**&Units:** 'c/kWh' = cents per kilowatt hour and is the unit of measurement for your electricity bill.  
'c/day' = cents per day.

**#Daily Supply Charge:** a charge that applies for supplying electricity to your premises for each day of the billing period, regardless of how much electricity you use.

**^Residential GD (or Single Rate meter)** is the basic network tariff for general domestic consumption such as lights and power outlets. Most domestic customers are supplied under this network tariff. This tariff has a fixed daily charge and an energy consumption charge that applies 24 hours per day, 7 days per week. There is no Off Peak charge associated with this tariff.

^^**Residential GD and Controlled Load (hot water and heating)** is the basic network tariff for general domestic consumption such as lights and power outlets, and electric hot water and/or storage space heaters (only on for a controlled period – generally between 11 pm and 7 am AEST) using a time-switch. Only available to residential installations currently taking supply under these rates.

^^^**Residential GH/GL Peak and Off Peak** is the basic network tariff for general domestic consumption where consumption charges vary based on Peak and Off Peak times. Peak rates generally apply between 7 am and 11 pm Monday to Friday AEST, and Off Peak rates generally apply 11 pm and 7 am Monday to Friday AEST, and all weekend.

^^^^**Residential Time of Day** applicable to customers who have a Time of Day meter configuration. Peak Consumption – 3 pm to 9 pm AEST business days; Shoulder Consumption – 7 am to 3 pm AEST business days; Off Peak Consumption – 9 pm to 7 am AEST business days and all weekend.

\***Standard Feed In Tariff (SFIT)** is available to customers who have installed a Small Renewable Energy Generation Facility (SREGF) at their Supply Address under a 1 for 1 contract.

\*\***Climate Saver** is a meter configuration option available only in the Powercor distribution zone, where a dedicated meter is installed for reverse cycle air conditioning units. This meter configuration is approved by Powercor.

\*\*\***Feed In Tariffs (PFIT and TFIT)** are available to customers who have installed a Qualifying Solar Energy Generation Facility (QSEGF) at their Supply Address. The Victorian Feed in Tariff (FIT) is open to renewable generation facilities under 100kW in capacity. PFIT and TFIT are closed to new entrants.

\*\*\*\***General Feed In Tariff (GFIT)** is available to customers who have installed a Small Renewable Energy Generation Facility (SREGF) at their Supply Address, and do not qualify for other FIT schemes.
