The assessment must be made in the knowledge that no representation is made by the Secretary, and no member of its staff is authorised to make a representation, regarding sufficient clearance to any structure, wires, trees or rail level crossing.

The vehicle must not be driven along a route if to do so would be likely to cause:

(a) disruption to telecommunications, electricity, rail, gas, water or sewage services; or

(b) damage to a road, bridge, structure, rail level crossing or tree.

It is the responsibility of the owner and driver of a Class O vehicle to ensure that there is sufficient clearance under overhead structures and wires by contacting the relevant electricity and telecommunications authorities and that the route to be used is suitable for the safe passage of the load.

A separate support vehicle must travel with the vehicle and load if the removal of any road furniture is required. This task is not to be performed by pilot/escort vehicles.
