Notes on Tables 1 and 2:

- Seasonal determinations may be made in intervals of 1% by interpolation between the values shown or extrapolation below 70% (or above 100% for the losses), not just in the 10% intervals shown.
- Murray Valley and Torrumbarry have fixed losses of 63,247 GL and 50,892 GL (including 0,352 GL for Tresco) respectively, plus two variable loss components as follows:
 - for high-reliability rights, variable loss varies from zero at zero allocation, increasing linearly to 10,436 GL for Murray Valley and to 16,301 GL for Torrumbarry at an allocation of 100%;
 - for low-reliability rights, variable loss varies from zero at zero low allocation, increasing linearly to 38,033 GL for Murray Valley and to 52,034 GL for Torrumbarry at an allocation of 100% to low-reliability entitlements; and these losses may be allocated as required to deliver water carried over in these irrigation areas based on the equivalent maximum allocation in each area (calculated as the seasonal determination + carryover).
- Allocations against the 22.1 GL of high-reliability entitlement added to Table 1 in November 2009 for Snowy EWR commenced when the Lake Boga-Lake Kangaroo-Lake Charm component of the Victorian Mid-Murray Storages was first deemed by the Resource Manager to have been operated in accordance with clause 8A (which occurred on 1 April 2010).
- Broken Creek entitlements are generally supplied from the Goulburn System, including town supplies for Numurkah and Nathalia and relevant environmental entitlements, hence are not included in Tables 1 and 2, but receive Murray allocation regardless of whether they are supplied from the Murray or Goulburn System.
- The allocation to the Murray Valley and Torrumbarry losses shown may be increased up to the maximum accumulated unused loss volume available for each in order to allow for delivery of allocation carried over in these districts from the previous year.
- These tables do not show changes in water share volumes as a result of trade since 13 August 2015, or entitlements to unregulated flows in the River Murray or River Murray Increased Flows.
