FISHERIES ACT 1982

Notice to Licence Holders in The Southern Zone Rock Lobster Fishery Arrangements for Fishing in May

AS you are aware, support has been provided for to undertake a commercial fishing trial in May 2004. This notice is to advise that an exemption from the winter seasonal closure has been implemented to allow fishing in May 2004 in the Southern Zone Rock Lobster Fishery. A copy of the exemption is attached. Please read it carefully as the Fisheries Act 1982 provides that it is an offence to breach a condition of an exemption.

Only fishing activity undertaken pursuant to your SZRLF licence is authorised by this exemption, therefore you must comply with your normal licence conditions. In particular, you are reminded that this means that you may only fish if there are uncaught quota entitlements endorsed on your licence. No new quota entitlements have been issued for the May fishing trial. The dockside monitoring arrangements continue to apply as they do throughout the normal season.

In addition to normal licence conditions, the exemption also provides that licence holders or registered masters must make a prior-to-fishing report to PIRSA Fishwatch on 1800 065 522 and provide the following information:

- the name of the licence holder or registered master making the call;
- the licence number of the licence pursuant to which the exempted activity is to be undertaken;
- an estimated time of landing and place of landing;
- the time and date the exempted activity will commence; and
- the time and date the exempted activity will cease.

You must not land any rock lobster before your estimated time of landing. If the estimated time of landing or place changes during the fishing trip, you must make another report, on the same number (1800 065 522) at least 1 hour prior to landing, and provide a new landing time and/or place.

SARDI Aquatic Sciences will be doing some at-sea monitoring and sampling during the May trial. Your co-operation with this monitoring is encouraged and will be appreciated.

If you have any questions about these arrangements, please contact Sean Sloan, Fisheries Manager, on (08) 8226 0219, or your local Fisheries Office.

Yours sincerely,

W. ZACHARIN, Director of Fisheries

2.1 The Company must be able to access and control a Location or other area used in connection with these conditions to the extent necessary to comply with these conditions.

2.2 Conditions of access negotiated by the Company must include:

(a) The landowner's agreement that the Company will provide contact details to the Nominated Officer.

(b) The landowner's agreement that potential purchasers will be notified of any current sites or past sites that are not signed off.

3. Notification of Plantings

3.1 That before the commencement of the winter seeding program and the summer seeding program, an overview of each season's planting schedule be provided to the Nominated Officer in writing.

3.2 Before planting the following information for each site should be provided to the Nominated Officer:

(a) The GPS co-ordinates to identify the perimeter of every area, using the GDA 94 datum (or nominated equivalent that allows conversion to this datum).

(b) The contact details of the landowner or his representative to enable authorised officers to seek consent to entry.

(c) Identification of the GMO type proposed to be grown at the area, and the area of each that is to be sown.

(d) Estimated date of planting, flowering and harvest of the site.

4. Measures to manage gene flow

4.1 For each Location, one of the following methods for managing gene flow must be adopted:

(a) The GMO at the Location must be male sterile types only. It must be surrounded by an Isolation Zone extending outwards by 400 m in all directions from the outer edge of the Location.

(b) All flowering heads of the GMO at the Location must be covered by selfing bags at least 7 days prior to flowering. The bags must remain on the GMO for the duration of the flowering of the GMO. The Location must be surrounded by an Isolation Zone extending outwards by 400 m in all directions from the outer edge of the Location.

(c) The GMO at the Location must be housed in an insect-proof tent. The tent must be erected at least 7 days prior to flowering of the GMO and remain in place for the duration of flowering of the GMO. The Location must be surrounded by an Isolation Zone extending outwards by 400 m in all directions from the outer edge of the Location.

(d) The Location must be surrounded by an Isolation zone extending outwards by 1km in all directions from the outer edge of the Location; or

(e) The Location must be surrounded by a Pollen Trap. The Pollen Trap must be surrounded by an Isolation Zone extending outwards by 400 m in all directions from the outer edge of the Pollen Trap.

5. Conditions relating to Isolation Zones

5.1 No *Brassica* crop may be grown in an Isolation Zone while the GMO is being grown at the Location, if there is a risk of outcrossing from the GMO to the crop through pollination synchronicity.

5.2 Where a risk exists, either the *Brassica* crop or the GMO in the Location (and its Pollen Trap, if any) must be destroyed prior to flowering.

5.3 If the GMO at the Location (and Pollen Trap, if any) is destroyed pursuant to this condition, the destruction of the GMO (and Pollen Trap, if any) is taken to be a harvest for the purposes of this condition.

Note: If a Location (and Pollen Trap, if any) has to be destroyed because a Brassica Crop is planted in the Isolation Zone, the Location is taken to have been harvested. Cleaning of the Location and Pollen Trap must occur soon afterwards (see the conditions below about cleaning Locations post harvest) and post harvest monitoring of the Location and Pollen Trap must be commenced.

6. Conditions relating to Pollen Traps

- 6.1 Once planted, Pollen Trap plants must be handled and controlled as if they are GMO, and Material from Pollen Trap plants must be handled and controlled as if it is Material from the GMO.
- 6.2 A Pollen Trap must be able to be accessed and controlled by the Company to an extent that is commensurate with the Company's rights to access and control the Location within it.

Note: Conditions about Cleaning Pollen Traps occur elsewhere in these conditions.

7. Monitoring during growing the GMO

- 7.1 Each Monitoring Zone must be monitored for the presence of Canola at least once every 35 days from the planting of the GMO until either harvest of the GMO or the Location is Cleaned. Any Canola detected during monitoring must be destroyed before seed maturity.
- 7.2 Each Isolation Zone must be monitored to satisfy conditions 5.1 and 5.2, at least once every 35 days commencing 14 days prior to flowering of the GMO and concluding when the GMO has completed flowering.
- 7.3 The results of monitoring activities must be reported to the Nominated Officer in writing. Results must be reported to the Nominated Officer within 35 days of any day on which monitoring occurs. Results of reporting must include:
- (a) identification details of the areas monitored;
 - (b) details of the date of monitoring;
 - (c) the names of the person or persons who undertook the monitoring and details of the experience, training or qualification that enabled them to recognise Volunteer plants and *Brassica* plants;
 - (d) the number of Volunteer plants and *Brassica* plants if any;
 - (e) details of whether the Volunteer plants and *Brassica* plants observed, if any, occurred in the Location, the Pollen Trap or the Monitoring Zone;
 - (f) details of the development stages reached by the Volunteer plants and *Brassica* plants, if any;
 - (g) details of methods used to destroy Volunteer plants and *Brassica* plants identified if any; and
 - (h) details of the date on which Volunteer plants and *Brassica* plants were cleaned.

8. Harvest of GMO

- 8.1 Subject to Condition 8.5 below, the GMO at a Location and Pollen Trap plants may be harvested for seed only.
- 8.2 Subject to Condition 8.5 below, following harvest of the GMO and Pollen Trap plants (if any):
- (a) Any harvested seed must be immediately, or as soon as is reasonably practicable:
 - (i) stored in a sealed container that is signed so as to indicate that it contains GM Canola seed, within a locked facility that is signed so as to indicate that genetically modified Canola seed is stored within the facility; or
 - (ii) exported; or
 - (iii) rendered unviable by autoclaving; or
 - (iv) destroyed by burning; or
 - (v) destroyed by burial under 1 m of soil.
- 8.3 Subject to Condition 8.5 below, any Canola seed obtained from harvest may only be transported to the extent necessary for seed cleaning or treating, to store it, export it or destroy it.
- 8.4 An amount of harvested Canola seed and/or Material from the GMO, obtained from harvest, may be saved and transported to the Seed Services Centre and SARDI Field Crops Pathology Unit, Primary Industries and Resources South Australia at Urrbrae, South Australia, where:
- 8.4.1 testing may be done, including:
- (a) germination analyses may be conducted on the harvested Canola seed;
 - (b) purity analysis may be conducted on the harvested Canola seed; and
 - (c) analysis of the presence of weed seed may be conducted on the harvested Canola seed;
 - (d) compositional analyses may be conducted on Material from the GMO; and

(e) pathogen analyses may be conducted on the harvested Canola seed.

- 8.4.2 Canola plants that develop in the course of the germination analyses must be destroyed prior to flowering.
- 8.4.3 The amount of harvested Canola seed and/or Material from the GMO that may be saved and transported is the amount necessary to perform the analyses.
- 8.4.4 Harvested Canola seed and/or Material from the GMO may be stored during the course of performing the analyses. Where Harvested Canola seed and/or Material from the GMO is stored for the purpose of analysis, it must be stored in a locked room. Within the room, the stored material must be stored in a sealed container that is signed so as to indicate that it contains GM Canola seed and/or Material from the GMO.
- 8.4.5 Once the analyses authorised by these agreement conditions have been completed and any other analyses have been completed, all GM Canola seed, Material from the GMO used in the analyses must be destroyed by either autoclaving, incineration, or autoclaving followed by incineration. Canola plants that are grown in the course of the germination analyses must be destroyed prior to flowering. All GM Canola seed not used in the analyses must be returned to the Company or destroyed as above.

9. Conditions relating to destruction by burial

- 9.1 Subject to condition 9.2 below, if the GMO, Pollen Trap plants, Material from the GMO or Material from Pollen Trap plants are destroyed by burial, the Company must:
- (a) within 30 days of burial, provide the Nominated Officer by notice in writing of the precise location of the Burial site (GPS coordinates and either a street address or other directions to the Location) and the date on which it was buried. The notice must identify the GMO or Pollen Trap plant, buried at the Burial site;
- (b) any emergence of Volunteer plants. If Volunteer plants are identified, the Burial site must be cleaned.
- 9.2 Monitoring of the Burial site is not required if burial takes place at a Municipal or commercial land fill and the Nominated Officer is provided with a written notice from the manager of the land fill undertaking:
- (a) not to disturb the Burial site for a period of at least 3 years from the date of burial; and
- (b) to notify both the Company and the Nominated Officer in writing of any significant disturbance of the Burial site that may affect the emergence of Volunteer plants.

10. Cleaning—post harvest and generally

- 10.1 Where Equipment, a Location or other area is used pursuant to these conditions in respect of GMOs, Material from GMOs, Pollen Trap plants or Material from Pollen Trap plants, it must be Cleaned.
- 10.2 Subject to condition 10.5, for each Location, either within 14 days of harvest of the GMO or 9 months after planting, the Location must be Cleaned.
- 10.3 Within 14 days of either harvest or Cleaning of the GMO at a Location, the Pollen Trap in respect of that Location, if any, must be Cleaned.
- 10.4 When Equipment is Cleaned, the area in which the Equipment is Cleaned must also be Cleaned.
- Note: For the sake of clarity, it is not necessary for Equipment to be Cleaned only at a Location.*
- 10.5 Cleaning must occur immediately or as soon as practicable after the use and before it is used for any other purpose.
- 10.6 *Note: For example, if seed is harvested with a mechanical harvester, the harvester must be Cleaned immediately following its use and before any other Canola is harvested.*
- 10.7 On the request of the Nominated Officer, the Nominated Officer must be provided with written documentation of the procedures in place to ensure continuing compliance with the Cleaning conditions in these conditions.
- Note: Burning and light tillage are strongly favoured as methods to Clean Locations and Pollen Traps post-harvest.*

11. Conditions relating to Grazing

- 11.1 The company must inform the owner of the land on which the location is situated of the marketing implications of any grazing of GM canola before commencement of the trial.
- 11.2 Evidence that the owner has been adequately informed must be presented to the nominated officer on request.

12. Reduction of the seed bank and secondary dormancy

- 12.1 Following Cleaning of any Location or Pollen Trap, light tillage must be carried out on each Location and Pollen Trap.
- 12.2 Subject to condition 12.4, light tillage must occur on at least two separate occasions in such a way as to promote the growth of any remaining Canola and to reduce onset of secondary dormancy of Canola seed.
- 12.3 The two occasions must be carried out at least 2 weeks apart.
- 12.4 If light tillage is used to Clean a Location or Pollen Trap, then only one subsequent occasion of light tilling must be performed.
- 12.5 All light tillage obligations must be performed within 12 months of harvest of the GMO or Pollen Trap.
- 12.6 The soil at the Location (and Pollen Trap, if any) must not be disturbed in a way that would bury plant material in that area to a depth of more than 50 mm, until at least 14 days after all light tillage obligations have been performed.
- Note: This condition prohibits 'deep tillage' (i.e., deep soil disturbance that would bury the GMO to a depth of more than 50 mm) to occur at the location or pollen trap until after light tillage obligations have been performed.*
- 12.7 A report on light tilling activities undertaken must be reported to the Nominated Officer in writing. Results must be reported to the Nominated Officer within 35 days of any day on which light tilling occurs. Results of reporting must include:
- (a) details of the Location (and Pollen Trap, if any) tilled; and
 - (b) details of the tillage methods used.

13. Conditions relating to light tillage

- 13.1 Light tillage may only be adopted as a method for destruction in conditions where germination of the GMO is reasonably likely to ensue (for example, immediately after rain or irrigation).
- Note: The incorporation of light tillage methods at times when germination of the GMO is not likely to ensue as a result (e.g., during a drought) will not be considered sufficient to satisfy light tillage conditions.*

14. Monitoring—post harvest and generally

- 14.1 Following Cleaning of each Location, the following places must be monitored for the existence of Volunteer plants:
- (a) the Location;
 - (b) the Pollen Trap in respect of the Location, if any; and
 - (c) any areas used to Clean Equipment used in connection with the GMO or to destroy the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants.
- 14.2 Following Cleaning of each Location, the Monitoring Zone in respect of the Location must be monitored for the existence of Volunteer plants of the GMO.
- 14.3 Monitoring must be performed by a person who is able to recognise Volunteer plants and *Brassica* plants.
- 14.4 Any Volunteer plants detected during monitoring must be Cleaned before seed maturity.
- 14.5 All the places required to be monitored must be monitored, with at least three site inspections to be undertaken during the April to November period. Additional monitoring may be required if conditions are conducive to growth outside traditional Canola growing periods.
- 14.6 The monitoring shall continue from the last day of Cleaning of the Location, and thereafter, until such time as the place to be monitored can meet site sign-off criteria, subject to condition 14.7. The site sign-off criteria is met when the aggregate GM Canola volunteers present in the previous 12 months are less than 50 per ha (equivalent to 1 per 200 m²) or if the site is less than 1 ha in size, a maximum number of 20 volunteers per site. Monitoring may cease when the Nominated Officer has provided a site sign-off notice in writing to the Company that further monitoring of the specified site is no longer required.
- 14.7 Where post-harvest site is planted to long-term pasture in the first year post-harvest, and continues as a regenerating pasture in the second, third and subsequent years post-harvest, the monitoring shall continue from the last day of Cleaning of the Location, and thereafter, until such time as the place to be monitored can meet site sign-off criteria. Active monitoring on these sites must resume when the site is

next cultivated and the monitoring shall continue until such time as the place to be monitored can meet site sign-off criteria.

- 14.8 The results of monitoring activities must be reported to the Nominated Officer in writing. Results must be reported to the Nominated Officer within 35 days of any day on which monitoring occurs. Results of reporting must include:
- (a) details of the areas monitored;
 - (b) details of the date of monitoring;
 - (c) the names of the person or persons who undertook the monitoring and details of the experience, training or qualification that enabled them to recognise Volunteer plants and *Brassica* plants;
 - (d) the number of Volunteer plants observed, if any;
 - (e) details of whether the Volunteer plants observed, if any, occurred in the Location, the Pollen Trap or the Monitoring Zone;
 - (f) details of the development stages reached by the Volunteer plants, if any;
 - (g) details of methods used to destroy Volunteer plants identified, if any; and
 - (h) details of the date on which Volunteer plants were Cleaned.

15. Use of Locations post-harvest

- 15.1 If the GMO is grown at a Location, no other Canola or *Brassica* plant of any kind may be planted at the location, or Pollen Trap in respect of the Location, if any, after harvest of the GMO, until monitoring obligations are satisfied, unless the brassica crop is for research trial purposes (e.g., to assess canola blackleg resistance).
- 15.2 If the GMO is grown at a Location, no other Canola may be grown at the Monitoring Zone in respect of the Location until monitoring obligations are satisfied, unless the brassica crop is for research trial purposes (e.g., to assess canola blackleg resistance).
- 15.3 Other crops may be grown at the site following harvest provided the company controls post harvest volunteers to the extent required under this order.

16. Transportation of the GMO, Material from GMO, Pollen Trap plants and Material from Pollen Trap plants

- 16.1 The GMO, Material from the GMO, Pollen Trap plants and Material from Pollen Trap plants must not be transported unless it is contained within a sealed durable container.
- 16.2 Every container used to transport the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants must be labelled:
- (a) to indicate that it contains genetically modified plant material; and
 - (b) with telephone contact numbers for the Company and instructions to contact the Company in the event that the container is broken or misdirected.
- 16.3 The Company must have in place accounting procedures to verify whether the same quantity of GMO, Material from the GMO, Pollen Trap Plant or Material from Pollen Trap plants sent is delivered and must document methods and procedures used for transportation of GMOs, Material from GMOs, Pollen Trap plants and Material from Pollen Trap plants.

17. Contingency Plans

- 17.1 Within 30 days of the date of the commencement of these conditions, a written Contingency Plan must be submitted to the Nominated Officer detailing measures to be taken in the event of the unintended presence of the GMO, Material from the GMO, Pollen Trap plants and Material from Pollen Trap plants, outside a Location, or Pollen Trap in respect of a Location, that must be monitored.
- 17.2 The Contingency Plan must include details of procedures to:
- (a) ensure the Nominated Officer is notified immediately if the Company becomes aware of the event;
 - (b) to destroy any of the GMOs, Material from the GMOs, Pollen Trap plants or Material from Pollen Trap plants; and
- 17.3 Monitor and destroy any Volunteer plants that may exist as a result of the event.
- 17.4 The Contingency Plan must be implemented in the event that the unintended presence of the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants is discovered outside an area that must be monitored.

18. Compliance Management Plan

- 18.1 Prior to growing the GMO, a written Compliance Management Plan must be provided to the Nominated Officer on request. The Compliance Management Plan must describe in detail how the Company intends to ensure compliance with these conditions and document that compliance.

SECTION 3: INTERPRETATION AND DEFINITIONS

Words and phrases used in these conditions have the same meanings as they do in the *Gene Technology Act 2000* (Cth) and the *Gene Technology Regulations 2001*.

Words importing a gender include any other gender.

Words in the singular include the plural and words in the plural include the singular.

Words importing persons include a partnership and a body whether corporate or otherwise.

References to any statute or other legislation (whether primary or subordinate) is to a statute or other legislation of the Commonwealth of Australia as amended or replaced from time to time unless the contrary intention appears.

Where any word or phrase is given a defined meaning, any other part of speech or other grammatical form in respect of that word or phrase has a corresponding meaning.

In this agreement:

'Brassica crops' means any crop of *Brassica* plants or Canola (and includes commercial *Brassica* crops).

'Brassica plants' means the species listed in the table at Table 1.

'Burial site' means a site at which the GMO or GM material from the GMO is destroyed by burial under at least 1 m of soil.

'Canola' means plants of the species *Brassica napus*.

'Clean' (or **'Cleaned'**), as the case requires, means:

- (a) in relation to a Location or other area (including a Pollen Trap, Monitoring Zone or Isolation Zone), the destruction of the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants in that Location or area, to the reasonable satisfaction of the Minister; or
- (b) in relation to Equipment, the removal and destruction of the GMO and Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants from the Equipment, to the reasonable satisfaction of the Minister.

'Department' means the Department of Primary Industries and Resources in South Australia.

'Destroy', (or **'Destroyed'** or **'Destruction'**), as the case requires, means killed by one or more of the following methods:

- (a) stalk pulling; or
- (b) light tillage; or
- (c) burning; or
- (d) treatment with herbicide; or
- (e) slashing; or
- (f) mowing; or
- (g) hand weeding; or
- (h) burial under 1 metre of soil; or
- (i) grazing; or
- (j) a combination of the above.

Note (1): 'As the case requires' has the effect that, depending on the circumstances, one or more of these techniques may not be appropriate. For example, in the case of killing the remains of harvest of the GMO, treatment of post harvest remains by herbicide would not be a sufficient mechanism.

Note (2): Where method (b) is adopted, this agreement contains additional conditions relating to light tillage as a method for destruction.

Note (3): Where method (h) is adopted, this agreement contains additional conditions relating to burial as a method for destruction.

Note (4): Where method (i) is adopted, this agreement contains additional conditions relating to grazing as a method for destruction.

'Equipment' includes harvesters, seeders, storage equipment, transport equipment (e.g., bags, containers, trucks), clothing and tools.

'GM' means genetically modified.

'Isolation Zone', means, in respect of a Location, an area of land surrounding either the Location, or the Location's Pollen Trap (if the Location is surrounded by a Pollen Trap) that is known not to contain any *Brassica* crops when the GMO is planted at the Location.

'Light tillage' or **'lightly tilled'** means the use of a technique to disturb the soil in an area so as not to bury plant material in the area to a depth of more than 50 mm and can include harrowing or mulching down to the soil surface.

'Location' means an area of land where the GMO is planted and grown.

Note: Generally, before the GMO is planted and grown in a field, this agreement refers to the field as an area or place. After the GMO is planted in a field and while it is being grown, this agreement refers to the field as a 'Location'.

'Material from Pollen Trap plants' means seed, stubble, pollen or any other GM material (including parts of a plant) that is derived from or produced by Canola from a Pollen Trap.

'Material from the GMO' means GM seed, stubble, pollen or any other GM material (including part of a GMO) that is derived from or produced by the GMO.

'Minister' means the Minister of Agriculture, Food and Fisheries in South Australia.

'Monitoring Zone' means an area extending outwards by 50 m in all directions from the outer edge of a Location, or the Location's Pollen Trap (if the Location is surrounded by a Pollen Trap).

'OGTR' means the Office of the Gene Technology Regulator.

'Pollen Trap' means an area of land, extending at least 15 m in all directions from the outside edge of a Location, containing non-genetically modified Canola or genetically modified male sterile Canola that is grown in such a way as to reasonably promote a dense and vigorous growth and flowering of the non-genetically modified Canola at the same time as the GMO.

'Pollen Trap plant' means Canola from a Pollen Trap.

'Post-harvest Monitoring Period' means the period that any Location, Pollen Trap in respect of a Location, and Monitoring Zone in respect of a Location must be monitored after harvest or after destruction of the GMO, either prior to seed set or at maturity.

'Volunteer plants' means progeny of the GMO or a Pollen Trap plant growing in the Location, its Pollen Trap, if any, or the Monitoring Zone for the Location, during the Post-Harvest Monitoring Period.

PETROLEUM ACT 2000: SECTION 25 (5) (b)

Variation of Petroleum Exploration Licence—PEL 101

NOTICE is hereby given that under the provisions of the Petroleum Act 2000, pursuant to delegated powers dated 28 March 2002, *Gazetted* 11 April 2002, page 1573, the conditions of the abovementioned Exploration Licence have been varied as follows:

Condition 1 of the licence is omitted and the following substituted:

- "1. During the term of the licence, the Licensee shall carry out or cause to be carried out exploratory operations on the area comprised in the licence in accordance with such work programs as are approved by the Minister from time to time. Year one to two exploratory operations are guaranteed. These exploratory operations shall include but not necessarily be limited to:

Year of Term of Licence	Minimum Work Requirements
One to Two	Drill 2 wells; 100 km 2D Seismic Acquisition
Three	Drill 2 wells
Four	Drill 2 wells
Five	Drill 3 wells

The variation provides some flexibility in the timing of wells and substitutes new 2D seismic for reprocessing of seismic data. The revised work requirements as a result of this variation would not have altered the outcome of the original competitive tender process.

 - (c) formal lists;
 - (d) copies of extracts from other documents, per A4 page. 30.00

NOTES

- A The amount allowed for each of the above items is to be at the discretion of the taxing officer, who shall be at liberty in the particular circumstances of the matter to disallow any item entirely or to allow a greater or lesser amount for any item AND PROVIDED THAT a greater amount may be allowed where the matter is of importance or difficulty.
- B Each bill of costs (other than a short form bill of costs) must show:
- (1) the time spent on any attendance;
 - (2) the number of A4 pages (or the equivalent thereof) contained in any document for which a charge is made;
 - (3) the name of any solicitor and the status of any clerk in respect of whom any attendance is charged;
 - (4) a separate identifying number for each item and the date thereof;
 - (5) the items of work and disbursements in chronological order.
- C Where the time for any attendance is only a portion of an hour, such amount may be allowed in accordance with the scale as the proportion of the hour bears to the amount allowed for the whole of an hour.
- D Where in this schedule fees (other than for photocopying, printing, electronically scanning, or sending and receiving by facsimile transmission) are set by reference to an A4 page, such fees are fixed (except in the case of correspondence) on the basis that the typed or printed content of each page consists of 30 lines of 12 size print with margins approximately the minimum referred to in R 102.02 (b). Where correspondence is concerned, the fee is fixed on the basis that the typed content of each page consists of 45 lines in 12 size print with margins approximately the minimum referred to in R 102.02 (b). The fee allowable may be adjusted by the taxing officer depending on whether the document in question exceeds or falls short of those standards.

Where the contents of a document (or page thereof) are less than one A4 page in length the fee allowed is therefore to be at the discretion of the taxing officer.

- E Where a document is prepared on other than A4 paper the amounts to be allowed under items 1, 2, 3 and 15 may be increased or decreased in the discretion of the taxing officer.
- F Only the amount of disbursements actually paid or payable are to be shown in the bill as disbursements. Where a disbursement is yet to be paid, this must be specially stated.
- G For drawing of any bill of costs (not including a short form bill of costs) the taxing officer may allow an additional 50 per cent on all drawing fees.
- H Such allowance for kilometreage by motor vehicle or other conveyance will be made as the taxing officer shall consider reasonable.
- I Where the Court orders a party, or a party or person is otherwise required, to tax costs both as between party and party and solicitor and client, Form 37 of the Supreme Court Rules shall be modified by the applicant so as to provide for the inclusion of both party and party and solicitor and client costs and the respondent's respective responses thereto.
- J The maximum rate for perusal is appropriate for documents such as pleadings, particulars, advices and opinions and for the more complicated medical and expert reports. A middle range figure will be appropriate for standard expert reports, lists of documents and medical reports. The lower rate will apply to appearances, ordinary correspondence, special damages, vouchers and the like. In cases where a large volume of documents is required to be perused, an hourly rate may be allowed by the taxing officer in lieu of a perusal fee.
- K When an instructing solicitor is in Court the lower attendance rate should be allowed if the solicitor is merely assisting counsel by being present, but the higher rate should be allowed if the solicitor is more actively involved, e.g. by proofing witnesses, preparing indices, etc.
- L Where a substantial number of sheets are or should be photocopied at the same time, in respect of multiple copies of the same document for each sheet after the first regard may be had to commercial photocopying rates.
- M The costs allowed in scale do not include the Goods and Services Tax (GST) which is to be added except in the following circumstances.
The GST should not be included in a claim for costs in a party/party Bill of Costs if the receiving party is able to recover the GST as an input tax credit. Where the receiving party is able to obtain an input tax credit for a proportion of GST only, only the portion which is not eligible for credit should be claimed in the party/party bill.
Where there is a dispute as to whether the GST is properly claimed in the party/party Bill of Costs, the receiving party must provide a certificate signed by the solicitors or the auditors of the receiving party as to the extent of any input tax credit available to the receiving party.
