Premier

T&F19/115CS

Legislative Council Office
Adelaide, 4 December 2019

Forwarded to the Honourable the Premier, the following Resolution, passed by the Legislative Council on 4 December 2019:

That the Regulations made under the Planning, Development and Infrastructure Act 2016 concerning Development Assessment, made on 27 June 2019 and laid on the Table of this Council on 2 July 2019, be disallowed.

CHRIS SCHWARZ
Clerk of the Legislative Council

ENVIRONMENT PROTECTION ACT 1993

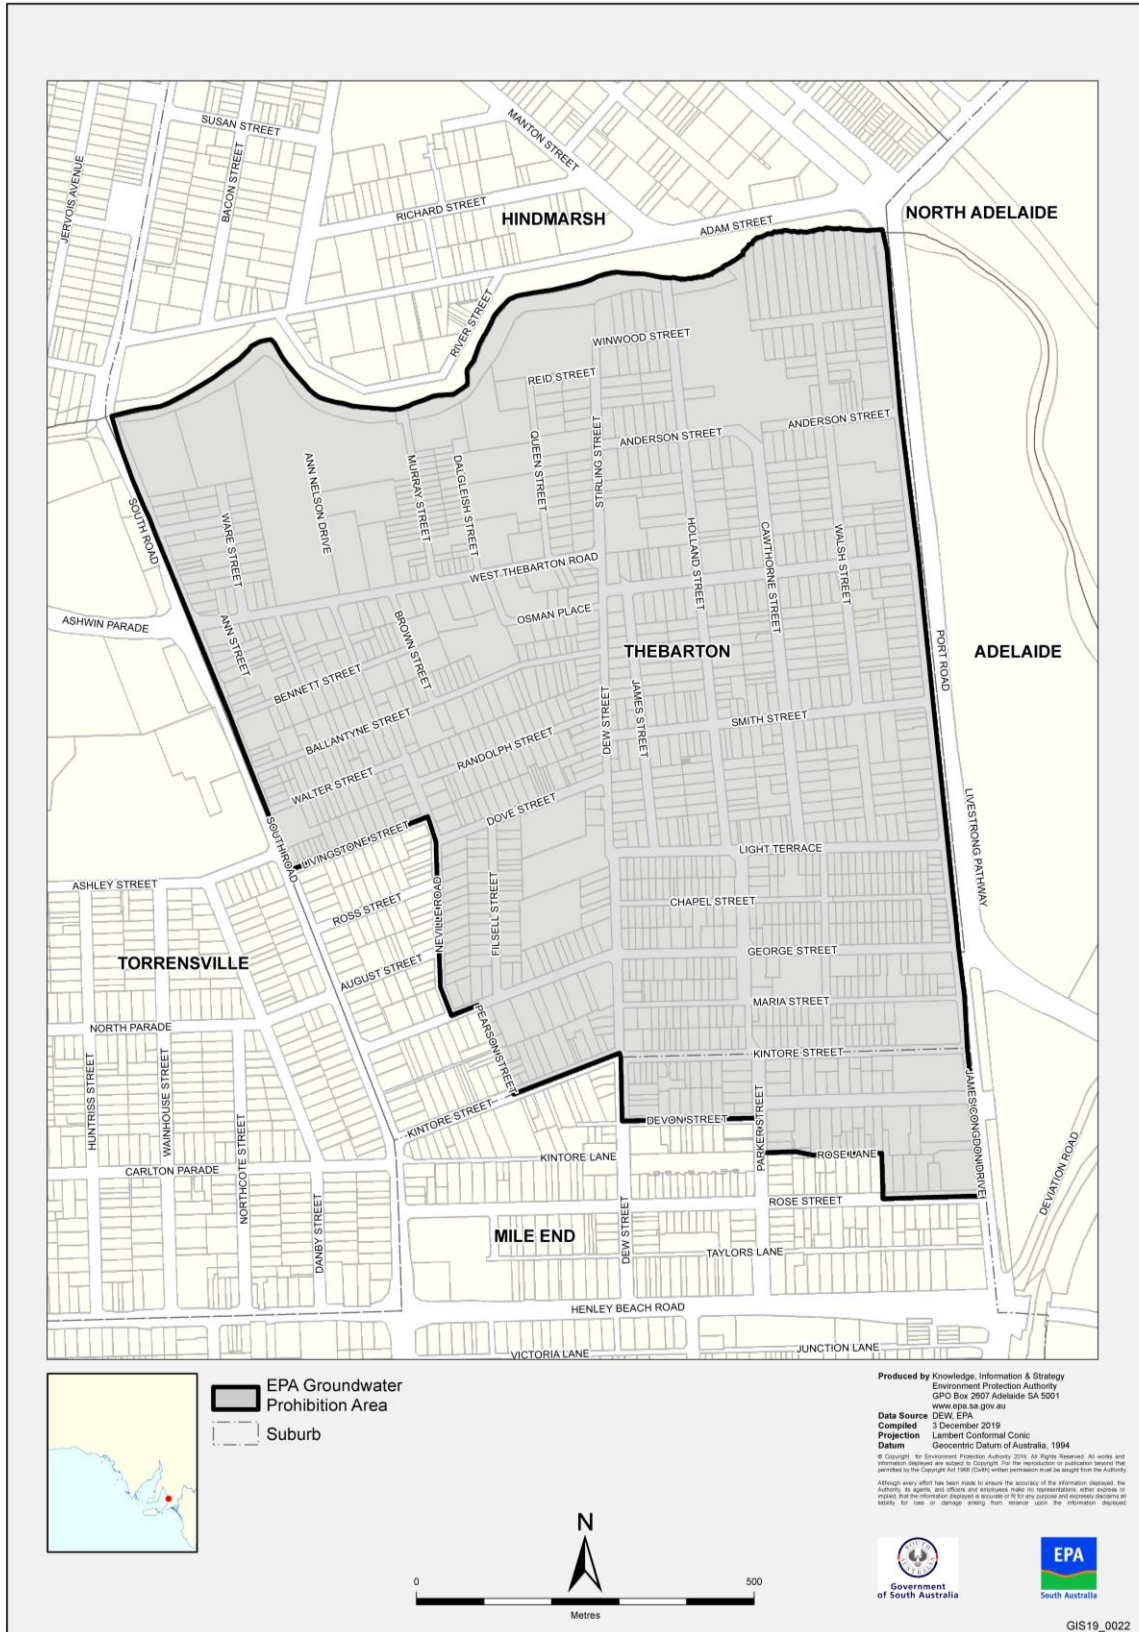

Prohibition on Taking Water affected by Site Contamination

I, ANDREW WALTER PRUSZINSKI, Manager of Site Contamination and Delegate of the Environment Protection Authority ('the Authority'), being satisfied that site contamination exists that affects or threatens groundwater and that action is necessary pursuant to section 103S of the *Environment Protection Act 1993* to prevent actual or potential harm to human health or safety hereby prohibit the taking of groundwater from the 1st Quaternary aquifer (as defined below) within the area specified in the map to this notice, other than for environmental assessment or environmental monitoring purposes or as approved in writing by the Authority.

This Notice relates to groundwater in:

- (i) The 1st Quaternary aquifer, being the body of groundwater 0 to approximately 17 metres below the ground surface within the specified area

The site contamination affecting the groundwater is in the form of chlorinated hydrocarbons, petroleum hydrocarbons and metals which represent actual or potential harm to human health or safety. This prohibition becomes official upon the gazettal of this notice.

Dated: 12 December 2019

A. PRUZINSKI
 Manager, Site Contamination
 Environment Protection Authority

ENVIRONMENT PROTECTION ACT 1993

SECTION 69

Revocation of Collection Depot Approval

I, ANDREA KAYE WOODS, Delegate of the Environment Protection Authority ('the Authority'), pursuant to Section 69 of the Environment Protection Act 1993 (SA) ('the Act') hereby:

1. Revocation of collection depot approval:

Revoke the approval of the collection depot identified by reference to the following matters, which previously received all containers belonging to a class of containers that were approved as Category B Containers:

- the name of the collection depot described in Column 1 of Schedule 1 of this Notice;
- the name of the proprietor of the depot identified in Column 3 of Schedule 1 of this Notice;
- the location of the depot described in Columns 4-6 of Schedule 1 of this Notice.

FISHERIES MANAGEMENT (PRAWN FISHERIES) REGULATIONS 2017

Fishing Activities in the Spencer Gulf Prawn Fishery

TAKE NOTE that pursuant to regulation 10 of the *Fisheries Management (Prawn Fisheries) Regulations 2017*, the notice dated 26 March 2019 on page 986 of the South Australian Government Gazette on 4 April 2019 prohibiting fishing activities in the Spencer Gulf Prawn Fishery, is hereby varied such that it will not be unlawful for a person fishing pursuant to a Spencer Gulf Prawn Fishery licence to use prawn trawl nets in the areas specified in Schedule 1, during the period specified in Schedule 2, and under the conditions specified in Schedule 3.

SCHEDULE 1

The waters of the Spencer Gulf Prawn Fishery:

- Except the Northern Closure area, which is defined as the area north of the following index points:
 - 33 ° 31.70 S 137 ° 16.00 E
 - 33 ° 31.70 S 137 ° 29.50 E
 - 33 ° 27.00 S 137 ° 29.50 E
 - 33 ° 27.00 S 137 ° 32.40 E
 - 33 ° 31.00 S 137 ° 35.80 E
 - 33 ° 40.00 S 137 ° 32.50 E
 - 33 ° 47.70 S 137 ° 41.80 E
- Except the Wallaroo Closure area, which is defined as the waters contained within the following index points:
 - 33 ° 47.50 S 137 ° 26.50 E
 - 33 ° 50.50 S 137 ° 31.70 E
 - 33 ° 52.50 S 137 ° 30.00 E
 - 33 ° 49.50 S 137 ° 24.70 E

Then back to point 1
- Except the Southern Closure area, which is defined as the waters contained within the following index points:
 - 33 ° 41.00 S 137 ° 06.00 E
 - 33 ° 51.80 S 137 ° 14.90 E
 - 33 ° 56.40 S 137 ° 17.00 E
 - 34 ° 14.00 S 136 ° 57.00 E
 - 34 ° 23.00 S 136 ° 57.00 E
 - 34 ° 36.00 S 136 ° 44.00 E
 - 34 ° 36.00 S 136 ° 34.00 E
 - 34 ° 19.00 S 136 ° 38.50 E
 - 34 ° 17.00 S 136 ° 42.00 E
 - 34 ° 08.20 S 136 ° 46.40 E
 - 33 ° 55.00 S 136 ° 34.00 E
- Except the Illusion closure area, which is defined as the waters contained within the following closure index points:
 - 33 ° 28.8 S 137 ° 32.2 E
 - 33 ° 28.3 S 137 ° 33.2 E
 - 33 ° 28.85 S 137 ° 33.5 E
 - 33 ° 29.4 S 137 ° 32.5 E

Then back to point 1
- Except the Jurassic Park closure area, which is defined as the waters contained within the following closure index points:
 - 33 ° 54.90 S 137 ° 17.60 E
 - 33 ° 54.40 S 137 ° 19.40 E
 - 33 ° 54.70 S 137 ° 19.60 E
 - 33 ° 55.20 S 137 ° 17.80 E

Then back to point 1

- f) Except the Wardang Closure area, which is defined as the waters contained within the following index points:
- | | | | | | | | | |
|----|----|---|-------|---|-----|---|-------|---|
| 1. | 34 | ° | 10.00 | S | 137 | ° | 28.00 | E |
| 2. | 34 | ° | 21.00 | S | 137 | ° | 12.00 | E |
| 3. | 34 | ° | 45.00 | S | 137 | ° | 15.00 | E |
| 4. | 34 | ° | 48.53 | S | 137 | ° | 09.45 | E |
| 5. | 34 | ° | 48.53 | S | 137 | ° | 06.00 | E |
| 6. | 34 | ° | 50.75 | S | 137 | ° | 06.00 | E |
| 7. | 34 | ° | 54.00 | S | 137 | ° | 01.00 | E |
- g) Except the Corny closure area, which is defined as the waters within and bounded by the following closure index points:
- | | | | | | | | | |
|----|----|---|-------|---|-----|---|-------|---|
| 1. | 34 | ° | 27.00 | S | 136 | ° | 53.00 | E |
| 2. | 34 | ° | 27.00 | S | 137 | ° | 02.00 | E |
| 3. | 34 | ° | 35.00 | S | 136 | ° | 56.00 | E |
| 4. | 34 | ° | 48.60 | S | 136 | ° | 52.00 | E |
| 5. | 34 | ° | 54.00 | S | 136 | ° | 52.00 | E |
| 6. | 34 | ° | 54.00 | S | 136 | ° | 48.50 | E |
| 7. | 34 | ° | 49.50 | S | 136 | ° | 48.50 | E |
| 8. | 34 | ° | 49.50 | S | 136 | ° | 40.50 | E |
| 9. | 34 | ° | 39.50 | S | 136 | ° | 40.50 | E |
- Then back to point 1

SCHEDULE 2

Commencing at sunset on 5 December 2019 and ending at sunrise on 7 December 2019.

SCHEDULE 3

1. The coordinates in Schedule 1 are defined as degrees decimal minutes and are based on the World Geodetic System 1984 (WGS 84).
2. No fishing activity may be undertaken between the prescribed times of sunrise and sunset for Adelaide (as published in the South Australian Government Gazette pursuant to the requirements of the Proof of Sunrise and Sunset Act 1923) during the period specified in Schedule 2.
3. Based on the best information available from the fleet, fishing must cease in an area in the Mid/North Gulf if the average prawn bucket count exceeds 260 prawns per 7kg; or in an area in the Southern Gulf if the average prawn bucket count exceeds 260 prawns/7kg.
4. No fishing activity may occur without the authorisation of Coordinator at Sea, Paul Watson, or other nominated Coordinator at Sea appointed by the Spencer Gulf and West Coast Prawn Fishermen's Association.
5. The authorisation of the Coordinator at Sea must be in writing, signed and record the day, date and permitted fishing area within the waters of Schedule 1 in the form of a notice sent to the fishing fleet or vary an earlier authorisation issued by the Coordinator at Sea.
6. The Coordinator at Sea must cause a copy of any authorisation for fishing activity or variation of same, made under this notice to be emailed to the Prawn Fisheries Manager immediately after it is made.
7. The Spencer Gulf and West Coast Prawn Fishermen's Association must keep records of all authorisations issued pursuant to this notice.

MINING ACT 1971

Determination for a PEPR for Metallic and Industrial Minerals

NOTICE is hereby given in accordance with Regulation 65 (7) of the *Mining Regulations 2011* determining the minimum information required to be provided in a program for environment protection and rehabilitation (PEPR) for a mineral lease (ML) and any associated miscellaneous purposes licence (MPL) for metallic and industrial minerals (excluding coal and uranium).

1. REQUIREMENT FOR DECLARATION OF ACCURACY

The PEPR must include a signed statement by the tenement holder (or their agent) in accordance with Regulation 65 (8) that the content of the PEPR has been reviewed and is accurate.

Provide a summary of the steps undertaken to review the PEPR and ensure its accuracy.

2. DESCRIPTION OF THE ENVIRONMENT

Identify any changes to the environment, or updates to information about the environment, since the previous description of the environment was provided (be it as a mining proposal, management plan or current approved PEPR).

Where changes to the environment are identified, provide an updated description of the environment to describe the changes. Include any new baseline environmental data relevant to the control strategies or criteria set out in Section 5.

Provide a description of any applicable exempt land under Section 9 of the *Mining Act 1971* and the status of waivers of exemption required.

Note: Where the current approved PEPR does not include a set of environmental outcomes, the additional information described in Section 10 must also be included.

3. DESCRIPTION OF THE MINING OPERATIONS

Each of the elements listed in Sections 3.1–3.10 must be described only to the extent that they apply to the mining operation. If the element (or part of the element) is not applicable to the mining operation, a statement to that effect must be made and the element (or part of the element) description may be omitted.

3.1 General Description and Maps/Plans of Operations

Provide:

- a summary description of all elements of the operation, including mining, processing and waste management (include maps/plans).

3.2 Reserves, Products and Market

3.2.1 Ore Reserves and Mineral Resources

Provide:

- a statement of the current ore reserve and mineral resource estimates in the tenement area and a brief description of the basis of this estimate; include Australasian Joint Ore Reserves Committee (JORC) compliant reserve and resource estimates (and categories) if available; and
- a statement of what reserve and/or resource forms the basis for the mining operation; or
- an estimate of the resource to be mined, the basis of this estimate, and demonstrate that the resource can be economically mined at current commodity prices; and
- steps that have been taken to ensure mining operations will not sterilise/prevent future extraction of mineral resources.

3.2.2 Production Rate and Products

Provide:

- a statement of the relevant commodities listed in Section 3.2.3 below that are to be extracted, processed and sold, and the expected market or end use;
- a statement of any other commodities present in the tenement area that are not to be recovered for sale, and the reasons for this decision;
- a quantitative estimate of production of mine gate product(s) for the life of mine, and a schedule of the annual production of mine gate product(s); and
- a statement if any extractive minerals (as defined by Section 6 of the *Mining Act 1971*) will leave the lease.

3.2.3 Commodities List

Refined Metals

Cobalt; Copper; Gold; Iron; Lead; Silver; Steel/pig iron; Thorium; Zinc

Mineral ores and concentrates

Iron ore—hematite direct shipping ore (DSO); Iron ore—magnetite DSO; Iron ore—magnetite concentrate; Heavy mineral concentrate; Rare earth elements; Contained copper in ore, concentrate or cement; Contained gold in ore or concentrate; Contained silver in ore or concentrate; Contained lead in ore or concentrate; Contained zinc in ore or concentrate

Gems and Semi Precious Stones

Amethyst; Calcite; Chrysoprase; Diamond; Jade; Opal; Quartz; Sapphire; Scholzite; Talc; Staurolite; Topaz

Industrial Minerals

Alunite; Andalusite; Anatase; Barite; Calcrete (agricultural purposes); Celestite; Cement shale; Diamond; Dolomite (use either industrial or agricultural); Diatomite; Feldspar; Garnet; Graphite; Gypsum (use either plaster, cement or agricultural); Ilmenite; Kaolin; Kyanite; Leucoxene; Lime sand (calcareous dune sands; use either chemical, agricultural or flux); Limestone (use either chemical, agricultural, cement, flux or whiting); Magnesite; Marble (use either chemical, agricultural, cement or flux); Mica; Micaceous hematite; Monazite; Palygorskite; Peat; Phosphate; Potash; Rutile; Salt; Shell grit (use either industrial or agricultural); Silica (rocks containing mainly silica-quartzite, flint, vein quartz etc.); Silica sand (use either filter, foundry or glass); Sillimanite; Talc (use either pharmaceutical or filler); Vermiculite; Wollastonite; Xenotime; Zircon

3.3 Exploration Activities

Provide information that details all exploration activities to be undertaken within the tenement area as a part of the mining operation, including:

- purpose of the activities (i.e. resource drill-out or resource extension);
- types of drilling;
- geophysical techniques likely to be used;
- earthworks required to conduct exploration activities;
- equipment required to conduct exploration activities; and
- rehabilitation methods for exploration works (including that not yet rehabilitated from previous tenure).

Any clearance of native vegetation due to exploration activities that had not been rehabilitated at the grant of the mining lease or licence must be included within the significant environmental benefit calculations detailed within the native vegetation management plan.

3.4 Mining Activities

3.4.1 *Type or Types of Mining Operation to be Carried Out*

Provide a clear statement on the type or types of mining operation to be carried out, such as:

- the mining method(s) to be adopted.

3.4.2 *Open Pit*

Describe, for the life of mine from inception to cessation, all open pit workings, including (but not limited to):

- overall pit wall angles, bench height, berm width;
- dimensions and depth of pit;
- access ramps; and
- maps, plans and cross-sections.

3.4.3 *Underground Workings*

Describe underground workings, including (but not limited to):

- stoping methods;
- potential surface disturbance resulting from underground mining;
- declines, shafts, tunnels, bore holes, ventilation intakes and exhausts; and
- maps, plans and cross-sections. Where underground fill is used, describe:
 - type of fill to be used;
 - the volume percentage of underground void to be filled;
 - sequence of filling;
 - source and proportion of fill; and
 - maps, plans and cross-sections showing the fill.

3.4.4 *Material Movements*

Provide:

- expected life of mine (including scope for extension);
- annual mine production rates and mine production schedule of ore and waste rock over the life of mine; and
- life of mine and annual strip ratios.

3.4.5 *Stockpiles*

Describe:

- location, size, shape and height of ore, product, subsoil and topsoil stockpiles;
- method of placement;
- method of stabilisation and erosion control of all stockpiles; and
- water movement through stockpiles.

The location, maximum height and extent of all stockpiles must be shown on a map.

3.4.6 *Use of Explosives*

If explosives are used, describe:

- type of explosives used on the site;
- timing and frequency of blasting;
- size of blasts; and
- storage of explosives (amount, type, detailed location and method of storage).

3.4.7 *Type of Mining Equipment*

Provide a description of the equipment (fixed and mobile) to be used in the mining operation in terms of:

- type, size and capacity of machines;
- approximate number of units;
- noise outputs;
- exhaust outputs; and
- fire ignition sources.

3.4.8 *Mine Dewatering*

Provide:

- estimated inflows of groundwater and stormwater and water from any other mining activities into mine workings;
- details of mine dewatering infrastructure, and mine water management and disposal;
- contingency measures for greater than planned water inflows into mine workings; and
- a mine water balance of water inflows and water outflows during operations and at mine completion (if not included in the water balance in Section 3.5.4).

3.4.9 *Sequence of Mining and Rehabilitation Operations*

Provide the following information on the sequence of operations in both text and map form:

- description of the sequence of mining stages;
- sequencing of progressive and final rehabilitation, including demonstration that progressive rehabilitation has been integrated with the mining plan;
- an estimation of the quantities of sulfide minerals that have the potential to generate acid or mobilise metals, or other hazardous minerals to be mined at each mining stage; and
- any mineral resource that may be sterilised from future mining by the planned mining operations.

3.4.9.1 *Rehabilitation Strategies and Timing*

Describe all activities, strategies and designs relating to mine closure for rehabilitation of open pit and/or underground workings, stockpiles, explosives storage, mining equipment and mine dewatering infrastructure. Include timing of these activities and all opportunities for progressive rehabilitation. Include (but not limited to) the maximum area of land disturbed by mining operations at any time, battering of mining faces and other earthworks, mine void backfilling, abandonment bunds, sealing of portals and ventilation shafts, soil management, revegetation and expected water infill rates.

3.4.10 *Modes and Hours of Operation*

State if the operation will be worked on a continuous (24 hour, 7 days a week), regular periodical or campaign basis.

If the operation is to be worked on a regular periodical basis, specify:

- period(s) (daily, weekly and public holidays) to be worked; and
- start and finish hours the site is to be worked per period. If the operation is to be worked on a campaign basis, specify:
 - minimum hours the site is to be worked per year;
 - the minimum time of each campaign;
 - the maximum and minimum time between campaigns;
 - define the beginning and end of each campaign;
 - hours of mining operations during campaign;
 - days of mining operations during campaign;
 - determining factors for initiating and ceasing a campaign;
 - maximum and minimum tonnage of each campaign; and
 - maximum and minimum tonnage of production per year.

3.4.11 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of the mine, should the mine suspend production, but not progress immediately to closure.

3.5 **Crushing, Grinding, Processing and Product Transport**

3.5.1 *Crushing and Grinding Plant*

Provide a description of the crushing / grinding plant including:

- area, size, type of construction and location;
- throughput rate;
- a description of ore preparation for processing;
- grind size of the ore;
- noise sources;
- dust sources and composition;
- fire ignition sources; and
- maps and plans.

3.5.2 *Processing Plant*

Provide a description of the processing plant including:

- the methods and details of processing and value adding;
- number, location, area, size, type of construction (including lining and drainage systems, as appropriate) of processing plant;
- any ancillary plant and infrastructure to be used for processing the minerals on site; examples of associated structures are concrete batching plants, wheel wash facilities, silos, fuel tanks, water tanks, chemical storage/use, reverse osmosis plants and bore fields;
- if chemicals are to be used in the beneficiation or processing of ore, describe the nature and quantities of the chemicals to be used, their reactions with ore and their ultimate fate;
- noise sources;
- dust sources and composition;
- fire ignition sources;
- other potential air emissions (including odour) and their composition; and
- maps and plans.

3.5.3 *Heap Leach*

Provide a description of the Heap Leach Pad and process including:

- type, size and location of the Heap Leach Pad;
- construction and operating specifications for the Heap Leach Pad and process, including solution containment measures;
- geochemical and geotechnical assessment of the material placed on the Heap Leach Pad before and after leaching;
- method and rate of ore deposition and removal;
- chemical characteristics of the leach solution, pregnant liquor and raffinate solutions;
- solution application rates, and method of application;
- removal (where proposed) of the Heap Leach Pad at cessation of production and the method/location of disposal of leached material;
- method of stabilisation and erosion control of Heap Leach Pad;
- an assessment of the long term chemical and physical stability of the Heap Leach Pad post mine completion;
- the source, pathway and ultimate fate of any potential mobile contaminants; and
- maps and plans.

3.5.4 *Process Water Management*

If processing water is to be used, provide a water balance including:

- approximate water volumes required;
- a summary of the inputs and outputs (with consideration of any purge requirements);
- determination of net surplus or deficit; and
- process flowsheet showing all streams including stormwater management and mine dewatering where these are connected to the processing circuit.

Provide a description of all process water ponds, including:

- size, capacity, layout and location of ponds;
- design and construction methods;
- chemical composition of the solution to be stored in each pond; and
- minimum freeboard to be maintained.

3.5.5 *Type of Mobile Equipment*

For mobile equipment to be used in crushing / grinding, processing ore and in transporting the mine product to the point of sale, describe:

- type, size and capacity of machines;
- approximate number of units;
- noise outputs;
- exhaust outputs; and
- fire ignition sources.

3.5.6 *Conveyors and Pipelines*

Provide a description of any conveyors or pipelines to be used for transporting material to or from the mine, processing facilities and the point of sale including:

- length, size (volumes to be transported), design and type of construction and location;
- the material being transported;
- leak detection strategies for pipelines;
- noise sources;
- dust sources and composition;
- fire ignition sources; and
- maps, plans and cross-sections.

3.5.7 *Hours of Operation*

Describe the hours of operation of crushing / grinding, processing and transport activities.

3.5.8 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of processing facilities, and material transport systems, should the mine suspend production, but not progress immediately to closure.

3.5.9 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure for removal, disposal, and rehabilitation of processing facilities, and material transport systems, including timing of these activities.

For rehabilitation strategies and timing related to Heap Leach, provide:

- a Heap Leach detoxification strategy;
- identification of the volumes of process solution and flush water to be disposed of at closure; and
- a methodology for the disposal of residual process solution and flush water at closure.

3.6 **Wastes**

3.6.1 *Waste Rock and Tailings Storage Facilities*

For waste rock and tailings storage facilities (TSF) provide:

- the estimated tonnes and volumes of all waste rock and tailings to be stored;
- the reserve and any resource or potential resource that the estimated tonnes and volumes of waste rock and tailings is based on;
- the type, location, size, shape, height and method of construction of permanent and temporary waste storage facilities;
- a geochemical and geotechnical assessment of the waste rock and tailings based on the geochemical and geotechnical properties determined from the analysis of representative sampling of all waste rock types and tailings to be disposed;
- an assessment on the weathering and erosive potential of waste rock to be disposed;
- specifications, drawings and plans for the design, construction, operation and completion of all facilities;
- the method and rate of waste rock/tailings disposal;
- where relevant, a description of the placement and encapsulation of waste material deemed to be hazardous, including potentially acid forming material (PAF);
- the method of stabilisation and erosion control of waste storage facilities, both during operations and post completion;
- surface water runoff control on disturbed and rehabilitated areas;
- a geotechnical stability assessment and a factor of safety analysis;
- an assessment of seepage of liquids through the waste rock and tailings storage facilities;
- strategies for the containment of any seepage that has the potential to impact the environment;
- an assessment of the post completion chemical and physical stability of the structure following rehabilitation, including the expected extent of erosion;
- an assessment of the source, pathway and ultimate fate of any potential mobile contaminants; and
- a description of the governance arrangements for the design, construction, operation and closure including when it is proposed to use third party verification.

Include a water balance for the TSF (if not included in the water balance in Section 3.5.4).

3.6.2 *Other Processing Wastes*

Provide:

- the volumes and composition of all solid and liquid wastes produced;
- estimated volumes of waste processing water, reverse osmosis reject water, water content of solid wastes, and method of disposal or recycling;
- waste water composition;
- disposal and management of any hazardous material or contaminants within waste including radioactive, toxic, corrosive or flammable materials; and
- the source, pathway and ultimate fate of any potential mobile contaminants.

3.6.3 *Industrial and Commercial Wastes*

List any industrial and commercial wastes generated including, but not limited to:

- putrescible waste, including sewage;
- oils and other hydrocarbons; and
- tyres.

For each waste type, describe the method of disposal including:

- offsite disposal;
- on site waste disposal (including size, location and construction details);
- recycling (either on or offsite);
- the type, area and layout of sewage systems to be installed at the site; and
- describe what, if any approvals are required for the disposal of waste.

For each type of waste, describe any potential contaminants that may be generated from onsite storage, and the ultimate fate of those contaminants.

3.6.4 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of waste rock and tailings and any other waste left on site, should the mine suspend production, but not progress immediately to closure.

3.6.5 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure, including timing of these activities and all opportunities for progressive rehabilitation of waste rock and tailings and any other waste to be left on site.

3.7 **Supporting Surface Infrastructure**

3.7.1 *Access*

Describe:

- access route to the mining operations;
- indicate if any new roads are to be constructed, or if existing roads or intersections (public and private) are to be upgraded;
- transport system(s) used to and from the mining operations and the estimated number of vehicle movements per day; and
- airport/airstrips to be constructed.

3.7.2 *Accommodation and Offices*

Describe:

- number, area, size, type of construction and location of accommodation buildings, caravans or camp, and associated structures to be used on site; and
- state if temporary or permanent.

3.7.3 *Public Services and Utilities Used by the Operation*

Describe:

- sources of external services that are supplied to the mining operations;
- routes for connection if any new connections to public infrastructure are required; and
- any existing surface infrastructure that has been and/or the extent it may be affected by the mining operations.

3.7.4 *Visual Screening*

Describe the type of screening, including existing or planned vegetation (i.e. species and density of plantings).

3.7.5 *Fuel and Chemical Storage*

For all fuels and chemicals stored on site, detail:

- types of bulk chemicals and the volumes of each; and
- details on storage, bunding and containment for all chemical and fuel storage vessels.

3.7.6 *Site Security*

Describe infrastructure and measures that will be adopted to prevent unauthorised access by the public, including fencing, signage etc.

3.7.7 *Stormwater, Silt Control and Drainage*

Describe:

- location and design of silt management structures;
- runoff control on disturbed and rehabilitated areas;
- storage, diversion and disposal of clean water (discharge water must comply with the applicable Environment Protection Authority South Australia water quality policy); and
- a whole of site stormwater balance, if not included in the water balance in Section 3.5.4. Provide a plan showing the surface water movement for the whole mine site.

3.7.8 *Care and Maintenance*

Detail all activities and strategies required for care and maintenance of supporting surface infrastructure, should the mine suspend production, but not progress immediately to closure.

3.7.9 *Rehabilitation Strategies and Timing*

Detail all activities, strategies and designs relating to mine closure for rehabilitation of supporting surface infrastructure. Provide details for timing of closure activities, including all opportunities for progressive rehabilitation.

3.8 **Vegetation Clearance**

3.8.1 *Description of Vegetation Clearance*

If clearing of native vegetation is to be undertaken, a plan and description of the vegetation present in the tenement area must be provided, showing:

- the extent of any vegetation clearance; and
- the likelihood of the presence of threatened flora.

3.9 **Mine Completion**

3.9.1 *Description of Mine Site at Completion*

Provide a description of the mine site as it will be at completion after all rehabilitation and closure activities have been completed, including:

- final post completion land use;
- landforms;
- vegetation covers (including native vegetation that will not be disturbed due to mining operations);
- natural contours of land not to be disturbed by mining operations;
- any mining infrastructure that will remain on site and will become the responsibility of the landowner;
- location, description and management of waste disposal areas;
- location of reshaped and rehabilitated areas showing surface contours and revegetation;
- mine voids (open pit and/or underground);
- location of stored and/or exposed PAF material and/or other hazardous materials;
- expected final water level and time to reach this level, and water quality of mine voids;
- location of surface water infrastructure including ponds and diversions; and
- representative plans and cross-sections that show:
 - pre-mining natural surface
 - emplacement areas, waste disposal areas and disturbed areas
 - final rehabilitated surface
 - where relevant, backfilled and remaining underground workings
 - predicted final groundwater levels
 - interpreted geology including all rock types.

Provide a description of the mechanism for transferring responsibility for any potential residual liability (i.e. ongoing maintenance or monitoring) subsequent to surrender of the tenement.

3.9.2 *Rehabilitation Liability Estimate*

Provide the maximum third party cost of rehabilitation at any time over the life of mine covered by the PEPR. The estimate must be based on reasonable third party costs of undertaking the rehabilitation strategies as outlined in Section 3 and include costs for project management, inflation, normal project variation, and contingency provision for risk associated with the strategies and uncertainty in the cost estimates.

3.10 **Resource Inputs**

3.10.1 *Workforce*

For the workforce for all mining operations (mining, processing, waste management and supporting surface infrastructure), describe:

- how operations on the site will be managed;
- number and workforce breakdown by job type; and
- source of employees.

3.10.2 *Energy Sources*

For the energy sources and usage provide:

- estimates of total annual energy usage (from all sources, including personnel transport and ore transport to point of sale);
- expected sources of energy;
- potential for efficiency gains;
- amount and percentage of zero emission energy to be utilised;
- equivalent annual CO₂ generated; and
- any carbon offsets proposed.

3.10.3 *Water Sources*

Provide details on the source(s) of water to be used at the mine, expected usage and any discharge, including:

- expected annual water usage by source;
- indicate if any water usage by source will be more than 5% of the total annual water withdrawal for that source;
- percentage of water that will be recycled; and
- water discharge by quality and destination.

4. **CONSULTATION**

This section must summarise the results of any attempted consultation that has been undertaken on the mining operation.

The summary must list:

- a description of the process undertaken for identifying stakeholders with an interest in, or stakeholders likely to be directly affected by the mining operation;
- a description of the process undertaken for the delivery of information to, gathering of feedback from, and responding to those identified stakeholders;
- the results of the consultation undertaken with those identified stakeholders, including:
 - the concerns / issues raised; and
 - the steps taken, or that are proposed to be taken to address those concerns.
- if any individual or group of similar impacted persons were not able to be consulted, what steps were taken to consult with them.

An ongoing engagement plan with the landowner must be provided (if the landowner is not the tenement holder). If required by the lease or licence, an ongoing community engagement plan must be provided that:

- identifies any community likely to be affected by mining operations authorised by the lease or licence;
- includes processes for:
 - identifying community attitudes and expectations;
 - providing information to the community;
 - receiving feedback from the community; and
 - analysing community feedback and considering community concerns or expectations in relation to mining operations authorised by the lease or licence.

- includes a process for registering, documenting and responding to complaints and other communications from members of the community in relation to mining operations authorised by the lease or licence.

5. ENVIRONMENTAL OUTCOMES, STRATEGIES, CRITERIA AND MONITORING

5.1 Environmental Outcomes

Set out environmental outcomes (including mine completion outcomes) as required by Section 70B (2) (b) (i) of the *Mining Act 1971* and Regulation 65 (2) (b), or as required by the lease/licence, or determined as a result of a review of a PEPR in accordance with Regulation 114 (9).

For each environmental outcome, the information described in Sections 5.2, 5.3, 5.4 and 5.5 must be provided.

5.2 Control and Management Strategies

5.2.1 Control and Management Strategies

Set out the control and management strategies adopted to demonstrate that the environmental outcomes can be and will continue to be achieved.

Demonstrate that the control and management strategies are commensurate with the impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

5.2.2 Uncertainty Assessment

Describe any significant degree of uncertainty pertaining to the likely effectiveness of control and management strategies, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

Provide a description and list of current and future works (for example (but not limited to) trials, test work, studies, modelling, validations) that are to be undertaken to address the identified uncertainty or assumption.

Provide a schedule of the timing that the future works will be undertaken and completed.

Based on the schedule of future works, state the timing for review of the PEPR in accordance with Section 70C (1) of the *Mining Act 1971*.

5.3 Measurement Criteria

Set out measurement criteria for each environmental outcome (including mine completion outcomes) and for each measurement criteria include all details listed in Regulation 65 (2) (d).

Measurement criteria must be developed separately for construction, operation and mine completion, as appropriate.

Where appropriate, recognised industry standards, codes of practice or legislative provisions from other Acts can be used as criteria.

All point-related measurement criteria, such as water bores, sampling points and photo points (including direction) must be included on a map.

When control or baseline data is used, this must be included in the PEPR.

Where groundwater modelling is to be relied upon to demonstrate achievement of groundwater completion outcomes, a process must be provided for validation of predictive modelling, including a description of the model and assumptions used.

Where native vegetation clearance is planned, criteria must demonstrate the successful implementation of the native vegetation management plan.

5.4 Leading Indicator Criteria

If required by the lease/licence and/or where there is a high level of reliance on control strategies to achieve an environmental outcome, set out leading indicator criteria as required by Regulation 65 (2) (e) that will be used to give an early warning that a control strategy may fail or be failing.

5.5 Operator Compliance Monitoring Plan

Provide a monitoring program which directly addresses the measurement criteria and leading indicator criteria in Sections 5.3 and 5.4 (as per Regulation 65 (2) (d) and 65 (2) (e)) and include:

- responsibility (who will measure);
- record keeping; and
- frequency of reporting to management and any external parties.

5.6 New Environmental Impacts

Where there has been a change in the description of the environment or a change in the description of operations from those detailed in the mining proposal, management plan or currently approved PEPR, the tenement holder must undertake an assessment of the environmental impacts for the site to determine if the current environmental outcomes (as included in the lease/licence and/or the currently approved PEPR) are appropriate and if new or modified environmental outcomes are required.

If new or modified environmental outcomes are required, additional information (as appropriate for the new environmental impact(s)) must be provided as specified in Section 11 and Section 5.5 of this Determination.

6. OPERATOR CAPABILITY

Sufficient information must be provided on each of the factors listed under Regulation 89 (1) (a–j) to demonstrate these have been implemented to an appropriate standard to provide confidence that the operator has appropriate experience, processes and procedures in place to be able to operate the tenement(s) to achieve compliance with the regulatory requirements and relevant environmental outcomes under the Act.

7. LEASE/LICENCE

Where the lease or licence includes specific conditions or requirements that are not environmental outcomes, a section must be included that demonstrates where these have been addressed in the PEPR (if relevant) or demonstrates how otherwise they have or will be complied with.

8. FORMAT OF THE PEPR

Unless otherwise specified by the Director of Mines or (delegate):

- an electronic version of the PEPR must be submitted online through the DEM website;
- each page, plan or other separate sheet must include the tenement number(s), date of the PEPR preparation and sequential page numbering;
- the electronic version must be submitted in one single Acrobat PDF file;
- the submitted PEPR must be accompanied by the relevant fee payable in accordance with legislation;
- Microsoft WORD compatible files must be submitted if requested by the Director of Mines (or delegate), or other authorised officer; and
- the PEPR must be submitted by email or hard copy if requested by the Director of Mines (or delegate) or other authorised officer.

If the PEPR being submitted is a review of an approved PEPR, provide a description or summary of all content changes made to the submitted PEPR.

The PEPR must be submitted by the holder(s) of the related mining tenements, or by a person acting on behalf of the tenement holder when accompanied by either a signed statement from the tenement holder endorsing the content, or a signed agency agreement that authorises the agent to provide a PEPR on behalf of the tenement holder.

PEPRs must be submitted online through the Department for Energy and Mining Website. PEPRs may be submitted via email, post or courier and should be marked 'Attention: Mining Assessments' only if authorised by the Director of Mines (or delegate), or other authorised officer.

9. MAPS AND PLANS

Unless otherwise specified by the Director of Mines or delegate, the elements described in Sections 9.1–9.4 must be included where applicable to the mining operation.

9.1 General Requirements for Maps, Plans and Cross-Sections

All maps and plans must conform to the following standards:

- Australian Height Datum (AHD);
- State and show the relevant datum;
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission. All cross-sections must conform to the following standards:
 - Australian Height Datum (AHD);
 - State and show the relevant datum;
 - metric units;
 - title, scale bar, text and legend;
 - date prepared and author;
 - be of appropriate resolution and scale for represented information; and
 - be legible in both the hardcopy and electronic versions of the submission.

9.2 Location Plan(s)

Provide location plan(s) of the existing environment showing:

- tenement boundaries;
- cadastral information;
- location of existing roads, rails, fences, transmission lines, buildings and pipelines;
- land titles and ownership;
- existing surface contours;
- existing vegetation;
- location of watercourses, including ephemeral and permanent rivers, creeks, swamps, streams and any man-made water management structures;
- location and extent of all previously disturbed areas, including those associated with previous mining; and
- location and extent of any adjacent conservation reserves, Aboriginal and/or European heritage sites (in so far as may be permitted by the relevant legislation) or any other significant areas.

9.3 Mining Operations Plan(s)

Provide plan(s) of mining operations showing:

- tenement boundaries;
- existing or modified surface contours;
- geology within the tenement area, including but not limited to; location, dimensions and orientation (dip and strike), and extent of the mineral resource and ore reserve;
- location of all extraction areas;
- location of existing ephemeral and permanent rivers, watercourses, creeks, dams and water management structures;
- location and extent of all areas to be disturbed from mining (including waste rock and soil/subsoil stockpiles, silt/sludge dams, mine infrastructure, processing plant, waste disposal facilities and pits);
- location and extent of all areas to be progressively rehabilitated during mining;
- sequence of mining and rehabilitation in appropriate time intervals, or per stages (depicting progressive rehabilitation); and
- final open pit and/or underground workings.

9.4 Vertical Sections/Cross-Sections

Provide a series of representative cross-sections at appropriate time intervals or stages that adequately represent:

- pre-mining natural surface;
- the staged profile indicating the location and shape of the active mining area, emplacement areas and rehabilitated areas;
- the final rehabilitated surface;
- final open pit and/or underground workings; and Show where the cross-sections are oriented to the mine plan.

In accordance with Regulation 114 (9), where the current approved PEPR does not include a set of environmental outcomes, the additional information described in Sections 10 and 11 must also be included.

10. DESCRIPTION OF THE ENVIRONMENT

Each of the elements of the environment listed in Sections 10.1–10.19 must be described only to the extent that they may need to be considered in assessing the potential impacts of the operations. If the element is not likely to be affected by the operation, a statement to that effect must be included (note: the environment is defined in Section 6 (4) of the *Mining Act 1971*).

10.1 Topography and Landscape

Provide a description and map of the topography and landscape of the:

- tenement area; and
- general surroundings.

10.2 Climate

Provide:

- a summary of rainfall and temperature patterns, evaporation rates, and wind directions and speed (including maximum wind gusts); and
- details of the maximum average recurrence interval or annual exceedance probability rainfall event used for the operational and closure design of the project, and the justification for the value(s) selected.

10.3 Topsoil and Subsoil

Provide:

- a description of the soil profile (type and depth), and the characteristics and/or productivity of all soils on the tenement area (show this information on a map if there is a variation in soils over the tenement area); and
- identify any soil characteristics, including (but not limited to) erodibility, acid sulfate, sodic or non-wettable soils, that may require control measures to reduce environmental impacts during operations or rehabilitation.

10.4 Geology

Provide a description of the following, as a minimum:

- regional geology;
- geology within the tenement area, including but not limited to;
 - location, dimensions and orientation (dip and strike), and extent of the mineral resource and ore reserve;
 - composition of all rock types that are to be disturbed;
 - interpretation of the stratigraphy of the rocks hosting the deposit as well as any overlying and adjacent rock units; and
 - a description and plan of potential for extension to the orebody.
- representative cross-sections, long projection and a geological map of the tenement area showing the location of rock types and rock units present; and
- the exploration data on which the geological interpretation was based on.

10.5 Geochemistry and Geohazards

Provide:

- a geochemical assessment of all rock types that are to be disturbed, based on representative sampling and analysis that includes the identification and quantification of, but not limited to, sulfide minerals that have the potential to generate acid or mobilise metals into the environment; and
- a mineralogical assessment of all the rock types that are to be disturbed, based on representative sampling and analysis for the presence and quantification of (but not limited to) radioactive minerals, asbestos or minerals that have the potential to produce respirable silica.

Describe the potential for any of the following natural geohazards to be present in the tenement area:

- structural instability, including slips, faults, karst features or geological discontinuities; and
- major seismic events (based on historical data).

10.6 Hydrogeology

Provide:

- a description of the local and regional hydrogeology, detailing both the stratigraphy and hydrostratigraphy;
- details of local groundwater systems, including information on water quality and static water level (including seasonal fluctuations, recharge and discharge mechanisms, aquifer hydraulic properties, location of any aquifer (shown on a plan) and static water level of any other known drillholes);
- the environmental value of the water resource(s) determined according to Australian and New Zealand guidelines for fresh and marine water quality (Australian and New Zealand Environment and Conservation Council & Agriculture and Resource Management Council of Australia and New Zealand, National Water Quality Management Strategy Paper No. 4, 2000) or as amended;
- a description of the existence, location and value of all Groundwater Dependent Ecosystems (GDEs) within the tenement area and within and immediately surrounding the extent of predicted hydrogeological impact of the mine operations;
- an assessment of any current or historical use of local groundwater by the landowner(s) and other users which includes a baseline survey of bores, including water level, groundwater quality, bore construction details, status and purpose and collar/ground elevations;
- a statement describing if the tenement area is within an area where the water resources are prescribed under the *Natural Resources Management Act 2004*, and provide details on the current availability of water resources within the prescribed area;
- a plan, to scale, identifying the tenement, all drillholes and boreholes relevant to the identification of hydrogeology, GDEs, direction of groundwater flow, any potential paleochannels and recharge zones;
- if mining operations are likely to intersect one or more aquifer units, provide a diagram of the potentiometric groundwater elevation contours for each aquifer and include the location of all drillholes and boreholes and supporting tabulated data used in developing the contours; and
- cross-section(s) of the interpreted hydrostratigraphy showing the known and inferred groundwater levels, and groundwater flow direction, recharge and discharge mechanisms (if applicable), water levels within each aquifer unit, tenement area, mining operations, and relevant drillholes and boreholes used in developing the cross-section(s).

10.7 Hydrology

Provide a description and map of the current drainage patterns for the tenement and water catchment including:

- location of watercourses, drains and dams;
- surface water catchment boundaries;
- direction of drainage and discharge from the tenement;
- a statement describing if the application area is within an area where the water resources are prescribed under the *Natural Resources Management Act 2004*, and provide details on the current availability of water resources within the prescribed area;
- a statement describing if the application area is within a water protection area including areas under the *River Murray Act 2003*; and
- groundwater—surface water interactions.

Provide water quality data for identified watercourses, where there is potential for discharge into that watercourse from the mining operation (whether intentional or not). Should identified watercourses be ephemeral, and it is not possible to collect water samples, provide a characterisation of sediments sampled from the watercourse bed upstream and downstream of the application area.

If there is potential for changing a flow regime (including change in flow volume) or discharge into these watercourses from the operations, an assessment of the use of this water by the landowner, downstream users and water dependent ecosystems must be included.

10.8 Vegetation, Weeds and Plant Pathogens

Provide:

- a description of existing flora (native and introduced) in the tenement area and surroundings, and display on a map;
- the State conservation status and habitat value of native vegetation present in the tenement area;
- a description of the presence of *Commonwealth Environment Protection and Biodiversity Conservation Act 1999* listed species and ecological communities;
- a description of the extent the tenement area and adjoining land is affected or potentially affected by pathogens and weeds, including phytophthora and broomrape; and
- if known, the history of land use to identify if the existing vegetation is the result of deliberate cultivation.

10.9 Fauna

Describe the native and feral fauna that may be present in the tenement area noting State or Commonwealth conservation status of all species, in particular if they are species of conservation significance or feral.

10.10 Caves

Describe the presence of any caves in karst (limestone) areas within, or near to, the tenement area. A survey for the presence of caves must be performed if the tenement area is within, or near to, known caves or significant limestone formations. Provide a summary of the results of the survey.

10.11 Local Community

Provide:

- a description of the local population, the economy, services and employment; and
- details of nearest town or urban areas, with a summary of the demographics of the local population.

10.12 Landowners and Land Use

Provide a description of:

- land ownership for all titles within and adjacent to the tenement area;
- land use (historical, current and potential) for the tenement area and the surrounding areas;
- the zoning as defined by relevant council (or out of council) development plans;
- any policies relevant to the tenement area, including council wide, zone specific and sub areas within a zone;
- known plans for future land use changes by other parties;
- a statement as to whether the tenement area falls within the Murray Darling Basin, Adelaide Dolphin Sanctuary or a Marine Park; and
- any other interests or restrictions on the tenement area, including:
 - public utility easements;
 - if the tenement is within land used for defence purposes, including the Woomera Prohibited Area or the Cultana Army Training Area;
 - any overlapping or adjacent tenements under the *Mining Act 1971* or *Petroleum and Geothermal Energy Act 2000*; and
 - any applicable exempt land under Section 9 of the *Mining Act 1971*, and any waivers of exemption obtained, and/or information on the status of waivers of exemption yet to be negotiated/finalised under Section 9AA of the *Mining Act 1971*.

Provide information relating to the prospect of obtaining access to land required for the mining operation.

10.13 Proximity to Infrastructure and Housing

Provide:

- information and maps identifying residences within and near the tenement area;
- information and maps identifying other human infrastructure such as (but not limited to) schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, cemeteries, scenic lookouts, roads, railway lines, fences, transmission lines, gas and water pipelines, and telephone lines (both underground and above ground); and
- information and maps identifying public roads to be utilised or affected as part of operations, including an estimate of the existing traffic movements.

10.14 Amenity

Provide a description of scenic or aesthetic values for the tenement area and immediate surrounds, including caves or karst features or other features of tourist or visitor interest.

10.15 Air Quality

Provide a description of the existing levels of dust and contributors to air quality including odour (both natural and anthropogenic).

10.16 Noise

Provide a description and measurement data of the existing levels of noise and contributors to noise (both natural and anthropogenic).

10.17 Heritage (Aboriginal, European, Geological)

Detail:

- any registered heritage sites in or adjacent to the tenement areas that are protected under legislation (in so far as may be permitted under the relevant legislation); and
- include a statement concerning whether or not an Aboriginal cultural heritage survey has been conducted by the tenement holder and, if so, the results of the survey.

10.18 Proximity to Conservation Areas

Provide information on proximity to national parks and reserves, private conservation areas, Commonwealth recognised conservation areas, heritage agreement areas and geological heritage sites.

10.19 Pre-Existing Site Contamination and Previous Disturbance

Provide information on any known existing contamination of the site and of any disturbance by previous mining operations or other activities.

11. MANAGEMENT OF ENVIRONMENTAL IMPACTS**11.1 Assessment of Environmental Impacts***11.1.1 Elements of the Environment*

Describe the specific elements of the environment (the environment is defined in Section 6 (4) of the *Mining Act 1971*) that may reasonably be expected to be impacted by the operation during construction, operation, and indefinitely post mine completion.

For each element of the environment identified:

- provide a summary of any issues or considerations raised by stakeholders, including relevant legislated or recognised standards in relation to the element of the environment;
- describe all potential environmental receptors; and
- undertake an impact assessment of how the element could be potentially impacted by mining operations (during construction, operation and post mine completion) through the provision of the information listed in the following Section 11.1.2.

11.1.2 Potential Impact Events

Describe potential impact events associated with each phase of the mining operations (construction, operation and post mine completion) and relevant to each element of the environment.

For the purpose of the impact assessment, a potential impact event is the combination of a source, a pathway and an environmental receptor.

The source, pathway and environmental receptor of each potential impact event must be described prior to the implementation of engineering or administrative control measures.

For each potential impact event identified in Section 11.1.2, provide:

11.1.2.1 Source

A description of the source of the potential impact event which alone or in combination has the potential to cause harm to an environmental receptor.

11.1.2.2 Pathway

A description of the potential pathway, means or route (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be impacted by an identified source.

11.1.2.3 Environmental Receptor

A description of the environmental receptors that may reasonably be expected to be impacted by the source, taking into account the considerations for the element of the environment described under 11.1.1.

11.1.2.4 Description of Uncertainty

Describe any significant degree of uncertainty pertaining to the evaluation of sources, pathways and environmental receptors, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made, including whether a change in assumption may result in a new environmental impact.

11.1.2.5 Confirmation of Impact Events

For each potential impact event provide:

- an analysis of whether a source, pathway and receptor does exist (and if not, provide an explanation for the conclusion); and
- a description of the likely impact from the source on the environmental receptor.

11.2 Control Measures, Uncertainty Assessment, Statement of Environmental Outcomes and Criteria

For each impact event confirmed in Section 11.1.2.5, the information listed in Sections 11.2.1–11.2.5 must be provided.

11.2.1 Control Measures

Describe the measures to manage, limit or remedy each impact event. Demonstrate that the measures are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation wherever possible.

If native vegetation is to be cleared, state the estimated quantum of significant environmental benefit (SEB) to be gained in exchange for the clearance and describe how the SEB will be provided.

11.2.2 *Description of Uncertainty*

Describe any significant degree of uncertainty pertaining to the likely effectiveness of proposed control measures, including (but not limited to) lack of site specific information, limitations on modelling and quality of data. Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

11.2.3 *Statement of Proposed Environmental Outcomes*

Provide a statement of the proposed environmental outcome or outcomes (including mine completion outcomes) for each impact event confirmed in Section 11.1.2.5.

The statement of environmental outcome(s) must describe the likely consequence of the expected impact on the environment by the mining operations subsequent to the implementation of the control measures described in Section 11.2.1.

Environmental outcomes must meet other applicable legislative requirements.

Provide evidence that reasonable steps have been taken to consult with the owners of any land on which mining operations are planned, and third parties who may be directly affected by the planned mining operations in the development of each environmental outcome.

Where clearance to native vegetation is planned, the environmental outcome must state a commitment to compliance with the *Native Vegetation Act 1991* and *Native Vegetation Regulations 2003*.

Mine completion outcomes must at least address the issues listed under Regulation 30 (1) (d).

11.2.4 *Measurement Criteria*

Provide the information specified in Section 5.3 of this Determination.

11.2.5 *Leading Indicator Criteria*

Provide the information specified in Section 5.4 of this Determination.

In accordance with Regulation 65 (7) of the *Mining Regulations 2011* this notice will have effect from 1 January 2020.

Dated: 12 December 2019

G. MARSHALL
Director Mining Regulation

MINING ACT 1971

Program for Environment Protection and Rehabilitation Requirements

NOTICE is hereby given in accordance with Regulation 65 (7) of the *Mining Regulations 2011*, determining the format of and minimum information required to be provided in a program for environment protection and rehabilitation (PEPR) for exploration operations on an exploration licence (EL), retention lease (RL) and mineral claim (MC) not within the scope of the *Generic program for environment protection and rehabilitation—low impact mineral exploration in South Australia* (generic PEPR; Ministerial Determination 001, available on the Department for Energy and Mining, (DEM) Minerals website).

GENERAL INFORMATION

An exploration PEPR can be submitted for up to 12 months, or for an ongoing period of time. The general information required for each of these options is outlined below

PEPR general information

Provide general details of the proposal including:

- tenement number(s);
- tenement holder(s) name;
- operating company (name, address and contact details);
- state the PEPR approval period (12 months or for the ongoing life of a tenement(s));
- contact person(s) (phone, email, qualifications/job title) responsible for preparation of the PEPR and person(s) (or contractor if applicable) in charge of field supervision and implementing compliance monitoring requirements (including details of experience, qualifications etc.);
- proposed start and end dates of the program (for 12 month approval period only);
- location details of the proposed program, including a general locality plan indicating the proposed activity in relation to tenement and landowner boundaries, and areas with environmental classifications or sensitivities;
- 1:250 000 scale map sheet;
- description of the project, including a general summary of all the elements of the proposed program, together with the commodity type and mineralisation model.

For PEPRs requesting ongoing approval, the following additional information must also be provided:

- scope of the proposed exploration activities:
 - all exploration methods to be covered by the PEPR;
 - extent of exploration activities (e.g. drillhole spacing and drill line density);
 - geographic extent of the area covered by the PEPR, including a general locality plan with tenement details, landowner boundaries and areas with environmental classifications or sensitivities; and
- specific exploration activities and environments not within the scope of the proposed program (e.g. parks, reserves and salt lakes that may be excluded).

Program notification

Program notifications must only be submitted for PEPRs approved for an **ongoing** period of time.

A program notification must be provided to DEM for each new program of works conducted. Program notifications can last for a period of up to 12 months and must be submitted 21 days prior to commencement of the program. DEM will assess the program notification to determine if the proposed activities are within scope of the approved ongoing PEPR.

The following information must be included within a program notification:

- E-PEPR number (e.g. 'E-PEPR2000-123');
- relevant tenement number(s);
- length of the program (maximum period of 12 months) including start and end dates;
- how stakeholders will be appropriately engaged and updated on the program and staff/contractor movements;
- 1:250 000 map sheet;
- description of the proposed exploration activities (including ancillary activities and groundwater investigation activities described within the approved PEPR);
- activities must be consistent with those described in Section 4;
- land use and land tenure details (as per Section 2.2);
- landowner details and results of consultation conducted (as per Section 2.4);
- number of drillholes, spacing, drill line density and proposed metres of drilling, if applicable;
- vegetation clearance (estimation in hectares), if applicable;
- number and dimensions of costeans, if applicable;
- number and length and width of any new tracks, drill traverses, seismic lines etc., if applicable;
- map showing the location of exploration activities (includes camps), EL boundary(s) and any areas of environmental significance;
- contact details of affected landowners;
- additional approvals required (e.g. water affecting activity permits, local council approval to drill on road side verges);
- any other relevant information.

Note: All rehabilitation is to be completed within 3 months after the expiry of the 12-month approval period for work program PEPRs, and 3 months after the expiry of the program notification for ongoing PEPRs.

PROGRAM PREPARATION AND ACCESS TO LAND

Work undertaken in preparing the proposal

Summarise the research and fieldwork undertaken in preparing the proposal including:

- desktop reviews of existing information;
- field visits for reconnaissance and landowner consultation purposes;
- contractor consultation (i.e. equipment scale, type);
- other information used when planning the proposed program.

Land use and tenure

Describe the land tenure (i.e. freehold, pastoral lease, perpetual lease etc.) and type of land use for the activity site and surrounding areas (i.e. national park, conservation park, conservation reserve, regional reserve, grazing, cropping, Defence land, Aboriginal land, tourism, etc.)

Native title

Provide the following information:

- indicate if the proposed area of exploration occurs within native title land (as defined in the Native Title (South Australia) Act 1994);
- identify if any registered native title claimants occur in the area;
- describe how you have complied with the requirements of part 9B of the *Mining Act 1971*.

Landowner details and consultation (r. 65(1)(c))

This section must provide relevant landowner details, including occupier and land manager details, and summarise the results of consultation that has been undertaken on the proposed operation (including submission of statutory forms). The summary should list:

- individual or group of similarly affected persons;
- type of interested or affected party (resident, council, government agency etc.);
- any concerns/issues raised;
- response to any concerns/issues raised;
- if any individual or group of similar affected persons were not able to be consulted, what steps were taken to consult with them;
- any additional land access approvals/permits required to conduct the proposed exploration program.

Where PEPRs are submitted in accordance with Section 1.2, consultation with all stakeholders at the PEPR submission stage may not be practicable. If so, a plan must be provided demonstrating how the above requirements will be achieved.

DESCRIPTION OF THE ENVIRONMENT (r. 65(1)(a))

Each of the elements of the environment must be described only to the extent that they may need to be considered in assessing the potential impacts of the proposed operations. If the element is not likely to be affected by the operation, a statement to that effect must be included.

Where possible, photographs and other relevant information obtained during site visits should be used when describing relevant environmental aspects.

Proximity to infrastructure and housing

Information is required to determine if existing infrastructure (both public and private) may be affected by the program, and to determine the extent of impact on the public from noise/dust etc. The following information is required:

- settlements – indicate the name and distance of the nearest town, and distance to houses and homesteads from the proposed exploration activity;
- roads and tracks – indicate existing fence lines, roads and tracks, including those which are to be used in the exploration program;
- other human infrastructure such as schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, scenic lookouts;
- railway lines, transmission lines, gas and water pipelines, communication lines (e.g. fibre optic cables) etc. if these may be impacted by the exploration activity.

Provide this information on a locality plan, where possible.

Landform and topography

Describe the topography of the general area affected by the exploration program. Include the susceptibility to erosion and visual attributes (steep or undulating slopes, plains, rocky outcrops, dunes, salt pans, clay pans, etc.).

Soil and surface cover

Describe the soil types and surface cover (e.g. gibber, rocky) in the general area affected by the exploration program. Include the susceptibility to compaction, erosion, dust, runoff and any other aspects that may be an issue for disturbance and rehabilitation.

Hydrology

Describe the potential interference with natural drainage (e.g. the presence of drainage lines, creeks, floodplains) and identify whether the area is within any water protection areas defined under the *River Murray Act 2003*, or any prescribed watercourse, or surface water areas under the *Natural Resources Management Act 2004*.

Groundwater

Describe the expected hydrogeological conditions, and identify groundwater aquifers in the exploration area(s) that may be affected, including the following information:

- approximate depth of drillholes;
- formation age and/or stratigraphy likely to be intersected within the proposed exploration area;
- number, depth and stratigraphic location of aquifers likely to be intersected;
- type of aquifers likely to be intersected, (e.g. confined, unconfined, artesian);
- aquifer salinity, standing water level and depth to water level, where possible;
- if activities are located within a prescribed wells area or prescribed water resource area.

Vegetation, weeds, plants and pathogens

Provide the following information when describing vegetation cover that is likely to be impacted by the proposed exploration activities:

- description of the formation and structure of vegetation in the area (e.g. woodland, shrubland, grassland);
- list of the dominant species;
- the extent to which the area is affected, or potentially affected by pathogens and weeds (e.g. Phytophthora; Buffel grass *Cenchrus ciliaris*);
- the presence of significant habitats and any rare, or endangered species located, or reported to have been identified in the area; include any known sightings of rare and endangered species on a locality plan/map where possible.

Fauna

Describe the native and feral fauna that may be present in the application area, noting the conservation status, in particular endangered, threatened or feral species. Include known sightings of rare and endangered species on a locality plan/map, where possible.

Environmentally sensitive locations

Identify any environmentally sensitive locations within, or close to the proposed exploration area (e.g. areas having particular ecological, cultural, scientific, aesthetic or conservation value). Mark these on a locality plan to identify any areas of conflict so that access roads or other activities can be planned and located effectively.

This section should also detail the likely effects the proposed program may have on any identified areas of environmental sensitivity.

DESCRIPTION OF EXPLORATION OPERATIONS (s. 70B(2)(a))

The document should provide a detailed description of proposed exploration operations and any activities ancillary to exploration (e.g. drilling water bores, or conducting pump tests).

The following elements must be described only to the extent that they apply to the particular proposal. If the element is not applicable, the element description may be omitted.

Equipment and personnel requirements

Describe the equipment (size, number and contractor details), number and composition of field crews (contractors, geologists, field assistants), and proposed working hours/days required to conduct the proposed program.

For a PEPR approved for an ongoing period, describe the equipment and personnel required for each activity that may be undertaken.

Low impact exploration activities

Where low impact exploration activities are not covered by the generic PEPR (e.g. activities in a park or reserve), describe the low impact exploration activities to be conducted during the proposed program.

Drilling

For PEPRs approved for 12 months, indicate the maximum number, location, size and depth of drillholes. Indicate drillsite locations, preparation methods, drilling method(s) and requirements for drilling sumps (number and size of sumps at each drillsite). State whether levelling or vegetation removal is required. If drill pad construction is required, detail the volume of material to be excavated at each site.

For PEPRs approved for an ongoing period of time, describe in detail all drilling methods that may be used and methods used to prepare sites, including vegetation clearance requirements, site levelling and digging of sumps.

For both 12 month and ongoing approval periods, describe how drillholes will be constructed, including casing material to be used, depth of casing, if the casing will be cemented, cementing intervals and the class of driller that will install the casing.

Describe drillhole decommissioning requirements, including the materials to be used, stratigraphic intervals where cement plugs will be placed, if the casing will be removed and when decommissioning will occur after drilling is completed.

Where confined or artesian conditions are expected, include a schematic diagram demonstrating how drillholes will be constructed and decommissioned.

Note: Construction and abandonment requirements must be compliant with *Mineral exploration drillholes — general specifications for construction and backfilling*, Earth Resources Information Sheet M21, available on the DEM Minerals website.

Costeans and bulk sample disposal pits

For PEPRs approved for 12 months, indicate the number and location, size (length, width and depth), excavation method, and maintenance and safety requirements for proposed costeans or bulk sample disposal pits. State whether vegetation removal is required and include the total area of disturbance.

For PEPRs approved for an ongoing period of time, indicate the maximum dimensions (length, width and depth) of costeans or bulk sample disposal pits and describe site preparation methods, vegetation clearance, and safety and maintenance requirements.

Sample management

Describe the size of samples collected (including bulk sampling), collection methods, materials used when collecting the sample, sample disposal methods (including removal of sample bags) and any other sample management requirements at the exploration site (e.g. tarps or matting used to contain cuttings). Include requirements for on-site geological sample management (splitting of archive samples, bag farms, core processing and storage).

Access routes to work areas

Indicate planned access routes on a locality plan and distinguish between existing and proposed new access tracks. Detail the method for gaining access if existing tracks are not available. Indicate if vegetation clearance is required and the method to be used to clear the vegetation. Include the total area of disturbance for all new access tracks (i.e. length and width).

Campsites, storage and equipment laydown areas

Describe the layout and the number of facilities such as tents, caravans, transportables, amenities, waste disposal and management procedures (including sewage and hydrocarbon management). Indicate whether any vegetation clearance and/or earthworks are required and include the total area of disturbance (environmental footprint). For camps, include the maximum number of people that will use the site.

Show the location of laydown areas and campsites on the locality plan, where possible.

Campsites that are outside of the scope defined in the generic PEPR must use ablution facilities endorsed by the Department of Health. Confirmation of this must be included within the PEPR.

Other exploration methods and/or ancillary activities

Describe in detail any other proposed exploration methods (e.g. seismic) and/or ancillary exploration activities, including site preparation, vegetation clearance and safety and maintenance requirements.

Water supply and management

Describe how and where water will be sourced for drilling, track maintenance and camping purposes (e.g. groundwater, surface water, mains). Provide details on the volume of water required and how wastewater or runoff water will be managed.

Groundwater drilling and investigation activities

Describe any proposed water drilling and investigation activities (e.g. pump testing, water monitoring sites, water storage, turkey nests/dams), including site preparation, vegetation clearance, safety and maintenance requirements and permits/licences required in accordance with the *Natural Resources Management Act 2004*.

Water affecting activities

Indicate if any water affecting activities (refer to s. 127 of the *Natural Resources Management Act 2004*) will be undertaken and whether permits have been obtained. Where water affecting activity permits are required, outline site preparation, vegetation clearance and safety and maintenance requirements.

Management of hazardous material

Indicate if exploration activities will be conducted in areas of known uranium or thorium mineralisation and identify other hazardous materials that are likely to be encountered.

Where exploration is located within an area of known uranium or thorium mineralisation a radiation management plan endorsed by the Environment Protection Authority (SA) (EPA) must be submitted to DEM along with the PEPR. Confirmation of EPA endorsement must also be provided with the PEPR.

For all other hazardous material identified, provide a plan on how the materials will be managed.

RETENTION LEASES

Where the RL includes specific conditions that are not environmental outcomes, a section must be included that demonstrates where these have been addressed in the PEPR (if relevant), or demonstrates how otherwise they have, or will be complied with.

MANAGEMENT OF ENVIRONMENTAL IMPACTS (r. 65(1))

The applicant is required to conduct an impact assessment to identify all of the environmental, social and economic potential impact events that are likely to occur as a result of the proposed exploration activities, how each of the identified impacts will be managed, and the level of risk remaining (residual risk) after implementing control and management strategies. Identified potential impact events should be developed based on the aspects of the environment that may be impacted on and the proposed operational details.

Potential impact events

Identify the actual and/or credible potential impact events associated with the proposed mineral exploration program based on the environment components identified in Section 3 (includes all environmental factors, i.e. social, natural and economic) and proposed exploration activities described in Section 4.

The impact event analysis should take into account the:

- Source – the source of the potential impact event which alone, or in combination, has the potential to cause harm to an environmental receptor.
- Pathway – the potential pathway, means or route (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be affected by an identified source.
- Environmental receptor – the environmental receptors that may reasonably be expected to be adversely affected by the source, taking into account considerations for the aspect of the environment (i.e. who or what could be affected).
- Impact likelihood and consequences.

Control and management strategies

Describe the measures proposed to manage, limit or remedy each impact event. Demonstrate that the measures proposed are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation where necessary.

Where uncertainty exists regarding the effectiveness of proposed control measures, provide a description of the degree of uncertainty, including (but not limited to) the lack of site-specific information and quality of data.

The description of rehabilitation measures must demonstrate that final rehabilitation will be completed within 3 months after the time allocated to complete the approved program, or 3 months after the time allocated in the program notification.

Risk assessment

Where a potential impact event has been identified, determine the risk after the implementation of control and management strategies. Both the likelihood and severity of the consequences of impact events must be estimated.

The risk of the potential must take into account any uncertainty pertaining to the likely effectiveness of proposed control measures.

Where risks are moderate to extreme, justify why the level of risk is acceptable, or develop additional control strategies to further lower the risk.

Proposed environmental outcome(s)

An outcome(s) must be developed to address each identified potential impact event.

These must describe the expected impact on the environment caused by the proposed or current exploration activities subsequent to control strategies being implemented and must meet other applicable legislative requirements.

Measurement criteria

Provide a draft statement of the criteria to be adopted to measure each of the proposed environmental outcomes. The draft criteria must, as far as practical, comply with Regulation 65 (1) (e).

Where appropriate, recognised industry standards, codes of practice or legislative provisions from other Acts can be used as criteria.

Outcome measurement criteria must identify the following key aspects:

- what will be measured;
- how it will be measured;
- frequency of measurement.

Note: DEM has developed an environmental management table within the exploration PEPR template which includes potential impacts, outcomes and measurement criteria common to most exploration programs. Proponents are required to conduct an impact assessment, including a risk analysis of each potential impact event and how each impact will be managed (i.e. control and management strategies). In some cases additional potential impacts events may be identified which require corresponding environmental outcomes and measurement criteria to be developed. Instructions on how to fill out the table are provided in the template.

Alternate or modified potential impacts events (and their receptors), environmental outcomes and measurement criteria may be provided by the proponent; however, this may increase the time DEM requires to assess the PEPR.

PUBLIC RELEASE (r. 88(3)(a))

Indicate if you consent to the public release of the approved PEPR. Where consent is not provided, clearly specify with reasons each section of the PEPR that should not be released in the public interest. Objections will be considered by the Minister (or delegate) before a determination is made on the release of the PEPR.

Determinations allowing for the public release of a PEPR will be made in accordance with the procedures outlined within the *Guidelines for conducting mineral exploration in South Australia*, Minerals Regulatory Guidelines MG22, available on the DEM Minerals website.

The following information required in an application is already deemed not to be in the public interest and will not be released:

- maps, plans or GPS coordinates identifying the exact location of specific exploration sites;
- any attachments in addition to those outlined within the exploration PEPR determination (e.g. tenement holder and/or operator policies, procedures, agreements and management plans);
- landowner and third party contact details and the results of any consultation undertaken;
- program notifications.

DECLARATION OF ACCURACY (r. 65(8))

The exploration proposal must include a signed (digital signatures allowed) statement by the applicant in accordance with Regulation 65 (8) declaring that the content of the PEPR has been reviewed and is accurate.

MAPS AND PLANS

All maps and sections must conform to the following standards:

- state the relevant datum (e.g. GDA2020, GDA94, WGS84);
- use metric units;
- include a title, north arrow, scale bar, text and legend;
- state the date prepared and author;
- be of appropriate resolution and scale to show the represented information.

The exploration proposal must be accompanied by a map(s) showing the following information, where applicable:

- tenement boundaries;
- cadastral information;
- existing surface contours;
- existing vegetation;
- proposed exploration operations (includes drillholes, existing and new access tracks, drill traverses, campsites, laydown areas and other applicable information) and/or the target exploration area(s);
- existing ephemeral and permanent rivers, creeks, swamps, streams or watercourses and water management structures;
- towns, houses and homesteads, existing roads, rails, fences, transmission lines, buildings, dams and pipelines;
- known sightings of listed species;
- location and extent of all environmentally sensitive areas;
- any relevant land use types (e.g. parks and reserves, Aboriginal freehold land, Woomera Prohibited Area).

FORMAT AND SUBMISSION OF APPLICATIONS (r. 65(9))

Unless otherwise specified by the Director of Mines or delegate:

- an electronic version of the PEPR must be submitted; using the exploration PEPR template(s) provided on the DEM Minerals website;
- the electronic version must be submitted online through the DEM website;
- the electronic version must be submitted in one single Acrobat PDF file;
- the submitted PEPR must be accompanied by the relevant fee payable in accordance with the Mining Regulation 2011;
- Microsoft WORD compatible files must be submitted if requested by the Director of Mines (or delegate), or other authorised officer; and
- the PEPR must be submitted by email or hard copy if requested by the Director of Mines (or delegate), or other authorised officer.

If the PEPR being submitted is a review of an approved PEPR, provide a description or summary of all content changes made to the submitted PEPR.

Unless an agency agreement or other document evidencing a legal authority is provided:

- the mining operator (tenement holder) must lodge all PEPR applications;
- all correspondence regarding the proposal will be through the mining operator; and
- PEPR approvals will be issued to the mining operator.

PEPRs must be submitted online through the Department for Energy and Mining Website. PEPRs may be submitted via email, post or courier and should be marked 'Attention: Exploration Regulation' only if authorised by the Director of Mines (or delegate), or other authorised officer.

In accordance with Regulation 65 (7) of the *Mining Regulations 2011*, this notice will have effect from 1 January 2020.

Dated: 12 December 2019

PRU FREEMAN
Deputy Executive Director

MINING ACT 1971

Program for Environment Protection and Rehabilitation Requirements

NOTICE is hereby given in accordance with Regulation 65 (7) of the *Mining Regulations 2011*, determining the minimum information required to be provided in a Program for Environment Protection and Rehabilitation (PEPR) for an Extractive Minerals Lease (EML) and any associated Miscellaneous Purposes Licence (MPL).

1 REQUIREMENT FOR DECLARATION OF ACCURACY

The PEPR must include a signed statement by the tenement holder in accordance with Regulation 65 (8).

2 DESCRIPTION OF THE ENVIRONMENT

Any changes to the environment or information about the environment since the previous description of the environment was provided (be it as a mining proposal or management plan or PEPR) must be included.

This must include an update in relation to the status of all waivers of exemption required for exempt land. This must include any new baseline data relevant to the measurement criteria set out in Section 5.

3 DESCRIPTION OF MINING OPERATIONS

Each of the elements listed in Sections 3.1–3.10 must be described only to the extent that they apply to the mining operation. If the element (or part of the element) is not applicable to the mining operation, a statement to that effect must be made and the element (or part of the element) description may be omitted.

3.1 General description and maps/plans of operations

A summary description and maps of all elements of the quarrying operation must be included.

3.2 Resource and Products

3.2.1 Resource

Provide:

A statement of the current estimated resource and a brief description of the basis of this estimate.

A statement of all the following standard extractive minerals proposed to be extracted and sold:

- Basalt;
- Calcrete;
- Clay (other than fire clay, bentonite or kaolin);
- Dolerite;
- Dolomite;
- Gabbro;
- Gneiss;
- Granite;
- Gravel (natural);
- Ironstone;
- Limestone;
- Marble;
- Pegmatite;
- Quartzite;
- Rhyolite;
- Sand;
- Sandstone;
- Schist;
- Shale;
- Shell Grit;
- Siltstone; and
- Slate.

3.2.2 Production Rate and Products

State:

- the end use for all extractive minerals proposed to be sold. Provide estimates of the:
- annual production rate (product and overburden);
- life of the quarry; and
- material movement over life of quarry (product and overburden).

3.3 Quarrying Activities

3.3.1 Type or types of quarry operation to be carried out

Provide:

- a summary and map (as per 9.1.2.1) of the site layout;
- a description of the proposed quarrying method; and
- dimensions and depth of proposed pit(s).

3.3.2 Sequence of quarrying and progressive rehabilitation

Describe and show on a map (as per 9.1.2.2):

- staging and description of each progressive quarrying stage;
- milestones that will instigate progressive rehabilitation; and
- staging and description of each progressive rehabilitation stage including:
 - use of overburden;
 - battering of mining faces and other earthworks;
 - topsoil management; and
 - revegetation.

3.3.3 Stockpiles

3.3.3.1 Topsoil and Subsoil Stockpiles

Describe and show on a map (as per 9.1.2.1):

- location, size, shape and height of product of topsoil/subsoil stockpiles.

3.3.3.2 Product Stockpile

Describe and show on a map (as per 9.1.2.2):

- location and height of product of product stockpiles.

3.3.4 Use of explosives

If explosives are used, describe:

- estimated frequency of blasting; and
- whether explosives will be stored onsite.

3.3.5 Modes and hours of operation

State if the quarry operation will be operated on a continuous (24 hour, 7 days a week), regular periodical or campaign basis.

If the quarry operation is to be operated on a regular periodical basis or campaign basis, specify:

- period(s) (daily, weekly and public holidays) to be worked
- start and finish hours the site is to be worked per period.

3.4 Crushing, processing and product transport

3.4.1 Fixed plant

The following information must be provided on the specifications of fixed plant:

- area, size, and location of fixed plant and associated structures including as applicable concrete batching plant, wheel wash facilities, silos, fuel tanks, water tanks, chemical storage proposed to be used for processing the extractive minerals on site;
- a description of rock or sand processing; in particular crushing, washing, drying, screening and separation; and
- the type(s) of processing/value adding used on the raw material and conducted onsite including as applicable concrete, bitumen, separation and drying.

3.4.2 Hours of operation

The hours of crushing, processing and product transport activities must be provided.

3.4.3 Processing wastes

If processing wastes are to be generated provide a description of:

- management of any proposed chemical additives to prevent environmental harm;
- management and disposal of processing wastes;
- construction and/or geotechnical details of proposed storage facilities; and
- construction details/design of evaporation ponds and proposed use of waste material.

3.4.4 Industrial and domestic wastes

A description of management of any of the following industrial and domestic wastes must be provided:

- putrescible waste;
- oil;
- other onsite waste disposal or recycling; e.g. workshop waste, tyres, drums, oil filters;
- offsite disposal; and
- a description of the type, area and layout of sewage systems installed at the site, and if the system is required to be approved by the relevant authority.

3.5 Supporting surface infrastructure

3.5.1 Access and Roads

Describe:

- access route to the site and show on a map (as per 8.1.2.3);
- indicate if any new roads are to be constructed, or if existing roads or intersections (public and private) are to be upgraded; and
- transport system(s) used to and from the site and the estimated number of vehicle movements per day.

3.5.2 Accommodation and offices

The following information must be provided regarding onsite personnel accommodation and offices:

- number, area, size, type of construction and location of accommodation building, caravans or camp, and associated structures (e.g. car parks, office buildings, water tanks, etc.) to be used on site; and
- if temporary or permanent.

3.5.3 Public services and utilities used by the operation

Describe:

- sources of public services or utilities that are supplied to the proposed site, such as power, water, telecommunications etc.;
- if new connections to public services and utilities are required, the proposed routes for connection; and
- the effects to any existing public services or utilities that have been or may be affected by the mining operations.

3.5.4 Visual screening

Describe the type of screening, including existing or proposed vegetation (i.e. species and density of plantings) and show on a map (as per 8.1.2.1).

3.5.5 Fuel and chemical storage

For all fuels and chemicals stored on site show the proposed location of storage on a map (as per 9.1.2.1) and provide detail on:

- types of bulk chemicals and the volumes of each; and
- proposed bunding and containment for all chemical and fuel storage vessels.

3.5.6 Site security

Describe infrastructure and measures that will be adopted to prevent unauthorised access by the public, including, but not limited to:

- fencing; and
- signage.

3.5.7 Erosion, Sediment and Silt Control

Describe and show on a map (as per 9.1.2.1):

- location and design of sediment management structures;
- management and disposal of silt;
- strategies to control runoff on disturbed areas and rehabilitated areas; and
- storage, diversion and disposal of clean water.

3.6 Vegetation clearance

If clearance of native vegetation is to occur, a description of the vegetation type to be cleared and map (as per 9.1.2.2) showing the proposed clearance area must be provided.

State the estimated quantum of significant environmental benefit (SEB) to be gained in exchange for the clearance and describe how the SEB will be provided.

3.7 Description of Quarry Site at Completion

Provide a map (as per 9.1.2.4), cross-section (as per 9.3.1.2) and a description of the quarry site as it will be at completion after all rehabilitation and closure activities have been completed, including:

- potential land use options;
- landforms;
- proposed vegetation covers (including native vegetation that will not be disturbed due to proposed quarrying operations);
- any quarrying infrastructure that may remain on site and become the responsibility of the landowner;
- location, description and management of waste disposal areas;
- location of reshaped and rehabilitated areas, proposed surface contours and revegetation; and
- location of surface water infrastructure including ponds and diversions.

Provide a description of the proposed mechanism for transferring responsibility for any potential residual liability (i.e. ongoing maintenance or monitoring) subsequent to surrender of the tenement.

3.8 Site Water Management

Provide an estimate of the quantity of water to be used and the source of that water. If processing water is to be used, provide a water balance including:

- approximate water volumes required for processing; and
- a summary of all water inputs and outputs.

Provide a description of all process water ponds, including:

- size, capacity, layout and location of ponds;
- design and construction methods; and
- minimum freeboard to be maintained.

4 CONSULTATION

This section must summarise the results of any attempted consultation that has been undertaken on the proposed mining operation. The summary must include:

- a description of the process undertaken for identifying stakeholders with an interest in, or stakeholders likely to be directly affected by the proposed mining operation;
- a description of the process undertaken for the delivery of information to, gathering of feedback from, and responding to those identified stakeholders; and
- the results of the consultation undertaken with those identified stakeholders, including:
 - the concerns / issues raised;
 - the response (if any) that is proposed to address those concerns;
 - if any individual or group of similar affected persons were not able to be consulted, what steps were taken to consult with them; and
 - the extent to which the outcomes proposed in Section 11.2.3 have been developed in consultation with the landowner and any other person who may be directly affected by the proposed mining operations.

5 ENVIRONMENTAL OUTCOMES, STRATEGIES, CRITERIA AND MONITORING

5.1 Environmental Outcomes

Set out environmental outcomes (including mine completion outcomes) as required by Section 70B (2) (b) (i) of the *Mining Act 1971* and Regulation 65 (2) (b), and/or as required by the lease/licence, and/or determined as a result of a review of a PEPR in accordance with Regulation 114 (9).

For each environmental outcome, the information described in Sections 5.2, 5.3, 5.4 and 5.5 must be provided.

5.2 Control and Management Strategies

5.2.1 Control and Management Strategies

Set out the control and management strategies adopted to demonstrate that the environmental outcomes can be and will continue to be achieved. Demonstrate that the control and management strategies are commensurate with the impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

5.2.2 Uncertainty Assessment

Describe any significant degree of uncertainty pertaining to the likely effectiveness of control and management strategies, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

5.3 Measurement Criteria

Set out the measurement criteria for each environmental outcome (including quarry completion outcomes). The measurement criteria must comply with Regulation 65 (2) (d), including details about:

- what is to be measured and the form of the measurements that are to be used;
- the locations where the relevant measurements are to be taken, or how such locations are to be determined;
- what is proposed to be taken to constitute the achievement of the relevant outcomes (with consideration given to any inherent errors of measurement);
- the frequency of any measuring or monitoring; and
- any background or control data that is to be used, or how any such data is to be acquired.

The measurement criteria must also include details about:

- responsibility (who will measure);
- record keeping; and
- frequency of reporting to management and any external parties.

Where groundwater modelling is to be relied upon to demonstrate achievement of groundwater completion outcomes, a process must be provided for validation of predictive modelling, including a description of the model and assumptions used.

Where native vegetation clearance is planned, criteria must demonstrate the successful implementation of the native vegetation management plan.

5.4 New Environmental Impacts

Where there has been a change in the description of the environment or a change in the description of operations from those detailed in the mining proposal, management plan or currently approved PEPR, the tenement holder must undertake an assessment of the environmental impacts for the site to determine if the current environmental outcomes (as included in the lease/licence and/or the currently approved PEPR) are appropriate and if new or modified environmental outcomes are required. If new or modified environmental outcomes are required, additional information (as appropriate for the new environmental impact(s)) must be provided as specified in Section 11 of this Determination.

6 OPERATOR CAPABILITY

This section must include sufficient information to demonstrate that the operator has appropriate experience, processes and procedures in place to be able to operate the tenement to meet the environmental outcomes.

7 LEASE/LICENCE

Where the lease or licence includes specific conditions or requirements that are not environmental outcomes, a section must be included that demonstrates where these have been addressed in the PEPR (if relevant) or demonstrates how otherwise they have or will be complied with.

8 FORMAT OF THE PEPR

Unless otherwise specified by the Director of Mines (or delegate):

- an electronic version of the PEPR must be submitted online through the DEM website;
- each page, plan or other separate sheet must include the tenement number(s), date of the PEPR preparation and sequential page numbering;
- the electronic version must be submitted in one single Acrobat PDF file;
- the submitted PEPR must be accompanied by the relevant fee payable in accordance with legislation;
- Microsoft WORD compatible files must be submitted if requested by the Director of Mines (or delegate), or other authorised officer; and
- the PEPR must be submitted by email or hard copy if requested by the Director of Mines (or delegate) or other authorised officer.

If the PEPR being submitted is a review of an approved PEPR, provide a description or summary of all content changes made to the submitted PEPR.

The PEPR must be submitted by the holder(s) of the related mining tenements, or by a person acting on behalf of the tenement holder when accompanied by either a signed statement from the tenement holder endorsing the content, or a signed agency agreement that authorises the agent to provide a PEPR on behalf of the tenement holder.

PEPRs must be submitted online through the Department for Energy and Mining Website. PEPRs may be submitted via email, post or courier and should be marked 'Attention: Mining Assessments' only if authorised by the Director of Mines (or delegate), or other authorised officer.

9 MAPS AND CROSS-SECTIONS

All maps and plans must conform to the following standards:

- state and show the relevant datum (Australian Height Datum (AHD) is preferred);
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

All cross-sections must conform to the following standards:

- state and show the relevant datum (Australian Height Datum (AHD) is preferred);
- metric units;
- title, north arrow, scale bar, text and legend;
- date prepared and author;
- be of appropriate resolution and scale for represented information; and
- be legible in both the hardcopy and electronic versions of the submission.

9.1 List of Maps

Following is a list of all maps required in the PEPR based on the relevant sections of this determination:

9.1.1 Maps required for Description of the Existing Environment (as per 10)

9.1.1.1 Topographic Map showing:

- Tenement boundaries;
- existing surface contours;
- existing vegetation;
- location of watercourses, including ephemeral and permanent rivers, creeks, swamps, streams, wetlands and any man-made water management structures;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- location and extent of all previously disturbed areas associated with previous mining; and
- location and extent of any adjacent conservation reserves, heritage sites or any other significant areas.

9.1.1.2 Local Geological Map showing:

- Tenement boundaries;
- location and dimensions of the deposit; and
- topsoil/subsoil variation if there is a variation in soils over the application area.

9.1.1.3 Groundwater Map showing:

- groundwater wells in the surrounding area highlighting those used to determine the groundwater level.

9.1.1.4 Land Access Map showing:

- Tenement boundaries;
- any exempt land;
- location of residences within and near the application area; and
- human infrastructure as per 10.14.

If relevant:

9.1.1.5 Caves Map showing:

- Tenement boundaries; and
- location of the cave(s).

9.1.2 Maps required for Description of the Proposed Quarrying Operations (as per 2)

9.1.2.1 Site Layout Map showing all components of the quarry operation including (but not limited to):

- Tenement boundaries;
- location of sediment management infrastructure;
- if relevant location of process water dams;
- location of haul roads;
- if relevant location of fixed plant;
- location of mobile plant for stage 1 of mining;
- location and extent of topsoil/subsoil and product stockpiles.

9.1.2.2 Sequence of Quarrying and Progressive Rehabilitation Map showing:

- Tenement boundaries;
- staging of each progressive mining stage;
- proposed native vegetation clearance; and
- staging of each progressive rehabilitation stage.

9.1.2.3 Access Route Map showing:

- access route for heavy vehicles;
- exit route for heavy vehicles; and
- new roads to be constructed if relevant.

9.1.2.4 *Mine Completion Map showing:*

- final landforms (including rehabilitated and non-disturbed areas); and
- proposed topographical contours of the entire site (including rehabilitated and non-disturbed areas).

9.2 Summary of Cross-Sections

Following is a summary of all cross-sections required in the PEPR:

9.2.1 Cross-Sections required for Description of the Existing Environment (as per 10)

9.2.1.1 *Geological Cross-Section(s) showing:*

- a representation of the geological profile within the application area; and
- depth of the resource and any overlying overburden.

9.2.1.2 *Groundwater Cross-Section(s) showing:*

- the proposed depth of mining; and
- the depth to groundwater.

9.2.2 Cross-Sections required for Description of Mining Operations (as per 3)

9.2.2.1 *Quarry Operation Cross-Section(s) showing:*

- Proposed pit depth; and
- Proposed pit dimensions (length and width).

9.2.2.2 *Quarry Completion Cross Section(s) showing:*

- Pre quarrying natural surface; and
- Proposed final rehabilitated surface.

In accordance with Regulation 114 (9), where the current approved PEPR does not include a set of environmental outcomes, the additional information described in Sections 10 and 11 must be included.

10 DESCRIPTION OF THE EXISTING ENVIRONMENT

Each of the elements of the existing environment listed in Sections 10.1–10.19 must be described only to the extent that they may need to be considered in assessing the potential impacts of the proposed quarry operations. If the element is not likely to be impacted by the operation, a statement to that effect must be included (note: the environment is defined in Section 6 (4) of the *Mining Act 1971*).

10.1 Topography and landscape

Provide a description and map (as per 9.1.1.1) of the topography and landscape, detailing the:

- application area; and
- general surroundings.

10.2 Climate

Provide a summary from the nearest weather station of:

- annual rainfall and temperature patterns; and
- prevailing wind directions and speed (including maximum wind gusts).

10.3 Topsoil and subsoil

Provide:

- a description of the soil profile (type and depth), and the characteristics and/or productivity of all soils on the application area (show this information on a map as per 9.1.1.2 if there is a variation in soils over the application area); and
- identify any soil characteristics that may be an issue for disturbance or rehabilitation.

10.4 Geological Environment

Provide:

- local geological or site map as per 9.1.1.2, showing location and dimensions of the deposit and structure (dip and strike where appropriate);
- representative cross sections as per 9.2.1.1 of the proposed quarry area that identify the extent of the resource and estimates of any overlying overburden; and
- a description and results of any geological evaluation work carried out.

10.5 Geohazards

Provide detail on the potential for any of the following natural geohazards to be present in the application area:

- structural instability including slips, faults, karst features or geological unit boundaries;
- minerals that may occur in the material to be quarried (including overburden) and are hazardous to human health specifically radioactive minerals, asbestiform minerals or have the potential to produce respirable silica; and
- minerals that may occur in the material to be quarried (including overburden) that may have the potential to pollute the environment in particular sulphide minerals that may generate acid.

10.6 Groundwater

Provide:

- a statement describing if the application area is within an area where the water resources are prescribed under the Natural Resources Management Act 2004;
- a map (as per 9.1.1.3) showing groundwater wells in the surrounding area, highlighting those used to determine the groundwater level;
- a cross section (as per 9.2.1.2) showing the proposed depth of mining and the depth to groundwater in metres Australian Height Datum (AHD); and
- evidence to validate the estimated depth to groundwater.

If the proposed quarry has the potential to intersect the water table the following must be provided:

- details of local groundwater systems, including information on water quality and static water level (including seasonal fluctuations), recharge and discharge mechanisms, aquifer hydraulic properties, location of any aquifer (shown on a plan) and static water level of any other known drill holes; and
- an assessment of any current use of this water by the landowner (including adjacent landowners) and groundwater dependent ecosystems.

10.7 Hydrology

Provide a Topographic Map (as per 9.1.1.1) and description of the current drainage patterns for the application area and water catchment including:

- location of watercourses, drains, dams and wetlands;
- surface water catchment boundaries;
- direction of drainage and discharge from the application area;
- a statement describing if the application area is within an area where the water resources are prescribed under the Natural Resources Management Act 2004, and provide details on the current availability of water resources within the prescribed area;
- a statement describing if the application area is within a water protection area including areas under the River Murray Act 2003; and
- a statement as to whether the application area falls within the Murray Darling Basin.

If there is potential for changing a flow regime (including change in flow volume) or discharge into these watercourses from the proposed mining operations, an assessment of the use of this water by the landowner, downstream users and water dependent ecosystems must be included.

10.8 Vegetation, weeds and plant pathogens

Provide:

- a description and map (as per 9.1.1.1) of existing flora (native and introduced) in the application area and surroundings;
- the State conservation status and habitat value of native vegetation present in the application area;
- a description of the presence of Commonwealth Environment Protection and Biodiversity Conservation Act 1999 listed species and ecological communities;
- a description of the extent the application area and adjoining land is affected or potentially affected by pathogens and prescribed weeds, including phytophthora and broomrape; and
- if known, the history of land use to identify if the existing vegetation is the result of deliberate cultivation or natural regrowth arising from previous clearance.

10.9 Fauna

Describe the native and feral fauna that may be present in the application area noting State or Commonwealth conservation status of all species, in particular if they are species of conservation significance or feral.

10.10 Caves

If the application area is within, or near to, known caves or significant limestone formations a survey for the presence of caves must be performed.

Provide a summary of the results of the survey and describe the presence of any caves in karst (limestone) areas within, or near to, the application area and show on a map (as per 9.1.1.5).

10.11 Land use

Provide a description of:

- land use (historical, current and potential) for the application area and the surrounding areas;
- the zoning as defined by relevant council (or out of council) development plans;
- policies relevant to the application area, including council wide, zone specific and sub areas within a zone;
- known plans for future land use changes by other parties;
- other interests or restrictions on the application area, including:
 - public utility easements;
 - if the application is within land used for defence purposes, including the Woomera Prohibited Area or the Cultana Army Training Area;
 - any overlapping or adjacent tenements under the *Mining Act 1971* or *Petroleum and Geothermal Energy Act 2000*; and
 - the status of negotiations with Native Title holders or claimants, if the application area includes non-freehold land.

10.12 Proximity to infrastructure and housing

Provide information and a map (as per 9.1.1.4):

- identifying residences within and near the application area;
- identifying other human infrastructure such as (but not limited to) schools, hospitals, commercial or industrial sites, roads, sheds, bores, dams, ruins, pumps, cemeteries, scenic lookouts, roads, railway lines, fences, transmission lines, gas and water pipelines, and telephone lines (both underground and above ground); and
- identifying public roads to be utilised or affected as part of proposed mining operations, including an estimate of the existing traffic movements.

10.13 Exempt Land

Provide a description and map (as per 9.1.1.4) of any applicable:

- exempt land under Section 9 of the *Mining Act 1971*; and
- any waivers of exemption obtained, and/or information on the status of waivers of exemption yet to be negotiated/finalised under Section 9AA of the *Mining Act 1971*.

10.14 Amenity

Provide a summary description of scenic or aesthetic values for the application area and immediate surrounds, where relevant including caves or karst features.

10.15 Air quality

Provide a description of the existing levels of dust and contributors to air quality (both natural and anthropogenic).

10.16 Noise

Provide a description of existing noise levels and contributors to noise (both natural and anthropogenic).

10.17 Heritage (Aboriginal, European, Geological)

Detail and show on a map (as per 9.1.1.1):

- any registered heritage sites in or adjacent to the application areas that are protected under legislation (in so far as may be permitted under the relevant legislation).

10.18 Proximity to conservation areas

Provide information and a map (as per 9.1.1.1) showing:

- proximity to national parks and reserves, private conservation areas, Commonwealth recognised conservation areas, heritage agreement areas and geological heritage sites.

10.19 Pre-existing site contamination and previous disturbance

Provide information and show on a map (as per 9.1.1.1) any known existing contamination of the site and/or any disturbance by previous mining operations or other activities.

11 MANAGEMENT OF ENVIRONMENTAL IMPACTS**11.1 Assessment of environmental impacts****11.1.1 Elements of the environment**

Describe the specific elements of the environment (the environment is defined in Section 6 (4) of *the Mining Act 1971*) that may reasonably be expected to be impacted on by the proposed quarry operation during construction, operation, and indefinitely post mine completion.

For each element of the environment identified:

- provide a summary of any issues or considerations raised by stakeholders, and any relevant legislated or recognised standards in relation to the element of the environment
- describe all potential environmental receptors
- undertake an impact assessment of how the element could be potentially impacted by proposed quarrying operations (during construction, operation and post mine completion) through the provision of the information listed in the following Section 11.1.2.

11.1.2 Potential impact events

Describe potential impact events associated with each phase of the proposed mining operations (construction, operation and post quarry completion) and relevant to each element of the environment.

For the purpose of the impact assessment, a potential impact event is the combination of a source, a pathway and an environmental receptor.

The source, pathway and environmental receptor of each potential impact event must be described prior to the implementation of engineering or administrative control measures.

For each potential impact event identified in Section 11.1.2, provide:

11.1.2.1 Source

A description of the source of the potential impact event, which alone or in combination has the potential to cause harm to an environmental receptor.

11.1.2.2 Pathway

A description of the potential pathway, (with consideration of any natural barriers) by which an identified environmental receptor can be exposed to, or may reasonably be expected to be impacted by an identified source.

11.1.2.3 Environmental receptor

A description of the environmental receptors that may reasonably be expected to be adversely impacted by the source, taking into account the considerations for the element of the environment described under 11.1.1

11.1.2.4 Description of uncertainty

Describe any significant degree of uncertainty pertaining to the evaluation of sources, pathways and environmental receptors, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made, including whether a change in assumption may result in a new environmental impact.

11.1.2.5 Confirmation of potential impact events

For each potential impact event provide:

- an analysis of whether a source, pathway and receptor does exist (and if not, or if it remains uncertain, provide an explanation for the conclusion); and
- a description of the likely impact from the source on the environmental receptor.

11.2 Control measures, uncertainty assessment, statement of environmental outcomes and criteria

For each impact event confirmed in Section 11.1.2.5, the information listed in Sections 11.2.1 – 11.2.5 must be provided:

11.2.1 Control measures

Describe the measures proposed to manage, limit or remedy each impact event. Demonstrate that the measures proposed are commensurate with the potential impacts, achieve compliance with other applicable statutory requirements and promote progressive rehabilitation.

11.2.2 Description of uncertainty

Describe any significant degree of uncertainty pertaining to the likely effectiveness of proposed control measures, including (but not limited to) lack of site specific information, limitations on modelling and quality of data.

Describe any assumptions connected with the identified uncertainty.

So far as is relevant, identify the sensitivity to change of any assumption that has been made and assess the likelihood of an outcome not being achieved if an assumption is later found to be incorrect.

11.2.3 Statement of proposed environmental outcomes

Provide a statement of the proposed environmental outcome(s) (including mine completion outcomes) for each impact event confirmed in Section 11.1.2.5.

The statement of proposed environmental outcome(s) must describe the likely consequence of the expected impact on the environment by the proposed mining operations subsequent to the implementation of the control measures described in Section 11.2.1.

Environmental outcomes must meet other applicable legislative requirements.

Provide evidence that reasonable steps have been taken to consult with the owners of any land on which mining operations are proposed, and third parties who may be directly affected by the proposed mining operations in the development of each environmental outcome.

Where clearance to native vegetation is proposed, the environmental outcome must state a commitment to compliance with the *Native Vegetation Act 1991* and *Native Vegetation Regulations 2017*.

Mine completion outcomes must at least address the following issues listed under Regulation 30 (1) (d):

- external visual amenity;
- risks to the health and safety of the public and fauna;
- physical, ecological and chemical stability;
- surface and groundwater quality and quantity.

11.2.4 Measurement criteria

Provide the information specified in Section 5.3 of this Determination.

In accordance with Regulation 65 (7) of the *Mining Regulations 2011*, this notice will have effect from 1 January 2020.

Dated: 12 December 2019

PRICES ACT 1948

SECTION 12 (2)

*Records Required to be Kept in Relation to Recovery, Towing, Storage and Quotation
for Repair of Motor Vehicles Damaged in Accidents within the Declared Area—Notice of the Commissioner for Prices*

PURSUANT to Section 12 (2) of the Prices Act 1948, I, Dini Soulio, Commissioner for Prices, require persons who in the course of a business supply a declared service to which Prices Order No. 1140 (S.A.) applies to keep, in respect of each service so supplied, a record setting out:

- the time and date when the service was ordered;
- the name of the person who ordered the service or other information sufficient to identify that person;
- the number of running kilometres travelled for the purposes of supplying the service;
- the time and date of arrival at the place of storage or repair of the vehicle to which the service relates and of return to the registered premises of the person supplying the service;
- if the work involved in supplying the service was carried out partly during normal hours and partly outside normal hours—details of the work carried out during normal hours and outside normal hours;
- if more than one tow truck was used in supplying the service or more than one person was engaged in supplying the service—the number of tow trucks used or persons engaged; and
- how the total charge for supplying the service was calculated.

Words and expressions used in this notice have the same meaning as in Prices Order No. 1140 (S.A.).

This notice will take effect on the day on which Prices Order No. 1140 (S.A.) comes into operation.

Dated: 4 December 2019

D. SOULIO
Commissioner for Prices

RETURN TO WORK ACT 2014

Notice of Travel Allowance

Preamble

Section 33 (8) of the *Return to Work Act 2014* (the Act) states that:

If a worker travels in a private vehicle to or from any place for the purpose of receiving medical services, hospitalisation or approved recovery/return to work services, and the travel is reasonably necessary in the circumstances of the case, the worker is entitled to a travel allowance at rates fixed by a scale published by the Minister under this section.

NOTICE

I DECLARE that the rate for travel allowance in 2020 is hereby fixed for the purposes of Section 33 (8) of the Act at 45.9 cents per kilometre, and this notice supersedes all previous notices of the travel allowance rate published under Section 33 (8) of the Act.

This Notice is effective for travel on or after 1 January 2020.

Road Traffic (Exemption for Feral Animal Control Operations) Notice 2019

issued pursuant to Regulation 6 of the Road Traffic (Road Rules—Ancillary and Miscellaneous Provisions) Regulations 2014

1 INTERPRETATION

In this Notice—

Ground-based shooting operations refers to operations whereby two passengers (one operating a spotlight and the other in control of a firearm) stand on the rear tray of a vehicle to search for target animals.

2 EXEMPTION

In accordance with my powers conferred on me as the Minister for Transport, Infrastructure and Local Government in South Australia, under Regulation 6 of the Road Traffic (Road Rules—Ancillary and Miscellaneous Provisions) Regulations 2014, I hereby exempt the Department of Environment and Water (South Australia) from Australian Road Rule 268, subject to the following conditions:

1. The exemption is granted for the sole purpose of feral animal control within Ikara—Flinders Ranges National Park via ground-based shooting operations;
2. This exemption only applies:
 - a. to any employee, contractor or other person authorised by the Department of Environment and Water to undertake the aforesaid feral animal control in accordance

with any relevant work instructions and procedures required for this activity by the Department of Environment and Water from time to time;

- b. For vehicles travelling
 - i. on the portions of Bunyeroo Road and Brachina Gorge Road within Ikara – Flinders Ranges National Park (as specified on the attached map); and
 - ii. At 0 kilometres per hour (i.e. at a complete stop) while shooting target animals, and at all other times, no faster than 25 kilometres per hour.

3 COMMENCEMENT AND OPERATION

This Notice will come into operation on the day on which it is published in the *South Australia Government Gazette* and expire on 31 January 2021.

Area of Exemption Operation

Dated: 9 December 2019

HON STEPHAN KNOLL MP
Minister for Transport, Infrastructure and Local Government

ROADS (OPENING AND CLOSING) ACT 1991

SECTION 24

*Notice of Confirmation of Road Process Order
Road Closure—Palmer Road, Beetaloo Valley*

BY Road Process Order made on 30 September 2019, the Northern Areas Council ordered that:

1. Portion of Palmer Road, Beetaloo Valley, situated adjoining Sections 132, 133, 149, 150, 151, 168, 169, 171 and 172, Hundred of Howe, more particularly delineated and marked 'A', 'B', 'C', 'D' and 'E' in Preliminary Plan 18/0027 be closed.
2. Transfer the whole of the land subject to closure to Springford Farm Pty Ltd in accordance with the Agreements for Transfer dated 17 September 2019 entered into between the Northern Areas Council and Springford Farm Pty Ltd.
3. The following easement is to be granted over portion of the land subject to that closure:

Grant a free and unrestricted Right of Way over the land marked 'A' in favour of Allotment 2 in Deposited Plan 122789.

On 5 December 2019 that order was confirmed by the Minister for Transport, Infrastructure and Local Government conditionally upon the deposit by the Registrar-General of Deposited Plan 122789 being the authority for the new boundaries.

Pursuant to section 24 of the Roads (Opening and Closing) Act 1991, NOTICE of the order referred to above and its confirmation is hereby given.

Dated: 12 December 2019

M. P. BURDETT
Surveyor-General

DPTI: 2018/18870/01

ROADS (OPENING AND CLOSING) ACT 1991

SECTION 24

*Notice of Confirmation of Road Process Order
Road Closure—Public Road adjacent
Spencer Highway, North Moonta*

BY Road Process Order made on 14 November 2019, the Copper Coast Council ordered that:

1. The Public Road, North Moonta, situated adjoining Sections 1277 to 1281 and Sections 1284 to 1286, Hundred of Wallaroo, more particularly delineated and lettered 'A' and 'B' in Preliminary Plan 19/0012 be closed.
2. Transfer the whole of the land subject to closure to Brian John Goldsworthy in accordance with the Agreement for Transfer dated 2 September 2019 entered into between the Copper Coast Council and Brian John Goldsworthy.

On 5 December 2019 that order was confirmed by the Minister for Transport, Infrastructure and Local Government conditionally upon the deposit by the Registrar-General of Deposited Plan 122727 being the authority for the new boundaries.

Pursuant to section 24 of the Roads (Opening and Closing) Act 1991, NOTICE of the Order referred to above and its confirmation is hereby given.

Health Care (Local Health Networks—Transfer of Assets, Rights and Liabilities) Proclamation 2019

under section 32A of the *Health Care Act 2008*

1—Short title

This proclamation may be cited as the *Health Care (Local Health Networks—Transfer of Assets, Rights and Liabilities) Proclamation 2019*.

2—Commencement

This proclamation comes into operation on the day on which it is made.

3—Interpretation

In this Proclamation—

PCMS contract number, in respect of a contract or agreement, means the contract number assigned to the contract or agreement and recorded in the Procurement and Contract Management System under the *Procurement and Contract Management System (PCMS) Policy Directive* (ISBN No 978-1-76083-049-6).

4—Transfer of contracts and agreements from Barossa Hills Fleurieu Local Health Network Incorporated to Eyre and Far North Local Health Network Incorporated

The assets, rights and liabilities of the Barossa Hills Fleurieu Local Health Network Incorporated in existence immediately before the commencement of this proclamation in respect of the contracts and agreements listed, by reference to the assigned PCMS contract number, in Schedule 1 clause 1 are transferred to, and vested in, the Eyre and Far North Local Health Network Incorporated.

5—Transfer of contracts and agreements from Barossa Hills Fleurieu Local Health Network Incorporated to Flinders and Upper North Local Health Network Incorporated

The assets, rights and liabilities of the Barossa Hills Fleurieu Local Health Network Incorporated in existence immediately before the commencement of this proclamation in respect of the contracts and agreements listed, by reference to the assigned PCMS contract number, in Schedule 1 clause 2 are transferred to, and vested in, the Flinders and Upper North Local Health Network Incorporated.

6—Transfer of contracts and agreements from Barossa Hills Fleurieu Local Health Network Incorporated to Limestone Coast Local Health Network Incorporated

The assets, rights and liabilities of the Barossa Hills Fleurieu Local Health Network Incorporated in existence immediately before the commencement of this proclamation in respect of the contracts and agreements listed, by reference to the assigned PCMS contract number, in Schedule 1 clause 3 are transferred to, and vested in, the Limestone Coast Local Health Network Incorporated.

7—Transfer of contracts and agreements from Barossa Hills Fleurieu Local Health Network Incorporated to Riverland Mallee Coorong Local Health Network Incorporated

The assets, rights and liabilities of the Barossa Hills Fleurieu Local Health Network Incorporated in existence immediately before the commencement of this proclamation in respect of the contracts and agreements listed, by reference to the assigned PCMS contract number, in Schedule 1 clause 4 are transferred to, and vested in, the Riverland Mallee Coorong Local Health Network Incorporated.

8—Transfer of contracts and agreements from Barossa Hills Fleurieu Local Health Network Incorporated to Yorke and Northern Local Health Network Incorporated

The assets, rights and liabilities of the Barossa Hills Fleurieu Local Health Network Incorporated in existence immediately before the commencement of this proclamation in respect of the contracts and agreements listed, by reference to the assigned PCMS contract number, in Schedule 1 clause 5 are transferred to, and vested in, the Yorke and Northern Local Health Network Incorporated.

9—Transfer of contracts and agreements from Flinders and Upper North Local Health Network Incorporated to Eyre and Far North Local Health Network Incorporated

The assets, rights and liabilities of the Flinders and Upper North Local Health Network Incorporated in existence immediately before the commencement of this proclamation in respect of the contracts and agreements listed, by reference to the assigned PCMS contract number, in Schedule 1 clause 6 are transferred to, and vested in, the Eyre and Far North Local Health Network Incorporated.

Details of any further information that the applicant would like to submit in support of the application (circumstances and seriousness of offence, the circumstances of the applicant etc.)

The decision to make an order under section 13A of the *Spent Convictions Act 2009* is at the discretion of the qualified magistrate. The matters that a qualified magistrate must have regard to when deciding whether to make an order are set out in section 13A(6) of the *Spent Convictions Act 2009*. Please include in your application any matters under section 13A(6) that may be relevant to your application.

RELEVANT SECTIONS OF THE SPENT CONVICTIONS ACT 2009**8A—Spent conviction for an eligible sex offence**

- (1) A conviction for an eligible sex offence is spent if, on application by the convicted person in accordance with the regulations, a qualified magistrate makes an order that the conviction is spent.
- (2) An application for an order under this section in respect of a conviction—
 - (a) may not be made until the completion of the qualification period for the conviction; and
 - (b) may not be made if a qualified magistrate has refused to make an order under this section in respect of the same conviction within the preceding 2 years.
- (3) An application under this section may not be made in respect of a conviction for an offence against the laws of another jurisdiction.
- (4) Schedule 2 applies to an application under this section and to proceedings on an application.
- (5) The making of an order under this section is at the discretion of the qualified magistrate and (subject to subsection (6)) that discretion will be exercised having regard to—
 - (a) the nature, circumstances and seriousness of the offence; and
 - (b) if a victim impact statement was furnished to the sentencing court in connection with the sentencing of the applicant for the offence (and that statement is available to the qualified magistrate)—anything referred to in that statement; and
 - (c) any penalty imposed, and any other order or requirement made or imposed by a court, in relation to the offence; and
 - (d) the length of time since the conviction; and
 - (e) all the circumstances of the applicant, including the circumstances of the applicant at the time of the commission of the offence and at the time of the application and whether the applicant appears to have rehabilitated and to be of good character; and
 - (f) whether the spending of the conviction and the non-disclosure of the offence to other persons by operation of an order under this section might present a risk to the public (and, if so, the extent of that risk); and
 - (g) whether there is any other public interest served in not making the order; and
 - (h) any other matter considered relevant by the qualified magistrate.
- (6) In the case of a designated sex-related offence, the qualified magistrate may make an order under this section without reference to any matters set out in subsection (5) if the qualified magistrate is satisfied—
 - (a) that the offence is a designated sex-related offence; and
 - (b) that the conduct constituting the offence has ceased, by operation of law, to be an offence.

13A—Exclusions may not apply

- (1) A person in relation to whom a conviction for an offence is spent may apply to a qualified magistrate for an order that 1 or more of clauses 7 and 8 of Schedule 1 do not apply in relation to the offence.
- (2) An application under this section must be made in accordance with the regulations.
- (3) An application for an order under this section in relation to an offence may not be made if a qualified magistrate has refused to make an order under this section in relation to the same offence within the preceding 2 years.
- (4) An application under this section may not be made in respect of a conviction for an offence against the laws of another jurisdiction.
- (5) Schedule 2 applies to an application under this section and to proceedings on an application.
- (6) The making of an order under this section is at the discretion of the qualified magistrate and that discretion will be exercised having regard to—
 - (a) the nature, circumstances and seriousness of the offence; and
 - (c) in the case of an application that relates to clause 7 of Schedule 1—if the offence involved a vulnerable person or persons; and
 - (d) if a victim impact statement was furnished to the sentencing court in connection with the sentencing of the applicant for the offence (and that statement is available to the qualified magistrate)—anything referred to in that statement; and
 - (e) any penalty imposed, and any other order or requirement made or imposed by a court, in relation to the offence; and
 - (f) all the circumstances of the applicant, including the circumstances of the applicant at the time of the commission of the offence and at the time of the application and whether the applicant appears to have rehabilitated and to be of good character; and
 - (g) whether the removal of the exclusion by operation of an order under this section might present a risk to children, vulnerable persons or the public more generally (and, if so, the extent of that risk); and
 - (h) whether there is any public interest served in not making the order; and
 - (i) any other matter considered relevant by the qualified magistrate.
- (7) An order under this section will have effect according to its terms.
- (8) An order under this section does not limit the operation of clause 9A of Schedule 1 in any respect.

CITY OF HOLDFAST BAY

ROADS (OPENING AND CLOSING) ACT 1991

Road Closure—Lynton Avenue and Lynmouth Avenue, North Brighton

NOTICE is hereby given, pursuant to Section 10 of the Roads (Opening and Closing) Act 1991 that the City of Holdfast Bay proposes to make a Road Process Order to close portion of the public road (Lynton Avenue) and portion of the public road (Lynmouth Avenue) more particularly delineated and lettered 'A' and 'B' respectively in PP 19/0052.

A copy of the plan and a statement of persons affected are available for public inspection at the offices of the Council at 24 Jetty Road, Brighton, and at the Surveyor-General's Office, Level 2, 101 Grenfell Street, Adelaide during normal working hours. The Preliminary Plan can also be viewed at www.sa.gov.au/roadsactproposals.

Any application for easement or objection must set out the full name, address and details of the submission and must be fully supported by reasons. The application for easement or objection must be made in writing to the Council at PO Box 19, Brighton SA 5048 WITHIN 28 DAYS OF THIS NOTICE and a copy must be forwarded to the Surveyor-General at GPO Box 1354, Adelaide SA 5001. Where a submission is made, the Council will give notification of a meeting at which time the matter will be considered.

Dated: 22 October 2019

ROBERTO BRIA
Chief Executive Officer

CITY OF SALISBURY

Proposed Revocation of Classification as Community Land

NOTICE is hereby given, pursuant to Section 194 (2) (b) of the Local Government Act 1999, that the City of Salisbury is considering the revocation of the community land classification of the following land:

- Allotment 8 in Deposited Plan 34655, known as Dry Creek Linear Park (technology Park), Third Avenue Mawson Lakes as described in Certificate of Title Volume 5097 Folio 705.

Council has prepared a report on this proposal pursuant to Section 194 (2) (a) of the Act which is available for inspection at Council's Office, 34 Church Street, Salisbury during normal business hours.

Council invites written submissions on these proposals within 21 days of this notice and must be addressed to: Chief Executive Officer, City of Salisbury, PO Box 8, SALISBURY SA 5108.

Due to the Christmas period the Council will consider all submissions containing objections received by Friday 17 January 2020.

A request for a copy of the plan, and any enquiries relating to the proposal may be directed to Tim Starr on 8406 8577.

Dated: 11 December 2019

JOHN HARRY
Chief Executive Officer

TOWN OF GAWLER

Exclusion of Community Land

NOTICE is hereby given that council, at its meeting of 26 September 2017 carried the following resolution:

Pursuant to section 193 (4a) of the Local Government Act 1999, resolve to exclude the portions A, B, C and D as delineated and marked in Preliminary Plan 13/0022, Krieg Road and Edwards Crescent, Evanston Park as Community Land, having concluded its public consultation process.

Dated: 12 December 2019

H. INAT
Chief Executive Officer

DISTRICT COUNCIL OF KIMBA

LIQUOR LICENSING (DRY AREAS) NOTICE 2019

*Under Section 131(1a) of the Liquor Licensing Act 1997***1—Short title**

This notice may be cited as the *Liquor Licensing (Dry Areas) Notice 2019*.

2—Commencement

This notice comes into operation on 31 December 2019.

3—Interpretation

(1) In this notice—

principal notice means the *Liquor Licensing (Dry Areas) Notice 2015* published in the Gazette on 5.1.15, as in force from time to time.

(2) Clause 3 of the principal notice applies to this notice as if it were the principal notice.

4—Consumption etc of liquor prohibited in dry areas

(1) Pursuant to Section 131 of the Act, the consumption and possession of liquor in the area described in the Schedule is prohibited in accordance with the provisions of the Schedule.

(2) The prohibition has effect during the periods specified in the Schedule.

(3) The prohibition does not extend to private land in the area described in the Schedule.

(4) Unless the contrary intention appears, the prohibition of the possession of liquor in the area does not extend to—

(a) a person who is genuinely passing through the area if—

(i) the liquor is in the original container in which it was purchased from licensed premises; and

- (ii) the container has not been opened; or
- (b) a person who has possession of the liquor in the course of carrying on a business or in the course of his or her employment by another person in the course of carrying on a business; or
- (c) a person who is permanently or temporarily residing at premises within the area or on the boundary of the area and who enters the area solely for the purpose of passing through it to enter those premises or who enters the area from those premises for the purpose of leaving the area.

Schedule—Kimba Area 1**1—Extent of prohibition**

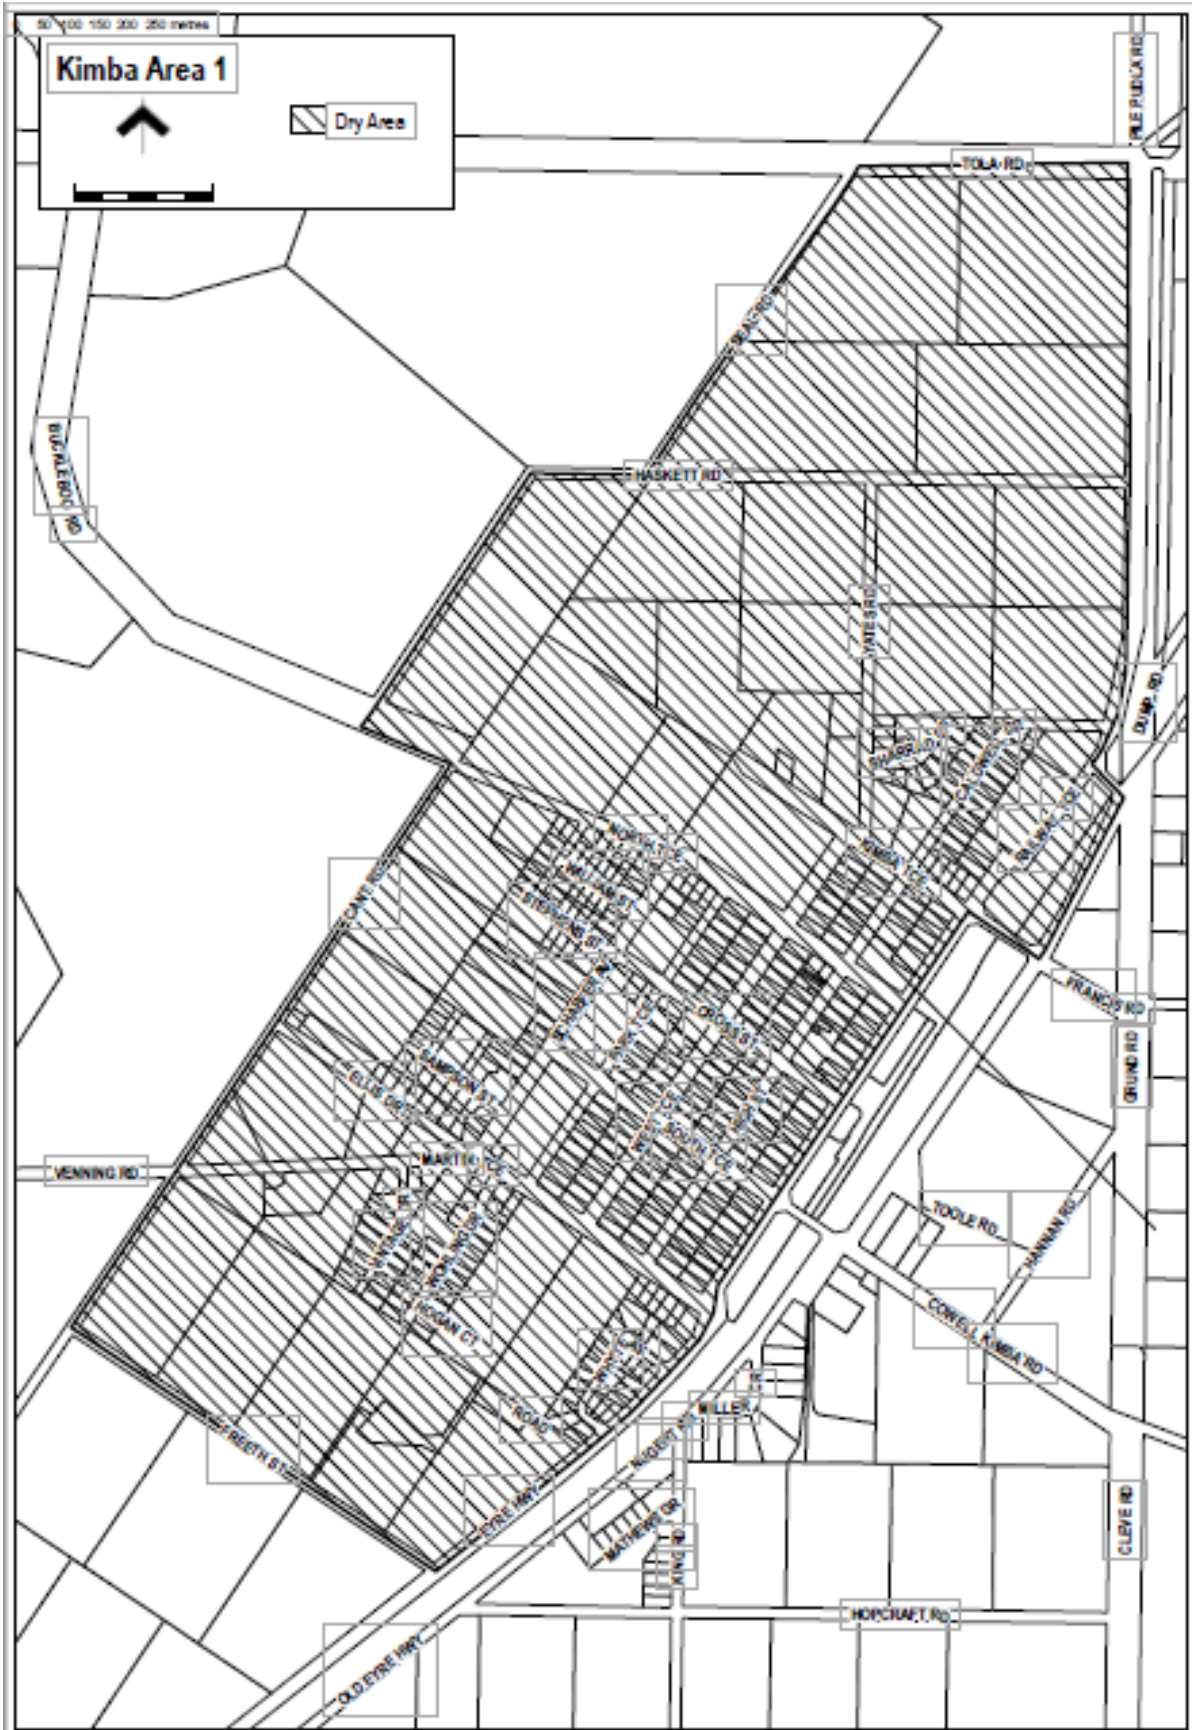

The consumption of liquor is prohibited and the possession of liquor is prohibited.

2—Period of prohibition

From 9pm on 31 December 2019 until 8am 1 January 2020.

3—Description of area**Kimba Area 1**

The area in and adjacent to Kimba bounded as follows: commencing at the point at which the prolongation in a straight line of the eastern boundary of Railway Terrace intersects the northern boundary of Tola Road, then westerly along the northern boundary of Tola Road to the point at which it is intersected by the prolongation in a straight line of the north-western boundary of Seal Road, then south-westerly along that prolongation and boundary of Seal Road to the northern boundary of Haskett Road, then westerly and south-westerly along that boundary of Haskett Road, and the prolongation in a straight line of that boundary, to the southern boundary of Buckleboo Road, then south-easterly along that boundary of Buckleboo Road to the north-western boundary of Cant Road, then south-westerly along that boundary of Cant Road to the point at which it is intersected by the prolongation in a straight line of the south-western boundary of Freeth Road, then south-easterly along that prolongation and boundary of Freeth Road, and the prolongation in a straight line of that boundary, to the south-eastern boundary of Eyre Highway, then generally north-easterly along that boundary of Eyre Highway to the southern side of the intersection at which Eyre Highway, South Terrace and Railway Terrace meet, then in a straight line by the shortest route (across the intersection) to the south-western end of the south-eastern boundary of Railway Terrace, then generally north-easterly along the south-eastern boundary of Railway Terrace to the south-western boundary of Kimba Terrace, then south-easterly along that boundary of Kimba Terrace to the north-western boundary of Eyre Highway, then generally north-easterly along that boundary of Eyre Highway to the south-western boundary of Grund Road, then north-westerly along that boundary of Grund Road to the south-eastern boundary of Railway Terrace, then generally north-easterly and northerly along that boundary of Railway Terrace, and the prolongation in a straight line of that boundary, to the point of commencement.

Dated: 13 November 2019

DEBRA LARWOOD
Chief Executive Officer

DISTRICT COUNCIL OF LOWER EYRE PENINSULA
LIQUOR LICENSING (DRY AREAS) NOTICE 2019
Under Section 131(1a) of the Liquor Licensing Act 1997

1 – Short title

This notice may be cited as the *Liquor Licensing (Dry Areas) Notice 2019*.

2 – Commencement

This notice comes into operation on 31 December 2019.

3 – Interpretation

(1) In this notice-

principal notice means the *Liquor Licensing (Dry Areas) Notice 2015* published in the Gazette on 5.1.15, as in force from time to time.

(2) Clause 3 of the principal notice applies to this notice as if it were the principal notice.

4 – Consumption etc of liquor prohibited in dry areas

(1) Pursuant to section 131 of the Act, the consumption and possession of liquor in the area described in the Schedule is prohibited in accordance with the provisions of the Schedule.

(2) The prohibition has effect during the periods specified in the Schedule.

(3) The prohibition does not extend to private land in the area described in the Schedule.

(4) Unless the contrary intention appears, the prohibition of the possession of liquor in the area does not extend to—

(a) a person who is genuinely passing through the area if –

(i) the liquor is in the original container in which it was purchased from licensed premises; and

(ii) the contained has not been opened; or

(b) a person who has possession of the liquor in the course of carrying on a business or in the course of his or her employment by another person in the course of carrying on a business; or

(c) a person who is permanently or temporarily residing at premises within the area or on the boundary of the area and who enters the area solely for the purpose of passing through it to enter those premises or who enters the area from those premises for the purpose of leaving the area.

Schedule – Cummins Area 1**1 – Extent of prohibition**

The consumption of liquor is prohibited and the possession of liquor is prohibited.

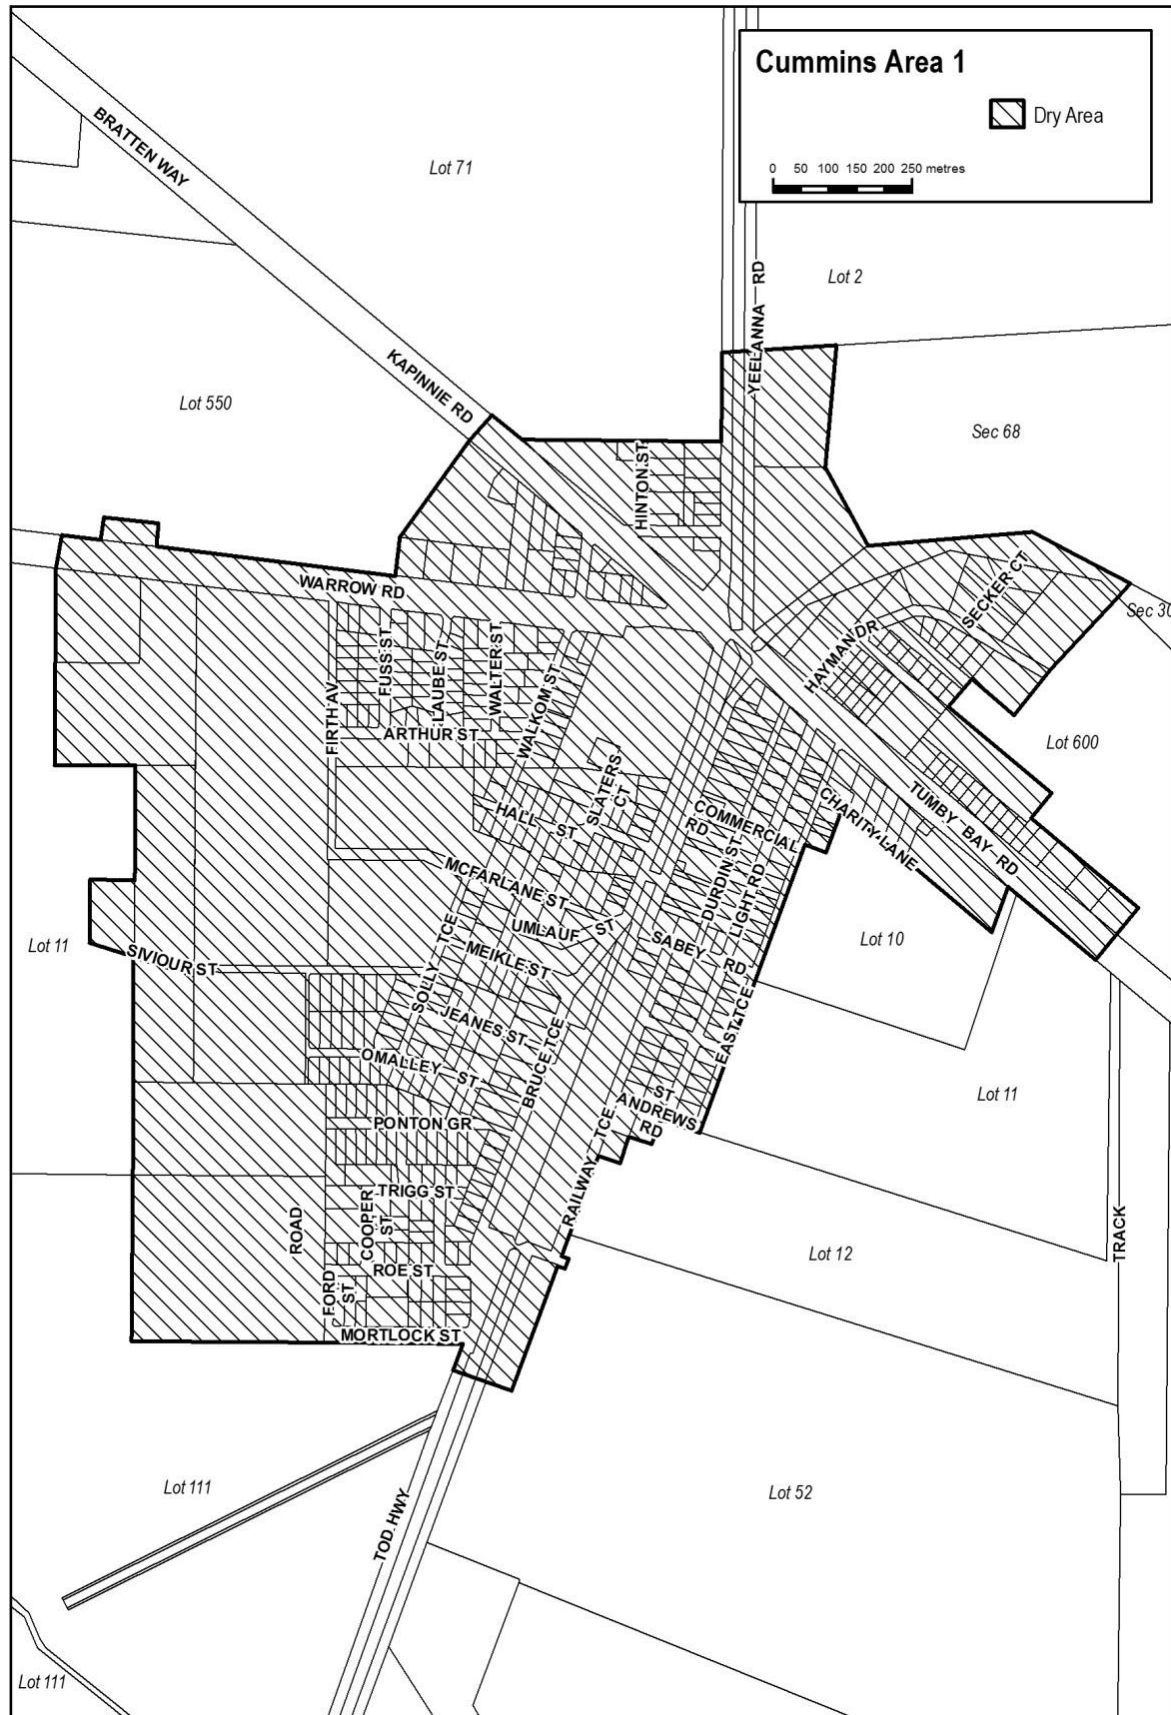

2 – Period of prohibition

From 9pm on 31 December 2019 to 8am on 1 January 2020.

3 – Description of area

The public area in Cummins bounded as follows:

All in the Hundred of Cummins and within an area as defined as commencing at northwest corner of Allotment 99 in FP 180131 and extending northwards in line with the western boundary of this allotment to a point on the northern boundary of Warrow Road, then heading eastwards and following the boundary of Allotment 550 in DP 66791 until the north corner of Allotment 22 in DP 79231, then heading eastwards across Bratten Way to follow the southern boundary, then the eastern boundary of Allotment 71 in DP 94689 to a point in line with the northern boundary of Section 80, then heading eastwards across the Tod Highway to follow northern and then eastern boundary of Section 80, then heading roughly southeast to the nearest corner of Section 30, then heading eastwards along the northern boundary of Section 30 until reaching a point in line with the northeast corner of Allotment 601 in DP 87427, then heading southwest and following the boundary of Allotment 600 in DP 87427 until the southern corner of Allotment 24 in DP 50626, then heading to a point on the southern boundary of Tumbly Bay Road in line with the southeast boundary of Allotment 24 in DP 50626, then heading northwest and following the southern boundary of Bratten Way up to the northwest corner of Allotment 149 in FP 180181 and then following, in a southerly direction the western boundary of Allotments 10, 11 and 12 in DP 95966 and Allotment 52 in DP 53199 until the southwest corner of Allotment 802 in FP 209177, then heading westwards along and in line with the southern boundary of Allotment 802 in FP 209177 until the western boundary of the Tod Highway, then heading north and following the boundary of Allotment 111 in DP 67442 until, and then following the eastern boundary of Allotment 11 in DP 85166 until the commencement point being the northwest corner of Allotment 99 in FP 180131.

RENMARK PARINGA COUNCIL

ROADS (OPENING AND CLOSING) ACT 1991

Road Closing—Government Road, Renmark West

In accordance with Section 10 of the Roads (Opening and Closing) Act 1991, notice is hereby given that The Renmark Paringa Council proposes to make a Road Process Order to close and sell to the adjoining land owner a portion of Government Road adjoining allotment 424 in F177630 shown marked 'A' on Preliminary Plan 19/0050.

A preliminary plan of the proposal, and a statement, are available for public inspection at the Renmark Paringa Council office at 61 Eighteenth Street, Renmark or at the Office of the Surveyor-General, Level 2, 101 Grenfell Street Adelaide, during normal office hours. The Preliminary Plan can also be viewed at <http://www.sa.gov.au/roadsactproposals>.

Any person may object to the proposal (and any adjoining landowner or other person substantially affected by the proposed road closure may apply for an easement relative to the closure). Such objection (or application for an easement) must be made in writing to the Renmark Paringa Council, PO Box 730, Renmark, SA 5341, within 28 days of the date of this notice. If a submission is made, the council is required to give notice of a time and place at which a meeting will be held to consider the matter, so that the person making the submission (or a representative) may attend to support the submission, if desired.

Any submission must set out the full name and address of the person making the submission and must be fully supported by reasons (and any application for the grant of an easement must give full particulars of the nature and location of the easement and, where made by a person as the owner of adjoining or nearby land, specify the land to which the easement is to be annexed). A copy of the submission must be forwarded to the Office of the Surveyor-General at Level 2, 101 Grenfell Street Adelaide, or GPO Box 1354, Adelaide, SA 5001.

NOTICE SUBMISSION

Notices for publication must be submitted before 4 p.m. Tuesday, the week of intended gazettal.

Proofs of formatted content are supplied for all notice submissions. Alterations must be returned before 4 p.m. Wednesday.

The *SA Government Gazette* is compiled and published each Thursday. Requests to withdraw submitted notices must be received before 10 a.m. on the day of publication.

Gazette notices should be emailed as Word files—and signed PDF files if applicable—in the following format:

- Title (name of the governing legislation/department/organisation)
- Subtitle (description of notice)
- A structured body of text
- Date of authorisation
- Name, position, and department/organisation of the authorising person

Please provide the following information in your email:

- Date of intended gazettal
- Details that may impact on publication of the notice
- Email address and phone number of the person authorising the submission
- Name of the person and organisation to be charged for the notice, if applicable
- Request for a quote, if required
- Purchase order, if required
