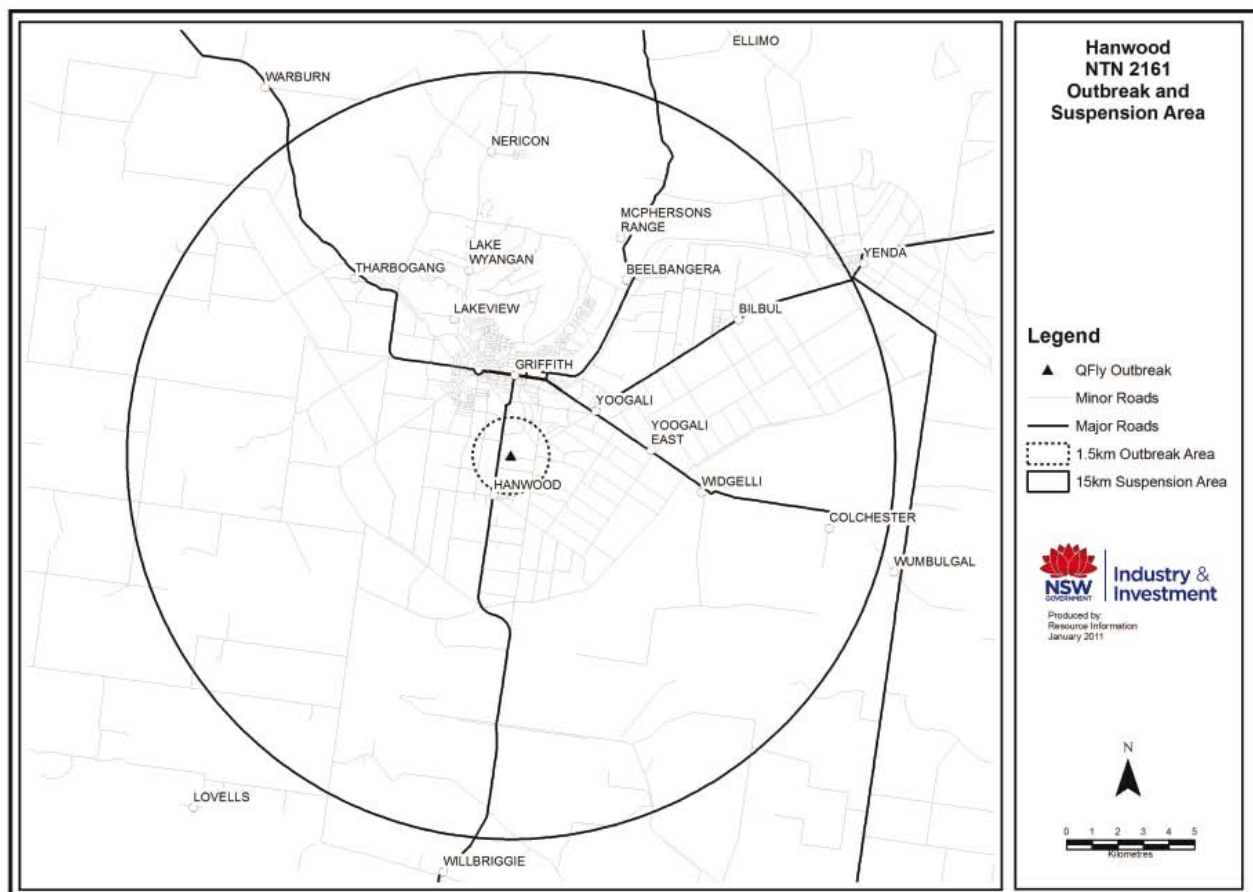

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.316927 South and 146.04881 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.316927 South and 146.04881 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hanwood North NTN 2161 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, YOOGALI NTN 2760) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Yoogali NTN 2760) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-253.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

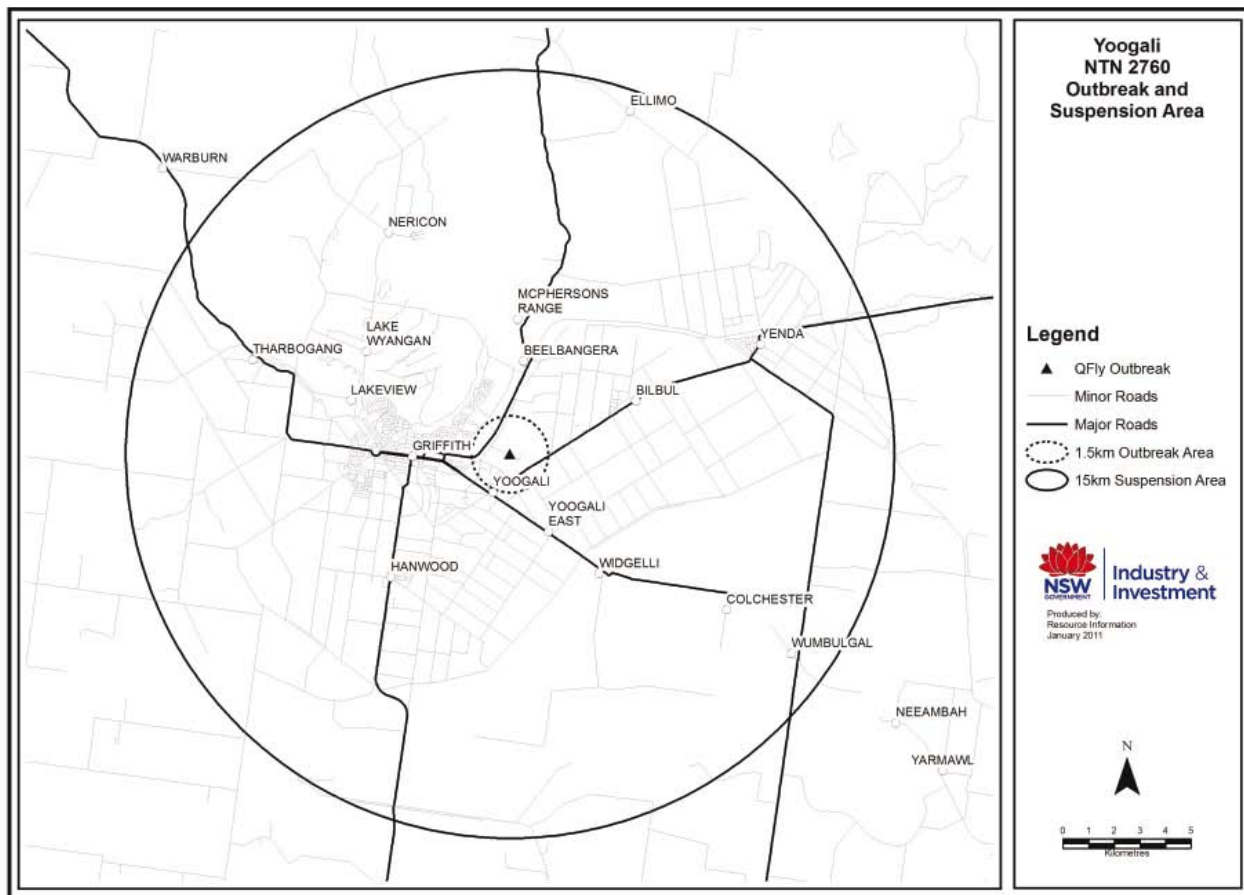

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -34.288049 South and 146.092247 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -34.288049 South and 146.092247 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Yoogali NTN 2760 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, HILLSTON NTN 2289) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Hillston NTN 2289) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-250.

**SCHEDULE 1 – Host fruit**

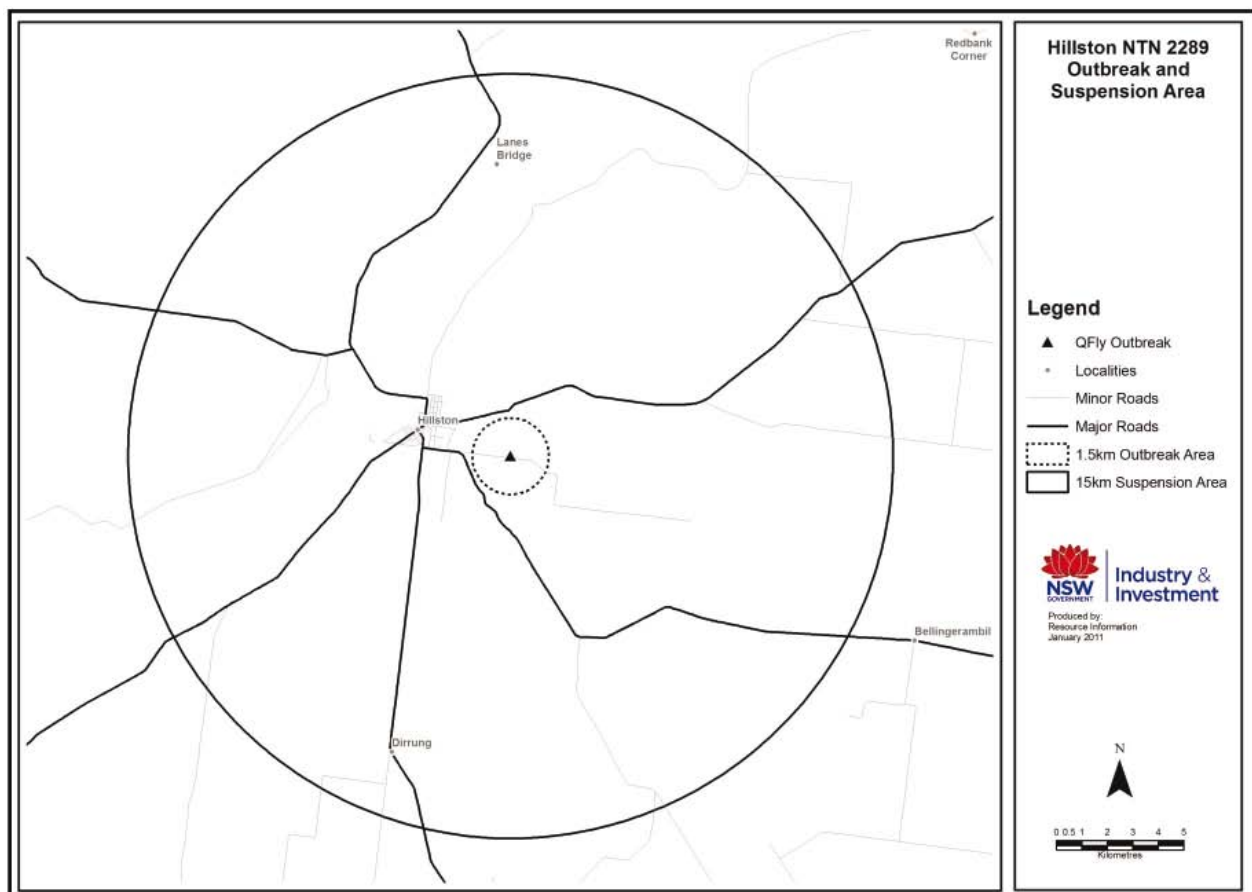

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -33.495336 South and 145.570515 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -33.495336 South and 145.570515 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hillston NTN 2289 Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm, so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**PLANT DISEASES (FRUIT FLY OUTBREAK, HANWOOD NTN 2168) ORDER 2011**

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

**1 Name of Order**

This Order is the Plant Diseases (Fruit Fly Outbreak, Hanwood NTN 2168) Order 2011.

**2 Commencement**

This Order commences on the date it is published in the *NSW Government Gazette*.

**3 Definitions**

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**NTN** means national trap number.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

**4 Regulation of the movement of host fruit**

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-251.

**SCHEDULE 1 – Host fruit**

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Feijoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees – 34.331532 South and 146.038459 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees – 34.331532 South and 146.038459 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Hanwood NTN 2168 Outbreak Area and Suspension Area**

### SCHEDULE 5 – Exceptions for movement of host fruit

#### Host fruit that has received an approved treatment

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

#### Untreated host fruit for processing

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

#### Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

#### Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm, so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

## PLANT DISEASES (FRUIT FLY OUTBREAK, ELLERSLIE) ORDER 2011

under the Plant Diseases Act 1924

I, STEVE WHAN, M.P., the Minister for Primary Industries, in pursuance of section 4 of the Plant Diseases Act 1924, being of the opinion that the importation, introduction or bringing of host fruit into specified portions of New South Wales is likely to introduce the pest Queensland fruit fly (*Bactrocera tryoni*) into specified portions of New South Wales, make the following Order regulating the importation, introduction or bringing of host fruit into specified portions of New South Wales.

### 1 Name of Order

This Order is the Plant Diseases (Fruit Fly Outbreak, Ellerslie) Order 2011.

### 2 Commencement

This Order commences on the date it is published in the *NSW Government Gazette*.

### 3 Definitions

In this Order:

**approved treatment** means a treatment or schedule of treatments relevant to the type of host fruit or manner of harvest as specified in Schedule 6.

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority.

**authorised person** means an inspector or a person authorised pursuant to section 11 (3) of the Act.

**certificate** means a Plant Health Certificate or a Plant Health Assurance Certificate.

**Certification Assurance Arrangement** means an arrangement approved by the Department which enables a business accredited under the arrangement to certify that certain quarantine requirements have been satisfied for the movement of host fruit to interstate and/or intrastate markets.

Note: An example of an approved Certification Assurance Arrangement is the Interstate Certification Assurance (ICA) Scheme.

**Department** means Industry and Investment, NSW – Primary Industries.

**free of broken skin** means the skin has no preharvest cracks, punctures, pulled stems or other breaks which penetrate through the skin and that have not healed with callus tissue.

**host fruit** means the fruit specified in Schedule 1, being fruit which is susceptible to infestation by Queensland fruit fly.

**lot** means a discrete quantity of fruit received from one grower at one time.

**Outbreak Area** means the portion of New South Wales described in Schedule 2.

**Outer Area** means the portion of New South Wales known as the NSW Fruit Fly Exclusion Zone, as specified in Proclamation P184 published in *NSW Government Gazette* No. 152 of 28 November 2008 at pages 11434 to 11435, excluding the Outbreak Area and the Suspension Area.

**Plant Health Assurance Certificate** means a certificate issued by a business accredited under a Certification Assurance Arrangement.

**Plant Health Certificate** means a certificate issued by an authorised person.

**Queensland fruit fly** means the pest *Bactrocera tryoni* (Froggatt).

**Suspension Area** means the portion of New South Wales described in Schedule 3.

**the Act** means the Plant Diseases Act 1924.

Note: **covering** or **package**, **inspector**, **occupier** and **owner** all have the same meaning as in the Act.

### 4 Regulation of the movement of host fruit

Pursuant to section 4 (1) of the Act the importation, introduction or bringing of host fruit into specified portions of New South Wales is regulated as follows:

(a) Host fruit that originates from or has moved through:

(i) the Outbreak Area must not be moved into the Suspension Area or the Outer Area;

(ii) the Suspension Area must not be moved into the Outer Area,

except for such movements as are specified in Schedule 5 and which comply with the relevant conditions of exception set out in Schedule 5; and

(b) The movement of any host fruit in accordance with Schedule 5 must be accompanied by a certificate:

(i) specifying the origin of the host fruit; and

(ii) in the case of a Plant Health Certificate, certifying that the host fruit has been treated in the manner specified in Schedule 6; and

(iii) in the case of a Plant Health Assurance Certificate, certifying that the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement.

Dated this 1st day of February 2011.

STEVE WHAN, M.P.,  
Minister for Primary Industries

Note: The Department's reference is O-257

**SCHEDULE 1 – Host fruit**

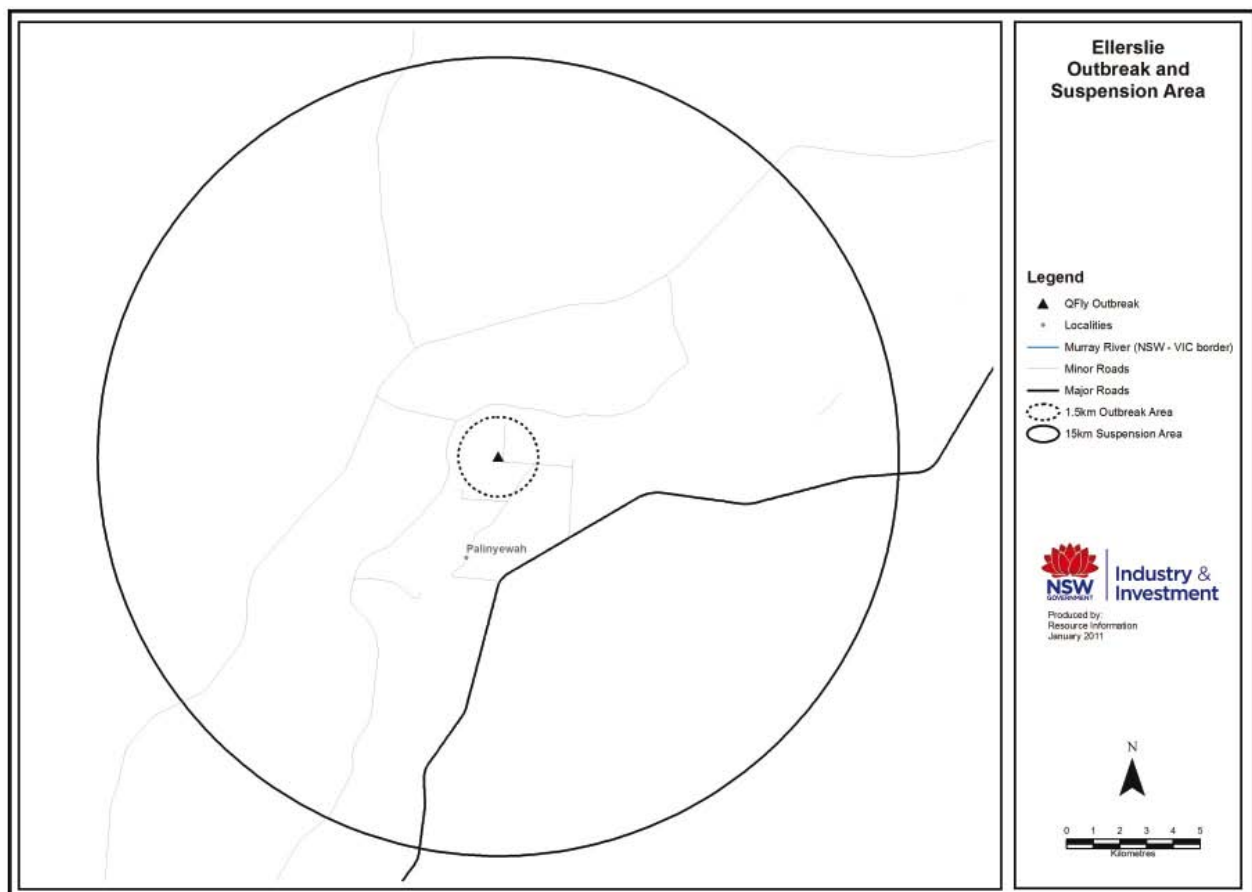

Abiu	Chilli	Lime	Persimmon
Acerola	Citron	Loganberry	Plum
Apple	Cumquat	Longan	Plumcot
Apricot	Custard Apple	Loquat	Pomegranate
Avocado	Date	Lychee	Prickly Pear
Babaco	Durian	Mandarin	Pummelo
Banana	Eggplant	Mango	Quince
Black Sapote	Fejoa	Mangosteen	Rambutan
Blackberry	Fig	Medlar	Raspberry
Blueberry	Granadilla	Miracle Fruit	Rollinia
Boysenberry	Grape	Mulberry	Santol
Brazil Cherry	Grapefruit	Nashi	Sapodilla
Breadfruit	Grumichama	Nectarine	Shaddock
Caimito (Star Apple)	Guava	Orange	Soursop
Cape Gooseberry	Hog Plum	Passionfruit	Sweetsop (Sugar Apple)
Capsicum	Jaboticaba	Pawpaw	Strawberry
Carambola (Starfruit)	Jackfruit	Peach	Tamarillo
Cashew Apple	Jew Plum	Peacharine	Tangelo
Casimiro (White Sapote)	Ju jube	Pear	Tomato
Cherimoya	Kiwifruit	Pepino	Wax jambu (Rose Apple)
Cherry	Lemon		

**SCHEDULE 2 – Outbreak Area**

The portion of New South Wales within a 1.5 kilometre radius of the coordinates decimal degrees -33.80872 South and 142.02888 East, being the area within the 1.5 kilometre radius circle (broken line) in the map in Schedule 4.

**SCHEDULE 3 – Suspension Area**

The portion of New South Wales within a 15 kilometre radius of coordinates decimal degrees -33.80872 South and 142.02888 East (excluding the Outbreak Area), being the area between the 1.5 kilometre radius circle (broken line) and the 15 kilometre radius circle (unbroken line) in the map in Schedule 4.

**SCHEDULE 4 – Map of the Ellerslie Outbreak Area and Suspension Area**

**SCHEDULE 5 – Exceptions for movement of host fruit****Host fruit that has received an approved treatment**

1. Movement of host fruit that has received an approved treatment prior to movement, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure that:
    - (i) any used packaging or coverings containing host fruit are free of soil, plant residues and other organic matter; and
    - (ii) in the case of host fruit that has been consigned as a lot for the purpose of producing smaller packs of host fruit and has been repacked in smaller packs, the host fruit has been received, handled, stored and repacked under secure conditions which prevent infestation by Queensland fruit fly; and
    - (iii) any individual package contains only one kind of host fruit; and
    - (iv) all previous incorrect information displayed on the outer covering of the package is removed and the outer covering is legibly marked with the following information:
      - (A) the district of production; and
      - (B) the name, address, postcode and the State or Territory of both the grower and the packer; or where the business is sourcing from multiple growers, the name, address, postcode and the State or Territory of the packer; and
      - (C) a brief description of the contents of the package;
 or
    - (v) where the host fruit originates from a property or facility which is owned or occupied by a business accredited under a Certification Assurance Arrangement, the host fruit is packed, labelled and certified in accordance with any conditions prescribed in the Certification Assurance Arrangement.

**Untreated host fruit for processing**

2. Movement of untreated host fruit for processing, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and
  - (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
    - (i) all bins or containers and any vehicles (‘‘transport vehicle’’) are free from all plant debris and soil prior to packing and loading; and
    - (ii) the host fruit is securely covered by a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
    - (iii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
    - (iv) the transport vehicle is free of all soil and plant debris after loading; and
    - (v) the transport vehicle travels by the most direct route to the receiving processor; and
  - (c) The owner or occupier of the property or facility at which the host fruit is to be processed must ensure:
    - (i) the host fruit is processed within 24 hours of receipt; and
    - (ii) all measures to avoid spillage of host fruit are taken and where spillages occur, must be disposed of in a manner generally accepted as likely to prevent the spread of Queensland fruit fly; and
    - (iii) all processing wastes must be disinfested by heat or freezing or be buried.

**Outer Area host fruit on a direct journey through the Outbreak Area or Suspension Area into the Outer Area**

3. Movement of host fruit originating within the Outer Area and moving on a direct journey through the Outbreak Area or the Suspension Area into the Outer Area, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit is securely transported by covering with a tarpaulin, shade cloth, bin cover or other covering or contained within the covered transport vehicle so as to prevent infestation by Queensland fruit fly and spillage during transportation.

**Untreated Suspension Area host fruit on a direct journey to an end destination having no restrictions on account of Queensland fruit fly**

4. Movement of host fruit originating within the Suspension Area and moving on a direct journey to an end destination which has no restrictions on account of Queensland fruit fly, subject to the following conditions:
  - (a) The owner or occupier of the property or facility from which the host fruit originates must ensure that the host fruit remains under secure conditions from post harvest to the time of dispatch and transport, except when impractical during packing and grading activities; and

- (b) Prior to movement, the owner or occupier of the property or facility from which the host fruit originates must ensure:
- (i) all bins or containers and any vehicles to be used for the transportation of host fruit (“transport vehicle”) are free from all plant debris and soil prior to packing and loading; and
  - (ii) the host fruit must be loaded onto or into a transport vehicle on a hard surface and not within the orchard from which the host fruit was sourced; and
  - (iii) the transport vehicle is free of all soil and plant debris after loading; and
  - (iv) the host fruit is transported under secure conditions that include:
    - (A) unvented packages or vented packages with the vents secured with mesh with a maximum aperture of 1.6mm prior to dispatch; or
    - (B) shrink-wrapped and sealed as a palletised unit; or
    - (C) fully enclosed under tarpaulins, shade cloth, bin cover or other covering which provides a maximum aperture of 1.6mm,
 so as to prevent infestation by Queensland fruit fly and spillage during transportation; and
  - (v) the transport vehicle travels by the most direct route.

### **SCHEDULE 6 – Approved treatments for host fruit**

#### **Preharvest Treatment and Inspection**

1. Tomatoes:
  - (a) treated preharvest with an application of dimethoate or fenthion or trichlorfon in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
2. Capsicums and chillies:
  - (a) treated preharvest with an application of dimethoate in accordance with all label directions for the control of Queensland fruit fly, and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
3. Stonefruit:
  - (a) treated preharvest with an application of fenthion in accordance with all label directions for the control of Queensland fruit fly; and
  - (b) inspected postharvest at the rate of at least 1 package in every 100 or part thereof, and found free of fruit fly larvae and free of broken skin.
4. Table grapes:
  - (a) treated preharvest for the control of Queensland fruit fly, with a program of:
    - (i) bait sprays with an insecticide containing 0.24 g/L spinosad as the only active constituent in accordance with all label directions; or
    - (ii) bait sprays with an insecticide containing 1150 g/L maldison as the only active constituent in accordance with all label and APVMA permit (PER12359) directions; or
    - (iii) cover sprays using an insecticide containing 550 g/L fenthion as the only active constituent in accordance with all label and APVMA permit (PER11643) directions; and
  - (b) inspected postharvest where a sample of the fruit is inspected and found free of fruit fly larvae and free of broken skin.

#### **Postharvest Dimethoate Dip**

5. Any host fruit, excluding capsicum (hollow-fruited), chilli (hollow-fruited), cumquat and strawberries, treated with a postharvest dip using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions; where dipping is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and
  - (b) Pomefruit, where a non-recovery gloss wax and or a compatible fungicide as specified on the label may be applied within 3 hours of treatment.

#### **Postharvest Dimethoate Flood Spray**

6. Any host fruit, excluding cumquat, eggplant and strawberries, treated with a postharvest flood spray using an insecticide containing 400 g/L dimethoate as its only active constituent in accordance with all label and APVMA permit (PER12074) directions, where spraying is the last treatment before packing except in the case of:
  - (a) Citrus, where a non-recovery gloss wax coating and or a compatible fungicide as specified on the label may be applied within 24 hours of treatment; and

- (b) Pomefruit, where a non-recovery gloss wax coating and or compatible fungicide as specified on the label may be applied within 3 hours of treatment.

**Postharvest Methyl Bromide Fumigation**

7. Any host fruit fumigated postharvest with a fumigant containing 1000 g/kg methyl bromide as its only active constituent in accordance with all label and APVMA permit (PER10699) directions, at the following rates:
- (a) 10°C – 14.9°C at 48 g/m<sup>3</sup> for 2 hours; or
  - (b) 15°C – 20.9°C at 40 g/m<sup>3</sup> for 2 hours; or
  - (c) 21°C – 25.9°C at 32 g/m<sup>3</sup> for 2 hours; or
  - (d) 26°C – 31.9°C at 24 g/m<sup>3</sup> for 2 hours.

**Postharvest Cold Treatment**

8. Any appropriate host fruit treated postharvest at a temperature of:
- (a) 0°C ± 0.5°C for a minimum of 14 days; or
  - (b) 1°C – 3°C ± 0.5°C for a minimum of 16 days (Lemons minimum 14 days).

**ORDER**

Transfer of a Crown Road to a Council

IN pursuance of the provisions of section 151, Roads Act 1993, the Crown roads specified in Schedule 1 is hereby transferred to the Roads Authority specified in Schedule 2 hereunder, as from the date of publication of this notice and as from the date, the road specified in Schedule 1, ceases to be Crown road.

TONY KELLY, M.L.C.,  
Minister for Lands

SCHEDULE 1

*Parish – North Bellingen; County – Ralieggh;  
Land District – Bellingen; Shire – Bellingen Shire Council*

Road south of Lots 364 and 365, DP 755553.

Width to be Transferred: Whole width.

SCHEDULE 2

Roads Authority: Bellingen Shire Council.

Council Reference: 2010/af-307, L991, L992.

LPMA Reference: 11/00891.

SCHEDULE 1

*Parish – Buller; County – Buller;  
Land District – Casino; Shire – Kyogle Council*

The un-named section of Crown road known as Goanna Creek Road commencing at its intersection with Duck Creek Road and then running in a generally south-easterly direction through Lot 14, DP 751047; Lots 1 and 2, DP 747578 and Lots 7 and 10, DP 751047, through to a point approximately 40 metres past the point where the Crown road meets the northernmost boundary of Lot 6, DP 751047.

Width to be Transferred: Whole width.

SCHEDULE 2

Roads Authority: Kyogle Council.

Council Reference: GAK:JHH, Road Closing.

LPMA Reference: 10/14587.

**NOTIFICATION OF CLOSING OF ROAD**

IN pursuance of the provisions of the Roads Act 1993, the road hereunder described is closed and the land comprised therein ceases to be a public road and the rights of passage and access that previously existed in relation to the road are extinguished. On road closing, title to the land comprising the former public road vests in the body specified in the Schedule hereunder.

### NOTIFICATION OF CREATION OF EASEMENT

PURSUANT to Part 4, Division 5, section 52 (1) (b) (ii), Crown Lands Act 1989, the easement described hereunder is created.

TONY KELLY, M.L.C.,  
Minister for Lands

#### Description

*County of Killara; Administrative District of Wilcannia;  
Shire of Central Darling*

Purpose: Right of Access.

Land Benefited: Lot 2721, DP 764832.

Land over which Created: The site designated "A" in DP 1154951 affecting Crown reserves 64899 for Commonage (Addn.), notified 9 November 1934, 71522 for Commonage (Addn.), notified 25 May 1945 and 96417 for travelling stock, notified 16 July 1982.

#### TERMS AND CONDITIONS OF RIGHT OF WAY

1. The owner of the lot benefited, and every person authorised by them may:
  - (a) by any reasonable means pass across the land burdened, but only within the site of this easement, to get to or from the land benefited, and
  - (b) do anything reasonably necessary for that purpose, including:
    - entering the land burdened, and
    - taking anything on to the land burdened, and
    - carrying out work within the site of this easement, such as constructing, placing, repairing or maintaining trafficable surfaces, driveways or structures.
2. In exercising those powers, the owner of the lot benefited must:
  - (a) ensure all work is done properly, and
  - (b) cause as little inconvenience as is practicable to the owner and any occupier of the land burdened, and
  - (c) cause as little damage as is practicable to the land burdened and any improvement on it, and
  - (d) restore the land burdened as nearly as is practicable to its former condition, and
  - (e) make good any collateral damage

File No.: 10/4991.

### HERITAGE ACT 1977

Direction Pursuant to Section 34 (1) (a) to List an Item on the State Heritage Register

Government Cottage Archaeological Site

SHR No. 1843

IN pursuance of section 34 (1) (a) of the Heritage Act 1977, I, the Minister for Planning, having considered a recommendation of the Heritage Council of New South Wales, direct the Council to list the item of environmental heritage specified in Schedule "A" on the State Heritage Register. This listing shall apply to the curtilage or site of the item, being the land described in Schedule "B". The listing is subject to the exemptions from approval under section 57 (2) of the Heritage Act 1977, described in Schedule "C" and in addition to the standard exemptions.

Sydney, 16th day of December 2010.

TONY KELLY, M.L.C.,  
Minister for Planning

---

#### SCHEDULE "A"

The item known as Government Cottage Archaeological Site, situated on the land described in Schedule "B".

---

#### SCHEDULE "B"

All those pieces or parcels of land known as Lot 1, Section 11, DP 995355 in Parish of St Matthew, County of Cumberland shown on the plan catalogued HC 2325 in the office of the Heritage Council of New South Wales.

---

#### SCHEDULE "C"

All works (excluding any excavations) to existing residential and domestic buildings which do not affect the fabric or significance of archaeological remains.

---

### BUILDING PROFESSIONALS ACT 2005

#### NOTICE

I, the Minister for Planning, under section 4 (7) of the Building Professionals Act 2005, amend the Building Professionals Board Accreditation Scheme by adopting the amendments set out in the Schedule.

The amendments are to commence upon the publication of this notice in the *NSW Government Gazette*.

Sydney, 24 January 2011.

TONY KELLY, M.L.C.,  
Minister for Planning

---

#### SCHEDULE

Schedule 3, Part 2: Qualifications demonstrating specialty criteria

Under the heading "Category A1-Accredited certifier-building surveying grade 1", add the additional qualifications:

- Post Graduate Diploma in Building Surveying-Bond University
- Master of Building Surveying-Bond University

Under the heading "Category A2-Accredited certifier-building surveying grade 2", add the additional qualifications:

- Graduate Certificate in Building Surveying-Bond University
- Post Graduate Diploma in Building Surveying-Bond University
- Master of Building Surveying-Bond University.

Under the heading "Category A3-Accredited certifier-building surveying grade 3", add the additional qualifications:

- Graduate Certificate in Building Surveying-Bond University
- Post Graduate Diploma in Building Surveying-Bond University
- Master of Building Surveying-Bond University.

# Roads and Traffic Authority

## ROAD TRANSPORT (GENERAL) ACT 2005

### Australia Post Temporary Work and Rest Hours Exemption 2011

I, PAUL ENDYCOTT, Acting General Manager, Compliance and Enforcement Branch, pursuant to Clause 117 of the Road Transport (General) Regulation 2005, hereby exempt regulated heavy vehicle drivers employed by Australian Postal Corporation ("Australia Post"), from the standard hours for the solo driver of a regulated heavy vehicle set out in Clause 64 to the Road Transport (General) Regulation 2005, subject to the conditions set out in the Schedule below.

Dated this 2nd day of February 2011.

PAUL ENDYCOTT,  
Acting General Manager,  
Compliance and Enforcement Branch,  
Roads and Traffic Authority

### SCHEDULE

#### 1. Citation

This Exemption may be cited as the Australia Post Temporary Work and Rest Hours Exemption 2011.

#### 2. Commencement

This Exemption takes effect on and from 7 February 2011.

#### 3. Effect

This Exemption remains in force until midnight 7 August 2011, unless it is amended or repealed earlier.

#### 4. Interpretation

Unless stated otherwise, words and expressions used in this Exemption have the same meaning as those defined in the Road Transport (General) Regulation 2005 ("the Regulation").

#### 5. Application

This Exemption applies to solo drivers of regulated heavy vehicles employed by Australia Post, when driving a regulated heavy vehicle in the course of their employment with Australia Post.

#### 6. Exemption

Pursuant to Clause 117 of the Regulation, drivers specified in Clause 5 of this Exemption are exempt from the standard hours for the solo driver of a regulated heavy vehicle as set out in Clause 64 of the Regulation, subject to the conditions set out in clause 7 of this Exemption.

#### 7. Conditions

This Exemption applies on the condition that in any period of time mentioned in Column 1 of Table 1, a driver:

- must not work for more than the work time mentioned in Column 2 of Table 1, and
- must have the rest of that period of time off work, with at least the rest time mentioned in Column 3 of Table 1.

TABLE 1

<i>Column 1 Time Period</i>	<i>Column 2 Maximum Work Time</i>	<i>Column 3 Minimum Rest Time</i>
5½ hours	5¼ hours	15 continuous minutes rest time
8 hours	7½ hours	30 minutes rest time, in blocks of 15 continuous minutes
11 hours	10 hours	60 minutes rest time, in blocks of 15 continuous minutes
24 hours	12 hours	10 continuous hours stationary rest time
7 days	72 hours	24 continuous hours stationary rest time
14 days	144 hours	3 periods of 24 continuous hours stationary rest time, and 3 night rest breaks

#### Explanatory Note

This Exemption applies in New South Wales only and does not exempt from requirements under Commonwealth legislation. Drivers of regulated heavy vehicles working in other States and Territories must comply with the work and rest time limits set out in the laws of those States and Territories.

A copy of this Exemption must be carried by a driver working under this Exemption, and must be produced in response to a request by a Police officer or an authorised officer. It is an offence to contravene a condition of this Exemption.

**ROAD TRANSPORT (GENERAL) ACT 2005**

Notice under the Roads Transport (Mass, Loading and Access) Regulation 2005

I, Michael Bushby, Chief Executive of the Roads and Traffic Authority, in pursuance of the Road Transport (Mass, Loading, Access) Regulation 2005, by this Notice, specify the routes and areas on or in which Road Trains may be used subject to any requirements or conditions set out in the Schedule.

Duroby Nature Reserve  
Plans of Management

A plan of management for Mann River Nature Reserve was adopted by the Minister for Climate Change and the Environment on 17 November 2010. Plans of management for Watagans National Park and Jiliby State Conservation Area and for Duroby Nature Reserve were adopted by the Minister on 10 December 2010. A plan for Woodford Island Nature reserve was adopted on 20 December 2010, and a plan for Belford National Park was adopted on 31 December 2010.

Copies of the Watagans and Belford plans are available from the NPWS office at 207 Albany Street, Gosford (phone 4320 4200). Copies of the Woodford Island and Duroby plans are available from the NPWS office at 75 Main Street, Alstonville (6627 0200). Copies of the Mann River plan are available from the NPWS office at 87 Faulkner Street, Armidale (6776 0000). The plans are also on the website: [www.environment.nsw.gov.au](http://www.environment.nsw.gov.au).

**NATIONAL PARKS AND WILDLIFE ACT 1974**

Notice of Reservation of a Nature Reserve

I, Professor Marie Bashir, A.C., C.V.O., Governor of the State of New South Wales, with the advice of the Executive Council, reserve the lands described in the Schedule below, part of Minimbah Nature Reserve, under the provisions of section 30A (1) of the National Parks and Wildlife Act 1974.

Signed and sealed at Sydney this 19th day of January 2011.

MARIE BASHIR  
Governor,

By Her Excellency's Command,

FRANK SARTOR  
Minister for Climate Change and the Environment.

GOD SAVE THE QUEEN

SCHEDULE

*Land District – Taree; LGA – Great Lakes*

County Gloucester, Parish Wang Wauk, 210.54 hectares, being Lots 65, 66, 71, 83, 84, 85, 178, 179 and 188, DP 753212. DECCW/FIL08/3636.

**OCCUPATIONAL HEALTH AND SAFETY  
REGULATION 2001**

(Clauses 348 and 270)

Exemption Order No. 002 /11  
Operation and Use of a Dragline

I, JOHN WATSON, General Manager, Occupational Health and Safety Division of the WorkCover Authority of New South Wales, pursuant to Clause 348 of the Occupational Health and Safety Regulation 2001, make the following Order.

Dated this 1st day of February 2011.

JOHN WATSON,  
General Manager,  
Occupational Health and Safety Division  
WorkCover Authority of New South Wales

OCCUPATIONAL HEALTH AND SAFETY  
REGULATION 2001

Exemption Order No. 002 /11

**Operation and Use of a Dragline**

1. Name of Order

This Order is The Occupational Health and Safety Regulation 2001 Exemption Order No. 002/11 Operation and Use of Dragline Equipment

2. Commencement

This Order commences on 1 April 2011, and has effect for a period of five years from that date.

3. Exemption

Operators or users of draglines (or persons employing, directing or allowing an operator of draglines) are exempt from clause 266 & 270 of the Occupational Health and Safety Regulation 2001 (requirement to hold a certificate of competency or recognised qualification in relation to loadshifting machines), provided that the conditions specified in Schedule 1 are complied with.

SCHEDULE 1

1. The controller of the dragline must:

- (a) ensure that any hazards identified with the use of the dragline have been assessed and adequately controlled and that authorised persons are advised of the hazards and control measures;
- (b) ensure that only persons assessed as competent in the operation of the dragline are authorised to use the equipment.

2. The dragline is only to be operated by persons who are:

- (a) authorised to use it by the controller of the dragline equipment;
- (b) over 18 years of age;
- (c) able to communicate to a level necessary to perform their duties safely;
- (d) trained and competent in the safe operation of the dragline equipment;
- (e) aware of this Order and its conditions and limitations.

3. While operating or using the dragline, the operator must follow safe work practices and take action to prevent any person being placed at risk by the use of the equipment.

**PIPELINES ACT 1967**

Instrument of Grant of Variation to Pipeline Licence

Colongra Gas Pipeline

Licence No. 33 – Variation No. 3

JEMENA COLONGRA PTY LTD (ABN 13 127 533 519), having its registered office at Mount Waverley, Victoria, has applied in accordance with the provisions of section 18 of the Pipelines Act 1967 (hereinafter called “the Act”) and Pipeline Regulation 2005 (hereinafter called “the Regulation”) for a Variation to Pipeline Licence No. 33 in relation to the finalisation of easements following completion of construction and surveying of the as-built location of the pipeline.

This application complies with the provisions of the Act and Regulation and therefore I, PAUL LYNCH, Minister for

Energy, do grant Variation No. 3 to Licence No. 33 effective from my signing of this variation.

The lands affected by the overall pipeline licence area are indicated on Deposited Plan Nos. Lot 161 DP1 118119, DP1118125, DP 1147915, DP1 147953 and DP 1147959 including associated instruments, lodged and registered at the Sydney office of Land and Property Management Authority NSW.

Signed at Sydney, New South Wales this 24th day of January 2011.

PAUL LYNCH,  
Minister for Energy

**PIPELINES ACT 1967**

Notification of Vesting of Easements

Colongra Gas Pipeline

Pipeline Licence No. 33 – Variation No. 3

I, PAUL LYNCH, Minister for Energy, pursuant to the provisions of sections 21 and 61 of the Pipelines Act 1967, hereby declare that the easements over the additional lands included in the Licence Area consequent to the grant of Variation No. 3 to Pipeline Licence No. 33, as described in Schedule 1 hereto, are vested in Jemena Colongra Pty Ltd (ABN 13 127 533 519) for the purposes of and incidental to the construction and operation of a pipeline subject to the restrictions as to user set out in Schedule 2 hereto.

Dated this 24th day of January 2011.

PAUL LYNCH,  
Minister for Energy

SCHEDULE 1

Additional Lands Affected by Easements for Pipeline

All those additional pieces or parcels of land described in the following Deposited Plans and accompanying instruments under section 20 of the Pipelines Act 1967 lodged and registered at the Sydney office of Land and Property Management Authority NSW.

<i>Deposited Plan Number</i>	<i>Instrument Item Numbers</i>
DP 1147915	(B) and (E)
DP 1147953	(B), (C) and (D)
DP 1147959	(B), (J) and (K)

SCHEDULE 2

Restrictions as to User

Without affecting the generality of any requirement imposed by the Pipelines Act 1967 or regulations thereunder the owner or occupier of land over which there is an easement for pipeline must not within the easement, except with the prior consent in writing of the person in whom the easement is vested:

- (a) Excavate (including blasting), drill or dig.
- (b) Erect, place or permit to be erected or placed any building, structure (including fence posts), plant, apparatus or equipment, earthworks, utility services or other improvements whether permanent or temporary on, over or under the land.

- (c) Alter or disturb existing levels, contours or gradients.
- (d) Plant or cultivate any tree within 3 metres of the pipeline or any apparatus or works.
- (e) Place on or use any part of the land for the transport, carriage or support of any heavy object, vehicle or implement, which could in any way cause or be likely to cause damage to the pipeline.
- (f) Undertake any other activity that represents a danger to the pipeline or is a danger to the operation of the pipeline or its apparatus or works including signs, vent pipes and cathodic protection systems including anode beds and electrolysis test points.

### PIPELINES ACT 1967

#### Notification of Extinguishment of Easements

##### Colongra Gas Pipeline

##### Pipeline Licence No. 33 – Variation No. 3

I, PAUL LYNCH, Minister for Energy, pursuant to the provisions of sections 21A of the Pipelines Act 1967, hereby declare that the easements over lands excluded from the Licence Area consequent to the grant of Variation No. 3 to Pipeline Licence No. 33, as described in Schedule 1 hereto, are extinguished and such restrictions as to user as may be applied, cease to have effect.

Dated this 24th day of January 2011.

PAUL LYNCH,  
Minister for Energy

#### SCHEDULE 1

##### Lands to be Excluded

All those pieces or parcels of land described in the following Deposited Plans and accompanying instruments under section 20 of the Pipelines Act 1967 lodged and registered at the Sydney office of Land and Property Management Authority NSW.

<i>Deposited Plan Number</i>	<i>Instrument Item Numbers</i>
DP 1147915	(A) and (G)
DP 1130083	Lot 162

### PIPELINES ACT 1967

#### Instrument of Grant of Variation to Pipeline Licence

##### Plumpton to Killingworth Gas Pipeline

##### Licence No. 7 – Variation No. 9

JEMENA GAS NETWORKS (NSW) LTD (ABN 87 003 004 322), having its registered office at Mount Waverley, Victoria, has applied in accordance with the provisions of section 18 of the Pipelines Act 1967 (hereinafter called “the Act”) and Pipeline Regulation 2005 (hereinafter called “the Regulation”) for a Variation to Pipeline Licence No. 7 in relation to the addition of the Munmorah Off take and Metering Station (MOMS), and associate easement for access, to Pipeline Licence No. 7.

This application complies with the provisions of the Act and Regulation and therefore I, PAUL LYNCH, Minister

for Energy, do grant Variation No. 9 to Licence No. 7 and vary Pipeline Licence No. 7 by incorporating Lot 162 and the land which is the subject of the easement for right of carriage shown as (A) on Deposited Plan 130083 lodged and registered at the Sydney Office of Land and Property Management Authority effective from my signing of this variation.

Signed in Sydney, New South Wales 24th day of January 2011.

PAUL LYNCH,  
Minister for Energy

### PIPELINES ACT 1967

#### Notification of Vesting of Land and Easement

##### Licence No. 7 – Variation No. 9

I, PAUL LYNCH, Minister for Energy, pursuant to the provisions of sections 21 and 61 of the Pipelines Act 1967, hereby declare that the additional land and associated easement included in the Licence Area consequent to the grant of Variation No. 9 to Pipeline Licence No. 7, as described in Schedule 1 hereto, are vested in Jemena Gas Networks (NSW) Ltd (ABN 87 003 004 322) for the purposes of and incidental to the construction and operation of an inlet facility for the Colongra Gas Pipeline subject to the restrictions as to user set out in Schedule 2 hereto.

Date this 24th day of January 2011.

PAUL LYNCH,  
Minister for Energy

#### SCHEDULE 1

##### Additional Lands Affected by Easements for Pipeline

All that additional parcel of land described in the following Deposited Plan and accompanying instrument under section 20 of the Pipelines Act 1967 lodged and registered at the Sydney office of Land and Property Management Authority NSW.

<i>Deposited Plan Number</i>	<i>Instrument Item Numbers</i>
DP 1130083	Lot 162 and (A)

#### SCHEDULE 2

##### Restrictions as to User

Without affecting the generality of any requirement imposed by the Pipelines Act 1967 or regulations thereunder the owner or occupier of land over which there is an easement for pipeline must not within the easement, except with the prior consent in writing of the person in whom the easement is vested:

- (a) Excavate (including blasting), drill or dig.
- (b) Erect, place or permit to be erected or placed any building, structure (including fence posts), plant, apparatus or equipment, earthworks, utility services or other improvements whether permanent or temporary on, over or under the land.
- (c) Alter or disturb existing levels, contours or gradients.
- (d) Plant or cultivate any tree within 3 metres of the pipeline or any apparatus or works.

- (e) Place on or use any part of the land for the transport, carriage or support of any heavy object, vehicle or implement, which could in any way cause or be likely to cause damage to the pipeline.
- (f) Undertake any other activity that represents a danger to the pipeline or is a danger to the operation of the pipeline or its apparatus or works including signs, vent pipes and cathodic protection systems including anode beds and electrolysis test points.

### PRACTICE NOTE No. 3

#### The Children's Court of New South Wales Alternative Dispute Resolution Procedures in the Children's Court

#### 1. Commencement

- 1.1 This Practice Note commences on 7 February 2011.

#### 2. Preamble

- 2.1 Section 65 of the Children and Young Persons (Care and Protection) Act 1998 (the Care Act) provides for a Children's Registrar to arrange and conduct a dispute resolution conference (a DRC) between the parties.
- 2.2 Section 65A of the Care Act empowers the Children's Court to make an order that the parties to a care application attend an alternative dispute resolution service (external ADR) in relation to the proceedings before the Court or any aspect of those proceedings.

#### Dispute Resolution Conferences conducted under section 65

#### 3. Purposes and aims of a DRC

- 3.1 The purpose of a DRC is to provide a safe environment that promotes frank and open discussion between the parties to a care application in a structured forum and to encourage them to agree on action that should be taken in the best interests of the child or young person concerned.
- 3.2 A DRC is intended to facilitate the early resolution of care applications through a non-adversarial process designed to include the parties and others who may make a contribution to the resolution of the issues.
- 3.3 A DRC should aim to:
  - identify the risks and safety concerns that have led to the intervention or involvement of Community Services;
  - identify and clarify the strengths within the family, including any progress made by family members in addressing those concerns;
  - hear the views of the child(ren) either directly or indirectly through the child's legal representative;
  - focus the parties' attention on the child's best interests;
  - identify and clarify the issues in dispute;
  - identify and clarify areas of agreement;
  - develop options for ensuring the safety and welfare of the child or young person and consider alternatives to the outcome sought in the Care Application;

- enhance communication between the parties;
- reach agreement between the parties to avoid or limit the scope of any hearing;
- formulate final or interim orders that may be made by consent.

#### 4. Attendees

- 4.1 A DRC is to be attended in person by:
  - the parties to the proceedings and, if represented, their legal representatives;
  - a guardian ad litem, if appointed by the Court;
  - the relevant Casework Manager and Caseworker from Community Services;
  - the legal representative for the Director General of the Department of Human Services;
  - in appropriate cases and if available, the authorised clinician of the Children's Court Clinic where the clinician has carried out an assessment prior to the DRC.
- 4.2 A DRC may, upon request and at the discretion of the Children's Registrar, be attended by:
  - a support person;
  - a member of a relevant kinship group;
  - a non-legal advocate and/or an interpreter where a party requires such assistance to communicate effectively;
  - a person who is or is proposed to be a carer for a child or young person pursuant to an order of the court;
  - an expert witness, other than an authorised clinician, where the expert witness has carried out an assessment prior to the DRC.
- 4.3 If a party or their legal representative wishes a person specified in 4.2 to attend the DRC the party is required to give reasonable notice to the Children's Registrar.

#### 5. Personal Attendance

- 5.1 With the exception of an authorised clinician or other expert witness, attendance is to be in person. Attendance by telephone or audiovisual link can only occur in exceptional circumstances at the discretion of the Children's Registrar.

#### 6. Attendance of child/young person at the DRC

- 6.1 Personal attendance of a child or young person is not required. However, the child or young person may attend, if the child or young person so wishes, with advance notice to the Children's Registrar and the parties, so that any concerns about the appropriateness of the child or young person's attendance can be addressed.

#### 7. Responsibilities of all attendees at a DRC

- 7.1 All persons attending a DRC are required to:
  - act in good faith, that is, to be open and frank in all aspects of their participation in the DRC;
  - conduct themselves in a courteous and considerate manner and
  - act in a non-adversarial manner.

#### 8. Responsibilities of all parties and legal representatives at a DRC

- 8.1 All parties and legal representatives at a DRC are required to:
  - prepare for the conference by reviewing and being familiar with the documents filed;

- commit to attending the DRC for 2 hours.
9. Responsibilities of parties at a DRC
    - 9.1 All parties at a DRC are required to:
      - clearly state their point of view;
      - listen to and discuss the views of others;
      - consider the options for resolving the care and protection concerns which gave rise to the application;
      - attempt to agree on options which will provide the arrangements that are in the best interests of the child.
  10. Role of support persons
    - 10.1 A member of the extended family or kinship group may act as a support to the child or family. In appropriate situations they may also provide a constructive and impartial contribution to the resolution of the care and protection concerns relating to the child or young person. A member of the extended family or kinship group is not to act as an advocate for one party against another.
    - 10.2 Support persons, other than a member of the extended family or kinship group, will not take an active role in the DRC.
  11. Timing of DRC
    - 11.1 A DRC should as far as practicable be held as early as possible in the proceedings in order to facilitate the early resolution of a care application.
    - 11.2 Once a care application has been filed in the Children's Court, the Magistrate or Children's Registrar responsible for the management of the case will, in consultation with the parties, determine if and when a DRC should take place.
    - 11.3 If appropriate, more than one DRC may be held at different stages of the proceedings.
  12. Listing of DRCs and hearing dates
    - 12.1 In the usual course DRCs will be listed by the Magistrate or Children's Registrar during a mention of a matter in Court in accordance with the arrangements established by the Magistrate for that location and the Senior Children's Registrar. In locations where this is not practicable, arrangements will be made by the Senior Children's Registrar to allocate a conference date as soon as practicable.
    - 12.2 Hearing dates will ordinarily only be allocated after the DRC has failed to settle the matter.
  13. Duration and location of DRC
    - 13.1 A DRC is to be scheduled for two hours and should take place in courthouse accommodation.
  14. Pre-DRC preparation
    - 14.1 Approximately one week prior to a DRC a Children's Registrar will make contact with the parties or their legal representatives to establish who will be in attendance, to consider any issues that may affect the manner in which the conference is conducted and to resolve any questions relating to the conference process.
  15. DRC process
    - 15.1 DRCs are to be conducted by using a conciliation model of alternative dispute resolution (ADR).
 

As a conciliator the Children's Registrar has an advisory role, but not a determinative one.
  - 15.2 The Children's Registrar is responsible for managing the dispute resolution process, including setting the ground rules, managing any apparent power imbalances between the participants and ensuring the participants conduct themselves appropriately.
  - 15.3 In the ordinary course a DRC will be conducted in the following format;
    - opening by the Children's Registrar
    - parties' opening comments
    - reflection and summary by the Children's Registrar
    - identification of the relevant issues
    - exploration of the relevant issues
    - private sessions involving the Children's Registrar, a party and the party's legal representative
    - negotiation
    - further private sessions where appropriate
    - agreement and closure
  - 15.4 At the conclusion of a DRC a Children's Registrar may make directions for the further case management of the matter.
  - 15.5 At the conclusion of a DRC the Children's Registrar will provide a report to the Court indicating whether or not an agreement has been reached by all the parties and, if an agreement has not been reached, the Children's Registrar will, in consultation with the parties, identify the issues remaining in dispute to allow the Court to allocate hearing time.
16. Conference outcomes
    - 16.1 Where an agreement has been reached by all the parties, proposed consent orders will be prepared by one of the parties and presented at the next mention date of the matter before the Children's Court.
  17. Confidentiality
    - 17.1 The confidentiality of DRCs is protected under clause 11 of the Children and Young Persons (Care and Protection) Regulation 2000 subject to the exceptions provided by that clause.
    - 17.2 Directions made by a Children's Registrar after the conclusion of a DRC, and any proposed consent orders that are prepared, are not subject to confidentiality.
- Alternative Dispute Resolution  
conducted under section 65A**
18. Where the Court makes an order that the parties to a care application attend external ADR under section 65A of the Care Act the Court expects that all attendees at that service will comply with the responsibilities and obligations that apply in a DRC as required by this Practice Note.
  19. The Bidura Pilot
    - 19.1 A new model of external ADR under section 65A of the Care Act is currently being trialled at Bidura Children's Court (the Bidura Pilot).

- 19.2 The Bidura Pilot applies to matters listed at Bidura Children's Court, and to matters at other courts determined by the President of the Children's Court as not suitable for a DRC but suitable for external ADR.
20. Circumstances in which a case may be referred to the Bidura Pilot
- 20.1 A matter cannot be referred to the Bidura Pilot unless:
- with respect to a care application under section 61 of the CareAct a determination by the Court under section 71 of the CareAct that a child is in need of care and protection has been made;
  - with respect to an application under section 90 of the Care Act for variation/rescission of a care order or orders, leave for the application has been granted;
  - suitable arrangements can be made for the attendance of any party who is in custody.
- 20.2 If appropriate, more than one conference under the Bidura pilot may be held in a matter.
- 20.3 Wherever possible, an external ADR must be organised between two to four weeks following referral. All parties and their legal representatives should make every reasonable effort to be available for the external ADR conference.
21. Referral of matters back to the Children's Court
- 21.1 At the conclusion of an externalADR conference, the convenor will provide a report to the Court stating whether or not an agreement has been reached by the parties and, if an agreement has not been reached, the convenor will, in consultation with the parties, identify the issues remaining in dispute to allow the Court to allocate hearing time.
22. Confidentiality
- 22.1 Parties attending an externalADR service will be required to sign a Confidentiality Agreement. The disclosure of matters discussed during external ADR is only permitted where such disclosure is required by law. Any agreement reached by all the parties during external ADR (or the fact that agreement could not be reached) is not subject to confidentiality.

Dated: 4 February 2011.

His Honour JUDGE MARK MARIEN, S.C.,  
President

- Galaxia Place From T Junction with proposed Porcupine Road at Sundowner Lodge to Rock Creek.

#### TOTALIZATOR ACT 1997

##### Section 71

##### ORDER

##### Participating Jurisdiction Declaration

- 1 (a) I, Kevin Greene, being the Minister for Gaming and Racing in the State of New South Wales, hereby declare that Germany is taken to be a participating jurisdiction for the purposes of section 71 of the Totalizator Act 1997 with effect from the date of publication of this Order in the *NSW Government Gazette* subject to the other provisions of this Order
- (b) The limitation in (a) above does not exclude the making of a further order or orders in similar terms to this Order, at the discretion of the Minister.
- 2 I also declare that Germany is taken to be a participating jurisdiction for the purposes of section 71 of the Totalizator Act 1997, while all of the following circumstances apply:

## 2.1 Rules of betting

All bets processed by Sportech PLC and related transactions in respect of totalizators pooled with TAB Limited New South Wales pools are subject to the Totalizator Rules of betting as apply to TAB Limited totalizator betting in New South Wales at the time the bet has been placed by a third party and received by Sportech PLC at that time.

## 2.2 Automated Totalizator Monitoring System (ATMS) and compliance with requests

(a) All totalizator pools pooled by Sportech PLC with TAB Limited New South Wales pools are subject to the operation of the Automated Totalizator Monitoring System, for the time being operating in New South Wales (or an approved equivalent similar system), only as follows:

- (1) in respect of collatable totalizator pools: final collations and pool totals; and
- (2) in respect of non-collatable totalizator pools: pool totals.

(b) That Sportech PLC complies with all reasonable requests from the NSW Minister for Gaming and Racing or the NSW Office of Liquor Gaming and Racing for information relating to any totalizator bets or cancelled totalizator bets processed by Sportech PLC or any related transactions, without unreasonable delay.

3 I also declare that should I form the view that any of the circumstances specified in paragraphs 2.1 and 2.2 above have ceased to apply, and I notify Sportech PLC that a 30 day review period will apply to this Order, Germany will cease to be taken to be a participating jurisdiction within 30 days of the date of the notification, unless I form the view that the circumstances once again apply and I notify Sportech PLC of that view before the expiry of the 30 day review period.

Dated this 1st day of February 2011.

KEVIN GREENE MP  
Minister for Gaming and Racing

**TOTALIZATOR ACT 1997**

## Section 71

## ORDER

## Participating Jurisdiction Declaration

1 (a) I, Kevin Greene, being the Minister for Gaming and Racing in the State of New South Wales, hereby declare that the United States of America is taken to be a participating jurisdiction for the purposes of section 71 of the Totalizator Act 1997 with effect from the date of publication of this Order in the *NSW Government Gazette* subject to the other provisions of this Order.

(b) The limitation in (a) above does not exclude the making of a further order or orders in similar terms to this Order, at the discretion of the Minister.

2 I also declare that the United States of America is taken to be a participating jurisdiction for the purposes of section 71 of the Totalizator Act 1997, while all of the following circumstances apply:

## 2.1 Rules of betting

All bets processed by Sportech Racing LLC (USA) and related transactions in respect of totalizators pooled with TAB Limited New South Wales pools are subject to the Totalizator Rules of betting as apply to TAB Limited totalizator betting in New South Wales at the time the bet has been placed by a third party and received by Sportech Racing LLC (USA) at that time.

## 2.2 Automated Totalizator Monitoring System (ATMS) and compliance with requests

(a) All totalizator pools pooled by Sportech Racing LLC (USA) with TAB Limited New South Wales pools are subject to the operation of the Automated Totalizator Monitoring System, for the time being operating in New South Wales (or an approved equivalent similar system), only as follows:

- (1) in respect of collatable totalizator pools: final collations and pool totals; and
- (2) in respect of non-collatable totalizator pools: pool totals.

(b) That Sportech Racing LLC (USA) complies with all reasonable requests from the NSW Minister for Gaming and Racing or the NSW Office of Liquor Gaming and Racing for information relating to any totalizator bets or cancelled totalizator bets processed by Sportech Racing LLC (USA) or any related transactions, without unreasonable delay.

3 I also declare that should I form the view that any of the circumstances specified in paragraphs 2.1 and 2.2 above have ceased to apply, and I notify Sportech Racing LLC (USA) that a 30 day review period will apply to this Order, Germany will cease to be taken to be a participating jurisdiction within 30 days of the date of the notification, unless I form the view that the circumstances once again apply and I notify Sportech Racing LLC (USA) of that view before the expiry of the 30 day review period.

Dated this 1st day of February 2011.

KEVIN GREENE MP  
Minister for Gaming and Racing

**TRANSPORT ADMINISTRATION ACT 1988**

Land Acquisition (Just Terms Compensation) Act 1991

Notice of Compulsory Acquisition of Land for the  
Purposes of the Transport Construction Authority

THE Transport Construction Authority, with the approval of Her Excellency the Governor with the advice of the Executive Council, declares that the land described in the Schedule hereto is acquired by compulsory process under the provisions of the Land Acquisition (Just Terms Compensation) Act 1991 for the purposes of the Transport Construction Authority, as authorised by the Transport Administration Act 1988.

Dated this 1st day of February 2011.

CHRIS LOCK,  
Chief Executive

\_\_\_\_\_  
SCHEDULE

All that piece or parcel of land situated at Mount Druitt, in the Local Government Area of Blacktown, Parish of Rooty Hill, County of Cumberland, being the land described as Lot 3 in Deposited Plan 719982, Folio Identifier 3/719982 and said to be in the ownership of Seranin Pty Limited. TCA Reference: 1139542\_2

**CONTAMINATED LAND MANAGEMENT ACT 1997**

## Declaration of Significantly Contaminated Land

(Section 11 of the Contaminated Land Management Act 1997)

Declaration Number 20101120; Area Number 3292

THE Environment Protection Authority (EPA) declares the following land to be significantly contaminated land under the Contaminated Land Management Act 1997 ("the Act"):

## 1. Land to which this declaration applies ("the site")

This declaration applies to the part of Blackwall Road and adjacent footpaths located to the east of 177-181 Blackwall Road, Woy Woy NSW (i.e. to the east of Lots 11, 12 and 13 in DP6846 within the local Government Area of Gosford City Council). The land to which this declaration applies is shown on the attached figure.

## 2. Nature of contamination affecting the site:

The EPA has found that the site is contaminated with the following substances ("the contaminants"):

- Petroleum Hydrocarbons (TPH);
- Toluene, Ethylbenzene and Xylene; and
- Naphthalene.

## 3. Nature of harm that the contaminants may cause:

The EPA has considered the matters in s.12 of the Act and for the following reasons has determined that the land is contaminated and that the contamination is significant enough to warrant regulation under the Act:

- Groundwater is contaminated with petroleum hydrocarbons, toluene, ethylbenzene, xylene and naphthalene at concentrations exceeding beneficial uses criteria; and
- Contaminated groundwater has migrated towards residential properties (with groundwater extraction bores) and Brisbane Water.

## 4. Further action under the Act

The making of this declaration does not prevent the carrying out of voluntary management of the site and any person may submit a voluntary management proposal for the site to the EPA. If the proposal satisfies the requirements of s.17 of the Act the EPA may agree not to issue a management order to the person or persons bringing the proposal.

## 5. Submissions invited

The public may make written submissions to the EPA on:

- Whether the EPA should issue a management order in relation to the site; or
- Any other matter concerning the site.

Submissions should be made in writing to:

Manager Contaminated Sites  
Department of Environment, Climate Change and Water  
PO Box A290  
Sydney South NSW 1232

or faxed to (02) 9995 5930

by not later than 28 February 2011.

Date signed: 31 January 2011.

NIALL JOHNSTON,  
Manager, Contaminated Sites,  
Department of Environment, Climate Change and Water

## NOTE:

## Management order may follow

If management of the site or part of the site is required, the EPA may issue a management order under section 14 of the Act.

## Amendment/Repeal

This declaration may be amended or repealed. It remains in force until it is otherwise amended or repealed. The subsequent declaration must state the reasons for the amendment or repeal (section 44 of the Act).

## Information recorded by the EPA

Section 58 of the Act requires the EPA to maintain a public record. A copy of this significantly contaminated land declaration will be included in the public record.

## Information recorded by councils

Section 59 of the Act requires the EPA to give a copy of this declaration to the relevant local council. The council is then required to note on its planning certificate issued pursuant to section 149 (2) of the Environmental Planning and Assessment Act 1979.

Act that the land is declared significantly contaminated land. The EPA is required to notify council as soon as practicable when the declaration is no longer in force and the notation on the section 149 (2) certificate is no longer required.

Relationship to other regulatory instrument

This declaration does not affect the provisions of any relevant environmental planning instruments which apply to the land or provisions of any other environmental protection legislation administered by the EPA.

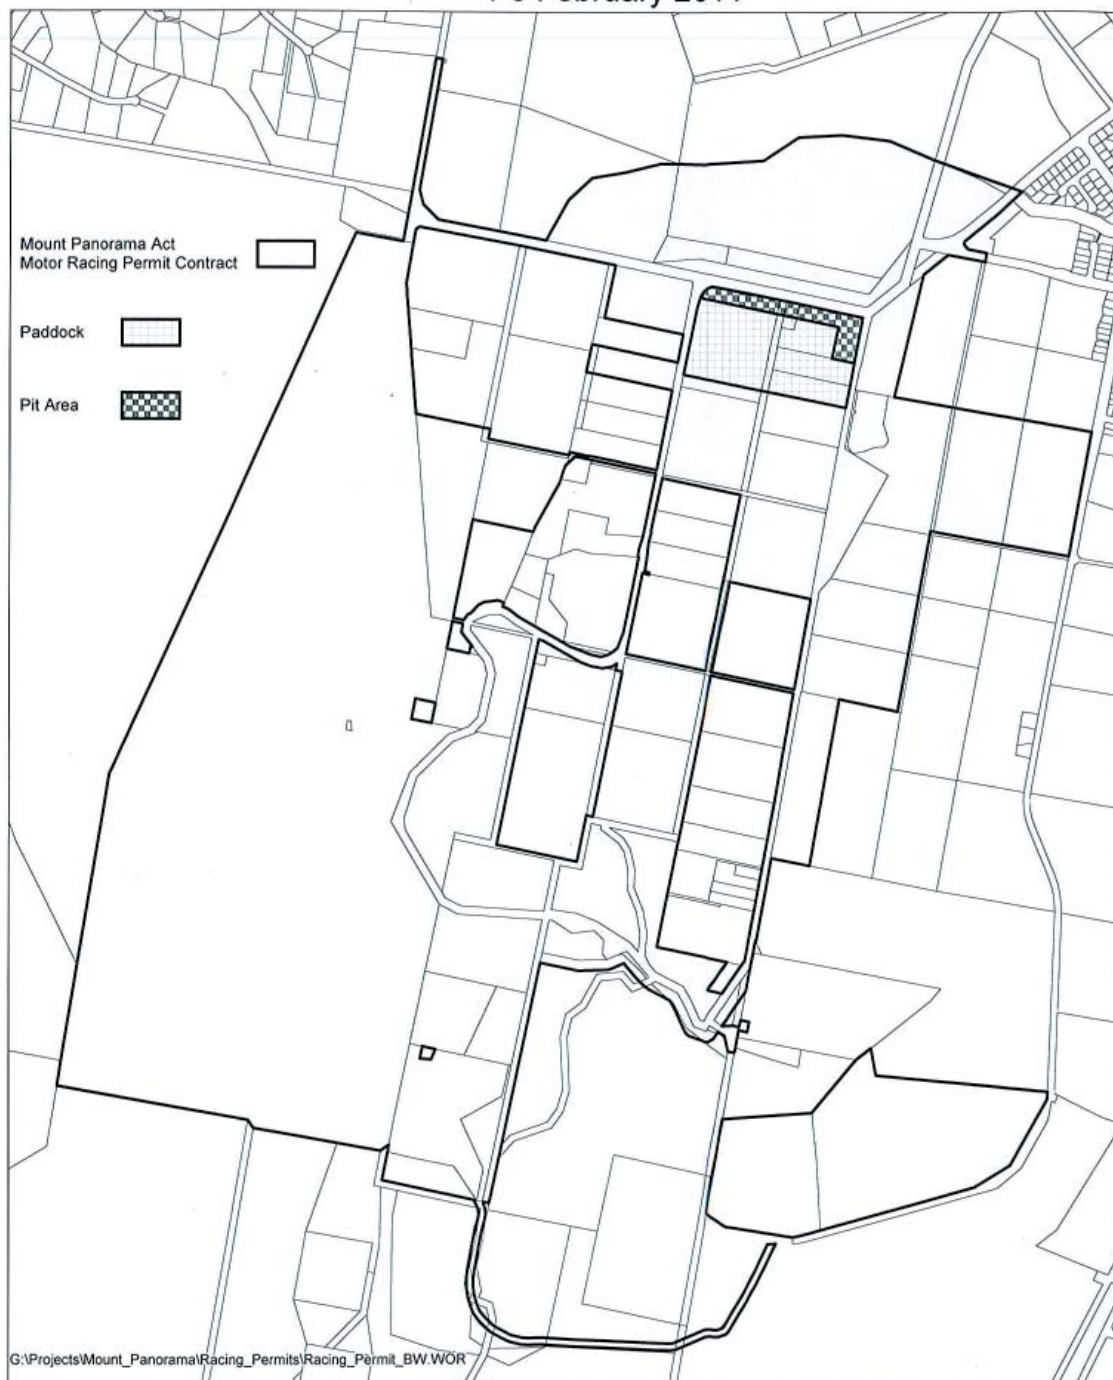

**MOUNT PANORAMA MOTOR RACING ACT 1989**

Conduct of Motor Racing and Associated Events  
Mount Panorama

IN pursuance of the provisions of section 4 of the Mount Panorama Motor Racing Act 1989, I declare that the lands, as shown by hatching on the diagram hereunder shall constitute the Mount Panorama Circuit for the purpose of motor racing, practice and associated events during the period 4 February to 7 February 2011, both dates inclusive.

KEVIN GREENE, M.P.,  
Minister for Gaming and Racing, Minister for Major Events  
and Minister for Sport and Recreation

**BATHURST REGIONAL COUNCIL**  
Mt Panorama Circuit  
2011 Bathurst 12 Hour Event  
4-6 February 2011

Bathurst Regional Council expressly disclaims all liability for errors or omissions of any kind whatsoever, or any loss, damage or of consequence which may arise from any person relying on information in this Plan.
