EXEMPTION

Application No. H171/2014

The Victorian Civil and Administrative Tribunal has considered an application pursuant to section 89 of the **Equal Opportunity Act 2010** (the Act) by Bogong Outdoor Education Centre – Bogong Campus (the applicant). The application for exemption is to enable the applicant to advertise for and employ only a woman in the role of outdoor education teacher at the applicant's residential school (the exempt conduct).

Upon reading the material filed in support of this application, including the affidavit of Roger Keith Blackwell, the Tribunal is satisfied that it is appropriate to grant an exemption from sections 16, 18, 107 and 182 of the Act to enable the applicant to engage in the exempt conduct.

In granting this exemption the Tribunal noted:

- The applicant school is a prep to year 12 state government school comprising two campuses: the 15 Mile Creek Campus near Benalla and the Bogong Campus situated at the base of the Victorian Alps in Bogong Village. It is a residential school which operates all year during Victorian school terms. The Bogong Campus has staff overnight out in the field for over 100 camping nights and at least 50 of those nights require a female staff member to be present.

- Outdoor education teachers, male and female, are required to undertake a range of work including: directing the teaching of individuals and groups of students during the day, overnight and on weekends; contributing to the maintenance, development and implementation of the curriculum; maintaining a caring and supportive environment for students; and undertaking non-teaching supervisory roles.
- The need for female teachers arises in part from a Department of Education and Early Childhood Development policy which requires that, on overnight stays for mixed genders, at least one person of each sex is to be present. The applicant's current teaching workforce for the Bogong Campus of 12 full-time equivalent staff includes only two females and so the applicant cannot currently meet that policy requirement. The applicant also notes that students learn through role models and believes that it is important to model female teachers in the field of outdoor education and promote opportunities that are available.
- While section 28 of the Act creates an exception which allows for the employment of persons with a certain attribute (such as being women only) where a service for special needs is offered, I am not satisfied that the applicant school falls within the definition of a special needs service. While sections 25 and 26 also create exceptions which may apply in respect of aspects of the outdoor education teacher role, I am not satisfied that there is sufficient evidence before the Tribunal to conclude one or other clearly applies. As no exception or current exemption already applies to the exempt conduct, in the absence of an exemption the exempt conduct would amount to prohibited discrimination.
- An exemption in equivalent terms has been granted to the applicant to be relied upon for the 15 Mile Creek Campus (H172/2014).
- When making decisions about exemptions, the Tribunal is required to give proper consideration to relevant human rights as set out in the **Charter of Human Rights and Responsibilities Act 2006** (Charter). Arguably, this exemption limits the right to equality and in particular the right to equal and effective protection against discrimination of men who would wish to be employed in the outdoor education teacher role. I am satisfied that, in the circumstances discussed above, the limit imposed by this

exemption is reasonable and justified under the Charter.

The Tribunal hereby grants an exemption from the operation of sections 16, 18, 107 and 182 of the Act to enable the applicant to engage in the exempt conduct.

This exemption is to remain in force from the day on which notice of the exemption is published in the Government Gazette until 17 September 2019.

Any agreement must not materially impact water available for entitlements in Table 1 of Schedule 2.</p>
Mt William Creek	Lake Lonsdale	<p>December to May – nil June to November – 60 ML/d</p> <p>Alternatively, in consultation with the storage manager, the Water Holder may store in Lake Lonsdale all or part of the water required to meet the passing flows to provide:</p> <ol style="list-style-type: none"> improved environmental outcomes; water quality benefits for other entitlement holders; or provide other community benefits. <p>The water may be stored in Lake Lonsdale under this provision if there is storage capacity in Lake Lonsdale not required by the storage manager to meet the storage manager's other obligations.</p> <p>Any water stored in Lake Lonsdale under this provision is:</p> <ul style="list-style-type: none"> the first to spill if Lake Lonsdale spills; subject to losses to be determined by the Storage Manager in consultation with the Water Holder and having regard for the primary purpose of storing the passing flow. <p>The Storage Manager may, in agreement with the Water Holder, temporarily alter the release of passing flow from Lake Lonsdale in order to protect water quality in the Wimmera–Mallee headworks system to ensure it is fit for purpose for urban, domestic and stock, industrial, irrigation and environmental use. The water not released is to be retained in storage for later use by the environment.</p>

Notes to Table 1:

- All passing flows are the lesser of the flow specified in Column 3 and the natural flow.
- The natural flow is the flow that would have occurred at the location specified in Column 2 if there were no man-made works upstream of that location, and is estimated by the storage manager.

3. The passing flows are subject to the following operational tolerances:
 - (a) the average flow on any day is to be not less than the passing flow by 10%; and
 - (b) the total flow over any 7 day continuous period is to be not less than the sum of the passing flow for each day over the same period.
4. The passing flows are to be reduced by the factor specified in Table 2 if the volume of water available determined by the storage manager in Schedule 2 of this Instrument falls within the range shown in Table 2.
5. If the volume of available water falls between the values in Table 2, a reduction factor is to be applied by the storage manager which is proportional to the difference in the values.’.
