ATTACHMENT A

*Mixed Use Zone***Introduction**

The objectives and principles of development control that follow apply in the Mixed Use Zone shown on Maps Mit/8 and 9. They are additional to those expressed for the whole of the council area.

OBJECTIVES

Objective 1: A zone primarily accommodating a mix of health and related land uses including facilities for health and aged care, rehabilitation, education, research, community, and supported accommodation.

Objective 2: Development that contributes to the desired character of the zone.

DESIRED CHARACTER

A variety of land uses will be encouraged throughout the zone, with a focus primarily on health and related purposes designed to support the site as a health precinct, with the broad arrangement of uses guided by Concept Plan Fig MU/1.

Buildings and open spaces will incorporate innovative and exemplary designs to support a cohesive character. Development will incorporate sustainable design features to reduce energy needs, water use and waste, facilitate urban cooling and promote biodiversity.

The land shown in Concept Plan Fig MU/1 will be developed as a walkable neighbourhood that is characterised by:

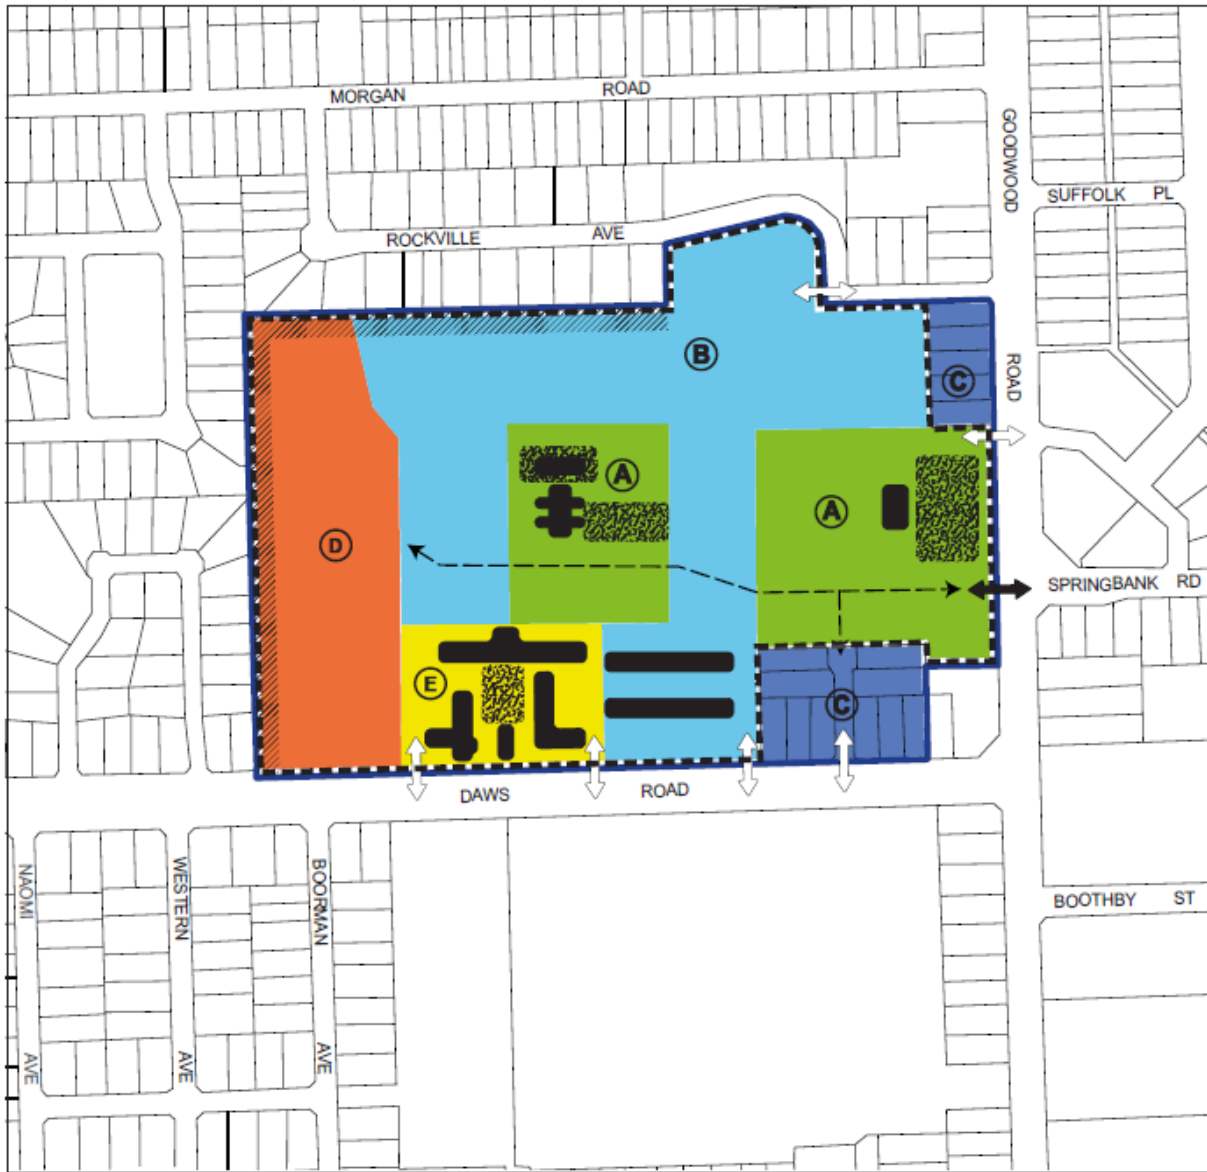

- (a) a health precinct for the health and wellbeing of the community;
- (b) active street facades integrated with quality public realm and intimate and larger open spaces that cater for social and ceremonial gatherings, recreation, cultural activities and reflection; and
- (c) preservation of the heritage-listed Chapel, Schools Patriotic Fund (SPF) Hall and Peace Garden for their considerable significance, particularly to World War II Veterans and their families.

Health, rehabilitation, aged care, educational, research and innovation, and community service land uses will be the predominant forms of development in the zone. Other forms of development will be subordinate and complementary to those uses to enhance the zone's integration with and appeal to the wider community, encourage multigenerational participation and contribute to vibrancy.

Shop development will be small-scale such as cafes and other tenancies that support local level services. Overall, shop development will provide no more than 2000 square metres of gross leasable floor area across the whole of the Concept Plan area (approximately 154, 700 square metres).

The public realm and identified areas of open space will provide locations to retain Significant and Regulated Trees and opportunities for additional landscaping, including planting of mature trees to ensure no net loss of vegetation. Trees and other landscaping will be used throughout the Concept Plan area to frame prominent buildings and entrances and provide pedestrian amenity.

**MITCHAM (CITY)
MIXED USE ZONE
CONCEPT PLAN
Fig MU/1**

NOTE:
This Concept Plan is indicative only. The final arrangement of land uses within this mixed use framework, may change as a result of implementing urban design and planning outcomes that seek to achieve the zone's provisions.

The general layout of the Peace Garden will be retained and be readily interpretable as a separate or special place within the surrounding open landscaping. An open landscaped setting around the Chapel will also be retained.

The zone includes a number of heritage buildings. Development affecting these buildings will:

- (a) support their adaptive re-use to promote ongoing use and conservation;
- (b) maintain the setting of the Central Administration Buildings as prominent and iconic features to the main Daws Road entrance;
- (c) retain the external presentation of the former Gatehouse adjacent Daws Road, although consideration will be given to improving connectivity between the interior and exterior of the building;
- (d) retain Daw House as a prominent feature to Goodwood Road behind an open garden setting.

Care will be taken to ensure new buildings and additions to places of heritage value retain the visual prominence and heritage values of such places, noting that well located and designed taller buildings are contemplated in the zone.

Development will comprise buildings at various scales up to 5 storeys and no more than 2 storeys for residential. Taller buildings will be located away from adjacent residential zones to enable an appropriate transition between areas of low rise housing adjacent to the zone and medium rise development in the zone. Taller buildings will also be sited to take advantage of the zone's attributes, including open spaces, heritage values and mix of community services and facilities to help create active and vibrant streets and lanes, and assist in creating a sense of place.

Pedestrian and cycling connections will be provided to link key land uses within the site and major entries and exits. Linkages will maximise opportunities to connect the site to the surrounding area, including the residential areas along Francis Street, Rockville Avenue and Day Avenue, and key land uses along Goodwood, Springbank and Daws roads.

Where practical, stormwater disposal from the zone or individual development sites within the zone will be managed to June 2017 levels, and incorporate water sensitive urban design systems at the site and building level, including the harvest, treatment, storage and reuse of stormwater. Harvested stormwater will improve the aesthetic and functional value of open spaces and public access ways. Floor levels of buildings within the site will be set a minimum 300 millimetres above the highest adjacent kerb watertable to mitigate flood risk.

Existing and former uses within the zone include potentially contaminating activities. As a consequence management of contaminated land may be necessary to ensure that it is suitable for the intended use, particularly where it involves sensitive uses like housing.

PRINCIPLES OF DEVELOPMENT CONTROL

Land Use

- 1 The following forms of development are envisaged in the zone:

- Affordable housing
- Advertisements
- Aged persons accommodation
- Community facility
- Consulting room
- Dependent accommodation
- Dwelling
- Educational establishment
- Health Services
- Institutional facility
- Nursing home
- Office
- Place of worship
- Pre-school
- Recreation area
- Residential flat building
- Restaurant
- Retirement village
- Small scale shop or group of shops
- Supported accommodation
- Visitor and short-term accommodation

- 2 Development listed as non-complying is generally inappropriate.

Form and Character

- 3 Development should not be undertaken unless it is consistent with the desired character for the zone.
- 4 Development should be undertaken in accordance with Concept Plan Fig MU/1.
- 5 The 'Potential Left-in/Left-out Entry/Exit' shown on Concept Plan Fig MU/1 should not be provided in a location generally opposite the Springbank Road alignment until such time as the existing intersection of Springbank Road and Goodwood Road is altered to limit vehicle movements to a left-in/left-out arrangement into/out of Springbank Road. In all cases, the new access should:
 - (a) maintain traffic flows along Goodwood Road;
 - (b) not interfere with road upgrades associated with the realignment of Springbank Road to Daws Road.
- 6 Development should be set back 3 metres from the boundary of an adjacent zone.
- 7 The bulk and scale of development should be compatible with adjoining land uses.
- 8 Any portion of a development above two storeys (8 metres) in height should be constructed within a building envelope provided by a 30 degree plane measured from a point 3 metres above natural ground level at the zone boundary (except where this boundary is a primary road frontage), as illustrated in Figure 1, unless it is demonstrated that the proposed development minimises interface impacts including from building massing, overshadowing and overlooking with adjoining residential development:

FIGURE 1

- 9 To minimise overshadowing of sensitive development outside of the zone or the Repatriation General Hospital Site boundary shown on Concept Plan Fig MU/1, buildings should ensure that:
- north-facing windows to habitable rooms of existing dwellings in adjacent zones receive at least 3 hours of direct sunlight over a portion of their surface between 9.00 am and 3.00 pm on 21 June;
 - ground level open space of existing residential buildings in adjacent zones receive direct sunlight for a minimum of 2 hours between 9.00 am and 3.00 pm on 21 June to at least the smaller of the following:
 - half of the existing ground level open space;
 - 35 square metres of the existing ground level open space (with at least one of the area's dimensions measuring no less than 2.5 metres);
 - sunlight to solar panels should be maintained for a minimum of 2 consecutive hours between 9.00 am and 3.00 pm on 22 June.
- 10 Vehicle parking areas should be established in accordance with one or any combination of the following:
- at the rear of premises;
 - at the side of premises;
 - undercroft/semi-basement;
 - within the podium of a multi-storey building.
- 11 Undercroft, semi-basement and above ground parking of vehicles should ensure:
- the overall height, bulk and appearance of the undercroft or above-ground structure does not adversely impact on streetscape character of the locality or the amenity of adjacent properties;
 - vehicles can safely enter and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles;
 - driveway gradients provide for safe and functional entry and exit;
 - driveways and adjacent walls, fencing and landscaping are designed to provide adequate sightlines from vehicles to pedestrians using the adjacent footpath;
 - openings are integrated with the main building so as to minimise visual impact;
 - landscaping, mounding and/or fencing is incorporated to improve its presentation to the street and to adjacent properties;
 - the overall streetscape character of the locality is not adversely impaired (e.g. visual impact, building bulk, front setbacks relative to adjacent development).
- 12 Development involving the parking of vehicles where vehicles are visible from public areas, should incorporate adequate screening and landscaping.
- 13 Development involving multi-level vehicle parking should be designed to:
- provide active street frontages and land uses such as commercial, retail or other non-car park uses, along ground floor street frontages to maintain pedestrian interest and activity at street level;
 - be of a high quality design and complement the surrounding built form in terms of height, bulk and scale;
 - provide surveillance, lighting and direct sightlines along clearly defined and direct walkways, through and within car parking areas and to lift and toilet areas;
 - on a corner site with two major street frontages, be set back from the major street frontages, with commercial or other non-car park floor space in front of and screening the car parking building;
 - on a site with only one major street frontage, include screening so that any car parking is not visible from the public realm either day or night, and detailed to complement neighbouring buildings in a manner consistent with desired character in the relevant Zone and Policy Area;
 - incorporate treatments to manage the interface with adjacent housing, such as careful use of siting and use of materials and landscaping.
- 14 Development within the zone should provide off-street vehicular parking in accordance with the following:
- the rates set out in Table Mit/9 - Off Street Vehicle Parking Requirements for Designated Areas (where applicable)

- (b) apartments or residential flat buildings - one car parking space per dwelling plus one additional car parking space for every five dwellings for visitors;
 - (c) offices and/or consulting rooms, where ancillary to health, medical, education, research and community facilities – 2.5 car parking spaces for every 100 square metres floor area;
 - (d) childcare centre - one car parking space for every four children;
 - (e) education or training facility – 0.25 car parking spaces for every student;
 - (f) research facility – 1.5 car parking spaces for every 100 square metres of floor area.
- 15** A lesser number of off-street parking spaces may be provided, where it can be justified and is unlikely to cause adverse traffic and parking conditions in the wider locality, based on (but not limited to) the following:
- (a) convenient on-street parking is readily available;
 - (b) the development is located within 400 metres of a high frequency public transport service, defined as a route serviced every 15 minutes between 7.30 am and 6.30 pm Monday to Friday and every 30 minutes at night, Saturday, Sunday and public holidays until 10.00 pm;
 - (c) the development is a mixed use development with integrated (shared) parking where the respective peak parking demands across the range of uses occurs at different times;
 - (d) the development is sited in a locality where the respective peak demands for parking across the range of uses (existing and proposed) occurs at different times and suitable arrangements are in place for the sharing of adjoining or nearby parking areas;
 - (e) the development supports the reuse of a heritage place where the provision of additional parking is unable to be accommodated on site.
- 16** Advertisements and advertising hoardings should not include any of the following:
- (a) flashing or animated signs;
 - (b) bunting, streamers, flags, or wind vanes;
 - (c) roof-mounted advertisements projected above the roofline;
 - (d) parapet-mounted advertisements projecting above the top of the parapet.

Complying Development

- 17** Complying developments are prescribed in Schedule 4 of the *Development Regulations 2008*. In addition, the following forms of development are designated as **complying** subject to the conditions contained in Table Mit/1 – Conditions Applying to Complying Development:
- (a) Advertisements listed in Table Mit/1, subject to compliance with conditions prescribed in Table Mit/1 where applicable.

Non-complying Development

- 18** The following kinds of development (including building work, a change in the use of land, or division of an allotment) are non-complying in the Mixed Use Zone:

Any development, or portion thereof (excluding rooftop plant and equipment), greater than 5 storeys or 18.5 metres in height

- Horticulture
- Hotel
- Motel

- Road transport terminal
- Special industry
- Stock sales yard
- Stock slaughter works

12. All works shall be undertaken in accordance with the approved plans, drawings, specifications and other documentation provided in accordance with conditions 4 to 11 listed above.

The following information shall be submitted for further assessment and approval by the Minister for Planning a minimum of six months prior to commercial operation of the development:

13. Final plans, drawings, specifications and financial and maintenance arrangements (including Deeds of Agreement) associated with road infrastructure upgrades for the intersection of Hog Bay Road and Davies Road, prepared in consultation with the Department of Planning, Transport & Infrastructure and the Kangaroo Island Council. 16. A Native Vegetation Management, Rehabilitation and Revegetation Plan, prepared in consultation with the Department for Environment and Water and the Kangaroo Island Natural Resources Management Board. The plan also should include details on how weeds and pests are to be managed following commencement of operations.

During Operation of the Development

17. Operations on the site shall be undertaken in accordance with the approved plans, drawings, specifications and other documentation provided in accordance with conditions 12 – 16 as listed above.
18. The development/site shall be maintained in a serviceable condition and operated in an orderly manner at all times consistent with conditions of approval, to the satisfaction of the Minister for Planning.
19. Undeveloped allotments shall be maintained in a neat and tidy condition at all times, with soil surfaces stabilised to minimise erosion, to the satisfaction of the Minister for Planning.
20. Recycled water (wastewater, greywater and stormwater) must be stored separately from the main water supply storage in accordance with relevant EPA Guidelines.
21. All liquids that have the ability to cause environmental harm must be stored within a bunded compound that has a capacity of at least 120% of the volume of the largest container, in accordance with the EPA 'Bunding and Spill Management Guidelines' (2007).

ADVISORY NOTES

1. Approvals will be required for all structures on site and for each component of the development, including:
- the resort clubhouse building and associated facilities;
 - the tourist accommodation (lodges and suites);
 - storage sheds and other storage structures;

- the water storage dam; and
- any land division to create certificates of title for separate allotments.

In respect of land division documentation, surveyed plans sufficient to satisfy Lands Titles Office procedure should be provided.

2. Further designs and plans (i.e. subject to separate applications to the Minister for Planning or the Development Assessment Commission, as the Governor's delegate) will be required should further development approval be sought for dwellings or additional tourist accommodation.
3. Pursuant to Development Regulation 64, the applicant is advised that the Kangaroo Island Council or private certifier conducting a Building Rules assessment must-
 - (a) provide to the Minister a certification in the form set out in Schedule 12A of the Development Regulations 2008 in relation to the building works in question; and
 - (b) to the extent that may be relevant and appropriate-
 - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12; and
 - (ii) assign a classification of the building under these regulations; and
 - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund Act 1993.

Regulation 64 of the Development Regulations 2008 provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Planning.

4. The Kangaroo Island Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this development authorisation (including any Conditions or Advisory Notes that apply in relation to this development authorisation).
5. Should the applicant wish to vary the Major Development or any of the components of the Major Development, an application may be submitted, provided that the development application variation remains within the ambit of the Public Environmental Report and Assessment Report referred to in this development authorisation. If an application variation involves substantial changes to the proposal, pursuant to Section 47 of the Development Act 1993, the applicant may be required to prepare an amended Public Environmental Report for public inspection and purchase. An amended Assessment Report may also be required to assess any new issues not covered by the original Assessment Report and a decision made by the Governor pursuant to Section 48 of the Development Act 1993.
6. The applicant's CEMMP and other Plans should be prepared taking into consideration (and with explicit reference to) relevant EPA policies and guideline documents, including, but not limited to:
 - (a) the Environment Protection (Air Quality) Policy 1994;
 - (b) the Environment Protection (Noise) Policy 2007;
 - (c) the Environment Protection (Water Quality) Policy 2003;
 - (d) the Environment Protection (National Pollutant Inventory) Policy 2008;
 - (e) the Standard for the Production and Use of Waste Derived Fill (if applicable) (2013);
 - (f) the Bunding and Spill Management Guidelines (2012);
 - (g) the Stormwater Pollution Prevention Code of Practice for the Building and Construction Industry (1999);
 - (h) Handbooks for Pollution Avoidance; and
 - (i) any other legislative requirements, Guidelines and Australian Standards requiring compliance.
7. All works and activities must be undertaken in accordance with the General Environmental Duty as defined in Part 4, section 25(1) of the Environment Protection Act 1993 (which requires that a person must not undertake any activity, which pollutes, or may pollute; without taking all reasonable and practical measures to prevent or minimise harm to the environment), relevant Environment Protection Policies made under Part 5 of the Environment Protection Act 1993 and other relevant publications and guidelines.
8. A site contamination consultant must be engaged to prepare the Preliminary Site Investigation Report, in accordance with Schedules A and B of the National Environment Protection (Assessment of Site Contamination) Measure 1999 (NEPM). If the report identifies that a potentially contaminating activity has occurred, an accredited Site Contamination Auditor must provide a Site Contamination Audit Report that states the site is suitable for residential use or the site does not pose unacceptable risks to human health and the environment for the proposed commercial area (e.g. short term tourist accommodation).

Statements by site contamination consultants in relation to site contamination must be clearly qualified as to the existence of site contamination at the site by specifying the land uses that were taken into account in forming that opinion as required by Section 103ZA of the Environment Protection Act 1993.

9. Best practice with regard to bioretention is considered to be a design which uses the guidance contained in the Cooperative Research Centre 'Water Sensitive Cities Guidelines for Stormwater Biofiltration Systems – Summary Report' (2015), available at: www.watersensitivecities.org.au. To be effective at treating stormwater on a long term basis, it is recommended that at least 50% of the plants used for bioretention are those recommended in the Report.
10. The applicant is reminded of its obligations under the Native Vegetation Regulations 2003 whereby any native vegetation clearance must be undertaken in accordance with a management plan that has been approved by the Native Vegetation Council that results in a significant environmental benefit on the property where the development is being undertaken, or a payment is made into the Native Vegetation Fund of an amount considered by the Native Vegetation Council to be sufficient to achieve a significant environmental benefit in the manner contemplated by section 21(6) of the Native Vegetation Act 1991, prior to any clearance occurring.
11. Kangaroos are protected under the National Parks and Wildlife Act 1972. South Australia has a Kangaroo Management Plan which has been approved under federal legislation, and a planning decision does not include approvals for the culling of Kangaroos, which is a separate matter to be carefully managed in consultation with the for Environment and Water and Natural Resources Kangaroo Island.
12. The applicant is reminded of its obligations under the Aboriginal Heritage Act 1988, whereby any 'clearance' work that may require permission to disturb, damage or destroy Aboriginal Sites, must be undertaken with the full authorisation of the Minister for Aboriginal Affairs and Reconciliation, according to Section 23 of the Act.

13. The applicant, and all agents, employees and contractors, such as construction crews, must be conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Department of Aboriginal Affairs and Reconciliation in the event that archaeological items (especially skeletal material) are uncovered during earthmoving.
14. The applicant is reminded of its obligations under the Commonwealth Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act), not to undertake any activity that could have a significant impact on any matter of National Environmental Significance, without first referring it to Commonwealth Minister for the Environment for consideration under the Act.
15. The Minister has a specific power to require testing, monitoring, auditing and reporting under Section 48C of the Development Act 1993.
