

Government Gazette

of the State of

New South Wales

Number 117–Other
Friday, 18 March 2022

The New South Wales Government Gazette is the permanent public record of official NSW Government notices. It also contains local council, non-government and other notices.

Each notice in the Government Gazette has a unique reference number that appears in parentheses at the end of the notice and can be used as a reference for that notice (for example, (n2019-14)).

The Gazette is compiled by the Parliamentary Counsel's Office and published on the NSW legislation website (www.legislation.nsw.gov.au) under the authority of the NSW Government. The website contains a permanent archive of past Gazettes.

To submit a notice for gazettal, see the Gazette page.

HEALTH INSURANCE LEVIES ACT 1982

NOTICE OF PRESCRIBED RATE

Pursuant to the *Health Insurance Levies Act 1982*, the prescribed rate for the purposes of the Act for the period commencing on 1 April 2022 will be \$1.64.

Scott Johnston
Chief Commissioner of State Revenue
Date: 9 March 2022

SUBORDINATE LEGISLATION ACT 1989

Notice of consultation on a proposal to make the *Independent Pricing and Regulatory Tribunal Regulation 2022*

Notice is hereby given, under section 5(2)(a) of the *Subordinate Legislation Act 1989*, that the Independent Pricing and Regulatory Tribunal of NSW (IPART) is seeking public submissions on a proposal to make the *Independent Pricing and Regulatory Tribunal Regulation 2022*.

The objects of the regulation are to modify the default arbitration rules set out in the *Commercial Arbitration Act 2010* for certain arbitrations about access to rail and water infrastructure in NSW.

The proposed new regulation would remake an existing regulation which is due to be automatically repealed in September 2022. The proposed new regulation is substantively identical to the existing regulation.

To view a copy of the proposed regulation and a regulatory impact statement, or to make a submission, please visit our website at: <https://www.ipart.nsw.gov.au/remake-of-the-ipart-regulation-2017>

Submissions close on 13 April 2022.

Dated 16 March 2022

James Diment
Director Legal
IPART

List of authorised explosives and categories of prohibited explosives in NSW

Under the Explosives Regulation 2013
2022

REGISTER OF EXPLOSIVES

The publication of this register, containing a list of authorised explosives and categories of prohibited explosives for NSW, is approved by SafeWork NSW in accordance with clause 63 of the Explosives Regulation 2013. It replaces the previous list published in August 2020.

Information on the latest laws can be checked by visiting the NSW legislation website www.legislation.gov.au
This publication does not represent a comprehensive statement of the law as it applies to particular problems or to individuals or as a substitute for legal advice. You should seek independent legal advice if you need assistance on the application of the law to your situation.
This material may be displayed, printed and reproduced without amendment for personal, in-house or non-commercial use.

4.5. Liquid oxygen explosive mixtures	53
4.6. Expired explosives	53
4.7. Unauthorised explosives	53

Introduction

SafeWork NSW follows the United Nations (UN) system for classifying explosives for transport, as a means of identifying explosive hazards. This classification system categorises explosives into hazard levels by assigning different divisions – such as 1.1, 1.2, 1.3, 1.4, 1.5 and 1.6.

These divisions are further assigned to groups that are compatible with each other and allow safe storage and transport without increasing the risk or hazard associated with the explosives.

The full classification of an explosive is known as its classification code and comprises the hazard division followed by a letter, known as the compatibility group.

The common hazard divisions encountered in NSW are:

- Division 1.1 – substances and articles which have a mass explosion hazard.
- Division 1.3 – substances and articles which have a fire hazard with minor blast or projection hazard.
- Division 1.4 – substances and articles which present no significant hazard.
- Division 1.5 – very insensitive substances which have a mass explosion hazard.

The common compatibility groups encountered in NSW are:

- B – articles containing a very sensitive primary explosive substance.
- C – an explosive substance used to propel projectiles out of a weapon.
- D – a detonating explosive that can cause mass destruction.
- G – a pyrotechnic substance or article used to give light, create smoke, or give a loud report.
- S – a substance or article packed in a package in a manner that it will not present any significant hazard if it is accidentally functioned within that package.

An example of a ‘most hazardous explosive’ is a detonator that has a classification code of 1.1B.

An example of a ‘least hazardous explosive’ is a party popper, in its packaging, which has a classification code of 1.4S.

Part 4 of the Explosives Regulation 2013 provides that SafeWork NSW as the regulatory authority may register an explosive as an authorised explosive under the UN classification system outlined above. Clause 54 provides that any explosive not authorised is prohibited. Clause 55 makes it an offence to ‘handle any prohibited explosive’ and clause 64 makes it an offence to falsely represent an explosive as authorised.

When SafeWork NSW authorises an explosive, it assigns a classification code according to the UN system and places the commercial name or trade name, or description, of that explosive on a register. The register contains a list of commercial names or trade names, or descriptions, of all explosives that are currently authorised for use in NSW. If an explosive’s name or description does not appear on the list in Section 1, the explosive is not authorised.

Certain Commonwealth explosives and display fireworks are separately authorised according to Sections 2 and 3 respectively.

1. Listing by United Nations number

Under the UN classification system headings of UN number, proper shipping name and classification code, the following table comprises the full listing of commercial or trade names, or descriptions, of the explosives that have been authorised in NSW, in UN number order.

Packaged explosives authorised with a hazard division other than 1.1 are only authorised in the packaging that, when design tested or authorised by analogy, resulted in the classification code being assigned. Use of alternative packagings may result in a higher hazard classification.

The list below contains items in a red box to indicate conditions apply to the authorisation, such as a restriction on authorised product codes, and removes legacy entries for which records are no longer available. Enquiries about either of these changes can be made by contacting SafeWork NSW.

UN number	Authorised product name	Class	Proper shipping name
0012	BAIKAL CARTRIDGES FOR RIFLES	1.4S	CARTRIDGES FOR WEAPONS, INERT PROJECTILE or CARTRIDGES, SMALL ARMS

2. Authorised Commonwealth explosives

The Directorate of Ordnance Safety (DOS) is the technical regulator of Explosive Ordnance storage and transport activities within the Australian Defence Organisation. An important activity of the DOS is the compilation of the Defence Explosive Ordnance Classification Listing (DEOCL) issued at regular intervals on a restricted basis.

Increasingly, civilian contractors handle defence ordnance and some of their activities come under the NSW explosives regulatory regime. This makes it necessary to formally recognise the contents of DEOCL as explosives authorised under NSW legislation.

Accordingly, the DEOCL as amended from time to time is recognised in NSW as forming part of the register of authorised explosives under clause 58 of the Explosives Regulation 2013.

3. Authorised display fireworks

With the exception of the prohibited fireworks identified in Section 4.2, display fireworks classified by their manufacturer with the proper shipping name FIREWORKS and intended for use by licensed professional pyrotechnicians in a fireworks display are generically authorised in NSW under clause 58 of the Explosives Regulation 2013.

This generic authorisation comprises UN numbers 0333, 0334, 0335, 0336, and 0337, and is only valid where the display fireworks have been classified in accordance with the United Nations Model Regulations (UNMR) and the United Nations Manual of Tests and Criteria (UNMTC). Where test results obtained according to the UNMTC are not available, display fireworks must be classified according to the Default Fireworks Classification Table in the UNMR.

Manufacturers and importers must provide evidence of the basis for the classification of a fireworks article upon request by SafeWork NSW.

4. Categories of prohibited explosives

The following categories of explosives are prohibited unless SafeWork NSW has granted an exemption under clause 112 or clause 113 of the Explosives Regulation 2013 or specific authorisation has been granted under clause 58 or 59 of the Explosives Regulation 2013.

4.1. Safety cartridges

A safety cartridge or other munitions is prohibited where:

- a. the bullet is not firmly fixed in the cartridge case
- b. the bullet has a split or cracked case
- c. the bullet has a case that is liable to split or rupture when fired in a properly constructed weapon of a chambering and calibre appropriate to a cartridge of its class
- d. the bullet or other projectile explodes, or contains an incendiary or tracer composition, or contains a lachrymatory, nauseating or toxic substance

but does not include:

- e. a safety cartridge in 4.1 (a), (b) and (c) held under a collector's licence issued by the police if the cartridges are kept separate from cartridges for use or for supply
- f. a safety cartridge for use by the Police Service, the Commonwealth or a State or Territory of the Commonwealth, or by the Armed Services
- g. the import, with the approval in writing of the Regulatory Authority, of a safety cartridge having a bullet or other projectile that contains an incendiary or tracer composition
- h. a safety cartridge having a bullet or other projectile approved in writing by the Regulatory Authority.

4.2. Fireworks

A firework is prohibited where the firework:

- a. contains a composition of a chlorate in admixture with sulphur, a sulphide or phosphorus (other than amorces, a streamer cone or a confetti bomb)
- b. is of such construction that firework composition can escape from it
- c. on ignition may project through the air in an erratic or unpredictable flight
- d. contains arsenic or a compound of arsenic as an ingredient of its composition
- e. does not have displayed on it instructions in the English language relating to the manner in which it should be ignited and the manner in which it is designed to behave
- f. ignites in less than three seconds, or more than 15 seconds, after its wick or touch paper has been ignited in accordance with the instructions displayed on it
- g. after having been set up and ignited in accordance with the instructions displayed on it, behaves otherwise than in accordance with those instructions.
- h. can be ignited or discharged by means other than the lighting of a wick, touch paper or by electric initiation, other than a distress signal, amorces, snaps for bon-bon crackers, streamer cones, model rocket propellant devices and confetti bombs
- i. is a rocket other than a distress signal
- j. is a trick firework
- k. is a firecracker that can be initiated by striking on the side of a match-box
- l. are aerial salutes larger than 75mm.

4.3. Distress signals

A distress signal is prohibited if it does not comply with AS 2092 (Pyrotechnic marine distress flares and signals for pleasure craft) or an equivalent International Standards Organisation standard.

4.4. Model rocket propellant devices

A model rocket propellant device is prohibited if it:

- a. contains a composition of a chlorate in admixture with sulphur, a sulphide or phosphorus
- b. is of such construction that ignitable substances can escape from it
- c. may explode either wholly or in part
- d. is used for a purpose other than that allowed for by a recognised model rocket club

The use of model rocket propellant devices containing an ignitable substance or ignitable substances not exceeding 15 grams Net Explosive Quantity (NEQ) does not require a licence.

Model rocket propellant devices containing an ignitable substance or ignitable substances exceeding 15 grams NEQ but not exceeding 62.5 grams NEQ may only be used by a person who is a member of a recognised model rocket club.

Model rocket propellant devices containing an ignitable substance or ignitable substances exceeding 62.5 grams NEQ may only be used by a person who is a member of a recognised model rocket club and holds a pyrotechnician's licence endorsed for the use of such devices.

4.5. Liquid oxygen explosive mixtures

A liquid oxygen explosive mixture, which is a mixture of liquid oxygen and a carbonaceous material and is known as a liquid oxygen explosive, is prohibited unless the mixture is created for immediate use as an integral part of a manufacturing process and that process is approved in writing by SafeWork NSW.

4.6. Expired explosives

Any explosive that has passed its manufacturer recommended expiry date is prohibited and shall not be handled other than with the written approval of SafeWork NSW.

4.7. Unauthorised explosives

Any explosive that does not appear on the list of authorised explosives is a prohibited explosive unless otherwise authorised by SafeWork NSW.

GEOGRAPHICAL NAMES ACT 1966

PURSUANT to the provisions of Section 10 of the *Geographical Names Act 1966*, the Geographical Names Board has this day assigned the name listed hereunder as a geographical name.

Canowindra Sports Complex for a reserve that adjoins Tilga Street in Canowindra, Cabonne Local Government Area.

The position and extent for this feature is recorded and shown within the Geographical Names Register of New South Wales. This information can be accessed through the Board's website at www.gnb.nsw.gov.au

THOMAS GRINTER
A/Chair

Geographical Names Board
346 Panorama Ave
BATHURST NSW 2795

Anti-Discrimination Act 1977

EXEMPTION ORDER

Under the provisions of section 126 of the *Anti-Discrimination Act 1977* (NSW), the exemption order granted to the Australian Indigenous Minority Supplier Office (trading as Supply Nation) on 29 April 2019 is HEREBY VARIED to read:

Under the provisions of section 126 of the *Anti-Discrimination Act 1977* (NSW), an exemption is given from sections 8 and 51 of the *Anti-Discrimination Act 1977* (NSW) to the Australian Indigenous Minority Supplier Office (trading as Supply Nation) to designate and recruit the positions of:

Manager, Indigenous Business Engagement

Manager, Certification and Audit

Manager, Programs

Manager, Partnerships and

Manager, People and Culture

for Aboriginal and/or Torres Strait Islander persons only.

This exemption will remain in force until 29 April 2029.

Dated this 16 March 2022

Manager, Governance & Advice
Delegate of the President
Anti-Discrimination NSW

**Termination of Strata Scheme for the Property at 2 Cobbon Crescent JINDABYNE
NSW 2627 (known as “Snowhaven”)**

THE OWNERS – STRATA PLAN NO 80609

Notice to send in claims

1. On 20 December 2021 and 7 March 2022, orders were made by the Supreme Court of New South Wales terminating the strata scheme for Strata Plan No 80609 and for the winding up of the owners corporation known as “The Owners – Strata Plan No 80609”.
2. Any person having a claim against the owners corporation, or security against a lot in the strata plan, is required on or before 6 April 2022 to send particulars of the claim and of any security held to Andrew Sallway and Jeffrey Marsden, BDO Australia, Level 11, 1 Margaret Street, SYDNEY NSW 2000.

Anti-Discrimination Act 1977

EXEMPTION ORDER

Under the provisions of section 126 of the *Anti-Discrimination Act 1977* (NSW), an exemption is given from sections 49D and 51 of the *Anti-Discrimination Act 1977* (NSW) to the NSW Council for Intellectual Disability to advertise, designate and recruit project worker and project assistant roles for people who self-identify as having an intellectual disability.

This exemption will remain in force for 10 years.

Dated this 16 March 2022
