$$\frac{(\text{preliminary premium}) \times 15,500 \times N}{{}_{EMP}R_0 \times 365}$$

**8 Small Employer**

$R^1$  is the sum of:

- (a) the rateable remuneration of the employer and any related employer for the preceding policy period; and  
 (b) the remuneration of a predecessor employer (other than remuneration that is otherwise included in the calculation of  $R^1$  for this policy period for the employer) during the preceding policy period in respect of operations carried out during any period of coverage at any workplace which:

 (3) An employer's total annualised remuneration is:  
 $(R^1 \times 366) \div N^1$

**9 Employer Performance Rating (EPR)****EXPLANATORY NOTE:**

The formulae set out in this clause are used to measure the claims history of employers. This is done by comparing the actual performance of a given employer with the average performance of the industries in which that employer has been operating during the relevant period.

This analysis is done by looking back over the three previous years.

The calculation takes account of the size of an employer so that the claims history (good or bad) of a very large employer will have more of an impact than that of a small employer.

An employer performance rating of 1 would be average. Anything over 1 represents a worse than average performance and anything less than 1 represents a performance that is better than average.

*Labour Hire EPR Adjustment*

- (6) The Authority itself:
  - (a) may calculate the size adjustment factor and the performance index for an employer as though items 2 and 3 of schedule 1, and schedule 4 to this Order applied throughout the preceding triennium, so that the places at which the workers of that employer worked may be treated as workplaces, if that employer has made an application under subclause (7);
  - (b) shall calculate the size adjustment factor and the performance index for an employer as though items 2 and 3 of schedule 1, and schedule 4 to this Order applied throughout the preceding triennium, so that the places at which the workers of that employer worked may be treated as workplaces, if clause 9(6)(a) or 9(6)(b) of the 2007/2008 Premiums Order applied in relation to the calculation of that employer's premium in the preceding policy period.
- (7) An employer may apply to the Authority requesting that the Authority calculate the size adjustment factor and performance index for that employer in accordance with subclause (6) if:

  - (c) the employer is a capped 2007/2008 employer.
- (8) An application under subclause (7) must be made in writing and must:
  - (a) include details of each of the places at which workers employed by the employer worked during any relevant period of coverage; and
  - (b) in respect of each place identified in the application, include details of the remuneration paid or payable by the employer to workers working at each place during any relevant period of coverage.

*WorkCover Insurance Premiums Order (No. 16) 2008/2009*PART 3—*continued*

- R<sub>cov</sub>* is the remuneration for the period of coverage at the workplace;
- relevant workplace** means a workplace which was a workplace of an employer during the preceding policy period and which is a current risk workplace of the employer or any related employer for the purposes of this Order.

- (2) Subject to subclause (3), an employer's weighted industry rate is:  $X^1 \div A$

Where:

*X<sup>1</sup>* is the sum of the amounts produced by applying the following formula to each relevant workplace in respect of the last period of coverage at that workplace:

$$IR \times (R_{cov} \times 366) \div N_{cov}$$

*A* is the sum of the amounts produced by applying the following formula to each relevant workplace in respect of the last period of coverage at that workplace:

$$(R_{cov} \times 366) \div N_{cov}$$

- (3) An employer's weighted industry rate is the employer's comparative rate where:
- the employer is a small employer; and
  - C* for the employer has a value of 0 (zero) or less than 0 (zero); and
  - the employer's comparative rate is less than  $X^1 \div A$ ; and
  - either:
    - clause 10(3) of the 2007/2008 Premiums Order applied in relation to the calculation of the employer's premium in the preceding policy period; or
    - the employer was not a small employer in the preceding policy period and *C'* for the employer has a value of 0 (zero) or less than 0 (zero).

**11 Comparative Rate****EXPLANATORY NOTE:**

This clause prescribes how the comparative rate will be calculated. The comparative rate is used to limit increases in premium rates for employers from year to year, generally where there has not been any change to the classification at the workplace of the employer.

The calculation takes all of the current risk workplaces and imputed workplaces that an employer has on 1 July 2008 and works out a notional premium rate for those workplaces in the previous year (a dollar figure). The rate is calculated by dividing the amount of calculated premium for all relevant periods of coverage at those workplaces over the amount of remuneration for those periods of coverage. The result of that calculation is the comparative rate.

*WorkCover Insurance Premiums Order (No. 16) 2008/2009*PART 3—*continued*

The comparative rate is then used to cap the premium rate charged across all of the current risk workplaces and all imputed workplaces of the employer in the WorkCover premium calculation.

It should be noted that the premium rate charged for new risk coverages is not capped and the comparative rate has no bearing upon the calculation of premiums for new risk workplaces.

*Comparative Rate Calculation*

- (1) The comparative rate for an employer is:

$$CP_{SUM} \div R_{SUM}$$

- (2) In this clause:

**calculated premium**, in relation to a period of comparative coverage, means the amount calculated in accordance with the formula specified in subclause (3);

**CF<sup>i</sup>** is the capping factor (CF) for the person that was the employer in relation to the workplace during that period of coverage, calculated in accordance with clause 6(1) of the 2007/2008 Premiums Order;

**CP<sub>SUM</sub>** is the sum of the calculated premium for all periods of comparative coverage;

**AP<sup>RI</sup>** is the applicable premium rate in relation to the workplace for the person that was the employer in relation to the workplace during that period of coverage, calculated in accordance with clause 6(4)(a) of the 2007/2008 Premiums Order;

- (4) If an employer has two or more workplaces and it is not reasonably possible to determine the proportion of the remuneration that is attributable to each workplace, the Authority may, subject to such terms and conditions as it determines, authorise the employer to pay premium on the basis of estimates of the proportion.
- (5) If the Authority has insufficient information to enable it to determine the remuneration for a period of coverage in accordance with this item, the Authority may use an estimate of rateable remuneration as provided for in sections 18, 20, 23 and 24 of the WorkCover Insurance Act.

  - (b) the employer did not hold a WorkCover insurance policy in the preceding period.
- (5) The Authority itself may revoke or vary a determination made under sub-item (1).

where the **relevant policy period** means the policy period in which the relevant activity commenced in workplace B.

7 **Industry Classification**

- (1) Subject to items 2(3) and 2(4), the industry classification of a workplace is the WorkCover industry classification in schedule 4 to which the predominant activity at that workplace corresponds or most closely corresponds.
- (2) For the purposes of determining the industry classification in accordance with sub-item (1):
  - (a) regard must be had to the introduction to, and all relevant elements of, schedule 4;
  - (b) consideration must be given to the industrial characteristics of the predominant activity without regard to the risk of injury associated with the predominant activity or with any of the occupations of or functions performed by workers engaged in operations at the workplace; and
  - (c) the predominant activity at a workplace does not correspond or most closely correspond to a WorkCover industry classification if workplaces predominantly engaged in that activity are expressly excluded from that classification in any of the elements of schedule 4.

8 **Industry Rate / Industry Claims Cost Rate**

- (1) Subject to sub-item (5), the industry rates and the industry claims cost rates for the current policy period for each industry classification are those rates determined by the Authority itself and notified in the Government Gazette during the current policy period.
- (2) Subject to sub-items (3), (3A), (4) and (5), the industry rate or the industry claims cost rate (as the case may be) for a workplace for a period of coverage is the rate for the current policy period that corresponds to the industry classification of that workplace for that period of coverage.
- (3) Notwithstanding anything in sub-item (2), the industry rate or the industry claims cost rate (as the case may be) for a workplace for a period of coverage is the rate for the current policy period that corresponds to the classification of that workplace on 1 July 2008 (**relevant classification**) where:
  - (a) the workplace was first given the relevant classification on 1 July 2008; and;
  - (b) the Authority is satisfied that the predominant activity carried on at that workplace during the relevant period of coverage was the same as the predominant activity carried on at that workplace on 1 July 2008; and

*WorkCover Insurance Premiums Order (No. 16) 2008/2009***Sch. 1**SCHEDULE 1—*continued*

- (c) application of this sub-item would result in a lower employer performance rating for that employer than the employer performance rating calculated in accordance with sub-item (2).
- (3A) Notwithstanding anything in sub-item (2), the industry rate or the industry claims cost rate (as the case may be) for a workplace for a period of coverage is the rate for the current policy period that corresponds to the classification of that workplace on 1 July 2007 if item 8(3) of schedule 1 of the 2007/2008 Premiums Order applied in relation to the workplace.
- (4) If, in the opinion of the Authority, an employer has failed to provide sufficient information to enable the Authority to determine the industry classification and/or the remuneration for a period of coverage at a workplace, the industry rate shall be deemed to be the default industry rate and the industry claims cost rate shall be deemed to be the default industry claims cost rate.
- (5) If the WorkCover premium is calculated before the earliest date at which both the industry rates and industry claims cost rates for the policy period have been published in the Government Gazette (*the publication date*) and it is not otherwise possible to calculate the premium payable by the employer then any reference to an industry rate or an industry claims cost rate in the current policy period shall, until the publication date, be construed as a reference to the rates published in the Government Gazette under the 2007/2008 Premiums Order.
- (6) For the avoidance of doubt, the premium payable by an employer must be recalculated after the publication date (referred to in sub-item 5) if it was calculated before that date.

**9 Coverage Classification**

- (1) Each period of coverage at a workplace in the current policy period is to be classified in accordance with this item as either:
  - (a) a current risk period of coverage; or

- (2) In this item, the period of coverage to be classified is referred to as the *relevant period*.
- (3)
  - (a) Subject to sub-items (5) and (6), the relevant period for an actual workplace is to be classified as a new risk period of coverage unless sub-item (4) applies.
  - (b) The relevant period for an imputed workplace is to be classified as a new risk period of coverage notwithstanding sub-item (4).
- (4) This sub-item shall apply, and the relevant period is to be classified as a current risk period of coverage, if:
  - (a) the rateable remuneration paid or payable to workers during the last period of coverage at the workplace was greater than 0 (zero); and
  - (b) the industry classification of the workplace is the same as it was during the last period of coverage.
- (5) Notwithstanding sub-item 3(a), the Authority may determine that the relevant period is to be classified as a current risk period of coverage where:

**SCHEDULE 4  
WORKCOVER INDUSTRY CLASSIFICATION**

INTRODUCTION

In accordance with item 7 of schedule 1, the industry to which a workplace is classified for an employer is the WorkCover industry classification in this schedule to which the predominant activity at that workplace corresponds or most closely corresponds.

Industry classifications, which are denoted by two letter, four digit alpha/numeric codes, are organised within broad divisions (each identified by a single letter), subdivisions (each identified by a two digit code) and Groups (each identified by a three digit code).

The preambles to the various divisions summarise and explain the scope of the relevant division and clarify the correct classification for specific predominant activities.

The predominant activity at the workplace is determined in accordance with item 3 of schedule 1 without regard to this schedule. It is then necessary to identify the WorkCover industry classification in this schedule to which that predominant activity corresponds or most closely corresponds.

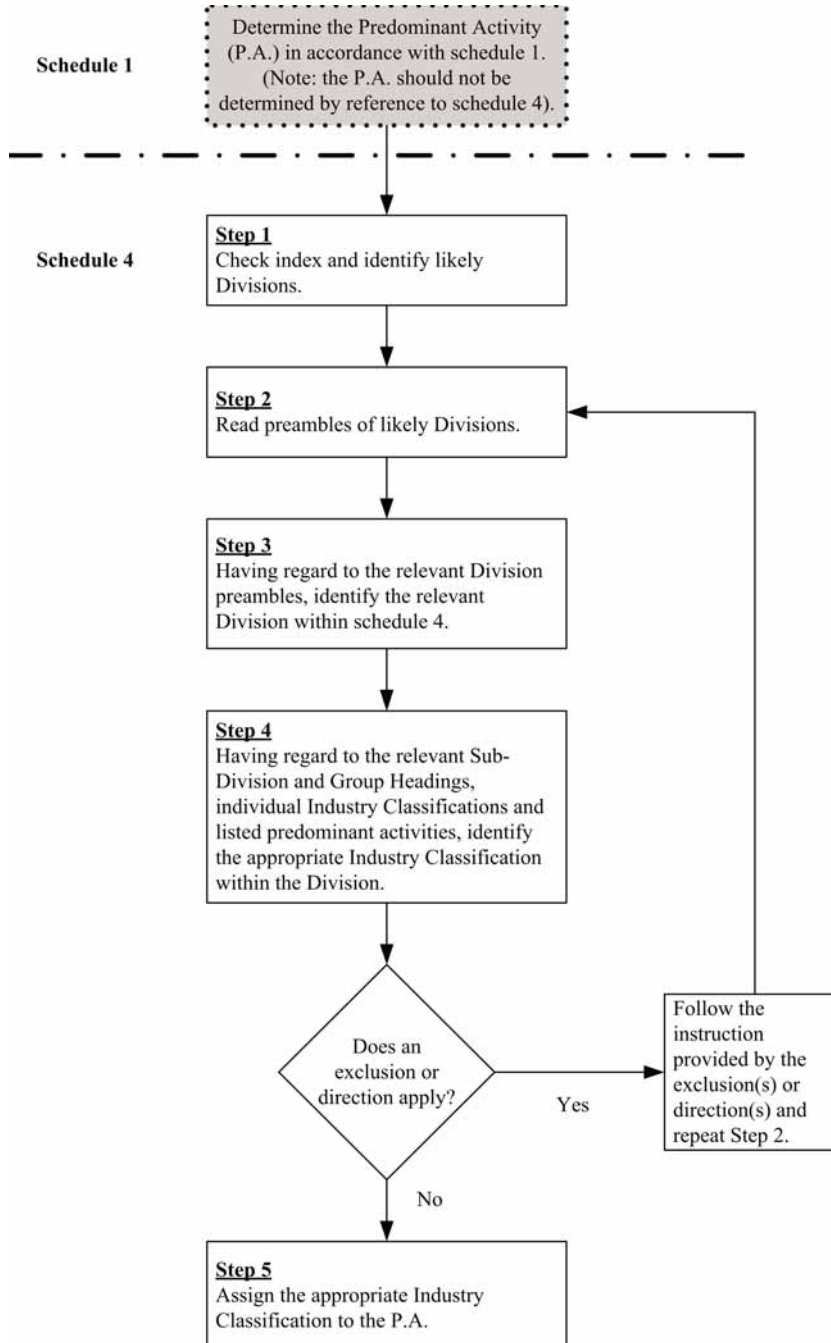

For this purpose, regard must be had to all relevant elements of this schedule, i.e. headings, preambles to divisions, industry descriptions, exclusions/references and the listed activities.

It must be noted that the predominant activity at a workplace does not correspond or most closely correspond to a WorkCover industry classification if workplaces predominantly engaged in that activity are expressly excluded from that classification in any of the elements of this schedule referred to above.

SCHEDULE 4—continued

The process for identifying the appropriate WorkCover industry classification is set out in the flow chart below.

## SCHEDULE 4

### DETAILED CLASSIFICATION

#### **DIVISION A : AGRICULTURE, FORESTRY, FISHING AND HUNTING**

1. This Division includes all workplaces predominantly engaged in “agriculture, forestry, fishing and hunting” or in providing related services, such as sheep shearing, aerial agricultural services, harvesting or forest protection. Agricultural extension or advisory services provided by government departments are, however, included as activities predominant to Public Administration in Subdivision 71.
2. The term “agriculture” is used here in the broad sense to include the breeding, keeping or cultivation of all kinds of animal or vegetable life except forest trees and marine life. Sun-drying of fruit is also included in this Subdivision.
3. Institutional farms such as research farms and prison farms are not included in this Division, but are classified to those classes in Division K, which include the institutions concerned.
4. “Forestry” includes afforestation or the harvesting or gathering of forest products. Logging operations such as felling, hewing or rough shaping of timber in the forest are included in this Division.
5. “Fishing” includes the catching, gathering, breeding or cultivation of marine life from ocean, coastal or inland waters (coastal waters include estuaries and inlets). Included also is the processing of ocean and coastal water fishery products aboard vessels predominantly engaged in both catching and processing those products.
6. “Hunting” includes the catching or taking of all types of animal wildlife on land. The catching or taking of wildlife such as crocodiles in inland waters is also included.

**Sch. 4** *WorkCover Insurance Premiums Order (No. 16) 2008/2009*SCHEDULE 4—*continued***DIVISION B : MINING**

1. This Division includes all workplaces predominantly engaged in ‘mining’, in mineral exploration on own account, in the provision of a wide variety of services to mining and mineral exploration on a contract or fee basis, as well as mining workplaces under development. The term ‘mining’ is used here in the broad sense to include the extraction of minerals occurring naturally as solids such as coal and ores, liquids such as crude petroleum, or gases such as natural gas by such processes as underground or open-cut mining, dredging, quarrying, the operation of wells or evaporation pans, or by recovery from ore dumps or railings.
2. Workplaces predominantly engaged in dressing or beneficiating ores or other minerals by crushing, milling, screening, washing, flotation or other, including chemical beneficiation, processes, or predominantly engaged in briquetting or iron ore pelletising are included in this Division. These activities are generally carried out at or near mine sites as an integral part of mining operations and are therefore regarded as predominant to this Division. Natural gas absorption, purifying and similar treatment plants are also included in this Division.
3. Excluded from this Division are workplaces predominantly engaged in refining or smelting of minerals or ores (other than preliminary smelting of gold), or in the manufacture of such products of mineral origin as coke, cement or fertilisers.
4. Workplaces which are predominantly engaged in undertaking mineral exploration on own account, ie: workplaces classifiable to the classes in Group 161, cannot be classified, as is usual in the case of other workplaces, on the basis of their gross receipts. Instead their classification will be determined, where possible, on the basis of their gross expenditures.

**Sch. 4** *WorkCover Insurance Premiums Order (No. 16) 2008/2009*SCHEDULE 4—*continued***DIVISION C : MANUFACTURING**

1. This Division includes all workplaces predominantly engaged in manufacturing the various categories of products summarised below.
2. The term ‘manufacturing’ is used here in the broad sense to relate to the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand. In addition, repair or re-conditioning of products, unless elsewhere classified, shall be included in this Division and classified to the same classification as the original manufactured product.
3. In the summary which follows below an indication is given (by no means comprehensive) of the treatment of particular repair, installation, blending, assembly, packing, bottling or other activities which are typically carried on outside the scope of this Division in an attempt to more clearly describe the activity contents of this Division.
4. Broadly, then, this Division includes all workplaces predominantly engaged in manufacturing:
  - (a) Food, beverages or tobacco products (Subdivision 21). Excluded are workplaces predominantly engaged in sun-drying fruit, processing fish aboard vessels which also catch fish (these are included in Division A), in washing or packing fresh fruit, pulping or other processing of eggs, bottling wine or spirits, repacking flour, cereal food products, dried fruits or in blending or repacking tea (these are included in Subdivision 47 in Division F). However, milk receiving depots treating milk by grading, testing, filtering or cooling and milk distribution depots predominantly engaged in bulk handling of milk are included in this Subdivision.
  - (b) Textiles, clothing and footwear (Subdivisions 23 and 24) including workplaces predominantly engaged in cotton ginning or other preparation of fibres for further processing. Excluded are workplaces predominantly engaged in making or installing curtains, in mens or womens custom tailoring or dressmaking or in boot and shoe repairing (these are included in Subdivision 48 in Division F) or in installing blinds or laying carpets or other floor coverings (these are included in Division E). Workplaces predominantly engaged in contract packing of textiles, clothing and footwear are included in Division I.
  - (c) Wood products and furniture (Subdivision 25). Excluded are workplaces predominantly engaged in hewing or rough shaping of railway sleepers, posts, etc., in the forest (these are included in Division A) or in fabrication of joinery at construction sites, erecting prefabricated wooden buildings or installing wooden framed windows (these are included in Division E). Workplaces predominantly engaged in contract packing wooden products and furniture are included in Division I.
  - (d) Paper or paper products (Subdivision 26), including workplaces predominantly engaged in publishing or in publishing and printing newspapers, magazines, books, music, maps, etc., or in providing printing trade services, such as electrotyping and bookbinding. Workplaces predominantly engaged in contract packing of paper and paper products are included in Division I.

SCHEDULE 4—*continued*

- (e) Chemical, plastic, coal, petroleum, glass, clay, cement or other non-metallic mineral products (Subdivisions 27 and 28 and Group 347 in Subdivision 34). Excluded are workplaces predominantly engaged in screening, crushing, dressing or other rudimentary treating of minerals, construction materials, etc., in briquetting coal or in purifying natural gas (these are included in Division B), or in blending lubricating oils and greases or in glazing (these are included in Subdivision 47 in Division F). Workplaces predominantly engaged in plastering, in manufacturing and/or laying of hotmix bituminous paving or in the installation of insulation materials or of bituminous roofing materials are included in Division E. Workplaces predominantly engaged in contract packing of chemical, plastic, glass etc., products are included in Division I.
- (f) Metals and metal products including machinery, transport or other equipment, scientific apparatus, and household appliances (Subdivisions 29, 31, 32 and 33), leather or rubber products, ophthalmic articles, jewellery, sporting equipment, etc. (Groups 345, 346 and 348 in Subdivision 34). Excluded are workplaces predominantly engaged in iron ore pelletising or in dressing or other preliminary treating of metallic ores (these are included in Division B), in repairing motor vehicles (except workplaces predominantly engaged in engine reconditioning – these are included in Division C), most types of household appliances, lawn mowers, marine outboard engines, toys, sporting equipment, photographic equipment, watches, clocks and jewellery, etc., tractors, farm and construction machinery or business machines (these are included in Subdivision 48 in Division F), in the erection or on-site assembly (from prefabricated components) of boilers, industrial furnaces, heavy electrical machinery, metal silos and storage tanks or structural steel, or in the installation of radio or T.V. broadcasting equipment, telephone or telegraph equipment, hot water systems, domestic exhaust fans, heating, refrigeration and air conditioning equipment, fire alarm and sprinkler systems, metal awnings, screens or windows, etc. (these are included in Division E). Workplaces predominantly engaged in contract packing of metal products, tools, household appliances, sporting equipment, etc., are included in Division I.
5. In general the manufacture of parts or components is a predominant activity of the same class as the manufacture of the finished product except where the manufacture of parts or components is specifically shown as a predominant activity of another class.
6. In some instances two or more activities are vertically integrated in the one manufacturing workplace in that the products of one activity are used as materials in the other. In these cases workplaces are generally included in the class to which the final activity is predominant. In some cases, however, the classes have been defined so that certain workplaces are included in the class to which the initial activity is predominant.

**Sch. 4***WorkCover Insurance Premiums Order (No. 16) 2008/2009*SCHEDULE 4—*continued***DIVISION F : TRADE**

1. This Division includes all workplaces predominantly engaged in the trading of goods either as a retailer, wholesaler (physically handling the goods and, usually, taking title to the goods) or as an agent or purchasing, marketing or buying office. The term ‘agency’ is used here to include those operations which trade in goods but do not usually take title to the goods traded and do not physically handle the goods. Typically an agency receives commission or fees which are directly related to the value of goods traded. A purchasing, marketing or buying office is a separate workplace, of a multi workplace employer, which is predominantly engaged in buying or marketing goods for use by other workplaces of the employer. Such a workplace which buys or markets for other workplaces of the employer does not physically handle the goods.
2. The term ‘wholesale trade’ is used here in the broad sense to include the sale (as principals) of new or used goods to retailers or other wholesalers. The more important types of businesses engaged in wholesale trade are wholesale merchants who take title to the goods they sell and separately located sales branches or sales offices (not being retail stores), operated by manufacturing enterprises, which do not merely take orders but supply goods to customers from stocks physically held at their own premises. Workplaces engaged in storing and distributing goods to other workplaces of the employer are included in Division G.
3. The term ‘retail trade’ is used here, generally speaking, to include the activity of selling new or used goods to final consumers. The more important types of business engaged in retail trade are department stores or other shops, stalls, mail order houses, hawkers, door to door sellers, milk or bread vendors, vending machine operators or consumer cooperatives. However, cafes, restaurants, licensed hotels, motels, wine saloons and clubs are included in Division L, Recreation, Personal and Other Services.
4. In addition to the foregoing it may be useful to note that while most types of goods can enter wholesale trade, not all goods may be considered to enter the retail sector even though they may be sold to the final consumer. Goods not normally entering retail trade include cereal grains, metal ores, crude petroleum, industrial chemicals, iron and steel and industrial machinery and equipment.
5. Workplaces predominantly engaged in selling their own goods by auction are included in this Division, but workplaces (except stock and station agents) which are predominantly engaged in providing auctioning services for others are included in Division I, Finance, Property and Business Services.
6. Workplaces predominantly engaged in leasing goods (not manufactured by the same workplaces) for periods in excess of one year, without operators, from stocks physically handled by the workplace are included in this Division, as are workplaces predominantly engaged in the hiring out of most types of consumer goods.

SCHEDULE 4—*continued*

7. Certain kinds of activity other than selling are commonly carried out by workplaces classified to this Division and have therefore been designated as predominant to the relevant classes of either Subdivision 47 or 48. The more important of these activities are:
- (i) Glazing (Class F4728R).
  - (ii) Blending industrial or lubricating oils from refinery base stock (Class F4741J).
  - (iii) Washing or packing (incl. contract packing) fresh fruit or vegetables (Class F4764X).
  - (iv) Pulping, dehydrating or preserving eggs (Class F4765A).
  - (v) Bottling or breaking down bulk quantities of wine or spirits (incl. contract packing) (Class F4767F).
  - (vi) Blending or repacking tea (incl. contract packing), repacking (incl. contract packing) flour, cereal food products, dried fruits or a wide range of other groceries (Class F4769K).
  - (vii) Custom tailoring or dressmaking (Class F4840R).
  - (viii) Repairing footwear (Class F4846C).
  - (ix) Making or installing curtains (Class F4847F).

9. Workplaces predominantly engaged in both baking and retailing bread or cakes are included in this Division, but workplaces predominantly engaged in baking bread or cakes are included in Division C, Manufacturing.
10. In the case of workplaces which have goods manufactured for them on commission or contract a variety of situations are encountered with different treatments applicable to each. In general, if a workplace has no goods producing facilities itself (or, if it has, does not use these or does not employ contractors to use them on its behalf), ie: the workplace undertakes no goods producing activities at all, then all its sales of goods produced for it on commission are treated for classification purposes as wholesale or retail sales, as appropriate.

1. This Division includes all workplaces predominantly engaged in providing health, education, library, museum, scientific research, meteorological, welfare, employment, police, prison and fire brigade services. Workplaces of certain non-profit organisations such as religious organisations, business, professional and labour organisations, political parties and associations formed to promote community or sectional aims are also included in this Division.
2. Groups 823 and 824 in this Division include all workplaces which are predominantly engaged in providing education. Workplaces operated by religious organisations, the defence forces, government departments, companies or other organisations, predominantly engaged in providing vocational training for employees or members are included in Group 824.
3. The term ‘own account’ has been used in this Division to qualify certain predominant activity descriptions which have usually been specified in terms of an occupation. This approach has been adopted to distinguish between a service provided by employees of an organisation or institution, (which would be classified according to its predominant activity) and the same service being provided by a self employed practitioner conducting his own business.
