- (e) details of whether the Volunteer plants and *Brassica* plants observed, if any, occurred in the Location, the Pollen Trap or the Monitoring Zone;
- (f) details of the development stages reached by the Volunteer plants and *Brassica* plants, if any;
- (g) details of methods used to destroy Volunteer plants and *Brassica* plants identified if any; and
- (h) details of the date on which Volunteer plants and *Brassica* plants were cleaned.
- 8. Harvest of GMO**
- 8.1 The GMO at a Location and Pollen Trap plants may be harvested for seed only.
- 8.2 Following harvest of the GMO and Pollen Trap plants (if any), any harvested seed must be immediately, or as soon as is reasonably practicable:
- (a) stored in a sealed container that is signed so as to indicate that it contains GM Canola seed, within a locked facility that is signed so as to indicate that genetically modified Canola seed is stored within the facility; or
- (b) rendered unviable by autoclaving; or
- (c) destroyed by burning; or
- (d) destroyed by burial under 1 m of soil.
- 8.3 Any Canola seed obtained from harvest may only be transported to the extent necessary for seed cleaning or treating, to store it, export it or destroy it.
- 9. Conditions Relating to Destruction by Burial**
- 9.1 Subject to Condition 9.2 below, if the GMO, Pollen Trap plants, Material from the GMO or Material from Pollen Trap plants are destroyed by burial, the Company must:
- (a) within 30 days of burial, provide the Nominated Officer by notice in writing of the precise location of the Burial site (GPS co-ordinates and either a street address or other directions to the Location) and the date on which it was buried. The notice must identify the GMO or Pollen Trap plant, buried at the Burial site;
- (b) any emergence of Volunteer plants. If Volunteer plants are identified, the Burial site must be cleaned.
- 9.2 Monitoring of the Burial site is not required if burial takes place at a Municipal or commercial land fill and the Nominated Officer is provided with a written notice from the manager of the land fill undertaking:
- (a) not to disturb the Burial site for a period of at least three years from the date of burial; and
- (b) to notify both the Company and the Nominated Officer in writing of any significant disturbance of the Burial site that may affect the emergence of Volunteer plants.
- 10. Cleaning—Post Harvest and Generally**
- 10.1 Where Equipment, a Location or other area is used pursuant to these conditions in respect of GMOs, Material from GMOs, Pollen Trap plants or Material from Pollen Trap plants, it must be Cleaned.
- 10.2 Subject to Condition 10.5, for each Location, either within 14 days of harvest of the GMO or 9 months after planting, the Location must be Cleaned.
- 10.3 Within 14 days of either harvest or Cleaning of the GMO at a Location, the Pollen Trap in respect of that Location, if any, must be Cleaned.

- 10.4 When Equipment is Cleaned, the area in which the Equipment is Cleaned must also be Cleaned.
Note: For the sake of clarity, it is not necessary for Equipment to be Cleaned only at a Location.
- 10.5 Cleaning must occur immediately or as soon as practicable after the use and before it is used for any other purpose.
- 10.6 *Note: For example, if seed is harvested with a mechanical harvester, the harvester must be Cleaned immediately following its use and before any other Canola is harvested.*
- 10.7 On the request of the Nominated Officer, the Nominated Officer must be provided with written documentation of the procedures in place to ensure continuing compliance with the Cleaning conditions in these conditions.
Note: Burning and light tillage are strongly favoured as methods to Clean Locations and Pollen Traps post-harvest.
- 11. Conditions Relating to Grazing**
- 11.1 The company must inform the owner of the land on which the location is situated of the marketing implications of any grazing of GM canola before commencement of the trial.
- 11.2 Evidence that the owner has been adequately informed must be presented to the nominated officer on request.
- 12. Reduction of the Seed Bank and Secondary Dormancy**
- 12.1 Following Cleaning of any Location or Pollen Trap, light tillage must be carried out on each Location and Pollen Trap.
- 12.2 Subject to Condition 12.4, light tillage must occur on at least two separate occasions in such a way as to promote the growth of any remaining Canola and to reduce onset of secondary dormancy of Canola seed.
- 12.3 The two occasions must be carried out at least two weeks apart.
- 12.4 If light tillage is used to Clean a Location or Pollen Trap, then only one subsequent occasion of light tilling must be performed.
- 12.5 All light tillage obligations must be performed within 12 months of harvest of the GMO or Pollen Trap.
- 12.6 The soil at the Location (and Pollen Trap, if any) must not be disturbed in a way that would bury plant material in that area to a depth of more than 50 mm, until at least 14 days after all light tillage obligations have been performed.
Note: This condition prohibits 'deep tillage' (i.e., deep soil disturbance that would bury the GMO to a depth of more than 50 mm) to occur at the location or pollen trap until after light tillage obligations have been performed.
- 12.7 A report on light tilling activities undertaken must be reported to the Nominated Officer in writing. Results must be reported to the Nominated Officer within 35 days of any day on which light tilling occurs. Results of reporting must include:
- (a) details of the Location (and Pollen Trap, if any) tilled; and
- (b) details of the tillage methods used.
- 13. Conditions Relating to Light Tillage**
- 13.1 Light tillage may only be adopted as a method for destruction in conditions where germination of the GMO is reasonably likely to ensue (for example, immediately after rain or irrigation).
Note: The incorporation of light tillage methods at times when germination of the GMO is not likely to ensue as a result (e.g., during a drought) will not be considered sufficient to satisfy light tillage conditions.
- 14. Monitoring—Post Harvest and Generally**
- 14.1 Following Cleaning of each Location, the following places must be monitored for the existence of Volunteer plants:
- (a) the Location;
- (b) the Pollen Trap in respect of the Location, if any; and
- (c) any areas used to Clean Equipment used in connection with the GMO or to destroy the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants.
- 14.2 Following Cleaning of each Location, the Monitoring Zone in respect of the Location must be monitored for the existence of Volunteer plants of the GMO.
- 14.3 Monitoring must be performed by a person who is able to recognise Volunteer plants and *Brassica* plants.
- 14.4 Any Volunteer plants detected during monitoring must be Cleaned before seed maturity.
- 14.5 All the places required to be monitored must be monitored, with at least three site inspections to be undertaken during the April to November period. Additional monitoring may be required if conditions are conducive to growth outside traditional **Canola** growing periods.
- 14.6 The monitoring shall continue from the last day of Cleaning of the Location, and thereafter, until such time as the place to be monitored can meet site sign-off criteria, subject to Condition 14.7. The site sign-off criteria is met when the aggregate GM Canola volunteers present in the previous 12 months are less than 50 per ha (equivalent to 1 per 200 m²) or if the site is less than 1 ha in size, a maximum number of 20 volunteers per site. Monitoring may cease when the Nominated Officer has provided a site sign-off notice in writing to the Company that further monitoring of the specified site is no longer required.
- 14.7 Where post-harvest site is planted to long-term pasture in the first year post-harvest, and continues as a regenerating pasture in the second, third and subsequent years post-harvest, the monitoring shall continue from the last day of Cleaning of the Location, and thereafter, until such time as the place to be monitored can meet site sign-off criteria. Active monitoring on these sites must resume when the site is next cultivated and the monitoring shall continue until such time as the place to be monitored can meet site sign-off criteria.
- 14.8 The results of monitoring activities must be reported to the Nominated Officer in writing. Results must be reported to the Nominated Officer within 35 days of any day on which monitoring occurs. Results of reporting must include:
- (a) details of the areas monitored;
- (b) details of the date of monitoring;
- (c) the names of the person or persons who undertook the monitoring and details of the experience, training or qualification that enabled them to recognise Volunteer plants and *Brassica* plants;
- (d) the number of Volunteer plants observed, if any;
- (e) details of whether the Volunteer plants observed, if any, occurred in the Location, the Pollen Trap or the Monitoring Zone;
- (f) details of the development stages reached by the Volunteer plants, if any;
- (g) details of methods used to destroy Volunteer plants identified, if any; and
- (h) details of the date on which Volunteer plants were Cleaned.

15. Use of Locations Post-Harvest

- 15.1 If the GMO is grown at a Location, no other Canola or *Brassica* plant of any kind may be planted at the location, or Pollen Trap in respect of the Location, if any, after harvest of the GMO, until monitoring obligations are satisfied, unless the brassica crop is for research trial purposes (e.g., to assess canola blackleg resistance).
- 15.2 If the GMO is grown at a Location, no other Canola may be grown at the Monitoring Zone in respect of the Location until monitoring obligations are satisfied, unless the brassica crop is for research trial purposes (e.g., to assess canola blackleg resistance).
- 15.3 Other crops may be grown at the site following harvest provided the company controls post harvest volunteers to the extent required under this order.

16. Transportation of the GMO, Material from GMO, Pollen Trap Plants and Material from Pollen Trap Plants

- 16.1 The GMO, Material from the GMO, Pollen Trap plants and Material from Pollen Trap plants must not be transported unless it is contained within a sealed durable container.
- 16.2 Every container used to transport the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants must be labelled:
- (a) to indicate that it contains genetically modified plant material; and
- (b) with telephone contact numbers for the Company and instructions to contact the Company in the event that the container is broken or misdirected.
- 16.3 The Company must have in place accounting procedures to verify whether the same quantity of GMO, Material from the GMO, Pollen Trap Plant or Material from Pollen Trap plants sent is delivered and must document methods and procedures used for transportation of GMOs, Material from GMOs, Pollen Trap plants and Material from Pollen Trap plants.

17. Contingency Plans

- 17.1 Within 30 days of the date of the commencement of these conditions, a written Contingency Plan must be submitted to the Nominated Officer detailing measures to be taken in the event of the unintended presence of the GMO, Material from the GMO, Pollen Trap plants and Material from Pollen Trap plants, outside a Location, or Pollen Trap in respect of a Location, that must be monitored.
- 17.2 The Contingency Plan must include details of procedures to:
- (a) ensure the Nominated Officer is notified immediately if the Company becomes aware of the event;
- (b) to destroy any of the GMOs, Material from the GMOs, Pollen Trap plants or Material from Pollen Trap plants; and
- 17.3 Monitor and destroy any Volunteer plants that may exist as a result of the event.
- 17.4 The Contingency Plan must be implemented in the event that the unintended presence of the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants is discovered outside an area that must be monitored.

18. Compliance Management Plan

- 18.1 Prior to growing the GMO, a written Compliance Management Plan must be provided to the Nominated Officer on request. The Compliance Management Plan must describe in detail how the Company intends to ensure compliance with these conditions and document that compliance.

SECTION 3: INTERPRETATION AND DEFINITIONS

Words and phrases used in these conditions have the same meanings as they do in the Gene Technology Act 2000 (Commonwealth) and the Gene Technology Regulations 2001.

Words importing a gender include any other gender.

Words in the singular include the plural and words in the plural include the singular.

Words importing persons include a partnership and a body whether corporate or otherwise.

References to any statute or other legislation (whether primary or subordinate) is to a statute or other legislation of the Commonwealth of Australia as amended or replaced from time to time unless the contrary intention appears.

Where any word or phrase is given a defined meaning, any other part of speech or other grammatical form in respect of that word or phrase has a corresponding meaning.

In this agreement:

'Brassica crops' means any crop of *Brassica* plants or Canola (and includes commercial *Brassica* crops).

'Brassica plants' means the species listed in the table at Table 1.

'Burial site' means a site at which the GMO or GM material from the GMO is destroyed by burial under at least 1 m of soil.

'Canola' means plants of the species *Brassica napus*.

'Clean' (or **'Cleaned'**), as the case requires, means:

- (a) in relation to a Location or other area (including a Pollen Trap, Monitoring Zone or Isolation Zone), the destruction of the GMO, Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants in that Location or area, to the reasonable satisfaction of the Minister; or
- (b) in relation to Equipment, the removal and destruction of the GMO and Material from the GMO, Pollen Trap plants or Material from Pollen Trap plants from the Equipment, to the reasonable satisfaction of the Minister.

'Department' means the Department of Primary Industries and regions in South Australia.

'Destroy', (or **'Destroyed'** or **'Destruction'**), as the case requires, means killed by one or more of the following methods:

- (a) stalk pulling; or
- (b) light tillage; or
- (c) burning; or
- (d) treatment with herbicide; or
- (e) slashing; or
- (f) mowing; or
- (g) hand weeding; or
- (h) burial under 1 m of soil; or
- (i) grazing; or
- (j) a combination of the above.

Note (1): 'As the case requires' has the effect that, depending on the circumstances, one or more of these techniques may not be appropriate. For example, in the case of killing the remains of harvest of the GMO, treatment of post harvest remains by herbicide would not be a sufficient mechanism.

Note (2): Where method (b) is adopted, this agreement contains additional conditions relating to light tillage as a method for destruction.

Note (3): Where method (h) is adopted, this agreement contains additional conditions relating to burial as a method for destruction.

Note (4): Where method (i) is adopted, this agreement contains additional conditions relating to grazing as a method for destruction.

‘**Equipment**’ includes harvesters, seeders, storage equipment, transport equipment (e.g., bags, containers, trucks), clothing and tools.

‘**GM**’ means genetically modified.

‘**Isolation Zone**’, means, in respect of a Location, an area of land surrounding either the Location, or the Location’s Pollen Trap (if the Location is surrounded by a Pollen Trap) that is known not to contain any Brassica crops when the GMO is planted at the Location.

‘**Light tillage**’ or ‘**lightly tilled**’ means the use of a technique to disturb the soil in an area so as not to bury plant material in the area to a depth of more than 50 mm and can include harrowing or mulching down to the soil surface.

‘**Location**’ means an area of land where the GMO is planted and grown.

Note: Generally, before the GMO is planted and grown in a field, this agreement refers to the field as an area or place. After the GMO is planted in a field and while it is being grown, this agreement refers to the field as a ‘Location’.

‘**Material from Pollen Trap plants**’ means seed, stubble, pollen or any other GM material (including parts of a plant) that is derived from or produced by Canola from a Pollen Trap.

‘**Material from the GMO**’ means GM seed, stubble, pollen or any other GM material (including part of a GMO) that is derived from or produced by the GMO.

‘**Minister**’ means the Minister of Agriculture, Food and Fisheries in South Australia.

‘**Monitoring Zone**’ means an area extending outwards by 50 m in all directions from the outer edge of a Location, or the Location’s Pollen Trap (if the Location is surrounded by a Pollen Trap).

‘**OGTR**’ means the Office of the Gene Technology Regulator.

‘**Pollen Trap**’ means an area of land, extending at least 15 m in all directions from the outside edge of a Location, containing non-genetically modified Canola or genetically modified male sterile Canola that is grown in such a way as to reasonably promote a dense and vigorous growth and flowering of the non-genetically modified Canola at the same time as the GMO.

‘**Pollen Trap plant**’ means Canola from a Pollen Trap.

‘**Post-harvest Monitoring Period**’ means the period that any Location, Pollen Trap in respect of a Location, and Monitoring Zone in respect of a Location must be monitored after harvest or after destruction of the GMO, either prior to seed set or at maturity.

‘**Volunteer plants**’ means progeny of the GMO or a Pollen Trap plant growing in the Location, its Pollen Trap, if any, or the Monitoring Zone for the Location, during the Post-Harvest Monitoring Period.

NATURAL RESOURCES MANAGEMENT ACT 2004

Notice of Assessment of Quantity of Water taken when Meter Readings are not used

PURSUANT to Section 106 of the Natural Resources Management Act 2004, I, Paul Caica, Minister for Sustainability, Environment and Conservation, hereby declare that the basis of assessment of water use rates and the method by which the assessment of water use where meter readings are not used, or when water is taken without licence or authorisation, will be as set out in Schedule 1.

SCHEDULE 1

The basis of the assessment of water use will be the estimation of water requirements for a crop.

The method by which the estimation of water requirements for crops will be used is the methodology of Doorenbos and Pruitt (1977), as refined by Allen *et al.* (1998) and set out in the PIRSA Technical Report No. 263, second edition ('the Report'). Crop factors will be calculated from Kc (crop coefficient) values from Food and Agriculture Organisation of the United Nations, Rome Irrigation and Drainage Paper 56 (Allen, Pereira *et al.*, 1998) ('FAO 56') and using site specific monthly Kp (pan coefficient) values and average monthly Kg values (bird guard coefficient) set out in the Report.

The methodology incorporates the use of Bureau of Meteorology evaporation data, the application of crop specific factors to evaporation figures to calculate crop evapotranspiration for the crop and location in question, subtraction of effective rainfall and an allowance for leaching for salinity control and irrigation efficiency.

The water requirement calculated by this method is expressed as depth of water required in millimetres for a particular crop grown over a particular season. Depth multiplied by the number of hectares of that crop grown (in each specified season for short season crops), multiplied by 10 gives the volume of water required for each crop in kilolitres.

A copy of each of the Report and FAO 56 is obtained through the Geoscience Library at the Department for Manufacturing, Innovation, Trade, Resources and Energy. The reference number for the Report is ISBN No. 07308-4349-1 and the reference number for FAO 56 is Kinetica/Amicus No. 000020037000 or ISBN No. 92-5-104219-5.

This notice has effect in relation to the financial year commencing on 1 July 2012.

Dated 1 May 2012.
