- PI is the employer's performance index, calculated in accordance with the following formula:

$$\text{PI} = \frac{\text{ECCR}}{\text{IACCR}}$$

where:

- ECCR is the employer's claims cost rate, calculated in accordance with the following formula:

$$\text{ECCR} = \frac{\text{AC}}{\text{AR}}$$

- IACCR is the employer's industry average claims cost rate, calculated in accordance with the following formula:

$$\text{IACCR} = \frac{\text{AP}}{\text{AR}}$$

where:

- (i) AC is calculated in accordance with the following formula:

- (3) A reference in this clause to a premium avoidance scheme is a reference to a scheme in respect of which the Authority has determined that the person, or one of the persons, who entered/ enters into or carried/carries out the scheme (or any part of the scheme) did/does so for the purpose of enabling the relevant employer to obtain a premium benefit in connection with the scheme, or of enabling the relevant employer and another employer or other employers each to obtain a premium benefit in connection with the scheme (whether or not that person who entered into or carried out the scheme or any part of the scheme is the relevant employer or is the other employer or one of the other employers). (“the relevant purpose”)
- (4) For the purposes of sub-clause (3), it is irrelevant whether the relevant purpose is the only or dominant purpose of the conduct, as long as it is a substantial purpose.

- (6) Where sub-clause (1) applies, the Authority itself may determine that:
- (a) for the purposes of calculating the premium payable by the relevant employer, the premium avoidance scheme or any part of it shall be disregarded;
 - (b) without limiting the generality of (a):
 - (i) for the purposes of determining the predominant activity carried on at, or the industry classification of, a workplace of the relevant employer, regard shall be had to the activity carried on at any two or more workplaces (whether or not they are the workplaces of the relevant employer) as though they were one workplace, notwithstanding that those workplaces may not be contiguous;
 - (ii) a period of coverage at a workplace of the relevant employer shall be treated as a new risk or current risk period of coverage, notwithstanding anything in item 9 of schedule 1;
 - (iii) a workplace shall be treated as the predecessor of any workplace of the relevant employer, notwithstanding anything in item 6 of schedule 1;
 - (c) the premium payable by the relevant employer shall be the amount specified in the determination.
- (7) A determination under sub-clause (6) must be in writing and must be provided to the relevant employer together with written reasons for the making of the determination.

- (3) Subject to sub-item (4), if workers employed by an employer are working in a place that is not a workplace of that employer within the meaning of sub-item (1), those workers shall be deemed to be working at the workplace of the employer from which that work is managed or controlled or, if there is no such workplace, the place determined by the Authority to be the workplace of the employer in respect of that work.
- (4) If workers employed by an employer which is a member of a group within the meaning of Part 6 of the *WorkCover Insurance Act* are not working at a workplace of that employer but are working at a workplace, or place of business, of another member of the group, the second-mentioned workplace (or place of

- (5) Where two or more persons (“the **relevant persons**”) are:
- (a) members of a group within the meaning of Part 6 of the *WorkCover Insurance Act*; and
 - (b) carrying out their respective operations at two or more group workplaces (“the constituent workplaces”) which:
 - (i) are contiguous with each other; or
 - (ii) occupy (in whole or in part) the same area of land,
- the Authority may (subject to sub-item (6)) determine that the constituent workplaces, or two or more of them, are to be treated as a single workplace (“the grouped workplace”) for the purpose of determining the predominant activity of each constituent workplace.
- (5A) For the purposes of sub-item (5), “**group workplace**” means any place of business (whether or not a workplace of an employer) at which any of the relevant persons (whether or not an employer) carries out its operations, and such place shall be treated as a workplace of that person.

- (a) the operations are not carried on independently of each other;
 - (b) the operations are connected with each other; or
 - (c) the operations are carried on with an intention either directly or indirectly of minimising the amount of premium payable by one or other of the relevant persons under this Order.
- (7) Where the Authority makes a determination under sub-item (5), this Order shall apply as if the predominant activity and the applicable industry rate for each constituent workplace were the same as for the grouped workplace.
- (8) Any reference to a workplace includes:
- (a) any predecessor workplace; and
 - (b) where applicable, a reference to an establishment which corresponds to the workplace.

3. **Predominant Activity**

- (1) (a) “Predominant activity”, in relation to a period of coverage at an actual workplace of an employer, means the activity of the employer which during that period contributes, or is likely to contribute, more than any other activity of the employer to the value of goods and/or services produced or provided by operations carried on in that workplace.

WorkCover Insurance Premiums Order (No. 13) 2005/2006

- (b) “Predominant activity”, in relation to a period of coverage at an imputed workplace of an employer, means the activity of the labour hire client which during that period contributes, or is likely to contribute, more than any other activity of the client to the value of goods and/or services produced or provided by operations carried on in that workplace.
- (2) In determining the predominant activity in relation to a workplace, regard may be had to, but must not be limited by, measures of activity during the preceding period of 12 months or less consisting of data relating to sales, cost of goods produced, cost of labour or gross profit, taken from:
 - (a) a statement prepared and signed by a registered company auditor, accountant or tax agent; or
 - (b) where an employer did not engage a registered company auditor, accountant or tax agent during the period to which the information refers, a return by the employer.
- (3) Subject to sub-items (4) and (5), if, at a workplace of an employer that comprises two or more contiguous areas (“the contiguous areas”), the predominant activity carried on at each of those areas is different, the Authority may determine that each of those areas is a separate workplace of that employer for the purposes of this Order.
- (4) Unless sub-item (6) applies, sub-item (3) does not apply in relation to an area (“the subject area”) if:
 - (a) the predominant activity carried on at the subject area –
 - (i) is wholly or mainly dependent on; or
 - (ii) occurs wholly or mainly as a consequence of; or
 - (iii) is wholly or mainly ancillary to,
the predominant activity carried on at one or more of the other contiguous areas; or

 - (i) clerical services;
 - (ii) management services;
 - (iii) administrative services;
 - (iv) sales and marketing services;

WorkCover Insurance Premiums Order (No. 13) 2005/2006

 - (b) that activity is carried on wholly or mainly in connection with the operations carried on in one or more of the other contiguous areas.
- (6) Sub-items (4) and (5) do not apply, and sub-item (3) does apply, to an area (“the relevant area”) if:
 - (a) either I6185T – Corporate Head Office Administration, Private Sector or I6186V – Corporate Head Office Administration, Public Sector is the industry classification to which the predominant activity for the relevant area corresponds (but not if either classification is merely the industry classification to which such predominant activity most closely corresponds); and
 - (b) at least one of the workplaces of the employer in connection with which the relevant area is engaged in corporate administration is not contiguous with any of the contiguous areas.
- (7) For the purposes of sub-item (6)(b), the expression “workplaces of the employer” includes an area, or two or more contiguous areas, of land outside Victoria but within Australia, not otherwise being a workplace for the purposes of this Order, which would be a workplace if sub-items 2(1) and (2) of this schedule applied.

4. Remuneration

- (1) The remuneration for a period of coverage at a workplace of an employer (“**the relevant period**”) shall be determined in accordance with this item.
- (2) Subject to sub-items (3), (4) and (5), the remuneration for the relevant period shall be the sum of the rateable remuneration paid or payable to workers employed by the employer or (if applicable) by a predecessor employer in respect of operations carried out at that workplace during that period.
- (3) Unless the Authority determines otherwise, if a worker is engaged in operations at two or more workplaces of an employer and the remuneration paid or payable to the worker in respect of operations in each workplace is not identified, the proportion of the remuneration attributable to each workplace is the same proportion as the number of hours during which the worker is engaged in operations in that workplace bears to the total number of hours during which the worker is or was engaged in operations in those workplaces.
- (4) If an employer has two or more workplaces and it is not reasonably possible to determine the proportion of the remuneration that is attributable to each workplace, the Authority may, subject to such terms and conditions as it determines, authorise the employer to pay premium on the basis of estimates of the proportion.

WorkCover Insurance Premiums Order (No. 13) 2005/2006

- (5) If the Authority has insufficient information to enable it to determine the remuneration for a period of coverage in accordance with this item, the Authority may use an estimate of rateable remuneration as provided for in sections 18, 20, 23 and 24 of the *WorkCover Insurance Act*.

5. Homogenous Workplaces

If the predominant activities carried on at two or more workplaces of an employer are of the same kind, any two or more of those workplaces may be determined by the Authority to be one workplace unless the determination would result in the premium payable by the employer being different from the amount which would have been calculated in accordance with this Order if the determination had not been made.

“**associate**” has the meaning given in item 11.

the Authority may make a determination accordingly.

WorkCover Insurance Premiums Order (No. 13) 2005/2006

- (7) For the purposes of making a determination under sub-item (6), the Authority itself may disregard a relationship of control which would otherwise be taken to exist or to have existed (as the case may be) between employer B and employer A by reason that an entity (in this sub-item called “the relevant entity”), whether employer A or employer B or another entity, has or had a controlling interest in an employer of a kind specified in sub-item (9), if the Authority is satisfied that it would be reasonable to do so having regard to:

- (9) For the purposes of this item, a relationship of control shall be taken to exist or to have existed (as the case may be) between employer B and employer A if:
 - (a) at any time in the relevant test period employer A has or had a controlling interest in employer B; or
 - (b) any entity which at any time in the relevant test period has or had a controlling interest in employer A also has or had at any time in the relevant test period (not necessarily being the same time) a controlling interest in employer B; or
 - (c) at any time in the relevant test period employer B has or had a controlling interest in employer A; or

WorkCover Insurance Premiums Order (No. 13) 2005/2006

- (a) employer A is a partnership in which an entity was a partner; and
- (b) that entity would be taken to have a controlling interest in employer B if the entity's partners in employer A were taken to be associates of that entity.

 - (b) consideration must be given to the industrial characteristics of the predominant activity without regard to the risk of injury associated with the predominant activity or with any of the occupations of or functions performed by workers engaged in operations at the workplace; and
 - (c) the predominant activity at a workplace does not correspond or most closely correspond to a WorkCover industry classification if workplaces predominantly engaged in that activity are expressly excluded from that classification in any of the elements of schedule 5.

SCHEDULE 5

INTRODUCTION

In accordance with item 7 of schedule 1, the industry to which a workplace is classified for an employer is the WorkCover industry classification in this schedule to which the predominant activity at that workplace corresponds or most closely corresponds.

Industry classifications, which are denoted by two letter, four digit alpha/numeric codes, are organised within broad divisions (each identified by a single letter), subdivisions (each identified by a two digit code) and Groups (each identified by a three digit code).

The preambles to the various divisions summarise and explain the scope of the relevant division and clarify the correct classification for specific predominant activities.

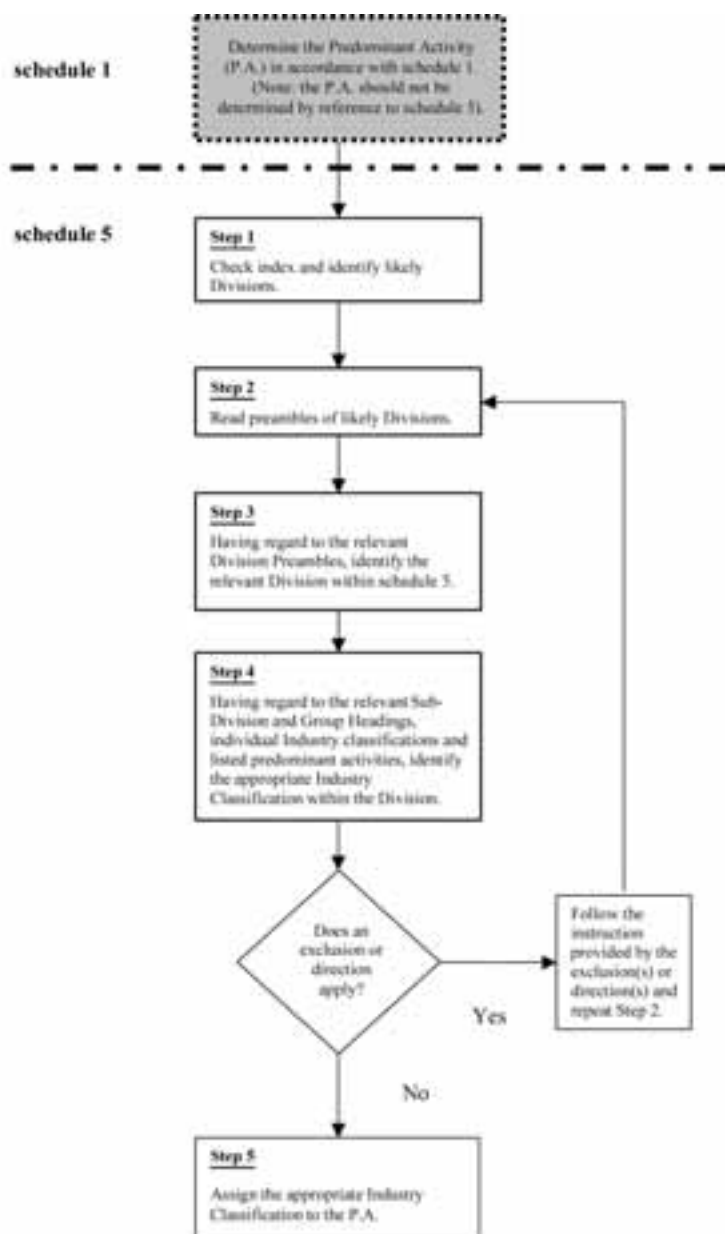

The predominant activity at the workplace is determined in accordance with item 3 of schedule 1 without regard to this schedule. It is then necessary to identify the WorkCover industry classification in this schedule to which that predominant activity corresponds or most closely corresponds.

For this purpose, regard must be had to all relevant elements of this schedule, ie headings, preambles to divisions, industry descriptions, exclusions/references and the listed activities.

It must be noted that the predominant activity at a workplace does not correspond or most closely correspond to a WorkCover industry classification if workplaces predominantly engaged in that activity are expressly excluded from that classification in any of the elements of this schedule referred to above.

SCHEDULE 5

The process for identifying the appropriate WorkCover industry classification is set out in the flow chart below.

WORKCOVER INDUSTRY CLASSIFICATION

DETAILED CLASSIFICATION

DIVISION A : AGRICULTURE, FORESTRY, FISHING AND HUNTING

1. This Division includes all workplaces predominantly engaged in “agriculture, forestry, fishing and hunting” or in providing related services, such as sheep shearing, aerial agricultural services, harvesting or forest protection. Agricultural extension or advisory services provided by government departments are, however, included as activities predominant to Public Administration in Subdivision 71.
2. The term “agriculture” is used here in the broad sense to include the breeding, keeping or cultivation of all kinds of animal or vegetable life except forest trees and marine life. Sun-drying of fruit is also included in this Subdivision.
3. Institutional farms such as research farms and prison farms are not included in this Division, but are classified to those classes in Division K, which include the institutions concerned.
4. “Forestry” includes afforestation or the harvesting or gathering of forest products. Logging operations such as felling, hewing or rough shaping of timber in the forest are included in this Division.
5. “Fishing” includes the catching, gathering, breeding or cultivation of marine life from ocean, coastal or inland waters (coastal waters include estuaries and inlets). Included also is the processing of ocean and coastal water fishery products aboard vessels predominantly engaged in both catching and processing those products.
6. “Hunting” includes the catching or taking of all types of animal wildlife on land. The catching or taking of wildlife such as crocodiles in inland waters is also included.

SCHEDULE 5—*continued***DIVISION B : MINING**

1. This Division includes all workplaces predominantly engaged in ‘mining’, in mineral exploration on own account, in the provision of a wide variety of services to mining and mineral exploration on a contract or fee basis, as well as mining workplaces under development. The term ‘mining’ is used here in the broad sense to include the extraction of minerals occurring naturally as solids such as coal and ores, liquids such as crude petroleum, or gases such as natural gas by such processes as underground or open-cut mining, dredging, quarrying, the operation of wells or evaporation pans, or by recovery from ore dumps or railings.
2. Workplaces predominantly engaged in dressing or beneficiating ores or other minerals by crushing, milling, screening, washing, flotation or other, including chemical beneficiation, processes, or predominantly engaged in briquetting or iron ore pelletising are included in this Division. These activities are generally carried out at or near mine sites as an integral part of mining operations and are therefore regarded as predominant to this Division. Natural gas absorption, purifying and similar treatment plants are also included in this Division.
3. Excluded from this Division are workplaces predominantly engaged in refining or smelting of minerals or ores (other than preliminary smelting of gold), or in the manufacture of such products of mineral origin as coke, cement or fertilisers.
4. Workplaces which are predominantly engaged in undertaking mineral exploration on own account, ie: workplaces classifiable to the classes in Group 161, cannot be classified, as is usual in the case of other workplaces, on the basis of their gross receipts. Instead their classification will be determined, where possible, on the basis of their gross expenditures.

In addition, repair or re-conditioning of products, unless elsewhere classified, shall be included in this Division and classified to the same classification as the original manufactured product.
3. In the summary which follows below an indication is given (by no means comprehensive) of the treatment of particular repair, installation, blending, assembly, packing, bottling or other activities which are typically carried on outside the scope of this Division in an attempt to more clearly describe the activity contents of this Division.
4. Broadly, then, this Division includes all workplaces predominantly engaged in manufacturing:

Workplaces predominantly engaged in contract packing of metal products, tools, household appliances, sporting equipment, etc., are included in Division I.

5. In general the manufacture of parts or components is a predominant activity of the same class as the manufacture of the finished product except where the manufacture of parts or components is specifically shown as a predominant activity of another class.
6. In some instances two or more activities are vertically integrated in the one manufacturing workplace in that the products of one activity are used as materials in the other. In these cases workplaces are generally included in the class to which the final activity is predominant. In some cases, however, the classes have been defined so that certain workplaces are included in the class to which the initial activity is predominant.

DIVISION F : TRADE

1. This Division includes all workplaces predominantly engaged in the trading of goods either as a retailer, wholesaler (physically handling the goods and, usually, taking title to the goods) or as an agent or purchasing, marketing or buying office. The term ‘agency’ is used here to include those operations which trade in goods but do not usually take title to the goods traded and do not physically handle the goods. Typically an agency receives commission or fees which are directly related to the value of goods traded. A purchasing, marketing or buying office is a separate workplace, of a multi workplace employer, which is predominantly engaged in buying or marketing goods for use by other workplaces of the employer. Such a workplace which buys or markets for other workplaces of the employer does not physically handle the goods.
2. The term ‘wholesale trade’ is used here in the broad sense to include the sale (as principals) of new or used goods to retailers or other wholesalers. The more important types of businesses engaged in wholesale trade are wholesale merchants who take title to the goods they sell and separately located sales branches or sales offices (not being retail stores), operated by manufacturing enterprises, which do not merely take orders but supply goods to customers from stocks physically held at their own premises. Workplaces engaged in storing and distributing goods to other workplaces of the employer are included in Division G.
3. The term ‘retail trade’ is used here, generally speaking, to include the activity of selling new or used goods to final consumers. The more important types of business engaged in retail trade are department stores or other shops, stalls, mail order houses, hawkers, door to door sellers, milk or bread vendors, vending machine operators or consumer cooperatives. However, cafes, restaurants, licensed hotels, motels, wine saloons and clubs are included in Division L, Recreation, Personal and Other Services.
4. In addition to the foregoing it may be useful to note that while most types of goods can enter wholesale trade, not all goods may be considered to enter the retail sector even though they may be sold to the final consumer. Goods not normally entering retail trade include cereal grains, metal ores, crude petroleum, industrial chemicals, iron and steel and industrial machinery and equipment.

SCHEDULE 5—*continued*

5. Workplaces predominantly engaged in selling their own goods by auction are included in this Division, but workplaces (except stock and station agents) which are predominantly engaged in providing auctioning services for others are included in Division I, Finance, Property and Business Services.
6. Workplaces predominantly engaged in leasing goods (not manufactured by the same workplaces) for periods in excess of one year, without operators, from stocks physically handled by the workplace are included in this Division, as are workplaces predominantly engaged in the hiring out of most types of consumer goods.
7. Certain kinds of activity other than selling are commonly carried out by workplaces classified to this Division and have therefore been designated as predominant to the relevant classes of either Subdivision 47 or 48. The more important of these activities are:
 - (i) Glazing (Class F4728R).
 - (ii) Blending industrial or lubricating oils from refinery base stock (Class F4741J).
 - (iii) Washing or packing (incl. contract packing) fresh fruit or vegetables (Class F4764X).
 - (iv) Pulping, dehydrating or preserving eggs (Class F4765A) .
 - (v) Bottling or breaking down bulk quantities of wine or spirits (incl. contract packing) (Class F4767F) .
 - (vi) Blending or repacking tea (incl. contract packing), repacking (incl. contract packing) flour, cereal food products, dried fruits or a wide range of other groceries (Class F4769K).
 - (vii) Custom tailoring or dressmaking (Class F4840R).
 - (viii) Repairing footwear (Class F4846C) .
 - (ix) Making or installing curtains (Class F4847F) .
 - (x) Repairing locks or providing key duplicating services (Class F4853A) .
 - (xi) Repairing non-electric household appliances (Class F4856J).
 - (xii) Repairing or installing household electric appliances (except heating equipment) not requiring electrical work (Class F4857K).
 - (xiii) Repairing or servicing motor vehicles (Class F4861A)

SCHEDULE 5—*continued*

- (xiv) Repairing tractors, agricultural or construction machinery (Class F4863F) .
 - (xv) Repairing or servicing business machines or equipment (Class F4897C) .
8. The treatment of such activities as installation, assembly, blending, bottling and packing is usually specified in the class descriptions. Where these activities have not been specified it should be assumed that they are included in the class that trades in the product.
9. Workplaces predominantly engaged in both baking and retailing bread or cakes are included in this Division, but workplaces predominantly engaged in baking bread or cakes are included in Division C, Manufacturing.
10. In the case of workplaces which have goods manufactured for them on commission or contract a variety of situations are encountered with different treatments applicable to each. In general, if a workplace has no goods producing facilities itself (or, if it has, does not use these or does not employ contractors to use them on its behalf), ie: the workplace undertakes no goods producing activities at all, then all its sales of goods produced for it on commission are treated for classification purposes as wholesale or retail sales, as appropriate.
