EXEMPTION

Application No. A4/2005

The Victorian Civil and Administrative Tribunal (the Tribunal) has considered an application, pursuant to Section 83 of the **Equal Opportunity Act 1995** (the Act), by the Bendigo Health Care Group, Human Research Ethics Committee (the applicant). The application for exemption is to enable the applicant to advertise for a female lay representative to fill a vacancy on the Committee.

Upon reading the material submitted in support of the application, including the affidavit of Michael Oerlemans, the Tribunal is satisfied that it is appropriate to grant an exemption from Sections 100 and 195 of the Act to enable the applicant to advertise for a female lay representative to fill a vacancy on the Committee.

In granting this exemption the Tribunal noted:

- National Health and Medical Research Council guidelines for Human Research Ethics Committees require that the membership of these committees includes one female lay person and one male lay person;
- due to the recent resignation from the Committee of the female lay representative it is necessary to appoint a replacement and the position needs to be advertised.

The Tribunal hereby grants an exemption to the applicant from the operation of Sections 100 and 195 of the Act to enable the applicant to advertise for a female lay representative to fill a vacancy on the Committee.

This exemption is to remain in force from the day on which notice of the exemption is published in the Government Gazette until 20 January 2008.

EXEMPTION

Application No. A3/2005

The Victorian Civil and Administrative Tribunal (the Tribunal) has considered an application, pursuant to Section 83 of the **Equal Opportunity Act 1995** (the Act), by the University of Melbourne (the applicant). The application for exemption is to enable the applicant to advertise for and employ a person of Indigenous Australian background to the position of Indigenous Liaison Officer in the Faculty of Medicine, Dentistry and Health Sciences.

Upon reading the material submitted in support of the application, including the affidavit of Michelle Lim, the Tribunal is satisfied that it is appropriate to grant an exemption from Sections 13, 14, 100 and 195 of the Act to enable the applicant to advertise for and employ a person of Indigenous Australian background to the position of Indigenous Liaison Officer in the Faculty of Medicine, Dentistry and Health Sciences.

In granting this exemption the Tribunal noted that:

- the applicant has a clear commitment to affirmative action to increase the number of staff of Aboriginal and Torres Strait Islander descent and to increase the numbers of Indigenous students at the University;
- the applicant's Enterprise Bargaining Agreement 2003 contains a commitment to foster and grow its Indigenous Employment Strategy (IES), which strategy aims to support goals contained in the applicant's strategic plan;
- the IES seeks to make the applicant an employer of choice for Indigenous Australians. It will do so by implementing an employment strategy that fosters the participation, support and career progression of Indigenous Australians in academic and general staff positions across the University;
- the IES builds on earlier Indigenous education and employment programs by identifying six specific objectives to further increase the number of Indigenous academic and general staff members within the University and to support their professional development and career progression. The objectives encompass significant change on

a number of institutional levels: University culture and leadership, recruitment, work environment, professional development and the establishment of an Indigenous Working Party that will have a key role in providing advice and overseeing the implementation of the IES;

- the success of the IES in meeting its objectives shall be measured through the achievement of the following:
 - recognition of the University as an employer of choice for Indigenous Australians;
 - an increase in the number and support for the development of academic and general Indigenous staff across all areas of the University;
 - a twofold increase in the number of Indigenous staff in the five year period 2004–2009;
- the appointment of an Indigenous person to the position of Indigenous Liaison Officer in the Faculty of Medicine, Dentistry and Health Sciences will make a major contribution to the University's IES and to the recruitment and education of Indigenous students in courses offered by the Faculty of Medicine, Dentistry and Health Sciences;
- the Indigenous Liaison Officer is required to actively engage with and facilitate the development of individual Indigenous students and liaise with the local, rural and remote Indigenous Australian communities for recruitment/access purposes. The officer will assist with ascertaining the needs of Indigenous communities in their aspirations for their people studying in courses offered by the Faculty of Medicine, Dentistry and Health Sciences. The officer will work within a small team across both Faculty staff and the Centre for Indigenous Education (CIE) staff to provide a holistic program of emotional, mental, social, cultural/spiritual and community support programs within the Faculty;
- in their role, the officer will work with both the Faculty and the CIE to increase University participation in the local and national Indigenous communities and the development of Koori related government and external partnerships. To facilitate this

work, it is vital the incumbent has knowledge and experience of Aboriginal communities and cultural understanding of Indigenous practices. It is expected that this knowledge will also be utilised to develop strategies that will enable broader participation of Indigenous people in higher education. It is essential that the person filling the position has a high level of sensitivity and cultural understanding in order to identify and support the needs of Indigenous students who come to them for advice, advocacy and counselling;

- the work of the officer will involve day-to-day, hands on, community based work with students, their families and communities. The officer will thus play a vital role in enhancing the CIE's community engagement in the wider community. The officer will work with the Elders committees to enhance their contribution to the work of the Faculty and the CIE and the programs offered in cultural/spiritual wellbeing;
- the position description for the position of Student Development Officer clearly identifies specific duties for which an Indigenous appointee would be essential;
- the recruitment and appointment of an Indigenous Australian to the position of Indigenous Liaison Officer in the Faculty of Medicine, Dentistry and Health Sciences will make a major contribution to increasing the participation of Indigenous people in higher education and supporting their educational development. In the interests of reconciliation and overcoming current and historical disadvantage of Indigenous Australian people, the role will play a part in furthering understanding and awareness among University staff and the wider Victorian community of the talents and support needs of Indigenous students and their communities.

The Tribunal hereby grants an exemption to the applicant from the operation of Sections 13, 14, 100 and 195 of the Act to enable the applicant to advertise for and employ a person of Indigenous Australian background to the position of Indigenous Liaison Officer in the Faculty of Medicine, Dentistry and Health Sciences.

This exemption is to remain in force from the day on which notice of the exemption is published in the Government Gazette until 20 January 2008.

The Regulations are to be made under the **Meat Industry Act 1993**.

The RIS discusses possible alternatives to the proposed Regulations.

The proposed Regulations were considered the best means of achieving the stated objective and the most appropriate means to regulate the Victorian meat industry.

The RIS assesses the costs and benefits of the proposed Regulations and concludes that the benefits of the Regulations are greater than costs imposed.

Copies of the RIS and the proposed Regulations may be obtained from: Department of Primary Industries Information Centre, Ground Floor, 1 Spring Street, Melbourne, between 8:30 am and 5:00 pm; and internet at www.dpi.vic.gov.au/ris.

All comments and submissions should be written and should be sent to the Public Transport Safety (attention: Ms Tricia Brett) of the Department of Infrastructure, Level 27, 80 Collins Street, Melbourne 3000, or sent by email to tricia.brett@doi.vic.gov.au. Notes:

1. The at-farm commitments for lower-security water are calculated by starting with the rights, then multiplying by the announcement level (subtracting 30% where the rights do not qualify for the first 30% of "sales"), then multiplying by assumed utilisation factors.

2. Murray Valley and Torrumbarry have fixed losses of 80.000 GL and 125.352 GL (including 0.352 GL for Tresco) respectively, plus two variable loss components:
 - a) for high-security rights, zero at zero allocation, increasing linearly to 18.998 GL for Murray Valley and to 31.879 GL for Torrumbarry at an allocation of 100%;
 - b) for lower-security rights, the extra loss is calculated by starting with the at-farm commitments and multiplying by 0.28/0.72 (72% efficiencies has been assumed).
3. Most diversion licences do not qualify for the first 30% of “sales” water, so their utilisation is assumed at that stage to be zero. When high allocations are made, some water users will not use all their rights, even in a dry year, so again utilisation is assumed to be less than 1. Utilisation factors need to be reviewed regularly as practices change.”.

2. An allocation can be below 50%, by extrapolation (losses formula on next page).
3. D&S in irrigation districts restricted. Legislation which came into effect on 18 May 1999 allows D&S water in irrigation districts to be restricted in the same way as water right, so this water is not now shown separately, under clause 14.1.
4. Torrumbarry losses reduced for Woorinen pipeline savings. Snowy Environmental Reserve user group added and savings transferred to this group. Murray Valley & Torrumbarry losses reduced for IMSVID savings. Snowy Environmental Reserve entitlement increased to reflect transfer.
5. Grampians Wimmera Mallee Water entitlement increased by 1,092 ML to reflect purchase from Goulburn system.

Notes:

1. The at-farm commitments for lower-security water are calculated by starting with the rights, then multiplying by the announcement level (subtracting 30% where the rights do not qualify for the first 30% of "sales"), then multiplying by assumed utilisation factors.

2. Murray Valley and Torrumbarry have fixed losses of 80.000 GL and 125.352 GL (including 0.352 GL for Tresco) respectively, plus two variable loss components:
- for high-security rights, zero at zero allocation, increasing linearly to 18.998 GL for Murray Valley and to 31.879 GL for Torrumbarry at an allocation of 100%;
 - for lower-security rights, the extra loss is calculated by starting with the at-farm commitments and multiplying by 0.28/0.72 (72% efficiencies has been assumed).
3. Most diversion licences do not qualify for the first 30% of “sales” water, so their utilisation is assumed at that stage to be zero. When high allocations are made, some water users will not use all their rights, even in a dry year, so again utilisation is assumed to be less than 1. Utilisation factors need to be reviewed regularly as practices change.”.

4. Torrumbarry losses reduced for Woorinen pipeline savings. Snowy Environmental Reserve user group added and savings transferred to this group. Murray Valley & Torrumbarry losses reduced for IMSVID savings. Snowy Environmental Reserve entitlement increased to reflect transfer.
5. Grampians Wimmera Mallee Water entitlement increased by 1,092 ML to reflect purchase from Goulburn system.

Notes:

1. The at-farm commitments for lower-security water are calculated by starting with the rights, then multiplying by the announcement level (subtracting 30% where the rights do not qualify for the first 30% of "sales"), then multiplying by assumed utilisation factors.

2. Murray Valley and Torrumbarry have fixed losses of 80.000 GL and 125.352 GL (including 0.352 GL for Tresco) respectively, plus two variable loss components:
 - a) for high-security rights, zero at zero allocation, increasing linearly to 18.998 GL for Murray Valley and to 31.879 GL for Torrumbarry at an allocation of 100%;
 - b) for lower-security rights, the extra loss is calculated by starting with the at-farm commitments and multiplying by 0.28/0.72 (72% efficiencies has been assumed).
3. Most diversion licences do not qualify for the first 30% of “sales” water, so their utilisation is assumed at that stage to be zero. When high allocations are made, some water users will not use all their rights, even in a dry year, so again utilisation is assumed to be less than 1. Utilisation factors need to be reviewed regularly as practices change.”.

Notes:

1. Allocations in both Table 1 and Table 2 may be made in intervals of say 5%, not just in the 10% intervals shown, by interpolation.
2. An allocation can be below 50%, by extrapolation (losses formula on next page).

3. D&S in irrigation districts restricted. Legislation which came into effect on 18 May 1999 allows D&S water in irrigation districts to be restricted in the same way as water right, so this water is not now shown separately, under clause 14.1.
4. Torrumbarry losses reduced for Woorinen pipeline savings. Snowy Environmental Reserve user group added and savings transferred to this group. Murray Valley & Torrumbarry losses reduced for IMSVID savings. Snowy Environmental Reserve entitlement increased to reflect transfer.
5. Grampians Wimmera Mallee Water entitlement increased by 1,092 ML to reflect purchase from Goulburn system.

Notes:

1. The at-farm commitments for lower-security water are calculated by starting with the rights, then multiplying by the announcement level (subtracting 30% where the rights do not qualify for the first 30% of "sales"), then multiplying by assumed utilisation factors.
2. Murray Valley and Torrumbarry have fixed losses of 80.000 GL and 125.352 GL (including 0.352 GL for Tresco) respectively, plus two variable loss components:
 - a) for high-security rights, zero at zero allocation, increasing linearly to 18.998 GL for Murray Valley and to 31.879 GL for Torrumbarry at an allocation of 100%;

- b) for lower-security rights, the extra loss is calculated by starting with the at-farm commitments and multiplying by 0.28/0.72 (72% efficiencies has been assumed).
- 3. Most diversion licences do not qualify for the first 30% of “sales” water, so their utilisation is assumed at that stage to be zero. When high allocations are made, some water users will not use all their rights, even in a dry year, so again utilisation is assumed to be less than 1. Utilisation factors need to be reviewed regularly as practices change.”.
