Premium Solar Feed-in Tariff, Terms and Conditions

IMPORTANT NOTE

This publication is pursuant to section 40FF of the **Electricity Industry Act 2000**, which requires AGL Sales Pty Limited (AGL) as a relevant licensee to publish premium solar feed-in tariff, terms and conditions on which AGL will provide qualifying customers with premium solar feed-in credits or payments for qualifying solar energy generation electricity from a qualifying solar energy generating facility (solar generation export) during the premium solar feed-in tariff period.

These terms and conditions will become effective in accordance with section 40H of the **Electricity Industry Act 2000**.

Your distributor may need to change the type of meter at your supply address to connect your qualifying solar electricity generation facility to the distribution system. In some cases your previous retail tariff may not be available as a result of this change. This may mean we are not able to offer you an electricity sale contract with a retail tariff that includes a dedicated circuit controlled load component in conjunction with this offer.

We recommend that you seek the advice of an expert tradesman and your Distributor to ensure that the connection of your Solar Facility to the relevant Distribution System is safe, reliable and complies with all Regulatory Requirements and your connection agreement with your Distributor.

5 PREMIUM SOLAR FEED-IN TARIFF AND VARIATIONS

5.1 Credits calculated from Tariff set out in Premium Solar Feed-in Offer

5.1.1 The initial AGL Premium Solar Feed-in Tariff is set out in the Premium Solar Feed-in Offer.

5.1.2 We will credit you for Solar Generation Export during each Billing Period in accordance with the following formula:

$$\text{Premium Solar Feed-in Credit} = E \times T$$

Where:

Premium Solar Feed-in Credit =

the amount which will credit to your bill for the relevant Billing Period under your Electricity Sale Contract on account of Solar Generation Export during that Billing Period,

E = the volume of Solar Generation Export (in kWh) during that Billing Period, and

T = the AGL Premium Solar Feed-in Tariff current at that time (in cents per kWh).

5.2 Pass through of Distribution and Metering Costs

5.2.1 Any Distribution and Metering charges in relation to your Solar Facility or Solar Generation Export, to the extent that they are not recovered under your Electricity Sale Contract, will be charged at the relevant applicable price under your Electricity Sale Contract. These costs can include, but are not limited to, any costs imposed in relation to the disconnection or reconnection of your Solar Facility and costs for the provision, maintenance or reading (including any special Meter reading) of electricity Meters at the Supply Address where your Solar Facility is located.

5.3 Administration Costs

We can charge you administration costs incurred by us in offering or servicing this Premium Solar Feed-in Plan, which are the cost of:

- (a) labour or additional systems capability associated with administering the Premium solar Feed-in Plan;
- (b) administering the pass through of costs imposed by your Distributor and any Metering service provider; or
- (c) making a payment to you in accordance with clause 6.

5.4 Tax Changes and Changes in Regulatory Requirements

If an Increased Tax Cost Event or a change in Regulatory Requirements occurs and as a result we determine that there has been an increase in the costs to us to perform our obligations under this Premium Solar Feed-in Plan, you must pay any additional amounts we notify to you as being necessary to compensate us for that increase.

5.5 Variations

5.5.1 We may vary the AGL Premium Solar Feed-in Tariff and any other charges under this Premium Solar Feed-in Plan that are not referenced to your Electricity Sale Contract by providing you with prior written notice of that variation. However, the AGL Premium Solar Feed-in Tariff as varied by us will not be less than the minimum premium solar feed-in tariff required to be offered by us under the Regulatory Requirements.

5.5.2 We may vary the charges referenced to your Electricity Sale Contract by following the procedure set out for doing so in your Electricity Sale Contract.

5.6 Timing of Variations

5.6.1 A variation to your AGL Premium Solar Feed-in Tariff or any other charges under this Premium Solar Feed-in Plan that are not referenced to your Electricity Sale Contract will take effect on the date specified in our notice given under clause 5.5.1.

5.6.2 Any notice of variation will form part of this Premium Solar Feed-in Plan from the effective date of the variation.

5.6.3 If the date on which an AGL Premium Solar Feed-in Tariff variation is to take effect occurs during a Billing Period, the AGL Premium Solar Feed-in Credit for that Billing Period will be calculated using both the previous and new (as varied) AGL Premium Solar Feed-in Tariffs on a pro-rata basis in accordance with Regulatory Requirements.

6 PREMIUM SOLAR FEED-IN CREDITS AND PAYMENTS**6.1 Format and Timing of Premium Solar Feed-in Credits**

The account summary set out in each bill issued by us under your Electricity Sale Contract for the Supply Address for each Billing Period will include the following:

- (a) your Premium Solar Feed-in Credit for the Billing Period;
- (b) your current charges for the Billing Period, being the charges payable under the Electricity Sale Contract and this Premium Solar Feed-in Plan for the Billing Period; and
- (c) your account credit or debt balance, which is the amount that your account is in credit or debt at the end of the Billing Period, calculated as the sum of the balance carried forward from the previous Billing Period and the current charges for the Billing Period less the Premium Solar Feed-in Credit for the Billing Period.

6.2 Calculation of Bills

6.2.1 Unless you provide your explicit informed consent for bills to be calculated in some other way, the amount of Solar Generation Export will be derived from consecutive Meter Readings. Where Meter Readings are unavailable, it will be derived from estimates determined in accordance with Regulatory Requirements. We will use our Best Endeavours to ensure that your Meter is read at least once in any 12 month period.

6.2.2 In the event we obtain a Meter Reading after we have used an estimate to identify the amount of Solar Generation Export, we will make any appropriate adjustment in your next bill.

6.2.3 If the account summary set out in a bill issued by us under your Electricity Sale Contract has an account credit balance, subject to clauses 6.3 and 6.4, the account credit balance will be applied towards the next bill issued by us under the Electricity Sale Contract for the next Billing Period.

6.2.4 If the account summary set out in a bill issued by us under your Electricity Sale Contract has a debt owing on the account, the debt owing is payable by you in accordance with the Electricity Sale Contract.

6.2.5 This clause 6 will operate subject to clause 11.3.6.

6.3 Annual Credit Balance Payment

6.3.1 If an account credit balance of \$50.00 or greater appears on the first bill issued by us under your Electricity Sale Contract after an anniversary of the Scheme Start Date, provided that you request that we do so within 10 Business Days after the date we issue the relevant bill, we will pay you that amount (an 'Annual Credit Balance Payment'). We may charge a Credit Balance Payment Fee to recover our reasonable administration costs of doing so.

6.3.2 An Annual Credit Balance Payment made by cheque will be sent to the address to which bills are sent under your Electricity Sale Contract within 10 Business Days of your request.

6.3.3 An Annual Credit Balance Payment made by electronic funds transfer into an account that you nominate will be processed by us within one Business Day of your request.

6.3.4 Following an Annual Credit Balance Payment by us, an opening balance of zero will apply to the next bill issued by us under the Electricity Sale Contract. This does not affect the accumulation of your Premium Solar Feed-in Credit for any Billing Period.

6.4 Final Credit Balance Payment

Following termination of this Premium Solar Feed-in Plan, we will pay you the amount of any account credit balance appearing on the last bill issued by us under your Electricity Sale Contract by cheque to an Australian postal address nominated by you within 10 Business Days. We may charge a Credit Balance Payment Fee to recover our reasonable administration costs of doing so.

6.5 Review of Bills

6.5.1 We will review a bill in relation to a Premium Solar Feed-in Credit at your request. Our review will be in accordance with our Complaints and Dispute Resolution Procedure outlined in clause 10.

6.5.2 If our review shows the Premium Solar Feed-in Credit and bill to be correct, you must pay the total amount due of any outstanding bill in full or request a Meter test under clause 6.6. If our review shows the bill to be incorrect, clause 6.7 will apply.

6.6 Meter Testing

6.6.1 If you require your Meter to be tested after the completion of the review process under clause 6.5, we will refer you to the Distributor or Meter testing authority who will test the Meter at a charge for their services. You must pay us any relevant fee in advance. We will give you a copy of the results of the test if the testing authority does not do so.

6.6.2 If the Meter is accurate you must pay the total amount due as indicated on the bill.

6.6.3 If the Meter is defective and favours you by more than the amount allowable in the Metering Standards, you must pay us the difference between the value of the metered Solar Generation Export for which you received a Premium Solar Feed-in Credit and the value of the calculated actual Solar Generation Export for which you should have received a Premium Solar Feed-in Credit (an 'over-credit'), and we will reimburse any fee you are charged pursuant to clause 6.6.1. The over-credit, and any fee refund payable by us to you, will be applied as an adjustment to your next bill in accordance with clauses 6.7.2 and 6.7.3.

- 6.6.4 If the Meter is defective and favours us by more than the amount allowable in the Metering Standards, we will credit you the difference between the value of the metered Solar Electricity for which you received a Premium Solar Feed-in Credit and the value of the calculated actual Solar Electricity for which you should have received a Premium Solar Feed-in Credit (an 'under-credit'), and we will reimburse any fee you are charged pursuant to clause 6.6.1. The under-credit, and any fee refund payable by us to you, will be applied as an adjustment to your next bill in accordance with clauses 6.7.5 and 6.7.6.
- 6.6.5 We reserve the right to carry out such tests on your Solar Facility which we deem to be reasonably necessary, including tests on your Solar Facility's anti-islanding features and tests on power output quality of its inverter.

6.7 Errors in a Premium Solar Feed-in Credit

- 6.7.1 If there are errors in your Premium Solar Feed-in Credits, or if we are informed of errors in the amount of Solar Generation Export, we will adjust the amount of your next bill.
- 6.7.2 If a bill shows a Premium Solar Feed-in Credit in excess of that to which you are entitled (an 'over-credit'), the following procedure will apply:
- (a) where the over-credit results from a failure of our billing systems, we will only seek to adjust your bill by the amount over-credited in the nine months prior to your last bill (or, if we have not sent you a bill, prior to the date on which we notify you of the over-crediting); or
 - (b) subject to clause 6.7.4, in any other case we will only seek to adjust your bill by the amount over-credited in the twelve months prior to your last bill (or, if we have not sent you a bill, prior to the date on which we notify you of the over-crediting),
- and we will list the amount as a separate item in the bill for your next Billing Period, together with an explanation of the amount.
- 6.7.3 You will not be charged interest on any over-credited amount. If the adjustment for over-crediting results in you owing us money under your Electricity Sale Contract with us, you have the option of paying that amount in agreed instalments over a period at least equal to the period over which the over-crediting occurred.
- 6.7.4 If we have over-credited you as a result of fraud, or use of electricity otherwise than in accordance with this Premium Solar Feed-in Plan or your Electricity Sale Contract, we may:
- (a) estimate the amount of Solar Generation Export; and
 - (b) bill you or take debt recovery action for the amount you have been over-credited.
- 6.7.5 If a bill shows a Premium Solar Feed-in Credit less than that to which you are entitled (an 'under-credit'), we will:
- (a) inform you of the under-credit within 10 Business Days of our becoming aware of the error; and
 - (b) credit the additional amount on your next bill.
- 6.7.6 We are not obliged to pay you interest for any under-crediting.

6.8 Access to Meter

Premium Solar Feed-in Tariff, Terms and Conditions

IMPORTANT NOTE

This publication is pursuant to section 40FF of the **Electricity Industry Act 2000**, which requires Powerdirect Pty Ltd (Powerdirect) as a relevant licensee to publish premium solar feed-in tariff, terms and conditions on which Powerdirect will provide qualifying customers with premium solar feed-in credits or payments for qualifying solar energy generation electricity from a qualifying solar energy generating facility (solar generation export) during the premium solar feed-in tariff period.

These terms and conditions will become effective in accordance with section 40H of the **Electricity Industry Act 2000**.

Your distributor may need to change the type of meter at your supply address to connect your qualifying solar electricity generation facility to the distribution system. In some cases your previous retail tariff may not be available as a result of this change. This may mean we are not able to offer you an electricity sale contract with a retail tariff that includes a dedicated circuit controlled load component in conjunction with this offer.

We recommend that you seek the advice of an expert tradesman and your Distributor to ensure that the connection of your Solar Facility to the relevant Distribution System is safe, reliable and complies with all Regulatory Requirements and your connection agreement with your Distributor.

- 6.6.4 If the Meter is defective and favours us by more than the amount allowable in the Metering Standards, we will credit you the difference between the value of the metered Solar Electricity for which you received a Premium Solar Feed-in Credit and the value of the calculated actual Solar Electricity for which you should have received a Premium Solar Feed-in Credit (an 'under-credit'), and we will reimburse any fee

and we will list the amount as a separate item in the bill for your next Billing Period, together with an explanation of the amount.

- 6.7.3 You will not be charged interest on any over-credited amount. If the adjustment for over-crediting results in you owing us money under your Electricity Sale Contract with us, you have the option of paying that amount in agreed instalments over a period at least equal to the period over which the over-crediting occurred.
