For convenience, geographical coordinates shown on this map are expressed in terms of the Geocentric Datum of Australia 1994 (GDA94). Permit areas are defined by the 5 minute graticular block system set out under Section 33 of the Offshore Petroleum and Greenhouse Gas Storage Act 2006; under Sections 37 and 38 of the Act, the position of those blocks is determined by reference to the Australian Geodetic Datum (AGD86).

APPLICATIONS

Applications for exploration permits in relation to the above areas must be made in an approved manner and be accompanied by details of:

- (a) the applicant's proposals for work and expenditure in relation to the block or blocks specified in the application:

Applicants should propose an exploration strategy that has the potential to significantly advance the assessment and understanding of the petroleum potential of the permit area.

The exploration strategy should be supported by a technical assessment of the release area and the detailed descriptions of the work activities proposed for each year in the six (6) year permit term. It is expected that both the primary and secondary work programs will contain substantial new operational activities commensurate with the assessed petroleum prospectivity and understanding of the area. Expenditure should be categorised against each element of the work program and stated in Australian dollars.

In developing work programs applicants must take account of any Notices or Special Notices in relation to the area as listed in the annual Commonwealth Offshore Petroleum Exploration Acreage Release information package, which is available at www.petroleum-acreage.gov.au, along with ability to comply with the requirements of the Act, its Regulations and any Directions issued under the Act, and with any special conditions associated with each area. As well as the relevant provisions of the **Environmental Protection and Biodiversity Conservation Act 1999**, its Regulations and associated directions and documents when proposing petroleum operations.

- (b) the technical qualifications of the applicant and of the applicant's employees and / or the technical advice available to the applicant:

Details of the technical qualifications of the applicant and its key employees and/or details of the technical advice available to the applicant (by way of consultants or other providers) that will enable it to meet its work program commitments.

- (c) the financial resources available to the applicant:

The financial resources available to the applicant, including evidence of the applicant's ability to fund the proposed work program, a statement of other exploration commitments over the next six years, and a copy of the latest annual and quarterly reports for each applicant company.

For further details of the expectations of the Commonwealth – Victoria Offshore Petroleum Joint Authority in relation to the content of applications, applicants should give due consideration to the content of the publicly available guidelines: Requirements of Bid and Renewal Applications Guideline, the Assessment of Bid and Renewal Applications Guideline and the Application Checklist available at www.petroleum-acreage.gov.au and included as part of the annual Commonwealth of Australia Offshore Petroleum Exploration Acreage Release information package.

Fee

Applications must be accompanied by a fee payable to the 'Commonwealth of Australia' through an Australian bank or bank cheque. The amount of the fee is prescribed in Regulations under the Act, and at the time of printing was \$A 4,590, which is GST free.

Submission of applications

Four (4) bound paper copies and two (2) searchable electronic copies (on CD or USB) of the application, along with the fee defined above, must be submitted to the Victorian Designated Authority in the following manner:

- the application should then be sealed and clearly marked as 'Application for Area [Insert Area Number] Commercial-in-Confidence' and

All applicants will be notified in writing of the Minister's decision.

SPECIAL NOTES

The chief factors that will be considered in assessing applications

Applications, including competing applications for the same area, will be assessed on the following factors:

- the respective merits of the work program; and
- the likelihood that the proposed work program will be carried out.

Native title

Applicants should consider the consequences the **Native Title Act 1993** (NTA) may have on their exploration rights and any future production rights. Information on Native Title can be found at <http://new.dpi.vic.gov.au/earth-resources/about-erd/legislation/native-title>.

Applicants should note that the application area VIC/O-11(1):

1. contains Crown land; and
2. contains areas that are subject to Native Title Claims by the Gunditjmara people (claim numbers VC99/7 and VC06/1).

Therefore the future act provisions under Part 2, Division 3 of the **Native Title Act 1993** (NTA) must be addressed before a petroleum exploration permit is granted over this area.

When offering the permit to the successful applicant, the Minister will require the applicant to choose one of the following options to address the future act provisions of the NTA:

1. excise all Crown land except those areas where native title has been extinguished (such as Roads and Road Reserves); or
2. retain all Crown land and complete the future act provisions of the NTA within two years; or
3. withdraw the application.

If the successful applicant chooses option 2 the Department will carry out a 'future act assessment' in accordance with the NTA to determine what native title requirements need to be addressed prior to the grant of the permit and the successful applicant will be advised of the outcome of the future act assessment.

Key Objects

If a petroleum exploration permit is granted, applicants should be aware that:

Any exploration wells to be drilled and geophysical survey activities (i.e. 2D or 3D seismic or gravity) may be considered by the Minister to be key objects. Accordingly, if a petroleum exploration permit is granted, the exploration wells and geophysical survey activities (i.e. 2D or 3D seismic or gravity) may be declared to be the key objects of the work program. The key objects can only be varied in extraordinary circumstances and only if the proposed variation is considered to be equal or superior work.

Relevant Legislation

Before conducting any exploration activities they must make themselves familiar with (and refer to) the following legislation:

- **Aboriginal Heritage Act 2006 (Vic)**
- **Conservation, Forests and Lands Act 1987 (Vic)**
- **Catchment and Land Protection Act 1994 (Vic)**
- **Country Fire Authority Act 1958 (Vic)**
- **Dangerous Goods Act 1985 (Vic)**
- **Environment Effects Act 1978 (Vic)**
- **Environment Protection Act 1970 (Vic)**
- **Flora and Fauna Guarantee Act 1988 (Vic)**
- **Heritage Act 1995 (Vic)**
- **National Parks Act 1975 (Vic)**
- **Occupational Health and Safety Act 2004 (Vic)**
- **Petroleum Act 1998 (Vic)**
- **Planning and Environment Act 1987 (Vic)**
- **Water Act 1989 (Vic)**
- **Wildlife Act 1975 (Vic)**
- **Aboriginal and Torres Strait Islander Heritage Protection Act 1984 (Cth)**
- **Environment Protection and Biodiversity Conservation Act 1999 (Cth)**

Environmental considerations: The Department of Sustainability and Environment has indicated that significant flora and fauna may be present within the release area and request early advice prior to any activities in order to assist in the protection of cultural, environmental and biodiversity values. Explorers need to be aware of their obligations under Victoria's Native Vegetation Management – a Framework for Action with regard to any activities likely to impact on native vegetation.

Heritage: Successful applicant(s) should check the Heritage Register and Heritage Inventory for a list of significant remains or features prior to conducting exploration activities, as a permit and/or consent is required for activities that may affect places or items listed. Any new sites or wrecks encountered during exploration must be reported to Heritage Victoria.

The successful applicant(s) should also consult the Victorian Aboriginal Heritage Register to determine the location of known Aboriginal heritage places. A Cultural Heritage Management Plan may be required prior to obtaining acceptance of an Operations Plan.

AVAILABILITY OF DATA

A range of pre-competitive geoscience data pertaining to the advertised areas is available from GeoScience Victoria (Department of Primary Industries), from either the online store <http://www.dpi.vic.gov.au/minpet/store> or by contacting Terry Smith (Tel: +61 3 9658 4544; email terry.smith@dpi.vic.gov.au).
