STANDING COMMITTEE OF ATTORNEYS-GENERAL: CENSORSHIP
FILM FESTIVAL GUIDELINES COMMENCING 22 AUGUST 2007

Film Festival Guidelines

Film Exemptions

1. A person or organisation wishing to screen an unclassified film at a film festival/season/special film event may apply to the Director¹ (or, in some jurisdictions, the State or Territory Minister²) to have the unclassified film which the applicant wishes to exhibit formally exempted from classification.
2. When applying for exemption under clause 1, the applicant must submit adequate information about the matters listed in clauses 3, 4 and 5 below.
3. The applicant must submit the title of the film accompanied by an adequate synopsis³. The Director will take the synopsis into account, as well as any other information the Australian Attorney-General's Department may have about the film, in deciding whether to grant an exemption.
4. In deciding whether to grant an exemption, the Director must have regard to:
 - a) the purpose for which the film is to be screened; and
 - b) the extent to which the applicant carries on activities of a medical, scientific, educational, cultural or artistic nature; and
 - c) the reputation of the applicant in relation to the screenings of films; and
 - d) the conditions as to admission of persons to the screening of the film.
5. The Director will also have regard to any matters he/she considers relevant, such as:
 - a) the number of times the film will be screened, and
 - b) whether the audience is aged 18 years and over.
6. Where specified in State or Territory legislation, the Director is required to apply any guidelines or directions issued by the relevant Minister(s) in considering an application for an exemption.
7. When making a decision about an exemption, the Director will have regard to section 11 of the (Cwth) **Classification (Publication, Films and Computer Games) Act 1995** (the Commonwealth Classification Act).

¹ The Director is the Director of the Classification Board. In the NT, the Director is referred to as the 'National Director', and in the ACT as 'director'.

² The Director does not exempt films to be shown in SA and QLD film festivals and events. Applications for film exemptions are to be directed in SA to the Film Festivals Exemption Officer, SA Attorney-General's Department. For Film Festivals in QLD, refer to the Approved Organisation section of these guidelines and to the Films Classification Officer, QLD Department of Tourism, Racing and Fair Trading.

³ An adequate written synopsis of a film, under 14. (1) d (ii) of the **Classification (Publications, Films and Computer Games) Act 1995** is described as 'in English that includes a statement or summary of any incidents, or of the plot, depicted or intended to be depicted by the film'.

8. The Director will not grant an exemption for a film already classified X 18+ or RC⁴.
9. In the case of a film which has been classified X 18+ or RC at least 2 years before the date of application for exemption, the film may be exempted if, in the Director's view, the film would not be classified X 18+ or RC if reclassified under the Commonwealth Classification Act.
10. If in the opinion of the Director, whether based on the synopsis, other material, inspection of the film, or any other grounds, an unclassified film would be classified X 18+ or RC, the Director will not grant an exemption.
11. Where the Director has declined to exempt an unclassified film, the organisation may submit the film to the Classification Board for classification. If the film is classified X 18+ or RC, the Director's decision to decline to exempt it will be confirmed to the applicant.
12. Where an exemption is granted, it is a general requirement that the film must be exhibited under the following conditions:
 - a) only as part of the film festival/season/special film event at specified venues and on or between specified dates and not otherwise;
 - b) not more than four times each during the course of the film festival/season/special film event;
 - c) for the purpose for which the exemption was sought;
 - d) only to persons aged 18 years and over.
13. Variations to these conditions or additional conditions may also be imposed at the discretion of the Director.
14. The Director will notify the relevant State(s) and Territory(ies) of his/her decision about the film that has been granted an exemption. The Director will notify the relevant Minister(s) if a film has been refused exemption.

Approved Organisation Status

15. Organisations wishing to screen a film or hold a film festival/season/special film event may apply to the Director⁵ (or, in some jurisdictions, the State or Territory Minister and in the case of Queensland, the Films Classification Officer⁶) for 'approved organisation' status.
16. 'Approved' status allows an organisation to apply to have unclassified films which it wishes to exhibit formally exempted from classification.
17. When applying for approved organisation status under clause 15, organisations must submit adequate information about the matters listed in clauses 18 and 19 below.
18. In deciding whether to grant approval to organisations, the Director must have regard to:
 - a) the purpose for which the organisation was formed; and
 - b) the extent to which the organisation carries on activities of a medical, scientific, educational, cultural or artistic nature; and
 - c) the reputation of the organisation in relation to the screenings of films; and
 - d) the conditions as to admission of persons to the screening of films by the organisation.

4 RC films are described in the National Classification Code as ones that:

- (a) depict, express or otherwise deal with matters of sex, drug misuse or addiction, crime, cruelty, violence or revolting or abhorrent phenomena in such a way that they offend against the standards of morality, decency and propriety generally accepted by reasonable adults to the extent that they should not be classified; or
- (b) depict in any way that is likely to cause offence to a reasonable adult, a person who is, or who looks like, a child under 18 (whether the person is engaged in sexual activity or not); or
- (c) promote, incite or instruct in matters of crime or violence.

5 The Director is the Director of the Classification Board. In the NT, the Director is referred to as the 'National Director', and in the ACT as 'director'.

Applications for approved organisation status are to be directed in SA to the Film Festivals Exemption Officer, SA Attorney-General's Department and in QLD, to the Films Classification Officer, QLD Department of Tourism, Racing and Fair Trading.

19. The Director will also have regard to any matters he/she considers relevant, such as:
 - a) the number of times the films will be screened, and
 - b) whether the audience is aged 18 years and over.
20. Where specified in State or Territory legislation, the Director is required to apply any directions or guidelines issued by the relevant Minister in considering whether to approve an organisation.

Film Exemptions for Approved Organisations

22. An approved organisation wishing to screen an unclassified film or hold a film festival/season/special film event may apply to the Director⁷ (or, in some jurisdictions, the State or Territory Minister and in the case of Queensland, the Films Classification Officer⁸) to have unclassified films which the applicant wishes to exhibit, formally exempted from classification.
23. When applying for exemption under clause 22, the organisation must submit adequate information about the matters listed in clauses 24, 25 and 26 below.
24. The applicant must submit the title of the films accompanied by an adequate synopsis⁹. The Director will take the synopsis into account, as well as any other information the Australian Attorney-General's Department may have about the film, in deciding whether to grant an exemption.
25. In deciding whether to grant an exemption, the Director must have regard to the purpose for which the films are to be screened.
26. The Director will also have regard to any matters he/she considers relevant, such as:
 - a) the number of times the films will be screened, and
 - b) whether the audience is aged 18 years and over.
27. Where specified in State or Territory legislation, the Director is required to apply any guidelines or directions issued by the relevant Minister(s) in considering an application for an exemption.
28. When making a decision about an exemption, the Director will have regard to Section 11 of the Commonwealth Classification Act.
29. The Director will not grant an exemption for a film already classified X 18+ or RC¹⁰.
30. In the case of a film which has been classified X 18+ or RC at least 2 years before the date of application for exemption, the film may be exempted if, in the Director's view, the film would not be classified X 18+ or RC if reclassified under the Commonwealth Classification Act.

7 The Director is the Director of the Classification Board. In the NT, the Director is referred to as the 'National Director', and in the ACT as 'director'.

8 The Director does not exempt films to be shown in SA and QLD film festivals and events. Applications for exemption are to be directed in SA to the Film Festivals Exemption Officer, SA Attorney-General's Department and in QLD to the Films Classification Officer, QLD Department of Tourism, Racing and Fair Trading.

Part 2 – Renewable Energy Certificates

4 Accreditation of Power Stations

4.1 Components of an electricity generation system taken to be a relevant power station

For section 17(1)(a) of the Act, the Commission will decide which components of an electricity generation system are to be taken to be a relevant power station in accordance with Schedule 1.

4.2 Eligibility for accreditation

For section 17(3)(b) of the Act, the additional eligibility requirements that a relevant power station must satisfy are:

- (a) a power station that is in the national electricity market must use metering that meets the performance standard required by the National Electricity Rules;
- (b) a power station that is not in the national electricity market must use metering that enables the Commission to determine the amount of electricity generated by the power station;
- (c) for a power station that uses an energy source that is not an eligible renewable energy source to generate electricity or to prepare an eligible renewable energy source within the power station, there must be an energy source methodology;
- (d) for a power station for which a pre-scheme capacity (other than nil) has been determined, there must be a scheme generation methodology; and
- (e) the power station must be operated in accordance with any relevant Commonwealth, State, Territory or local government planning and approval requirements.

Note: For other eligibility criteria, see Act, section 17(3)(a).

4.3 Energy source methodology and scheme generation methodology

- (a) A registered person may apply to the Commission for provisional approval of a proposed energy source methodology or scheme generation methodology before applying for accreditation of a power station under section 15 of the Act. The Commission's provisional approval of a proposed methodology must specify that, if an application for accreditation is properly made under section 15 of the Act, the Commission will approve that methodology if the Commission is satisfied that the information on which the provisional approval was based has not materially changed.
- (b) The Commission may make guidelines in relation to energy source methodologies and scheme generation methodologies.

5 Specifying Pre-Scheme Capacity**5.1 How the Commission specifies pre-scheme capacity**

For section 17(6) of the Act, the Commission will determine a power station's pre-scheme capacity in accordance with Rules 5.2 and 5.3.

5.2 No generation before 1 January 2007

The pre-scheme capacity for a power station that generates electricity for the first time on a commercial basis on or after 1 January 2007 is nil.

5.3 Generation before 1 January 2007

The pre-scheme capacity for a power station that has generated electricity on a commercial basis before 1 January 2007 is equal to the nameplate capacity of the power station on 31 December 2006.

6 Specifying Scheme Capacity

For section 17(5)(b) and (7) of the Act, the scheme capacity (SC) is the amount of the power station's capacity to generate electricity, in MW, in excess of the power station's pre-scheme capacity calculated using the following formula:

$$SC = NC - PSC$$

where:

NC means the nameplate capacity of the power station.

PSC means the pre-scheme capacity for the power station specified by the Commission.

7 Eligible Renewable Energy Sources**7.1 Criteria for eligible renewable energy sources**

For section 25(2) of the Act, Rules 7.2 to 7.5 limit the meaning of eligible renewable energy sources in section 22 of the Act.

7.2 General requirements

An energy source is not an eligible renewable energy source unless:

- (a) if use of the source requires approval by a Commonwealth, State, Territory or local government authority, the approval has been given and is current;
- (b) use of the source meets the requirements of any relevant Commonwealth, State, Territory or local government planning and approval process;
- (c) the source is used to generate electricity; and
- (d) electricity generated using the source is used to meet demand directly for electrical energy.

7.3 Special requirements for wood waste

An energy source that is wood waste is not an eligible renewable energy source unless:

- (a) the wood waste is:
 - (i) biomass:
 - produced from non-native environmental weed species; and
 - harvested for the control or eradication of the species, from a harvesting operation that is approved under relevant Commonwealth, State or Territory planning and approval processes;
 - (ii) a manufactured wood product or by-product from a manufacturing process;
Examples
Packing cases, pallets, recycled timber.

- (iii) waste products from the construction of buildings or furniture, including timber off-cuts and timber from demolished buildings; or
- (iv) sawmill residue; or
- (b) if wood waste is from a plantation, it is:
 - (i) a by-product or waste product of a harvesting operation (including thinnings and coppicing) approved under relevant Commonwealth, State or Territory planning and approval processes; and
 - (ii) taken from an area that is managed in accordance with all applicable laws, codes and regional forest agreements.

7.4 Special requirements for energy crops

Biomass from a native forest is not an energy crop.

7.5 Special requirements for ocean, wave and tide

Electricity generated from an ocean, wave or tide energy source must be generated within the coastal waters of Victoria or a State or Territory in which an approved interstate renewable energy regime applies.

8 Ineligible energy sources

For section 25(3) of the Act, the following energy sources are not eligible renewable energy sources and the meaning of energy sources specified in section 23 of the Act is extended accordingly:

- (a) coal or natural gas;
- (b) coal seam methane, waste coal mine gas and other products derived from coal or natural gas;
- (c) waste heat from cogeneration if:
 - (i) the waste heat is not used for electricity generation; or
 - (ii) the primary fuel source is not an eligible renewable energy source;
- (d) electricity generation from cogeneration using fossil fuels;
- (e) radioactive material (other than an energy source specified in section 22 of the Act, subject to Rule 7);
- (f) any component of co-firing or wastes that is not bioenergy; and
- (g) any other fossil fuels or waste products derived from fossil fuels.

9 Generation utilising scheme capacity

9.1 Working out electricity generation utilising scheme capacity

For section 26(4) of the Act, the amount of electricity generated by an accredited power station utilising scheme capacity is to be worked out for each year in accordance with Rules 9.2 to 9.4 by:

- (a) determining the total eligible generation by that power station; and
- (b) determining the quantity of that total eligible generation that is attributable to the scheme capacity of that power station.

9.2 General formula for total eligible generation

The total eligible generation by an accredited power station in a year (TEG) is:

$$\text{TEG} = (\text{TG} - \text{EGAS}) - \text{NEG} - \text{AUX} - (\text{DLEG} \times (1 - \text{MLF}))$$

where:

TG is the total electricity, in MWh, generated at the generator terminals in the year.

EGAS is the amount of electricity, in MWh, generated in the year during any period of suspension of the accreditation of the power station under Division 8 of Part 2 of the Act.

NEG is the amount of electricity, in MWh, generated in the year (excluding any period of suspension of the accreditation of the power station) that is attributable to any energy sources used in generating electricity or preparing fuel that are not eligible renewable energy sources.

AUX is the auxiliary loss, in MWh, in the year (excluding any period of suspension of the accreditation of the power station).

DLEG is the amount of electricity, in MWh, sent out from the generator in the year, measured:

- (a) for a power station in the national electricity market, at the point determined under the National Electricity Rules; or
- (b) in any other case, at the point determined by an authority of the State or Territory where the power station is.

MLF is the marginal loss factor to allow for the amount of electricity lost in transmission networks applied:

- (a) for a power station in the national electricity market, by NEMMCO; or
- (b) in any other case, by an authority of the State or Territory where the power station is.

Total eligible generation may be calculated using different inputs to those set out in the above formula, if the Commission is satisfied that they will produce an equivalent outcome. For example, a measurement of the amount of electricity sent out from the power station at a transmission network connection point may produce the same result as TG–AUX.

9.3 Use of energy sources other than eligible renewable energy sources

If the power station uses an energy source that is not an eligible renewable energy source to generate electricity or to prepare an eligible renewable energy source within the power station, then:

- (a) for the purposes of determining NEG under Rule 9.2, the amount of energy that is attributable to that source is to be converted into an equivalent number of MWh of electricity represented by the energy content of that source;
- (b) for the purposes of determining AUX under Rule 9.2, the auxiliary loss from the system that is attributable to that energy source are to be deducted from the total auxiliary loss proportionately to the proportion of electricity generated from that source; and
- (c) the amounts of NEG and AUX are to be determined in accordance with Rule 9.3(a) and (b) and the applicable energy source methodology.

9.4 Total eligible generation attributable to scheme capacity

The amount of electricity generated by an accredited power station in a year utilising scheme capacity is:

- (a) if the pre-scheme capacity for the power station is nil, the amount of TEG determined under Rule 9.2;
- (b) if a pre-scheme capacity has been determined for an accredited power station, that part of TEG which is worked out using the applicable scheme generation methodology,

but not exceeding the maximum amount of electricity that could have been generated from the power station's scheme capacity in that year.

9.5 Hydro-electric Generation

For a hydro-electric power station or system that uses pumped storage, the auxiliary losses of the power station or system include the amount of electricity that is used to pump or to raise water before its release for hydro-electric generation.

9.6 Registration of certificates

To avoid doubt, the Commission must decide that a certificate created in respect of generation from a power station is not eligible for registration under section 41 of the Act unless the Commission is satisfied that the amount of electricity generated by that power station utilising scheme capacity has been determined using:

- (a) metering that complies with the standards determined under Rule 4.2; and
- (b) to the extent applicable, the energy source methodology and the scheme generation methodology for that power station.

9.7 Additional requirements for electricity generation return

For section 29(2)(e) of the Act, an electricity generation return must include the following information for each accredited power station:

- (a) the year to which the return applies;
- (b) for each eligible renewable energy source used by the registered person to generate the electricity:
 - (i) the amount of electricity that was generated in that year using the eligible renewable energy source;
 - (ii) the number of certificates created by the registered person in respect of the electricity generated in that year using the eligible renewable energy source; and
 - (iii) the number (if any) of Commonwealth certificates created by the registered person in respect of the electricity generated in that year using the eligible renewable energy source;
- (c) the telephone number, fax number and e-mail address (if any) of the power station;
- (d) the person's registration number;
- (e) the power station's identification code;
- (f) any changes during the year to information (even if already given to the Commission) about the following matters for the power station:
 - (i) ownership;
 - (ii) company mergers;
 - (iii) location;
 - (iv) contact details;
 - (v) electricity supply arrangements; and
 - (vi) generation capacity;
- (g) details of any breach of the conditions of a permit, or conviction for an offence, under any State, Commonwealth, Territory or local government law related to operation of the power station; and
- (h) if there was no breach or conviction for the year to which the return applies, a declaration to that effect.

Note: For other information that must also be included in the statement, see Act, section 29(2).

9.8 Audit requirements for electricity generation returns

For section 29(3) of the Act, each audit of an electricity generation return must be carried out by an auditor approved by the Commission under, and in accordance with the requirements of, an audit guideline published by the Commission pursuant to this Rule.

10 Small Generation Units**10.1 Meaning of small generation unit**

For the definition of ‘small generation unit’ in section 3(1) of the Act:

- (a) a device whose energy source is hydro is a small generation unit if:
 - (i) it has a kW rating of no more than 6.4 kW; and
 - (ii) it generates no more than 25 MWh of electricity each year; and
- (b) a device whose energy source is wind is a small generation unit if:
 - (i) it has a kW rating of no more than 10 kW; and
 - (ii) it generates no more than 25 MWh of electricity each year; and
- (c) a device whose energy source is solar (photovoltaic) is a small generation unit if:
 - (i) it has a kW rating of no more than 100 kW; and
 - (ii) it generates no more than 250 MWh of electricity each year.

10.2 When a certificate may be created

For section 30 of the Act, certificates may be created for a small generation unit:

- (a) annually; or
- (b) both:
 - (i) on installation – for the first 5 years after installation; and
 - (ii) at the start of each subsequent 5 year period – for the following 5 years if the Commission is satisfied that the unit is still installed and likely to remain functional for the 5 years; or
- (c) if the unit is a solar panel (photovoltaic) system in respect of which no certificates have been created – within 1 year after installation, for a period of 15 years after installation, but no subsequent certificates may be created for the unit even if the unit is installed more than once.

10.3 How many certificates may be created

For section 31 of the Act, the number of certificates (each representing 1MWh) that may be created for small generation units is to be determined under Rule 10.4, 10.5 or 10.6 as applicable, with the number of certificates worked out for an installation under those Rules to be:

- (a) rounded up to 1 if the amount of electricity generated is at least 0.5 MWh but less than 1 MWh; and
- (b) in any other case – rounded down to the nearest whole number.

10.4 Number of certificates for hydro-electric small generation units
