RIVER MURRAY ACT 2003

Exemption from Requirement to Refer

PURSUANT to section 22 (18) of the River Murray Act 2003, I, Karlene Ann Maywald, Minister for the River Murray, hereby exempt applications for statutory authorisations of the classes specified in the Schedule from the requirement to be referred to me, as Minister, under a related operational Act, subject to the conditions specified below.

CONDITIONS

This exemption is conditional upon the proponent of an application:

- (a) ensuring that the application for the statutory authorisation meets each of the specifications required by and specified in the Schedule hereto for the relevant class of application, and is true and correct in respect of each of those specifications; and
- (b) constructing any development approved by the statutory authorisation in accordance with each specification required by and specified in the Schedule hereto for the relevant class of application.

THE SCHEDULE

Class of statutory authorisation to which exemption applies

Development authorisation for the construction of a building (required to be referred pursuant to item 19 or 20 of Schedule 8 of the Development Regulations 1993) where:

- (a) the application for authorisation includes each of the 'specifications for domestic outbuilding application' or each of the 'specifications for farm building application', as specified below; and
- (b) the building does not involve, or is not for the purposes of, any activity specified in either Schedule 21 or Schedule 22 of the Development Regulations 1993.

Specifications for domestic outbuilding application

In these specifications 'floodplain' means land below the 1956 River Murray flood-level.

Purpose of outbuilding

- The outbuilding is only to be used for domestic purposes associated with an existing dwelling on the site.

Size, appearance and siting of outbuilding

- The wall height of the outbuilding will not exceed 3 m and the total building height will not exceed 4.5 m.
- The outbuilding will not be sited such that any part of the outbuilding is closer to the river than any part of the existing dwelling.
- The outbuilding, from its nearest point, is no greater than 6 m from the existing dwelling.
- The external surfaces of the outbuilding will be constructed of material that is pre-coated with factory applied colours of dark grey, brown or dull green so that any external wall is low reflective in nature.

- The construction, extension or replacement of an outbuilding will not result in the total floor area of all outbuildings on the site being more than the current total floor area, or 54 m², whichever is the greater.

Location

- The outbuilding will be sited on an allotment where the existing dwelling with which the outbuilding is to be associated is set back at least 50 m from the river.
- The outbuilding will not detract from the setting of a State heritage place within the meaning of the Development Act 1993.
- The outbuilding will not be sited on coastal land as defined in Schedule 8 of the Development Regulations 1993.

Native vegetation

- The outbuilding development will not result in the clearance of native vegetation.

Stormwater

- The roof area and gutters of outbuildings with a floor area over 15 m² will be connected to a rainwater tank, or tanks, to allow for stormwater collection.
- The rainwater tank(s) will have sufficient capacity to temporarily hold 20 L of stormwater per m² of total roof area on the site, including all dwellings and outbuildings.
- Overflow from the rainwater tank(s) will be diverted away from wastewater disposal areas, such as septic tanks and aerobic systems, in line with the on-site wastewater systems standards. If there is suitable space on the site, overflow will then be diverted into an infiltration basin and/or a level-spreader to reduce the rate of stormwater runoff.

Erosion and landform

- The outbuilding development will not require or involve excavation or filling exceeding 3 m³ if sited on the floodplain, or 9 m³ if sited elsewhere.

Hydrology

- The outbuilding will not impede floodwaters.
- If the outbuilding is sited in the floodplain it will be fitted with openings, roller doors, removable panels or similar on two ends or sides (whichever elevations face the direction of river flow).

Specifications for farm building application

In these specifications:

‘cliff’ means any point where the land rises from the floodplain at or more steeply than a rate of 1:1, with a rise of 5 m or more;

‘floodplain’ means land below the 1956 River Murray flood-level.

Purpose of building

- The farm building is only to be used for purposes associated with the agricultural use of the land on which it is built.

Size, appearance and siting of building

- The wall height of the building will not exceed 6 m, and the total building height will not exceed 7.5 m.
- The construction, extension or replacement of the building will not result in the total floor area of the relevant building being greater than 100 m².
- The external surfaces of the building will be constructed of material that is pre-coated with factory applied colours of dark grey, brown or dull green so that any external wall is low reflective in nature.

Location

- The building will not detract from the setting of the State heritage place within the meaning of the Development Act 1993.

- The building will not be sited on the floodplain, or within 200 m of the River Murray.
- Where the building is situated on a cliff, it will have a minimum setback of 100 m behind the top of a cliff when viewed from the River Murray, and will be no closer than 200 m to the River Murray.
- The building will not be sited on coastal land as defined in Schedule 8 of the Development Regulations 1993.

Native vegetation

- The building development will not result in the clearance of native vegetation.

Stormwater

- The roof area and gutters of a building with a floor area over 15 m² will be connected to a rainwater tank, or tanks, to allow for stormwater collection. The rainwater tank(s) will have sufficient capacity to temporarily hold 20 L of stormwater per m² of total roof area on the site, including all dwellings and outbuildings.
- Overflow from the rainwater tank(s) will be diverted away from wastewater disposal areas, such as septic tanks and aerobic systems, in line with the on-site wastewater systems standards. If there is suitable space on the site, overflow will then be diverted into an infiltration basin and/or a level-spreader to reduce the rate of stormwater runoff.

Erosion and landform

- The building will not require or involve excavation or filling exceeding 18 m³.

AND TAKE NOTE that failure to comply with a condition of exemption is an offence under the River Murray Act 2003, for which a maximum penalty of \$20 000 applies.

Dated 6 May 2005.

K. A. MAYWALD, Minister for the River Murray

Part 2—Periodic fees

2—Preamble relating to new fee structure applicable from 1 July 2005

From 1 July 2005, the periodic fees payable by aquaculture licence holders are payable each financial year (rather than each calendar year).

3—Proportion of periodic fee payable before grant of licence

A person who applies for an aquaculture licence must, before the licence is granted, pay to the Minister a fee of an amount calculated by multiplying—

- (a) the periodic fee that would have been payable by the person had the person held the licence at the last date for payment of periodic fees; and
- (b) the proportion that the number of whole months between the grant of the licence and the next 30 June bears to 12 months.

4—Transitional arrangements for period between 1 January 2005 and 30 June 2005

- (1) An aquaculture licence holder authorised under the licence to carry on aquaculture in an area held under an aquaculture lease must, before the payment date fixed by the Minister by written notice given to the licence holder, pay to the Minister, in respect of the period between 1 January 2005 and 30 June 2005, a fee of the following amount:
 - (a) for a licence to farm tuna—the amount obtained by multiplying \$37.73 by the number of hectares in the licence area;
 - (b) for a licence to farm finfish other than tuna—the amount obtained by multiplying \$73.14 by the number of hectares in the licence area;
 - (c) for a licence to farm abalone—the amount obtained by multiplying \$69.27 by the number of hectares in the licence area;
 - (d) for a licence to farm molluscs other than abalone—the amount obtained by multiplying \$166.01 by the number of hectares in the licence area;
 - (e) for a licence to farm algae—the amount obtained by multiplying \$33.23 by the number of hectares in the licence area;
 - (f) for a licence authorising the storage of sea cages—the amount obtained by multiplying \$33.23 by the number of hectares in the licence area.
- (2) If 2 or more licences are held in respect of the same area—
 - (a) the licence holder is only liable for 1 fee under subclause (1); and
 - (b) the fee payable is the higher or highest of the fees that would be payable under subclause (1) but for this subclause.
- (3) An aquaculture licence holder authorised under the licence to carry on aquaculture in an area not held under an aquaculture lease must, before the payment date fixed by the Minister by written notice given to the licence holder, pay to the Minister, in respect of the period between 1 January 2005 and 30 June 2005, a fee of the following amount:
 - (a) for an aquaculture licence classified by the Minister (by virtue of the low level of intensity of farming to be carried on under the licence) as a class A licence—\$92.92;

- (b) for an aquaculture licence classified by the Minister (by virtue of the medium level of intensity of farming to be carried on under the licence) as a class B licence—\$115.36;
 - (c) for an aquaculture licence classified by the Minister (by virtue of the high level of intensity of farming to be carried on under the licence) as a class C licence—
 - (i) in the case of a licence designated by the Minister as being for a mobile farming arrangement—\$1 128.00;
 - (ii) in any other case—\$1 372.00.
- (4) In the case of an aquaculture licence granted on or after 1 January 2005 but before the payment date referred to in this regulation, the periodic fee payable by the licence holder under this regulation is reduced to an amount calculated by multiplying—
- (a) the periodic fee that would be payable but for this subclause; and
 - (b) the proportion that the number of whole months between the grant of the licence and 30 June 2005 bears to 6 months.
- (5) If it is proposed to grant an aquaculture licence to a person on or after the payment date referred to in this regulation but before 1 July 2005, the person must (instead of paying a fee of an amount fixed by clause 3) pay to the Minister a fee of an amount calculated by multiplying—
- (a) the periodic fee that would have been payable by the person under subclause (1) or (3) had the person held the licence at that payment date; and
 - (b) the proportion that the number of whole months between the grant of the licence and 30 June 2005 bears to 6 months.
