## Sustainable Forests (Timber) Act 2004

### ALLOCATION TO VICFORESTS (FURTHER AMENDMENT) ORDER 2010

I, Gavin Jennings MLC, Minister for Environment and Climate Change, make the following order to amend the Allocation to VicForests Order 2004 (as already amended).

**1. Title**

This Order may be cited as the Allocation to VicForests (Further Amendment) Order 2010.

**2. Objectives**

The objective of the Allocation to VicForests (Further Amendment) Order 2010 is to amend the Allocation to VicForests Order 2004 (the 2004 Order) as already amended, following a review of the allocation of timber resources conducted in accordance with section 18(2)(c) of the **Sustainable Forests (Timber) Act 2004**.

**3. Authorising provision**

This amendment is made under section 17(1)(c) of the **Sustainable Forests (Timber) Act 2004**.

In accordance with section 20(3) of the **Sustainable Forests (Timber) Act 2004**, VicForests has agreed to this amendment being implemented immediately upon publication of the Allocation to VicForests (Further Amendment) Order 2010 in the Victoria Government Gazette.

**4. Amendments**

At the end of paragraph 5 of the 2004 Order (as already amended) insert the following:

‘As a transitional arrangement pending agreement and approval of a Working Forest Plan, VicForests is permitted to tend forest stands, including the undertaking of thinning operations in accordance with its Thinning Strategy (version 1.4, 7 December 2009), to produce high value timber resources for the future from the total available area in line with Victoria’s sustainable forest management framework. The tending of forest stands will not be attributed to the available area for timber harvesting. The location, approximate timing of forest stand tending operations and the location of associated access roads must be identified in an approved Timber Release Plan.’

For paragraph 6 of the 2004 Order (as already amended) substitute the following:

‘In accordance with section 15(1)(c) of the **Sustainable Forests (Timber) Act 2004**, in undertaking authorised activities VicForests is required to comply with the following conditions:

- VicForests must divide the total available area of the forests stands to which it has access into contiguous harvesting units (coupes) and assign each harvesting unit a coupe number by 30 June 2012. A map(s) of these harvesting units must be made publicly available.
- In each 5-year period, the total area (the gross area) of timber harvesting coupes and the estimated net area of roadline coupes on an approved Timber Release Plan must not exceed the available area for timber harvesting for that period.
- In each 5-year period, timber harvesting in any part of a timber harvesting coupe on an approved Timber Release Plan will result in the total area (the gross area) of that coupe being attributed to the available area for timber harvesting for that period. Where timber harvesting occurs in a coupe over more than one period, the total area (the gross area) of the coupe will be attributed to the available area for timber harvesting in the first period that timber harvesting occurs only.

**SPECIAL**

- As an exception to the condition stated in the dot point above, in period 2, as a transitional arrangement pending agreement and approval of a Working Forest Plan, the actual area (the net area) harvested in a fire salvage coupe will be attributed to the available area for timber harvesting for that period.
- In each 5-year period, the actual area (the net area) of roadline operations in a roadline coupe will be attributed to the available area for timber harvesting for that period.
- VicForests must advise the Secretary to the Department of Sustainability and Environment of the long term sustainable harvest level that it has calculated from the forest stands to which it has access, and provide to the Secretary to the Department of Sustainability and Environment quality assured data, models and assumptions that it has used in making the calculation for the purposes of audit for compliance with the framework for sustainable forest management in Victoria.
- VicForests must provide quality-assured data on harvesting extent (logging history) to the Secretary to the Department of Sustainability and Environment by 30 September each year.
- VicForests must provide quality-assured stocking (regeneration) survey results and data to the Secretary to the Department of Sustainability and Environment within 36 months of the completion of timber harvesting in a coupe on an approved Timber Release Plan.
- VicForests timber harvesting operations and associated activities will be subject to independent audit of compliance with an approved Timber Release Plan and this Order. VicForests must make available information requested from it by an auditor appointed by the Secretary to the Department of Sustainability and Environment.
- VicForests and the Secretary to the Department of Sustainability and Environment must prepare a Working Forest Plan for approval by the Minister for the Environment and Climate Change and the Minister for Agriculture by 31 December 2011.’

For Tables 1, 2 and 3 of the 2004 Order (as already amended) substitute the following tables:

**Table 1: Gross area available for timber harvesting in Period 2 of this Order (1 August 2009 to 31 July 2014).**

Forest stands	Total available area (ha)	Area available for timber harvesting (ha)
Ash	239,300	17,400
Mixed species	1,617,000	71,800

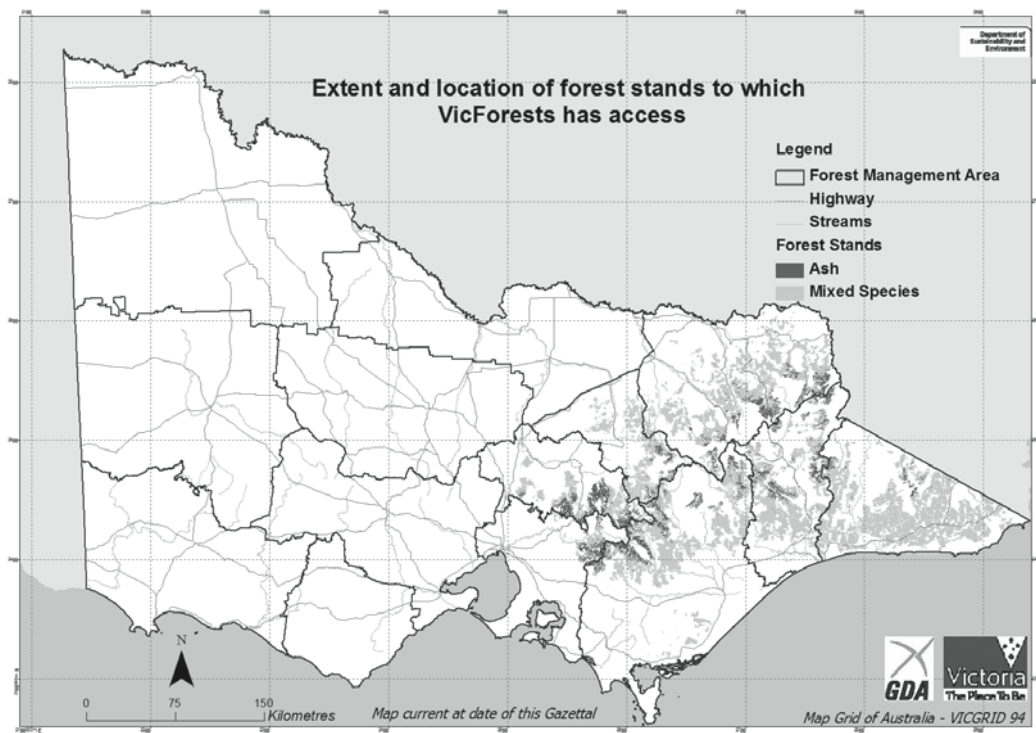

**Table 2: Gross area available for timber harvesting in Period 3 of this Order (1 August 2014 to 31 July 2019).**

Forest stands	Total available area (ha)	Area available for timber harvesting (ha)
Ash	239,300	13,400
Mixed species	1,617,000	71,800

**Table 3: Gross area available for timber harvesting in Period 4 of this Order (1 August 2019 to 31 July 2024).**

Forest stands	Total available area (ha)	Area available for timber harvesting (ha)
Ash	239,300	12,400
Mixed species	1,617,000	71,800

For Attachment 1 of the 2004 Order (as already amended) substitute the following attachment:  
**‘ATTACHMENT 1**

- Notes:
1. This map depicts the extent and location of the types of forest stands referred to in Tables 1 to 3.
  2. A current version of the map will be maintained on the Department of Sustainability and Environment web site ([www.dse.vic.gov.au](http://www.dse.vic.gov.au), Interactive Maps, Forests Explorer Online).’

Dated 8 September 2010

GAVIN JENNINGS MLC  
 Minister for Environment and Climate Change
