DIVISION B : MINING

1. This Division includes all workplaces predominantly engaged in ‘mining’, in mineral exploration on own account, in the provision of a wide variety of services to mining and mineral exploration on a contract or fee basis, as well as mining workplaces under development. The term ‘mining’ is used here in the broad sense to include the extraction of minerals occurring naturally as solids such as coal and ores, liquids such as crude petroleum, or gases such as natural gas by such processes as underground or open-cut mining, dredging, quarrying, the operation of wells or evaporation pans, or by recovery from ore dumps or railings.
2. Workplaces predominantly engaged in dressing or beneficiating ores or other minerals by crushing, milling, screening, washing, flotation or other, including chemical beneficiation, processes, or predominantly engaged in briquetting or iron ore pelletising are included in this Division. These activities are generally carried out at or near mine sites as an integral part of mining operations and are therefore regarded as predominant to this Division. Natural gas absorption, purifying and similar treatment plants are also included in this Division.
3. Excluded from this Division are workplaces predominantly engaged in refining or smelting of minerals or ores (other than preliminary smelting of gold), or in the manufacture of such products of mineral origin as coke, cement or fertilisers.
4. Workplaces which are predominantly engaged in undertaking mineral exploration on own account, ie: workplaces classifiable to the classes in Group 161, cannot be classified, as is usual in the case of other workplaces, on the basis of their gross receipts. Instead their classification will be determined, where possible, on the basis of their gross expenditures.

SCHEDULE 9—*continued***DIVISION C : MANUFACTURING**

1. This Division includes all workplaces predominantly engaged in manufacturing the various categories of products summarised below.
2. The term ‘manufacturing’ is used here in the broad sense to relate to the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand. In addition, repair or re-conditioning of products, unless elsewhere classified, shall be included in this Division and classified to the same classification as the original manufactured product.
3. In the summary which follows below an indication is given (by no means comprehensive) of the treatment of particular repair, installation, blending, assembly, packing, bottling or other activities which are typically carried on outside the scope of this Division in an attempt to more clearly describe the activity contents of this Division.
4. Broadly, then, this Division includes all workplaces predominantly engaged in manufacturing:
 - (a) Food, beverages or tobacco products (Subdivision 21). Excluded are workplaces predominantly engaged in sun-drying fruit, processing fish aboard vessels which also catch fish (these are included in Division A), in washing or packing fresh fruit, pulping or other processing of eggs, bottling wine or spirits, repacking flour, cereal food products, dried fruits or in blending or repacking tea (these are included in Subdivision 47 in Division F). However, milk receiving depots treating milk by grading, testing, filtering or cooling and milk distribution depots predominantly engaged in bulk handling of milk are included in this Subdivision.
 - (b) Textiles, clothing and footwear (Subdivisions 23 and 24) including workplaces predominantly engaged in cotton ginning or other preparation of fibres for further processing. Excluded are workplaces predominantly engaged in making or installing curtains, in mens or womens custom tailoring or dressmaking or in boot and shoe repairing (these are included in Subdivision 48 in Division F) or in installing blinds or laying carpets or other floor coverings (these are included in Division E). Workplaces predominantly engaged in contract packing of textiles, clothing and footwear are included in Division I.

SCHEDULE 9—*continued*

- (c) Wood products and furniture (Subdivision 25). Excluded are workplaces predominantly engaged in hewing or rough shaping of railway sleepers, posts, etc., in the forest (these are included in Division A) or in fabrication of joinery at construction sites, erecting prefabricated wooden buildings or installing wooden framed windows (these are included in Division E). Workplaces predominantly engaged in contract packing wooden products and furniture are included in Division I.
- (d) Paper or paper products (Subdivision 26), including workplaces predominantly engaged in publishing or in publishing and printing newspapers, magazines, books, music, maps, etc., or in providing printing trade services, such as electrotyping and bookbinding. Workplaces predominantly engaged in contract packing of paper and paper products are included in Division I.
- (e) Chemical, plastic, coal, petroleum, glass, clay, cement or other non-metallic mineral products (Subdivisions 27 and 28 and Group 347 in Subdivision 34). Excluded are workplaces predominantly engaged in screening, crushing, dressing or other rudimentary treating of minerals, construction materials, etc., in briquetting coal or in purifying natural gas (these are included in Division B), or in blending lubricating oils and greases or in glazing (these are included in Subdivision 47 in Division F). Workplaces predominantly engaged in plastering, in manufacturing and/or laying of hotmix bituminous paving or in the installation of insulation materials or of bituminous roofing materials are included in Division E. Workplaces predominantly engaged in contract packing of chemical, plastic, glass etc., products are included in Division I.
- (f) Metals and metal products including machinery, transport or other equipment, scientific apparatus, and household appliances (Subdivisions 29, 31, 32 and 33), leather or rubber products, ophthalmic articles, jewellery, sporting equipment, etc. (Groups 345, 346 and 348 in Subdivision 34). Excluded are workplaces predominantly engaged in iron ore pelletising or in dressing or other preliminary treating of metallic ores (these are included in Division B), in repairing motor vehicles (except workplaces predominantly engaged in engine reconditioning – these are included in Division C), most types of household appliances, lawn mowers, marine outboard engines, toys, sporting equipment, photographic equipment, watches, clocks and

jewellery, etc., tractors, farm and construction machinery or business machines (these are included in Subdivision 48 in Division F), in the erection or on-site assembly (from prefabricated components) of boilers, industrial furnaces, heavy electrical machinery, metal silos and storage tanks or structural steel, or in the installation of radio or T.V. broadcasting equipment, telephone or telegraph equipment, hot water systems, domestic exhaust fans, heating, refrigeration and airconditioning equipment, fire alarm and sprinkler systems, metal awnings, screens or windows, etc. (these are included in Division E). Workplaces predominantly engaged in contract packing of metal products, tools, household appliances, sporting equipment, etc., are included in Division I.

5. In general the manufacture of parts or components is a predominant activity of the same class as the manufacture of the finished product except where the manufacture of parts or components is specifically shown as a predominant activity of another class.
6. In some instances two or more activities are vertically integrated in the one manufacturing workplace in that the products of one activity are used as materials in the other. In these cases workplaces are generally included in the class to which the final activity is predominant. In some cases, however, the classes have been defined so that certain workplaces are included in the class to which the initial activity is predominant.

SCHEDULE 9—*continued***DIVISION F : TRADE**

1. This Division includes all workplaces predominantly engaged in the trading of goods either as a retailer, wholesaler (physically handling the goods and, usually, taking title to the goods) or as an agent or purchasing, marketing or buying office. The term ‘agency’ is used here to include those operations which trade in goods but do not usually take title to the goods traded and do not physically handle the goods. Typically an agency receives commission or fees which are directly related to the value of goods traded. A purchasing, marketing or buying office is a separate workplace, of a multi workplace employer, which is predominantly engaged in buying or marketing goods for use by other workplaces of the employer. Such a workplace which buys or markets for other workplaces of the employer does not physically handle the goods.
2. The term ‘wholesale trade’ is used here in the broad sense to include the sale (as principals) of new or used goods to retailers or other wholesalers. The more important types of businesses engaged in wholesale trade are wholesale merchants who take title to the goods they sell and separately located sales branches or sales offices (not being retail stores), operated by manufacturing enterprises, which do not merely take orders but supply goods to customers from stocks physically held at their own premises. Workplaces engaged in storing and distributing goods to other workplaces of the employer are included in Division G.
3. The term ‘retail trade’ is used here, generally speaking, to include the activity of selling new or used goods to final consumers. The more important types of business engaged in retail trade are department stores or other shops, stalls, mail order houses, hawkers, door to door sellers, milk or bread vendors, vending machine operators or consumer cooperatives. However, cafes, restaurants, licensed hotels, motels, wine saloons and clubs are included in Division L, Recreation, Personal and Other Services.
4. In addition to the foregoing it may be useful to note that while most types of goods can enter wholesale trade, not all goods may be considered to enter the retail sector even though they may be sold to the final consumer. Goods not normally entering retail trade include cereal grains, metal ores, crude petroleum, industrial chemicals, iron and steel and industrial machinery and equipment.

SCHEDULE 9—*continued*

5. Workplaces predominantly engaged in selling their own goods by auction are included in this Division, but workplaces (except stock and station agents) which are predominantly engaged in providing auctioning services for others are included in Division I, Finance, Property and Business Services.
6. Workplaces predominantly engaged in leasing goods (not manufactured by the same workplaces) for periods in excess of one year, without operators, from stocks physically handled by the workplace are included in this Division, as are workplaces predominantly engaged in the hiring out of most types of consumer goods.
7. Certain kinds of activity other than selling are commonly carried out by workplaces classified to this Division and have therefore been designated as predominant to the relevant classes of either Subdivision 47 or 48. The more important of these activities are:
 - (i) Glazing (Class F4728R).
 - (ii) Blending industrial or lubricating oils from refinery base stock (Class F4741J).
 - (iii) Washing or packing (incl. contract packing) fresh fruit or vegetables (Class F4764X).
 - (iv) Pulping, dehydrating or preserving eggs (Class F4765A).
 - (v) Bottling or breaking down bulk quantities of wine or spirits (incl. contract packing) (Class F4767F).
 - (vi) Blending or repacking tea (incl. contract packing), repacking (incl. contract packing) flour, cereal food products, dried fruits or a wide range of other groceries (Class F4769K).
 - (vii) Custom tailoring or dressmaking (Class F4840R).
 - (viii) Repairing footwear (Class F4846C).
 - (ix) Making or installing curtains (Class F4847F).
 - (x) Repairing locks or providing key duplicating services (Class F4853A).
 - (xi) Repairing non-electric household appliances (Class F4856J).
 - (xii) Repairing or installing household electric appliances (except heating equipment) not requiring electrical work (Class F4857K).
 - (xiii) Repairing or servicing motor vehicles (Class F4861A)

SCHEDULE 9—*continued*

- (xiv) Repairing tractors, agricultural or construction machinery (Class F4863F) .
 - (xv) Repairing or servicing business machines or equipment (Class F4897C) .
8. The treatment of such activities as installation, assembly, blending, bottling and packing is usually specified in the class descriptions. Where these activities have not been specified it should be assumed that they are included in the class that trades in the product.
 9. Workplaces predominantly engaged in both baking and retailing cakes are included in this Division, but workplaces predominantly engaged in both baking and retailing bread are included in Division C, Manufacturing.
 10. In the case of workplaces which have goods manufactured for them on commission or contract a variety of situations are encountered with different treatments applicable to each. In general, if a workplace has no goods producing facilities itself (or, if it has, does not use these or does not employ contractors to use them on its behalf), ie: the workplace undertakes no goods producing activities at all, then all its sales of goods produced for it on commission are treated for classification purposes as wholesale or retail sales, as appropriate.
