ADELAIDE, TUESDAY, 14 JUNE 2005

Public Notice

IN accordance with section 36AB of the *Electricity Act 1996 (SA)* CLP Australia Retail Pty Ltd (ABN 99 086 014 968) (formerly known as SPI Retail Pty Ltd) ('TXU') hereby publishes its default electricity contract prices with effect on and from **12th July 2005**.

The prices detailed in this notice apply for default customers only of TXU and are to be read with TXU's Default Contract Terms and Conditions published in the Government Gazette on **1st April 2005**.

TXU reserves the right to change its default electricity contract price from time to time acting in accordance with all applicable regulations.

Justification Statement

The default contract prices set out in this notice are no more than the standing contract prices of AGL South Australia Pty Limited ('AGL SA') anticipated to apply from 2nd July 2005 in respect of the relevant tariff categories, as set out in the notice published by AGL SA in The South Australian Government Gazette on 3rd June 2005.

TXU Default South Australian Electricity Pricing

<i>Residential Default Pricing</i>		GST Exclusive	GST Inclusive

	Balance/Qtr	7.61	8.37
		\$/Qtr	\$/Qtr
Supply Charge		—	—

[^] 'Qtr' means 'Quarter'.

Explanatory Notes:

1. Default contract price categories will only apply to small customers (that is, those customers who consume less than 160MWh of electricity per annum) who are purchasing electricity under TXU's default contract terms and conditions. The above default contract prices apply in accordance with the following principles:

- (a) Daily Consumption is the total electricity consumption for the period to which the customer's bill relates, divided by the number of days in that period.
- (b) Residential Default Pricing
 - applies to residential customers in premises used wholly or principally as private residences based on Domestic 110* tariff meter configuration and, in the case of off peak, Off peak Controlled Load Domestic 116* tariff meter configuration (refer to explanatory note 1(e) below for the circumstances in which off peak rates apply).
- (c) Business Default Pricing—General Supply
 - applies to non residential customers in premises that are not used wholly or principally as private residences based on General Supply 126* tariff meter configuration.
- (d) Business Default Pricing—Time of Use
 - applies to non residential customers in premises that are not used wholly or principally as private residences based on General Supply Time of Use 128* tariff meter configuration.
- (e) Off peak Controlled Load
 - for electricity used in permanently installed storage water heaters with a rated delivery of not less than 125 litres, storage space heaters and other approved thermal storage applications. The hours of application are fixed from time to time with control by time switch or other means. This price does not apply to electricity used outside those hours.

2. Peak period is 0700 hours to 2100 hours from Monday to Friday (Central Standard Time) for all tariffs other than Domestic 110* tariff meter configuration, except where the network meters do not recognise specific tariff days. In these situations peak period is 0700 hours to 2100 hours (Central Standard Time) each day for meter types other than Domestic 110* tariff meter configuration.

3. Off peak period is all times other than peak period.

4. Where prices change during a billing cycle the bill for that billing cycle will be calculated on a pro-rata basis using:

- (a) the old price up to and including the date of change; and
- (b) the new price from the date of change to the end of the billing cycle.

* *These tariff descriptions refer to tariffs published by AGL SA.*
