## Essential Services Commission Act 2001

### SECTION 35(2)

#### 1. Notice of Determinations

The Essential Services Commission (Commission) gives notice under section 35(2) of the **Essential Services Commission Act 2001** of the making of various Determinations under section 34 of the Act.

The Cost Recovery Order in Council issued under section 68 of the **Gas Industry Act 2001** (FRC Cost Recovery Order) allows gas distribution businesses to recover costs incurred in connection with the introduction of full retail competition in the Victorian gas industry. Pursuant to clause 14 of the FRC Cost Recovery Order, the Commission may determine one or more adjustment factors (such as formulae or other mechanisms) to adjust the prices, fees and charges charged by gas distribution businesses, so that those businesses may recover certain expenditure related to the introduction of full retail competition (FRC).

As required by the adjustment mechanism determined by the Commission on 30 August 2002 pursuant to clause 14 of the FRC Cost Recovery Order, the Commission has completed its annual review of the actual FRC-related expenditure incurred by distributors in 2002 – 2003, 2004 and 2005 and forecast FRC-related expenditure. Following this annual review, the Commission has made Determinations, which have the effect of:

- (a) establishing adjustment factors to adjust the prices, fees and charges so that each gas distribution business recovers:
  - (i) its actual expenditure (to the extent that such recovery is permitted pursuant to the cost recovery principles set out in clause 15 of the FRC Cost Recovery Order); and
  - (ii) compensation for time value of money (to the extent that the Commission determines pursuant to clause 11 of the FRC Cost Recovery Order that such compensation will occur);and no more or less;
- (b) setting adjusted prices, fees and charges that a gas distribution business may charge following the application of the relevant adjustment factor so it recovers from gas retailers its recoverable expenditure and the operations and maintenance expenditure incurred, or forecast to be incurred; and
- (c) setting adjusted prices, fees and charges that a gas distribution business may charge following the application of the relevant adjustment factor to gas retailers for special meter reads.
