1. This by-law may be cited as the Anangu Pitjantjatjara Yankunytjatjara Land Rights (Entry to the Lands) By-Law 2009.
2. In this by-law, unless the contrary intention appears:

The Act means the Anangu Pitjantjatjara Yankunytjatjara Land Rights Act 1981;

10. (a) A person aggrieved by a decision of Anangu to revoke or modify the permission for that person to enter the lands may appeal to the Arbitrator against that decision and the process followed by the Arbitrator in deciding that appeal should be consistent with the processes that would apply under Sections 36 (1a)-(4) to an appeal under Section 36 (1) of the Act;

(b) In the event that the Arbitrator is satisfied that the decision to revoke or modify permission granted under this by law was made without there being reasonable grounds for doing so, the Arbitrator may vary or reverse the decision or remit it back to Anangu to be determined in accordance with the Arbitrator's directions;

(c) A person who appeals to the Arbitrator may apply to the Arbitrator for the decision to revoke or modify the permission to be suspended pending the outcome of the hearing of the appeal and the Arbitrator may suspend or vary the decision pending the hearing of the appeal on such terms as the Arbitrator deems appropriate.

11. Subject to this by-law, a person who has been granted permission to enter the lands by Anangu under this by-law may reside, or otherwise remain, on the lands for as long as is necessary or desirable to carry out his or her duties or functions and for such time as may be necessary so as to allow the person to leave the lands.

12. Anangu may revoke this by-law at any time after the expiration of 12 months from when it first comes into operation subject to notice being given under Section 43 (5) of the Act.

13. This by-law shall come into operation on the day that it is confirmed by the Governor.

DEVELOPMENT ACT 1993, SECTION 48: DECISION BY THE MINISTER FOR URBAN DEVELOPMENT AND PLANNING UNDER DELEGATION FROM THE GOVERNOR

Preamble

1. On 19 October 1994, the Minister for Housing, Urban Development and Local Government Relations, being of the opinion that a proposed development of a waste management facility in the form of a solid waste landfill (Northern Balefill) near Dublin ('the development') was a development of major social, economic or environmental importance, directed the proponent to prepare an Environmental Impact Statement pursuant to section 46 of the Development Act 1993.

2. On 22 April 1996, an Environmental Impact Statement for the development was published in accordance with section 46 of the Development Act 1993. Subsequently, the Minister prepared an Assessment Report in accordance with section 46 of the Development Act 1993.

3. By notice in the *Government Gazette* on 29 January 1998, the Governor granted development authorisation to the development subject to conditions specified in that notice pursuant to section 48 of the Development Act 1993.

4. Following an application by the beneficiary of the development authorisation for a variation to the authorisation to allow the receipt and disposal of low level contaminated waste, the development was the subject of an Amended Environmental Impact Statement dated June 1998 and an Amended Assessment Report dated December 1998, under section 47 of the Development Act 1993 ('the amended Major Development').

5. By notice in the *Government Gazette* on 8 September 2005, the Governor granted provisional development authorisation to the amended Major Development, reserving specific matters for further assessment.

6. On 30 June 2008, Integrated Waste Services Pty Ltd applied for a second amendment to the development authorisation proposing the establishment of a Multiple Waste Treatment Facility for the treatment and disposal of high level contaminated waste at the existing landfill. The proposal was the subject of an Amended Environmental Impact Statement and an Amended Assessment Report under section 47 of the Development Act 1993 ('the further amended Major Development').

7. By notice in the *Government Gazette* on 27 August 2009, the Governor granted provisional development authorisation to the further amended Major Development, reserving specific matters for further assessment.

8. On 19 May 2010, Integrated Waste Services Pty Ltd applied for approval of the matters reserved for further assessment and for a variation of the development authorisation relating to the Multiple Waste Treatment Facility ('the MWTF'). The proposed further changes to the MWTF primarily relate to construction being undertaken in one stage (rather than two) and consequent minor modifications to the design of the facility.

9. By notice in the *Government Gazette* on 27 August 2009, the Governor delegated the following powers to the Minister pursuant to section 48 (8) of the Development Act 1993:

- (a) the power to assess and make a decision on matters specified as reserved and to grant a final development authorisation for the purposes of section 48 (2) (b) (i) of the Act;
- (b) the power pursuant to section 48B of the Act to grant or permit any variation associated with that development authorisation and associated document (provided the essential nature of the development is not changed); and
- (c) in relation to that development authorisation, or any variation thereto—the power to revoke conditions, or to attach new conditions, under section 48 (7) of the Act (provided the essential nature of the development is not changed).

10. I am satisfied that the application for variation of the development authorisation does not require the preparation of a further or amended Environmental Impact Statement and that the application does not change the essential nature of the development.

11. I have assessed the matters reserved for further assessment having regard to all relevant matters in accordance with section 48 (5) of the Development Act 1993, and I am satisfied that the further amended Major Development can now be granted development authorisation.

12. I have decided to grant the requested variation to the amended Major Development by the variation of conditions of the authorisation and the addition of new conditions pursuant to section 48 (7) (b) of the Development Act 1993 and grant development authorisation to the further amended Major Development under section 48 (2) (b) (i) of the Act.

Decision

PURSUANT to section 48 of the Development Act 1993, having due regard to the matters set out in section 48 (5) and all other relevant matters, I:

- (a) vary the amended Major Development by:
 - (i) revoking Conditions 6, 7, 8, 9, 12, 13, 14, 15, 16 and 18 of the provisional development authorisation dated 27 August 2009, in relation to the matter reserved for further assessment in paragraph (c) of the provisional development authorisation dated 27 August 2009;
 - (ii) revoking Condition 1 of the provisional development authorisation dated 27 August 2009;
 - (iii) varying Condition 2 of the provisional development authorisation dated 27 August 2009, by adding the following:

 - Correspondence from Katnitch Dodd for Stage 1—Civil and Structural Work dated 31 March 2010 and accompanying certified plans;
 - Correspondence from Katnitch Dodd for Final Stage—Services and Fitout Works dated 31 March 2010 and accompanying certified plans'; and
 - (iv) consolidating and re-numbering the remaining conditions of development authorisation as reproduced below;
- (b) grant development authorisation in relation to the matters reserved for further assessment in paragraphs (a) and (b) of the provisional development authorisation dated 27 August 2009;
- (c) specify for the purposes of section 48 (7) (b) (i) of the Development Act 1993, that all matters relating to this development authorisation are matters in respect of which conditions of this authorisation may be varied or revoked, or new conditions attached;
- (d) specify for the purposes of section 48 (11) (b) the period until 27 August 2011, as the time within which substantial work must be commenced on site, failing which I may cancel this authorisation.

NOTES TO PROPONENT

Building Rules

- The proponent shall obtain a Building Rules assessment and certification for any building work from either the Wakefield Regional Council or a private certifier (at the proponent's option) and forward to the Minister for Urban Development and Planning all relevant certification documents as outlined in Regulation 64 of the Development Regulations 2008.
- Pursuant to Development Regulation 64, the proponent is especially advised that the District Council of Mallala or private certifier conducting a Building Rules assessment must:
 - provide to the Minister for Urban Development and Planning a certification in the form set out in Schedule 12A of the Development Regulations 2008, in relation to the building works in question; and
 - to the extent that may be relevant and appropriate:
 - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12;
 - (ii) assign a classification of the building under these regulations; and
 - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund 1993.

- Regulation 64 of the Development Regulations 2008, provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Urban Development and Planning. The District Council of Mallala or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this provisional development authorisation (including its Conditions and Notes).

Environmental Management Plan for the Multiple Waste Treatment Facility (MWTF)

- An Environmental Management Plan (EMP) covering the operation requirements for the MTWF shall be prepared in consultation with the Environment Protection Authority.
- The EMP shall include an air quality monitoring programme to ensure air emissions from the MWTF do not contain contaminants at levels that may be harmful to nearby residents and land uses.
- The EMP shall include protocols for testing/trialling the suitability and effectiveness of treatment methods for batches of contaminated materials that could potentially be treated at the MWTF, prior to the receipt of such material.
- The EMP shall include contingencies for dealing with contaminated materials that cannot meet disposal criteria after treatment.
- The EMP shall include a detailed risk assessment protocol for all contaminated waste types to be treated.
- The EMP shall include a Fire Risk Management Plan.
- The EMP shall include a Hazardous Substances Management Plan.
- The EMP shall include an Occupational Health, Safety and Welfare Plan prepared in consultation with the Department of Health.
- The EMP shall include a financial assurance strategy.
- The EMP shall be amended if new treatment options, that have been approved by the Environment Protection Authority, are adopted in the future.
- The current Landfill Environmental Management Plan (LEMP) shall be amended, to the reasonable satisfaction of the Environment Protection Authority, to address the management of soil erosion and stormwater and the upgrading of existing screens and/or mounds or the establishment of new vegetated screens and/or mounds associated with the MWTF.
- The amendment of the LEMP and the upgrading of the site infrastructure, including but not limited to vegetated screens and/or mounds, shall be undertaken prior to commencement of the MWTF operations.

EPA Licensing and General Environmental Duty of Care

- The applicant is reminded of its general environmental duty, as required by section 25 of the Environment Protection Act 1993, to take all reasonable and practical measures to ensure that the activities on the whole site, including during both construction and operation, do not pollute the environment in a way which causes or may cause environmental harm.
- Environmental authorisation in the form of an amended licence will be required for the construction and/or operation of this development. The applicant is advised to contact the Environment Protection Authority before acting on this approval to ascertain licensing requirements.

- It is likely that as a condition of such a licence the Environment Protection Authority will require the licensee to carry out specified environmental monitoring of air and water quality and to make reports of the results of such monitoring to it.

General Landfill Operations

- To provide additional screening and wildlife habitat the following options could be investigated by the proponent, council, community and local landowners:
 - revegetation of the road reserve along Prime Beach Road, in conjunction with the District Council of Mallala and the community;
 - revegetation of the road reserve along Port Wakefield Road, in conjunction with the Department of Transport and Urban Planning (Transport SA) to further reduce views from the eastern direction;
 - plantings on private property along fence lines adjoining the site, in conjunction with landowners and the community.
- All sedimentation basins, evaporation ponds, and surface water drainage channels should be suitably located, designed and managed to ensure native vegetation (especially low-lying saltmarsh communities) is not adversely affected by construction activities or groundwater mounding and, if possible, the ecological value enhanced.
- A comprehensive Pest Plant and Animal Management Plan must be implemented prior to landfill operations commencing, to ensure the site is free of as many pest species as possible from the onset and adequate monitoring and follow-up control should occur, as discussed in the Assessment Report.
- Whilst not totally within the control of the proponent, monitoring and control programs to reduce the risk of disease transmission between activities in the area may ideally be prepared by adopting a district approach, in co-ordination with the Adelaide Plains Animal and Plant Control Board, Department of Primary Industries and Resources and landowners.
- To minimise and control any on-site soil erosion (particularly of stockpiled material), a Soil Erosion and Drainage Management Plan (SEDMP) as described in the Environment Protection Agency's 'Stormwater Pollution Prevention Codes of Practice', must be prepared and approved as part of the LEMP, before the site becomes operational.
- As part of the LEMP, a Surface Water Management Plan must be prepared by the proponent to the satisfaction of the EPA prior to receipt of any waste. The plan should address the collection and management of all on-site surface water (including any contaminated runoff originating from roadways, carparks and hardstands, the vehicle workshop or wheel washing facility) and management of all surface water flows entering the site from land external to the site, in particular to ensure their final discharge does not impact adversely on any downstream wetlands.
- A monitoring program must be established to record levels of coastal flooding in the western section of the site and, if results indicate a significant risk, a review process be undertaken (ideally through any relevant local community consultative committee) to determine whether to proceed with Stage 9.
- If blasting is required to remove any of the Ripon Calcrete, explosion vibration characteristics and monitoring requirements must be determined in consultation with the Environment Protection Authority and District Council of Mallala, prior to commencement.
- The Environment Protection Agency must be provided with all additional data concerning the site geology as it becomes available, as this could necessitate minor changes to landfill design or method of operation and the installation of additional groundwater monitoring bores.

- To enable detailed design of the proposed groundwater protection system, to determine the minimum depth at which the landfill cells should be based and to enable detailed design of the surface water management system; further investigation of groundwater levels and behaviour on the site must be undertaken prior to finalisation of the detailed design of the landfill and preparation of management plans.
- As part of the LEMP, a detailed Groundwater and Leachate Management Plan must be prepared by the proponent to the satisfaction of the Environment Protection Authority, prior to receipt of any waste. The Plan must demonstrate how the method of hydraulic containment proposed can be practically achieved. Further hydrogeological investigations must be carried out prior to the commencement of any landfill construction in order to fully define the dewatering and groundwater disposal requirements and to provide details of how the cells can be dewatered and constructed for full hydraulic containment of leachate. In particular, monitoring of watertable levels must commence immediately after the granting of the development authorisation in order that the magnitude of seasonal fluctuations can be fully established prior to construction of the landfill. The Plan may provide for staging of leachate and groundwater management works which may be required as a result of the staging of waste disposal activities upon the site, and should include contingency measures to be implemented in the event of any failure of the leachate management system.
- A more sustainable after-use for the site that will encourage the regeneration and rehabilitation of natural communities must be considered during future post closure planning.
- If appropriate with the desired end use to be determined in more detail at a later stage, the entire landform may be planted with appropriate types of native vegetation cover.
- Determination of interim and post closure land uses of the site, proposed to be undertaken in association with any relevant local community consultative committee, must be undertaken as required by the Environment Protection Authority as part of the LEMP.

Given under my hand at Adelaide, 2 September 2010.

Development and Planning
